The first connection of the Greeks with Thrace was through colonies planted upon its various coasts, the original object of which seems generally to have been of a commercial kind. Only an approximation to the date of most of these can be made, since the majority were established long before the commencement of authentic history. Byzantium and Selymbria, colonies of Megara, belong to the seventh century B. C., the year 675 B. C. being assigned for the foundation of the former. In 651 B. C. an unsuccessful attempt is said to have been made by settlers from Clazomenae to establish themselves at Abdera (Solin. x. 10); but that city was not actually founded till 560 B. C., and then by emigrants from Teos. (Herod. i. 168.) Mesembria, on the Euxine, was a colony of the Byzantians and Chalcedonians, who abandoned their cities on the approach of the Phoenician fleet, B. C. 493. (Id. vi. 33). When Dicaea, Maronea, and Aenus, all on the south coast, were established, is not known; which is the case also with Cardia and Sestus in the Chersonesus. That these settlements were generally exposed to the hostility of their Thracian neighbours, there can be no doubt, though we rarely have their infant struggles so fully recorded as in the instance of Amphipolis. The Athenians sent no less than 10,000 men (B. C. 465) to found a colony there; and they succeeded in driving off the Edonians who occupied the country; but having advanced into the interior, they were defeated at Drabescus by the natives, and compelled to abandon the country. About thirty years afterwards, however, the Athenians returned, and this time overcame all resistance. Sometimes the relation between the Greeks and the Thracians was of a more friendly description. Thus, in the time of Peisistratus, the Dolonci, who dwelt in the Chersonesus, invited Miltiades (the elder) to rule over them, as they were unable to cope with their neighbours the Apsinthii; and this led to the Athenians obtaining a firm footing in that most important and valuable district. (Herod. vi. 34, seq.) By these various means, the Greeks had obtained possession of nearly the whole coast of Thrace, a considerable period before the commencement of the great contest between themselves and the Persian empire. Of the interior they appear to have known scarcely anything whatever; and although in some cases the surrounding barbarians may have been brought into subjection (Byzantium is said to have reduced the Bithynian Thracians to the condition of tributary perioeci), yet this was rarely the case. On the contrary, it is clear from Thucydides (ii. 97), that the Greeks sometimes paid tribute to the native kings. The Greeks, even when dwelling among hostile strangers, showed their tendency to separation rather than to union; and hence their settlements on the Thracian coast never gained the strength which union would have conferred upon them. Each city had a government and to a great extent a history of its own; and we must therefore refer the reader for information respecting those states to the separate articles in this work devoted to them.

The first Persian expedition to Thrace was that of Darius, who crossed the Bosporus with his army about B. C. 513 (or 508, as some authorities hold). As the principal object of Darius was to chastise the Scythians for their invasion of Asia in the reign of Cyaxares, he took the shortest route through Thrace, where he met with no opposition. The Greeks whom he found there were required to follow in his train to the Danube: among them was the younger Miltiades, the destined hero of Marathon, who then ruled over the Chersonesus, as his uncle had formerly done, and who had married the daughter of a Thracian king. (Herod. vi. 39.) * On returning from the north, Darius directed his march to the Hellespont, and before crossing from Sestus into Asia, erected a fort at Doriscus, near the mouth of the Hebrus. (Herod. iv. 89—93, 143, 144, vii. 59.) Megabazus was left with 80,000 men to subdue the whole of Thrace, a task which he began by besieging Perinthus, which, though previously weakened by the attacks of the Paeonians, made a brave but fruitless resistance. After this, Megabazus reduced the country into subjection, though perhaps only the districts near the sea. (Herod. v. 1, 2, 10.) That his conquests extended as far as the Strymon appears from Darius's grant of a district upon that river to Histiaeus, who founded there the town of Myrcinus. (Herod. v. 11.) Megabazus soon returned to Asia ; and it seems probable that he took with him the greater part of his army; for if the Persians had maintained a powerful force in Thrace, the Paeonians could hardly have succeeded in making their escape from Phrygia back to the Strymon (Id. v. 98), nor could the revolted Ionians (B. C. 498) have taken Byzantium and all the other cities in that country. (Id. v. 103.) It is to this period that we must refer the invasion of the Scythians, who are said to have advanced as far as the Chersonesus, thus occasioning the temporary flight of Miltiades, who, they were aware, had assisted Darius in his attack upon their country. (Id. vi. 40.)

---

* Instances occur in later times of the intermarriage of Greeks with Thracians: thus the wife of Sitalces was a daughter of Pythes, a citizen of Abdera (Thucyd. ii. 29); and Iphicrates married a daughter of the Thracian king Cotys. (Nep. *Iph.* 3.)

After the suppression of the Ionian revolt (B. C. 493), the Phoenician fleet sailed to the Hellespont, and again brought the country under the Persian dominion, Cardia being the only city which they were unable to take. (Id. vi. 33.) Miltiades made his escape from the Chersonesus to Athens, on hearing of the approach of the hostile fleet. (*Ib.* 41.)

Next year Mardonius led an army across the Hellespont, and advanced as far as Macedonia; but his fleet having been wrecked off Mount Athos, and his land forces having suffered considerably in a war with the Thracians, who then occupied the country W. of the Strymon, he retraced his steps, and transported his shattered army into Asia (Id. vi. 43, seqq.).

It was not till B. C. 480 that the vast army under the command of Xerxes crossed the Hellespont by the famous bridges which spanned the strait from Abydos to Sestus. Of his march through Thrace, Herodotus gives an interesting account (vii. 108—115); but, as he met with no opposition, we need not dwell upon these circumstances.

After the disastrous battle of Salamis, Xerxes, with an escort of 60,000 men, hastened back by the same road which he had so recently trod in all the overweening confidence of despotic power: in Thrace, his miserable troops suffered greatly from hunger and consequent disease, but do not appear to have been openly attacked. (Herod. viii. 115, seqq.)

Next year (B. C. 479) was fought the battle of Plataeae in which Thracians formed part of the motley host arrayed against Greek freedom (Id. ix. 32). Artabazus led the 40,000 men, who alone remained of the Persian army, by forced marches through Thessaly, Macedonia, and Thrace. He struck through the interior of the latter country, probably for fear of the Greek cities on the coast; but he encountered enemies as much to be dreaded, and lost a great part of his army by hunger, fatigue, and the attacks of the Thracians, before he reached Byzantium.

It was now the turn of the victorious Greeks to assail their foes in their own territories. Thrace, with the exception of Doriscus, was soon cleared of the Persians. After the battle of Mycale, their fleet sailed to the Hellespont, where the Athenians laid siege to Sestus, which was taken early in the following year (B. C. 478) [SESTUS]. Eion, at the mouth of the Strymon, made a desperate resistance; but at length (B. C. 476) fell into the hands of Cimon and the Athenians, after its Persian governor had put to death all his family, and finally himself. (Herod. vii. 107; cf. Thucyd. i. 98). Byzantium had been taken by Pausanias the year before. Thus the Persians were driven out of Europe, and the Greek settlements in Thrace resumed their internal freedom of action, though most of them, it is probable, were under the supremacy of Athens, as the chosen head of the great Greek confederacy.

During the administration of Pericles, 1000 Athenian citizens were settled in the Thracian Chersonesus, which was always the chief stronghold of Athens in that quarter. Under the auspices of the same statesman, in B. C. 437, the Athenians succeeded in founding Amphipolis, the contests for the possession of which occupy a very prominent place in the subsequent history of Greece. [AMPHIPOLIS, Vol. I. p. 126.]

About this time flourished the most powerful Thracian kingdom that ever existed, that of the Odrysae, for the history of which see ODRYSAE, Vol. II. pp. 463—465. At the commencement of the Peloponnesian War (B.C. 431), the Athenians entered into an alliance with Sitalces, the king of the Odrysae (Thucyd. ii. 29), who, they hoped, would enable them to subdue all opposition to their supremacy in the Chalcidic peninsula. In consequence of this alliance, Sitalces led (B. C. 429) a vast host into Macedonia, the ruler of which supported the enemies of Athens: he encountered no opposition, yet was compelled by want of supplies to return to Thrace, about a month after he had left it (*Ib.* 95—101). But although Sitalces was an ally of Athens, this did not prevent Brasidas from having great numbers of light-armed Thracians in his armies, while commanding the Spartan forces in the neighbourhood of Amphipolis (B. C. 422).

It would occupy too much space to relate minutely the various turns of fortune which occurred in Thrace during the Peloponnesian War. The principal struggle in this quarter was for the command of the Bosporus and Hellespont, so important, especially to the Athenians, on account of the corn trade with the Euxine, from which Athens drew a large part of her supplies. Hence many of the most important naval battles were fought in the Hellespont; and the possession of Byzantium and Sestus was the prize of many a victory. The battle of Aegospotami, which terminated the long contest for supremacy, took place to the S. of Sestus, B. C. 405. By the peace concluded next year, Athens gave up all her foreign possessions; and those in the east of Thrace fell into the hands of the Spartans and Persians. [See BYZANTIUM, SESTUS, &c.]

When the remnant of the 10,000 Greeks returned (B. C. 400) to Europe, they were engaged by Seuthes, an Odrysian prince, to assist him in recovering the dominions which had belonged to his father, in the south eastern part of Thrace. (Xen. *Anab.* vii. pass.) Having thus been reinstated in his principality, he showed his gratitude to the Greeks, by sending auxiliaries to Dercyllidas, who commanded the Spartan forces against the Persians, with whom they were now (B. C. 399) at war (Xen. *Hell.* iii. 2). Next year Dercyllidas crossed over into the Chersonesus, and erected a wall across its northern extremity, as a protection to the Greek inhabitants, who were exposed to constant attacks from their barbarous neighbours (*Ib.* 2. §§ 8—10). The same general successfully defended Sestus from the combined forces of Conon and Pharnabazus (B. C. 394: *Ib.* iv. 8. § 5, seqq.) But in B. C. 390 Thrasybulus restored Athenian influence in Thrace, by forming an alliance with two native princes, and by establishing democracy at Byzantium (*Ib.* § 25, seqq.); and his success was confirmed by the victory of Iphicrates over Anaxibius the next year (*ib.* § 34). The peace of Antalcidas, however, released all the Greek states from their connection with Athens, and virtually gave the supremacy to Sparta (B. C. 387).

Nothing of any importance happened in Thrace after this event till the accession of Philip II. to the throne of Macedonia (B. C. 359). This able but unscrupulous monarch at once began his career of aggrandisement towards the east. He contrived to get possession of Amphipolis (B. C. 358), and thus obtained a secure footing from which he might extend his dominions in Thrace as opportunity offered. At this time there were three native Thracian princes, probably brothers, who seem to have ruled over most of the country. According to Justin (viii. 3), Berisades and Amadocus, two of them, chose Philip as judge of their disputes; of which position he treacherously availed himself to seize upon their dominions. Though this statement is not supported, we believe, by any other ancient author, yet it is probably true; for such conduct is highly characteristic of the Macedonian monarch; and the almost entire disappearance from history of these Thracian princes soon after Philip's accession, would thus be accounted for. Cersobleptes, the third brother, who seems to have had the E. portion of Thrace, maintained a long struggle against his ambitious neighbour. In B. C. 357 he ceded the Chersonesus to the Athenians, who sent a colony to occupy it four years afterwards. [See CERSOBLEPTES, *Dict. Biog.* Vol. I. p. 674 : SESTUS.] Philip at various times marched into Thrace, and repeatedly defeated Cersobleptes, whom he at length (B. C. 343) completely subdued and rendered tributary. Next year he established colonies in the eastern part of Thrace, and acts of hostility occurred between him and Diopeithes, the Athenian commander in that quarter. Philip was occupied the next three years in Thrace, and laid siege to Perinthus and Byzantium, which were in alliance with Athens, whose forces, commanded by Phocion, compelled Philip to abandon the sieges; and he soon afterwards left Thrace, to advance towards the south against the confederate Greeks. On his departure Phocion recovered several of the cities in which Macedonian garrisons had been placed.

Notwithstanding these checks, Philip had brought under his command a great part of Thrace, especially on the south coast: he had, above all, completely incorporated with his kingdom the district between the Strymon and the Nestus, and from the mines of the Pangaeus, which he seized in B. C. 356, he obtained abundant supplies of the precious metals.

Philip was assassinated B. C. 336: next year his successor, Alexander the Great, marched across the Haemus to attack the Triballi; but his chief attention was bestowed upon the preparations for the Asiatic expedition, which he entered upon next year, crossing the Hellespont from Sestus.

On the death of Alexander (B. C. 323), Thrace was allotted to Lysimachus, who was soon involved in hostilities with Seuthes, a king of the Odrysae. The reader is referred to the account of Lysimachus [*Dict. Biog.* Vol. II. pp. 867—870] for details respecting his government of Thrace: the result of his various wars was that his sway was firmly established over all the countries south of the Danube, as far as the confines of Macedonia; the Greek cities on the Euxine were garrisoned by his troops; and though many of the native tribes, in the more inaccessible districts, no doubt retained their freedom, yet he had completely defeated all their attacks upon his power. In B. C. 309 he founded Lysimachia, near the northern extremity of the Chersonesus and made it his capital. Having engaged in a war with Seleucus, the ruler of Syria, he advanced to meet his antagonist in Asia, and was defeated and slain at Corupedion (B. C. 281), upon which Seleucus passed over into Europe and took possession of Thrace. Next year, however, he was assassinated by Ptolemy Ceraunus, who was thereupon acknowledged king; but shortly afterwards a vast horde of Celts invaded the country, and Ptolemy was slain in a battle with them. Anarchy now prevailed for some years in the country: the Celts again advanced to the south in B. C. 279, and under Brennus penetrated as far as Delphi, on their repulse from which they retreated northwards, and some of them settled on the coast of Thrace.

For nearly fifty years after this time little mention is made of Thrace in history; it appears to have been annexed to Macedonia; but the rulers of that kingdom were too insecure, even in their central dominions, to be able to exercise much control over such a country as Thrace, inhabited now by races differing so widely as the Thracians, the Greeks, and the Celts, and offering so many temptations to the assertion of independence. [See ANTIGONUS GONATAS, DEMETRIUS II., and PYRRHUS, in *Dict. Biog.*]

About B. C. 247, the fleet of Ptolemy Euergetes captured Lysimachia and other important cities on the coast; and they remained for nearly half a century under the kings of Egypt. (Polyb. v. 34, 58.)

In B. C. 220, Philip V. ascended the throne of Macedonia. Under him the Macedonian power regained something of its old prestige; and had it not been brought in collision with Rome, it might have become as extensive as in former times. But Philip unfortunately directed his ambitious views in the first instance towards the West, and thus soon encountered the jealous Republic. It was not till B. C. 211 that Philip commenced his enterprises against Thrace: he then led an army into the country of the Maedi, who were in the habit of making incursions into Macedonia. Their lands were laid waste, and their capital, Iamphorina, compelled to surrender. Having made peace with the Romans (B. C. 205), he invaded Thrace, and took Lysimachia. In B. C. 200, he again attacked that country, both by sea and land; and it is evident that he did not anticipate much resistance, since he took with him only 2000 infantry and 200 cavalry. Yet with this insignificant force, aided by the fleet, he made himself master of the whole of the south coast, and of the Chersonesus. He then laid siege to Abydos, and after a desperate resistance took it (Liv. xxxi. 16). This seems to have hastened the declaration of war on the part of the Romans; a war which lasted till B. C. 196, when Philip was reduced to procure peace by surrendering all his conquests, and withdrawing his garrisons from the Greek cities (Liv. xxxiii. 30). L. Stertinius was sent to see that these terms were complied with (*ib.* 35). But scarcely had the cities been evacuated by the Macedonian garrisons, when Antiochus the Great crossed the Hellespont, and took possession of the Chersonesus, which he claimed as a conquest of Seleucus (*ib.* 38). He refused to comply with the demand of the Romans, that he should withdraw his army from Europe; but left his son Seleucus to complete the restoration of Lysimachia, and to extend his influence, which seems to have been done by placing garrisons in Maroneia and Aenus.

In the war which ensued between the Romans and Antiochus (B. C. 190), Philip rendered the former good service, by providing everything necessary for their march through Thrace, and securing them from molestation by the native tribes (Liv. xxxvii. 7). Antiochus was defeated by Scipio at Magnesia, and sued for peace, which was at length granted to him (B.C. 188) on condition of his abandoning all his dominions west of the Taurus (Liv. xxxviii. 38). The Romans gave the Chersonesus and its dependencies to their ally Eumenes (*ib.* 39). As indicative of the internal condition of Thrace, even along the great southern road, the account which Livy (*ib.* 40, seq.) gives of the march of the consul Manlius' army through the country on its return from Asia Minor, is highly interesting. The army was loaded with booty, conveyed in a long train of baggage-waggons, which presented an irresistible temptation to the predatory tribes through whose territories its route lay. They accordingly attacked the army in a defile, and were not beaten off until they had succeeded in their object of sharing in the plunder of Asia.

The possession of the Chersonesus by Eumenes soon led to disagreements with Philip, who was charged by Eumenes (B.C. 185) with having seized upon Maroneia and Aenus, places which he coveted for himself. (Liv. xxxix. 24, 27). The Romans insisted upon the withdrawal of the Macedonian garrisons (B.C. 184), and Philip, sorely against his will, was obliged to obey. He wreaked his anger upon the defenceless citizens of Maroneia, by conniving at, if not actually commanding, the massacre of a great number of them (*ib.* 33, 34). In the course of the disputes about these cities, it was stated that at the end of the war with Philip, the Roman commissioner, Q. Fabius Labeo, had fixed upon the king's road, which is described as nowhere approaching the sea, as the S. boundary of Philip's possessions in Thrace; but that Philip had afterwards formed a new road, considerably to the S., and had thus included the cities and lands of the Maronitae in his territories (*ib.* 27).

In the same year, Philip undertook an expedition into the interior of Thrace, where he was fettered by no engagements with the Romans. He defeated the Thracians in a battle, and took their leader Amadocus prisoner. Before returning to Macedonia he sent envoys to the barbarians on the Danube to invite them to make an incursion into Italy (*ib.* 35). Again in B.C. 183, Philip marched against the Odrysae, Dentheletae and Bessi, took Philippopolis, which its inhabitants had abandoned at his approach, and placed a garrison in it, which the Odrysae, however, soon afterwards drove out (*ib.* 53). In B.C. 182, Philip removed nearly all the inhabitants of the coast of Macedonia into the interior, and supplied their places by Thracians and other barbarians, on whom he thought he could more safely depend in the war with the Romans, which he now saw was inevitable (Liv. xl. 3). He had done something of the same kind a few years before (Id. xxxix. 24).

Philip's ascent of the Haemus, already referred to, took place in B. C. 181: on the summit he erected altars to Jupiter and the Sun. On his way back his army plundered the Dentheletae; and in Maedica he took a town called Petra. (Liv. xl. 21, seq.)

Philip died in B. C. 179, and his successor Perseus continued the preparations which his father had made for renewing the war with Rome, which did not begin, however, till B. C. 171. The Romans had formed an alliance the year before with a number of independent Thracian tribes, who had sent ambassadors to Rome for the purpose, and who were likely to be formidable foes to Perseus. The Romans took care to send valuable presents to the principal Thracians, their ambassadors having no doubt impressed upon the senate the necessity for compliance with this national custom. (Liv. xlii. 19.)

The advantage of this alliance was soon seen. Cotys, king of the Odrysae, was an ally of Perseus, and marched with him to meet the Romans in Thessaly, but with only 1000 horse and 1000 foot, a force which shows how greatly the power of the Odrysian monarchy had declined since the reign of Sitalces (*ib.* 51). Cotys commanded all the Thracians in Perseus's army in the first engagement with the Roman cavalry, which was defeated (*ib.* 57, seq.). When Perseus retreated into Macedonia a report was brought that the Thracian allies of Rome had invaded the dominions of Cotys, whom Perseus was therefore obliged to dismiss for their protection (*ib.* 67), and he does not seem to have personally taken any further part in the war, though he probably sent part of his forces to assist Perseus (xliv. 42). His son Bitis fell into the hands of the Romans, after the battle of Pydna (B.C. 168), which put an end to the Macedonian kingdom. Cotys sent ambassadors to Rome to endeavour to ransom his son, and to excuse himself for having sided with Perseus. The senate rejected his offers of money, but liberated his son, and gave a considerable sum to each of the Thracian ambassadors. The reason it assigned for this generosity was the old friendship which had existed between Rome and Cotys and his ancestors. The Romans were evidently unwilling to engage in a war with the Thracian people at this time; and were anxious to secure friends among them for the sake of the peace of Macedonia, which, though not yet nominally made a province, was completely in their power. They sent (B. C. 167) three commissioners to conduct Bitis and the other Thracians home; and at the same time, no doubt, to make observations on the state of that country. (Liv. xlv. 42).

After the fall of Perseus, the senate divided his dominions into four districts (*regiones*), the first of which included the territory between the Strymon and the Nestus, and all the Macedonian possessions east of the latter, except Aenus, Maroneia, and Abdera: Bisaltica and Sintice, west of the Strymon, also belonged to this district, the capital of which was Amphipolis. (*Ib.* 29.) It is important to recollect that the Thrace spoken of by the Latin historians subsequently to this time does not include the territories here specified, which thenceforth constituted an integral part of Macedonia.

From the year B. C. 148, when the Romans undertook the direct government of that country, they were brought into contact with the various barbarous nations on its frontiers, and were continually at war with one or another of them. For some years, however, their chief occupation was with the Scordisci, a people of Celtic origin which had settled south of the Danube, and often made devastating incursions into the more civilised regions of the south. They are sometimes called Thracians (e. g. by Florus, iii. 4; cf. Amm. xxvii. 4. § 4), which is the less surprising when we remember that great numbers of Celts had settled in Southern Thrace, and would soon be confounded under a common name with the other occupants of the country. The history of all this period, up to the time of Augustus, is very obscure, owing to the loss of so great a part of Livy's work; enough, however, appears in other writers to show that Thrace was left almost entirely to its native rulers, the Romans rarely interfering with it except when provoked by the predatory incursions of its people into Macedonia: they then sometimes made retaliatory expeditions into Thrace; but seem generally to have made their way back as soon as the immediate object was accomplished. The relation existing between the Romans and the Thracians, for more than a century after the conquest of Macedonia, thus bears a close resemblance to that which has long existed between our own countrymen and the Caffres.

During the years B. C. 110, 109, the Consul M. Minucius Rufus was engaged in hostilities with the Scordisci and Triballi; and, according to Florus (*l. c.*), laid waste the whole valley of the Hebrus (cf. Eutr. iv. 27). In B. C. 104, Calpurnius Piso penetrated into the district of Rhodope (Flor. *l. c.*). In B. C. 92, the Maedi defeated the praetor, C. Sentius, and then ravaged Macedonia (Cic. *Pis.* 34; Liv. *Epit.* 70). After the breaking out of the Mithridatic War (B.C. 88), mention is made in several successive years of the incursions of the Thracians into the Roman provinces, and it is probable that they were acting in concert with Mithridates, whose general Taxiles, in B. C. 86, led a vast army through Thrace, and Macedonia to the assistance of Archelaus. (Liv. *Epit.* 74, 76, 81, 82). On the final defeat of Archelaus, Sulla directed his march towards Asia through Thrace B. C. 84, and, either to punish the people for their connection with Mithridates, or because they opposed his passage, made war upon them with complete success (Id. 83). C. Scribonius Curio defeated the Dardani, and penetrated to the Danube, being the first Roman who had ventured into that part of Europe (B. C. 75; Liv. *Epit.* 92; Eutr. vi. 2). Curio was succeeded as governor of Macedonia by M. Lucullus (B. C. 73), who defeated the Bessi in a pitched battle on Mount Haemus, took their capital, and ravaged the whole country between the Haemus and the Danube (Liv. *Epit.* 97; Eutr. vi. 10). The Bessi were again conquered in B. C. 60 by Octavius, the father of Augustus (Suet. *Aug.* 3; cf. *Ib.* 94; Freinsh. *Suppl.* cxxxv. 2). In the years B. C. 58, 57, Piso, so well known to us from Cicero's celebrated speech against him, was governor of Macedonia; and, if we may believe Cicero, acted in the most cruel and faithless manner towards the Bessi and other peaceable Thracian tribes. (*Pis.* 34, *de Prov. Cons.* 2, seq.). From the latter passage it appears that although Thrace was not under the government of Rome, yet the Romans claimed the right of way through it to the Hellespont; for Cicero calls the Egnatian Way "via illa nostra militaris."

In the civil war between Caesar and Pompey, several Thracian princes furnished the latter with auxiliary forces. Why they interfered in the contest, and why they preferred Pompey to Caesar, are matters of conjecture only. Pompey had been chiefly engaged all his life in the East, Caesar in the West; and that is probably sufficient to account for the greater influence of Pompey in Thrace. (Caes. *B. C.* iii. 4; Flor. iv. 2; Dion Cass. xli. 51, 63, xlvii. 25).

At the time of Caesar's death two brothers, Rhascuporis and Rascus [*Dict. Biog.* Vol. III. p. 647] ruled over the greater part of Thrace; and when the war broke out between the triumvirs and the republican party, Rhascuporis sided with the latter, while Rascus aided the former. By this plan they hoped to be safe, whichever party might be victorious; and it is said that their expectations were realised.

When the power of Rome was at length wielded by Augustus without a rival, the relation of Thrace to the Roman state seems to have become in many respects like that which the native princes of India long bore to the British. The Thracian kings were generally allowed to exercise, without restraint, their authority over their own subjects, and when needful it was supported by the arms of Rome. But all disputes among the native rulers were referred to the decision of the emperors, who disposed of the country as its acknowledged lords. These subject princes were expected to defend Thrace from external and internal foes; to assist the Romans in the field; to allow them to enlist troops, and in other ways to exercise the rights of sovereignty. For illustrations of these statements we must refer the reader to Tacitus, especially to the following passages: *Ann.* ii. 64—67, iii. 38, 39, iv. 5, 46—51. The few Thracian coins which are extant afford a proof of the dependent character of the Thracian kings; they bear on the obverse the effigy of the reigning emperor, on the reverse that of the native prince. [See *Dict. Biog.* Vol. III. p. 653.]

The interference of the Romans in the government of Thrace was not submitted to by the nation at large without several severe struggles. The most formidable of these occurred about B. C. 14, the fullest account of which is given by Dion Cassius (lib. liv.). The leader in this insurrection was Vologaesus, a Bessian priest of Bacchus, who availed himself of his sacerdotal character to inflame the religious feelings of his countrymen. Having thus assembled a large army, he attacked, defeated, and slew Rhascuporis, a king under Roman protection; his uncle, Rhoemetalces, was next assailed and compelled to flee: the insurgents pursued him as far as the Chersonesus, where they devastated the country and captured the fortified places. On receiving information of these proceedings, Augustus ordered L. Piso, the governor of Pamphylia, to transport his army into Thrace, where, after a three years' war and several reverses, he at length succeeded in subduing the Bessi, who had adopted Roman arms and discipline. They soon afterwards made a second attempt to regain their independence; but were now easily crushed. (Vell. Pat. ii. 98; Tac. *Ann.* vi. 10; Sen. *Ep.* 83; Flor. iv. 12; Liv. *Epit.* 137.)

After this war, the Romans gradually absorbed all the powers of government in the country. Germanicus visited it in A. D. 18, and introduced reforms in its administration (Tac. *Ann.* ii. 54). A system of conscription seems to have been imposed upon the Thracians about A. D. 26 (*Ib.* iv. 46). The last native prince of whom we find any mention is Rhoemetalces II., who, in A. D. 38, was made by Caligula ruler over the whole country; and at length, in the reign of Vespasian (A. D. 69—79), Thrace was reduced into the form of a province. (Suet. *Vesp.* 8; Eutr. vii. 19; cf. Tac. *Hist.* i. 11.) The date of this event has been disputed on the authority of the Eusebian Chronicle, which states that it took place in A. D. 47, in the reign of Claudius; but the statement of Suetonius is express on the point. It is possible that Rhoemetalces II. may have died about the year last mentioned; and if Claudius refused to appoint a successor to him, this would be regarded as equivalent to incorporating the country in the Roman empire, although its formal constitution as a province was delayed; as we know was commonly the case. It is remarkable that Moesia was made a province upwards of 50 years before Thrace Proper, its first propraetor being mentioned in A. D. 15. (Tac. *Ann.* i. 79; cf. *Ib.* ii. 66; Plin. iii. 26. s. 29.)

Thrace now shared in the general fortunes of the Roman world, on the division of which into the Eastern and Western Empires, it was attached to the former, being governed by the *Vicarius Thraciarum*, who was subordinate to the *Praefectus Praetorio Orientis*. Its situation rendered it extremely liable to the inroads of barbarians, and its history, so far as it is known, is little else than a record of war and devastation. The Goths made their first appearance there in A. D. 255; the emperor Probus, about A. D. 280, established in it 100,000 Bastarnae. In A. D. 314, and again in 323, the emperor Licinius was defeated at Hadrianople by Constantine, who, in A. D. 334, settled a multitude of Sarmatians in Thrace, which, in 376, received another accession to its heterogeneous population, Valens having given permission to the Goths to reside in it. This gave rise to innumerable wars, the details of which are recorded by Ammianus (lib. xxxi.). In 395 the devoted country was overrun by Alaric, and in 447 by the more dreadful Attila. Through all these misfortunes, however, Thrace remained in connection with the Eastern Empire, the capital of which was within its boundaries, until the year 1353, when the Turks, who had crossed over into Europe in 1341, obtained possession of the Thracian fortresses. Their leader Amurath conquered the whole country, except Constantinople, and made Hadrianople his capital. At length, in 1453, Constantinople itself was taken, and the Turks have ever since been the undisputed lords of Thrace.

VI. TOPOGRAPHY.— Under this head we shall merely collect such names as will serve to direct the reader to articles in this work, where fuller information is given.

Pliny (iv. 18; cf. Mela, ii. 2; Amm. xxvii. 4) enumerates the following as the principal Thracian tribes: Denseletae, Maedi, Bisaltae, Digeri, Bessi, Elethi, Diobessi, Carbilesi, Brysae, Sapaei, Odomanti, Odrysae, Cabyleti, Pyrogeri, Drugeri, Caenici, Hypsalti, Beni, Corpilli, Bottiaei, Edoni, Selletae, Priantae, Dolonci, Thyni, Coeletae. To these we may add, the Apsinthii, Bistones, Cicones, Satrae, Dii, and Trausi.

Of the towns mentioned by Pliny (*l. c.*), these belonged to Thrace Proper: 1. On the coast (i.) of the Aegean: Oesyma, Neapolis, Datum, Abdera, Tirida, Dicaea, Maronea, Zone, and Aenus; to these must be added Amphipolis, Pistyrus, Cosinthus, and Mesembria; (ii.) of the Chersonesus: Cardia, Lysimachia, Pachyta, Callipolis, Sestus, Elaeus, Coelos, Tiristasis, and Panormus; besides these there were Alopeconnesus and Agora; (iii.) of the Propontis: Bisanthe, Perinthus, and Selymbria; (iv.) of the Bosporus: Byzantium; (v.) of the Euxine: Mesembria, Anchialus, Apollonia, Thynias, Salmydessus, and Phinopolis. 2. In the interior: Philippopolis, Philippi, Scotusa, Topiris, Doriscus, Cypsela, Apros, and Develton. This is a very scanty list; but many of the principal inland towns were founded after Pliny's time: their names also were often changed. The following are some of the chief towns in the interior: Hadrianopolis, Plotinopolis, Trajanopolis, Tempyra, Nicopolis, Beroea, Iamporina, and Petra.

Besides the rivers mentioned in the course of this article, the following occur: the Bathynias, Pydaras or Atyras, Bargus, Cossinites, Compsatus, and Xerogypsus.

As to the political divisions of Thrace, Pliny (*l. c.*) states that it was divided into fifty *strategiae*; but he describes Moesia as part of Thrace. According to Ptolemy (iii. 11. § 8, seq.), its districts were Maedica, Dentheletica, Sardica, Bessica, Drosica, Bennica, Usdicesica, Selletica, Samaica, Coeletica, Sapaica, Corpiliaca, Caenica, and Astica.

Ammianus (*l. c.*) states that in the 4th century Thrace was divided into six provinces, but of these only four belonged to Thrace south of the Haemus: (i.) Thrace Proper (speciali nomine), including the W. part of the country; principal cities, Philippopolis and Beroea: (ii.) Haemimontus, i. e. the NE. district; chief towns, Hadrianopolis and Anchialus: (iii.) Europa, comprehending the SE. district; cities, Apri and Perinthus (Constantinople, being the capital of the whole Eastern Empire, was not regarded as belonging to any province): (iv.) Rhodopa, comprising the SW. region; principal cities, Maximianopolis, Maroneia, and Aenus.

The principal modern writers in whose works information will be found respecting Thrace, have been mentioned in the course of this article. Among the other authors whom the reader may consult, we may name the following: Dapper, *Beschryving der Eilanden in de Archipel*, Amst. 1688, of which Latin and French translations were published at Amsterdam in 1703. Paul Lucas, *Voyage dans la Turquie, l'Asie, &c.* 2 vols. Amst. 1720. Choiseul, *Voyage Pittoresque dans l'Empire Ottoman*: of this work the first volume was published at Paris in 1782, the first part of the second not till 1809; the author died in 1817. A new edition, with many corrections and additions, was published in 4 vols. 8vo. at Paris in 1842. This work is devoted chiefly to the antiquities of the country; of which the plates contained in the illustrative Atlas which accompanies the book give many representations. Ami Boué's, *La Turquie d'Europe*, 4 vols. 8vo. Paris, 1840, is the most complete work yet written on the subject; its author, a man of great scientific acquirements, made two journeys in Turkey, in 1836, when he was accompanied by M. Viquesnel, and in 1838. The first volume contains an elaborate account of the physical geography, geology, vegetation, fauna, and meteorology of the country; but takes little or no notice of its classical geography. A map is prefixed to it, which was a vast improvement on all that had preceded it; but it is now in its turn superseded by that of Kiepert, who has employed in its construction the materials afforded by M. Viquesnel's reports already referred to. (Comp. Gatterer, *De Herodoti ac Thucydidis Thracia*, contained in the *Commentationes Soc. Reg. Gottin.* vol. iv. pp. 87—112, vol. v. pp. 59—88. [J. R.]

THRACIA, in Asia. A district in Asia Minor on the coast of the Euxine, is sometimes called Thrace, and its inhabitants Thracians. (Herod. i. 28; Xen. *Anab.* vi. 2. § 14, et al.) This country is more commonly called Bithynia. [See BITHYNIA, Vol. I. p. 404.] [J. R.]

THRA'CIUS BO'SPORUS. [BOSPORUS.]

THRASYME'NUS LACUS [TRASIMENUS.]

THRAUSTUS (Θραύστος, Xen) or THRAESTUS (Θραιστός), a town in the mountainous district of Acroreia in Elis, of unknown site. (Xen. *Hell.* vii. 14. § 14; Diod. xiv. 17.)

THRIA. [ATTICA, p. 328, b.]

THROASCA (Θρόασκα), a place in Carmania, mentioned by Ptolemy (vi. 8. § 14). Perhaps the modern *Girost*. [V.]

THRONI (Θρόνοι), a town and promontory on the SE. coast of Cyprus, distant 700 stadia from the promontory Curias. On the promontory of Throni

Pococke observed an ancient tower. (Strab. xiv. p. 682; Ptol. v. 14. §§ 2, 3; Engel, *Kypros*, vol. i. p. 99.)

THRO'NIUM (Θρόνιον: *Eth.* Θρόνιος, Θρονίτης, Θρονιεύς). 1. The chief town of the Locri Epicnemidii, situated 20 stadia from the coast and 30 stadia from Scarpheia, upon the river Boagrius, which is described by Strabo as sometimes dry, and sometimes flowing with a stream two plethra in breadth. (Strab. ix. p 436.) It is mentioned by Homer, who speaks of it as near the river Boagrius. (*Il.* ii. 533.) It was at one time partly destroyed by an earthquake. (Strab. i. p. 60.) At the beginning of the Peloponnesian War (B.C. 431) Thronium was taken by the Athenians. (Thuc. ii. 26; Diod. xii. 44.) In the Sacred War it was taken by Onomarchus, the Phocian general, who sold its inhabitants into slavery, and hence it is called by Scylax a Phocian city. (Diod. xvi. 33; Aesch. *de Fals. Leg.* p. 45, 33; Scylax, p. 23.) (Thronium is also mentioned by Polyb. ix. 41, xvii. 9; Eurip. *Iph. Aul.* 264; Liv. xxxii. 5, 6, xxxiii. 3, xxxv. 37, xxxvi. 20; Paus. v. 22. § 4; Lycophr. 1148; Ptol. iii. 15. § 7; Plin. iv. 7. s. 12; Steph. B. *s. v.*) The site of Thronium was ascertained by Meletius who found above the village *Români*, at a place named *Paleókastro*, where some remains of the city still exist, a dedicatory inscription of the council and demus of the Thronienses. (Leake, *Northern Greece*, vol. ii. pp. 177, 178.)

2. A town in Greek Illyria in the neighbourhood of Amantia [Amantia], said to have been founded after the Trojan War by the Abantes of Euboea and the inhabitants of the Locrian Thronium. It was taken at an early period by the inhabitants of the neighbouring town of Apollonia, and annexed to their territory, as appears from an epigram inscribed on a dedicatory offering of the Apolloniatae at Olympia. (Paus. v. 22. §§ 3, 4.)

THRYON, THRYOESSA. [Epitalium.]

THULE (Θούλη, Ptol. ii. 6. § 32), a celebrated island in the Northern Ocean, discovered by the navigator Pytheas. Pytheas arrived at it after a voyage of six days from the Orcades, in which it may be computed that he had accomplished about 3000 stadia. (Plin. ii. 77.) According to the account of Pytheas, he reached the polar circle, so that on this island the longest day was twenty-four hours, and there was constant day during the six summer months and constant night during the six winter ones. It was deficient in animals, and even the most necessary fruits, but produced a little corn. From the time of its discovery it was regarded as the most northerly point of the known world, although no further knowledge was obtained respecting it; and this view seems to be confirmed by its name, since in Gothic *Tiel* or *Tiule* (τέλος, *goal*) denoted the remotest land. (Strab. i. p. 63, ii. pp. 104, 114, iv. p. 201; Agath. i. 8; Prisc. *Perieg.* 587, sqq.; Mela, iii. 6; Plin. iv. 16. s. 30; Tac. *Agr.* 10; Virg. *G.* i. 30; Solin. c. 22, &c.; cf. Praetorius, *de Orbe Goth.* iii. 4. 3. p. 33; D'Anville, *Sur la Navig. de Pytheas*, p. 439; Rudbeck, *Atlant.* i. p. 514.) Ptolemy is the only writer who places Thule a great deal further S., though he undoubtedly had in view the island discovered by Pytheas; and according to him it would seem to have been the largest of the Shetland islands, or the modern *Mainland* (see ii. 3. § 32, i. 24. §§ 4, 6, 17, 20, vi. 16. § 21, vii. 5. § 12, viii. 3. § 3). Most modern geographers incline to the opinion that Pytheas meant *Iceland*; though according to others his Thule is to be variously sought in *Norway*; in that part called *Thile* or *Thilemark*; in *Jutland*, the extreme point of which is called *Thy* or *Thyland;* or in the *whole Scandinavian peninsula* (Malte-Brun, *Geogr. Univ.* i. p. 120; Ortelius, *Theatr. Orb.* p. 103.) [T. H. D.]

THUMATA (Θουμάτα, Ptol. vi. 7. § 33; Plin. vi. 28. s. 32; Thamatha, *Not. Imp. Rom.* § 22, p. 37), a town of Arabia Felix, according to Ptolemy, and described by Pliny as distant 10 days' sail from Petra, and subject to the king of the Characeni.

THUMNA. [Tamna.]

THUNU'DROMON (Θουνούδρομον, Ptol. iv. 3. § 29), a Roman colony in Numidia. It seems to be the same place as the Tynidrumense oppidum of Pliny (v. 4. s. 4). [T. H. D.]

THU'RIA (Θουρία: *Eth.* Θουριάτης), a town of Messenia, situated in the eastern part of the southern Messenian plain, upon the river Aris (*Pídhima*), and at the distance of 80 stadia from Pharae, which was about a mile from the coast (Paus. iv. 31. § 1). It was generally identified with the Homeric Antheia, though others supposed it to be Aepeia. (Paus. *l. c.*; Strab. viii. p. 360.) It must have been a place of considerable importance, since the distant Messenian gulf was even named after it (ὁ Θουριάτης κόλπος, Strab. *l. c.*). It was also one of the chief towns of the Lacedaemonian Perioeci after the subjugation of Messenia; and it was here that the Third Messenian War took its rise, B. C. 464 (Thuc. i. 101). On the restoration of the Messenians by Epaminondas, Thuria, like the other towns in the country, was dependent upon the newly-founded capital Messene; but after the capture of this city by the Achaeans in B. C. 182, Thuria, Pharae, and Abia joined the Achaean League as independent members. (Polyb. xxv. 1.) Thuria was annexed to Laconia by Augustus (Paus. *l. c.*); but it was restored to Messenia by Tiberius. [Messenia, p. 345, a.] Pausanias found two cities of this name. The Thuriatae had descended from the summit of the lofty hill of the upper city to dwell upon the plain; but without abandoning altogether the upper city, where a temple of the Syrian goddess still stood within the town walls (Paus. iv. 31. § 2). There are considerable remains of both places. Those of Upper Thuria are on the hill of the village called *Paleókastro*, divided from the range of mountains named *Makrypláï* by a deep ravine and torrent, and which commands a fine view of the plain and gulf. The remains of the walls extend half a mile along the summit of the hill. Nearly in the centre of the ruins is a quadrangular cistern, 10 or 12 feet deep, cut out of the rock at one end, and on the other side constructed of masonry. The cistern was divided into three parts by two cross walls. Its whole length is 29 paces; the breadth half as much. On the highest part of the ridge there are numerous ruins, among which are those of a small Doric temple, of a hard brown calcareous stone, in which are cockle and muscle shells, extremely perfect. In the plain at *Paleá Lutra* are the ruins of a large Roman building, standing in the middle of fig and mulberry grounds. Leake observes that "it is in an uncommon state of preservation, part even of the roof still remaining. The walls are 17 feet high, formed of equal courses of Roman tiles and mortar. The roof is of rubble mixed with cement. The plan does not seem to be that of a bath only, as the name would imply, though there are many appearances of the building having contained baths: it seems rather to have been the palace of some Roman governor. As there are no sources of water here, it is to be supposed that the building was supplied by an aqueduct from the neighbouring river of *Pídhima*." (Leake, *Morea*, vol. i. pp. 354, seq. 360; Boblaye, *Recherches*, *&c.* p. 105; Ross, *Reisen im Peloponnes*, p. 2; Curtius, *Peloponnesos*, vol. ii. p. 161.)

THU'RII (Θούριοι: *Eth.* Θουρῖνος, Thurinus), called also by some Latin writers and by Ptolemy Thurium (Θούριον, Ptol.), a city of Magna Graecia, situated on the Tarentine gulf, within a short distance of the site of Sybaris, of which it may be considered as having taken the place. It was one of the latest of all the Greek colonies in this part of Italy, not having been founded till nearly 70 years after the fall of Sybaris. The site of that city had remained desolate for a period of 58 years after its destruction by the Crotoniats [Sybaris]; when at length, in B.C. 452, a number of the Sybarite exiles and their descendants made an attempt to establish themselves again on the spot, under the guidance of some leaders of Thessalian origin; and the new colony rose so rapidly to prosperity that it excited the jealousy of the Crotoniats, who, in consequence, expelled the new settlers a little more than 5 years after the establishment of the colony. (Diod. xi. 90, xii. 10.) The fugitive Sybarites first appealed for support to Sparta, but without success: their application to the Athenians was more successful, and that people determined to send out a fresh colony, at the same time that they reinstated the settlers who had been lately expelled from thence. A body of Athenian colonists was accordingly sent out by Pericles, under the command of Lampon and Xenocritus; but the number of Athenian citizens was small, the greater part of those who took part in the colony being collected from various parts of Greece. Among them were two celebrated names,—Herodotus the historian, and the orator Lysias, both of whom appear to have formed part of the original colony. (Diod. xii. 10; Strab. vi. p. 263; Dionys. *Lys.* p. 453; *Vit. X. Orat.* p. 835; Plut. *Peric.* 11, *Nic.* 5.) The new colonists at first established themselves on the site of the deserted Sybaris, but shortly afterwards removed (apparently in obedience to an oracle) to a spot at a short distance from thence, where there was a fountain named Thuria, from whence the new city derived its name of Thurii. (Diod. *l. c.*; Strab. *l. c.*) The foundation of Thurii is assigned by Diodorus to the year 446 B. C.; but other authorities place it three years later, B. C. 443, and this seems to be the best authenticated date. (Clinton, *F. H.* vol. ii. p. 54.) The protection of the Athenian name probably secured the rising colony from the assaults of the Crotoniats, at least we hear nothing of any obstacles to its progress from that quarter; but it was early disturbed by dissensions between the descendants of the original Sybarite settlers and the new colonists, the former laying claim not only to honorary distinctions, but to the exclusive possession of important political privileges. These disputes at length ended in a revolution, and the Sybarites were finally expelled from the city. They established themselves for a short time upon the river Traens, but did not maintain their footing long, being dislodged and finally dispersed by the neighbouring barbarians. (Diod. xii. 11, 22; Arist. *Pol.* v. 3.) The Thurians meanwhile concluded a treaty of peace with Crotona, and the new city rose rapidly to prosperity. Fresh colonists poured in from all quarters, especially the Peloponnese; and though it continued to be generally regarded as an Athenian colony, the Athenians in fact formed but a small element of the population. The citizens were divided, as we learn from Diodorus, into ten tribes, the names of which sufficiently indicate their origin. They were,—the Arcadian, Achaean, Elean, Boeotian, Amphictyonic, Dorian, Ionian, Athenian, Euboean, and Nesiotic, or that of the islanders. (Diod. xii. 11.) The form of government was democratic, and the city is said to have enjoyed the advantage of a well-ordered system of laws; but the statement of Diodorus, who represents this as owing to the legislation of Charondas, and that lawgiver himself as a citizen of Thurii, is certainly erroneous. [*Dict. of Biogr.* art. Charondas.] The city itself was laid out with great regularity, being divided by four broad streets or "plateae," each of which was crossed in like manner by three others. (Diod. xii. 10.)

Very shortly after its foundation, Thurii became involved in a war with Tarentum. The subject of this was the possession of the fertile district of the Siritis, about 30 miles N. of Thurii, to which the Athenians had a claim of long standing [Siris], which was naturally taken up by their colonists. The Spartan general, Cleandridas, who had been banished from Greece some years before, and taken up his abode at Thurii, became the general of the Thurians in this war, which, after various successes, was at length terminated by a compromise, both parties agreeing to the foundation of the new colony of Heracleia in the disputed territory. (Diod. xii. 23, 36, xiii. 106; Strab. vi. p. 264; Polyaen. *Strat.* ii. 10.) [Heracleia.] Our knowledge of the history of Thurii is unfortunately very scanty and fragmentary. Fresh disputes arising between the Athenian citizens and the other colonists were at length allayed by the oracle of Delphi, which decided that the city had no other founder than Apollo. (Diod. xii. 35.) But the same difference appears again on occasion of the great Athenian expedition to Sicily, when the city was divided into two parties, the one desirous of favouring and supporting the Athenians, the other opposed to them. The latter faction at first prevailed, so far that the Thurians observed the same neutrality towards the Athenian fleet under Nicias and Alcibiades as the other cities of Italy (Thuc. vi. 44); but two years afterwards (B. C. 213) the Athenian party had regained the ascendency; and when Demosthenes and Eurymedon touched at Thurii, the citizens afforded them every assistance, and even furnished an auxiliary force of 700 hoplites and 300 dartmen. (Id. vii. 33, 35.) From this time we hear nothing of Thurii for a period of more than 20 years, though there is reason to believe that this was just the time of its greatest prosperity. In B. C. 390 we find that its territory was already beginning to suffer from the incursions of the Lucanians, a new and formidable enemy, for protection against whom all the cities of Magna Graecia had entered into a defensive league. But the Thurians were too impatient to wait for the support of their allies, and issued forth with an army of 14,000 foot and 1000 horse, with which they repulsed the attacks of the Lucanians; but having rashly followed them into their own territory, they were totally defeated, near Laüs, and above 10,000 of them cut to pieces (Diod. xiv. 101).

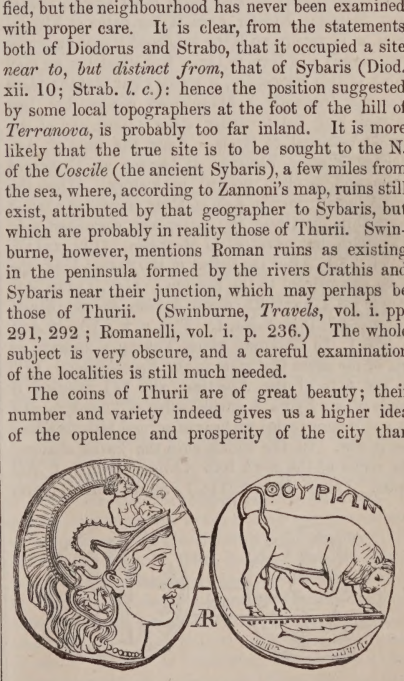
This defeat must have inflicted a severe blow on the prosperity of Thurii, while the continually increasing power of the Lucanians and Bruttians, in their immediate neighbourhood would prevent them from quickly recovering from its effects. The city continued also to be on hostile, or at least unfriendly, terms with Dionysius of Syracuse, and was in consequence chosen as a place of retirement or exile by his brother Leptines and his friend Philistus (Diod. xv. 7). The rise of the Bruttian people about B. C. 356 probably became the cause of the complete decline of Thurii, but the statement of Diodorus that the city was *conquered* by that people (xvi. 15) must be received with considerable doubt. It is certain at least that it reappears in history at a later period as an independent Greek city, though much fallen from its former greatness. No mention of it is found during the wars of Alexander of Epirus in this part of Italy; but at a later period it was so hard pressed by the Lucanians that it had recourse to the alliance of Rome; and a Roman army was sent to its relief under C. Fabricius. That general defeated the Lucanians, who had actually laid siege to the city, in a pitched battle, and by several other successes to a great extent broke their power, and thus relieved the Thurians from all immediate danger from that quarter. (Liv. *Epit.* xi.; Plin. xxxiv. 6. s. 15; Val. Max. i. 8. § 6.) But shortly after they were attacked on the other side by the Tarentines, who are said to have taken and plundered their city (Appian, *Samn.* 7. § 1); and this aggression was one of the immediate causes of the war declared by the Romans against Tarentum in B. C. 282.

Thurii now sunk completely into the condition of a dependent ally of Rome, and was protected by a Roman garrison. No mention is found of its name during the wars with Pyrrhus or the First Punic War, but it plays a considerable part in that with Hannibal. It was apparently one of the cities which revolted to the Carthaginians immediately after the battle of Cannae, though, in another passage, Livy seems to place its defection somewhat later. (Liv. xxii. 61, xxv. 1.) But in B. C. 213, the Thurians returned to their alliance with Rome, and received a Roman garrison into their city. (Id. xxv. 1.) The very next year, however, after the fall of Tarentum, they changed sides again, and betrayed the Roman troops into the hands of the Carthaginian general Hanno. (Id. xxv. 15; Appian, *Hann.* 34.) A few years later (B. C. 210), Hannibal, finding himself unable to protect his allies in Campania, removed the inhabitants of Atella who had survived the fall of their city to Thurii (Appian, *Hann.* 49); but it was not long before he was compelled to abandon the latter city also to its fate; and when he himself in B. C. 204 withdrew his forces into Bruttium, he removed to Crotona 3500 of the principal citizens of Thurii, while he gave up the city itself to the plunder of his troops. (Appian, *l. c.* 57.) It is evident that Thurii was now sunk to the lowest state of decay; but the great fertility of its territory rendered it desirable to preserve it from utter desolation: hence in B. C. 194, it was one of the places selected for the establishment of a Roman colony with Latin rights. (Liv. xxxiv. 53; Strab. vi. p. 263.) The number of colonists was small in proportion to the extent of land to be divided among them, but they amounted to 3000 foot and 300 knights. (Liv. xxxv. 9.) Livy says merely that the colony was sent "in Thurinum agrum," and does not mention anything of a change of name; but Strabo tells us that they gave to the new colony the name of COPIAE, and this statement is confirmed both by Stephanus of Byzantium, and by the evidence of coins, on which, however, the name is written COPIA. (Strab. *l. c.*; Steph. Byz. *s. v.* Θούριοι; Eckhel, vol. i. p. 164.) But this new name did not continue long in use, and Thurii still continued to be known by its ancient appellation. It is mentioned as a municipal town on several occasions during the latter ages of the Republic. In B. C. 72 it was taken by Spartacus, and subjected to heavy contributions, but not otherwise injured. (Appian, *B. C.* i. 117.) At the outbreak of the Civil Wars it was deemed by Caesar of sufficient importance to be secured with a garrison of Gaulish and Spanish horse; and it was there that M. Coelius was put to death, after a vain attempt to excite an insurrection in this part of Italy. (Caes. *B. C.* iii. 21, 22.) In B. C. 40 also it was attacked by Sextus Pompeius, who laid waste its territory, but was repulsed from the walls of the city. (Appian, *B. C.* v. 56, 58.)

It is certain therefore that Thurii was at this time still a place of some importance, and it is mentioned as a still existing town by Pliny and Ptolemy, as well as Strabo. (Strab. vi. p. 263; Plin. iii. 11. s. 15; Ptol. iii. 1. § 12.) It was probably, indeed, the only place of any consideration remaining on the coast of the Tarentine gulf, between Crotona and Tarentum; both Metapontum and Heraclea having already fallen into almost complete decay. Its name is still found in the Itineraries (*Itin. Ant.* p. 114, where it is written "Turios;" *Tab. Peut.*); and it is noticed by Procopius as still existing in the 6th century. (Procop. *B. G.* i. 15.) The period of its final decay is uncertain; but it seems to have been abandoned during the middle ages, when the inhabitants took refuge at a place called *Terranova*, about 12 miles inland, on a hill on the left bank of the Crathis.

The exact site of Thurii has not yet been identified, but the neighbourhood has never been examined with proper care. It is clear, from the statements both of Diodorus and Strabo, that it occupied a site *near to, but distinct from*, that of Sybaris (Diod. xii. 10; Strab. *l. c.*): hence the position suggested by some local topographers at the foot of the hill of *Terranova*, is probably too far inland. It is more likely that the true site is to be sought to the N. of the *Coscile* (the ancient Sybaris), a few miles from the sea, where, according to Zannoni's map, ruins still exist, attributed by that geographer to Sybaris, but which are probably in reality those of Thurii. Swinburne, however, mentions Roman ruins as existing in the peninsula formed by the rivers Crathis and Sybaris near their junction, which may perhaps be those of Thurii. (Swinburne, *Travels*, vol. i. pp. 291, 292; Romanelli, vol. i. p. 236.) The whole subject is very obscure, and a careful examination of the localities is still much needed.

The coins of Thurii are of great beauty; their number and variety indeed gives us a higher idea of the opulence and prosperity of the city than



COIN OF THURII.

we should gather from the statements of ancient writers. [E. H. B.]

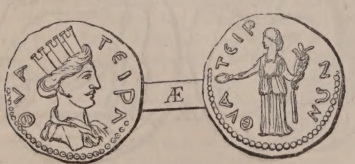
THU'RIUM. [Boeotia, p. 412, b.]

THYA'MIA. [Phlius, p. 602, b.]

THY'AMIS (Θύαμις), a river of Epeirus, flowing into the sea near a promontory of the same name. (Ptol. iii. 14. §§ 4, 5.) It formed the northern boundary of Thesprotia, which it separated from Cestrine, a district of Chaonia (Thuc. i. 46; Strab. vii. p. 324; Paus. i. 11. § 2; Cic. *ad Att.* vii. 2, *de Leg.* ii. 3; Plin. iv. 1.) It is now called *Kalamá*, apparently from the large reeds and aquatic plants which grow upon one of its principal tributaries. Its ancient name seems to have been derived from the ϑύα or juniper, which, Leake informs us, though not abundant near the sources of the river, is common in the woody hills which border the middle of its course. The historian Phylarchus related (*ap. Athen.* iii. p. 73) that the Egyptian bean, which grew only in marshy places and nowhere but in Egypt, once grew for a short time upon the banks of the Thyamis. (Leake, *Northern Greece*, vol. i. p. 103, vol. iv. p. 97.)

THY'AMUS (Θύαμος), a mountain lying to the S. of Argos Amphilochicum, identified by Leake with *Spartovúni*. (Thuc. iii. 106; Leake, *Northern Greece*, vol. iv. p. 251.)

THYATEIRA (τὰ Θυάτειρα: *Eth.* Θυατειρηνός), a considerable city in the north of Lydia, on the river Lycus, and on the road leading from Sardes in the south to Germa in the north. It was anciently called Pelopeia, Euhippa, and Semiramis. (Plin. v. 31; Steph. B. *s. v.* Θυάτειρα.) Strabo (xiii. p. 625) calls it a Macedonian colony, which probably means only that during the Macedonian period it was increased and embellished, for Stephanus B., admitting that it previously existed under other names, relates that Seleucus Nicator gave it the name of Thygateira or Thyateira on being informed that a daughter (Θυγάτηρ) was born to him. But whatever we may think of this etymology, it seems clear that the place was not originally a Macedonian colony, but had existed long before under other names, and at one period belonged to Mysia. After the time of Antiochus Nicator, however, it became an important place, and is often noticed in history. When the two Scipios arrived in Asia on their expedition against Antiochus the Great, the latter was encamped near Thyateira, but retreated to Magnesia. (Liv. xxxvii. 8, 21, 37.) After the defeat of the Syrian king, the town surrendered to the Romans. (Liv. xxxvii. 44; Polyb. xvi. 1, xxxii. 25; comp. Appian, *Syr.* 30; Strab. xiii. p. 646; Plut. *Sulla*, 15; Ptol. v. 2. § 16; *It. Ant.* p. 336.) In Christian times Thyateira appears as one of the seven Churches in the Apocalypse (ii. 18); in the Acts of the Apostles (xvi. 14) mention is made of one Lydia, a purple-seller of Thyateira, and at a still later period we hear of several bishops whose see it was. In the middle ages the Turks changed the name of the town into *Akhissar*, which it still bears. (Mich. Duc. p. 114.) Sir C. Fellows (*Asia Min.* p. 22), who calls the modern place *Aksa*, states that it teems with relics of an ancient splendid city, although he could not discover a trace of the site of any ruin or early building. These relics consist chiefly of fragments of pillars, many of which have been changed into well-tops or troughs. (Comp. Arundell, *Seven Churches*, p. 188, foll.; Wheeler and Spon, vol. i. p. 253; Lucas, *Troisième Voy.* p. 192, &c.; Prokesch, *Denkwürdigkeiten*, iii. p. 60, foll.) [L. S.]



COIN OF THYATEIRA.

THYIA (Θυιά), a place in Phocis, where the Delphians erected an altar to the winds, derived its name from Thyia, a daughter of Cephissus or Castalius, and the mother of Delphus by Apollo. (Herod. vii. 178; *Dict. of Biogr.* art. Thyia.)

THYMBRA (Θύμϐρη or Θύμϐρα), a town of Troas, in the vicinity of Ilium. (Hom. *Il.* x. 430; Steph. B. *s. v.*; Plin. v. 33.) Strabo (xiii. p. 598) speaks of it only as a plain traversed by the river Thymbrius. The valley of Thymbra and the hill in it, called Callicolone (Hom. *Il.* xx. 53, 151; Strab. *l. c.*), are said still to retain their ancient names. (Prokesch, *Denkwürdigkeiten*, i. p. 145, foll.) The town of Thymbra must have perished at an early period; but its name remained celebrated in religion, for Apollo, who had had a temple at Thymbra, is frequently called Thymbraeus (Θυμϐραῖος; Virg. *Aen.* iii. 85; Eurip. *Rhesus*, 224; Steph. B. *s. v.* Θύμϐρα). [L. S.]

THYMBRARA (Θύμϐραρα), a place near Sardes, not far from the small river Pactolus, at which the contingents of the Persian army furnished by the inhabitants of Asia Minor used to assemble. (Xen. *Cyrop.* vi. 2. § 11, vii. 1. § 45; Steph. B. *s. v.*) Some are inclined to identify this place with Thybarna, mentioned by Diodorus Siculus (xiv. 80); but this latter place could hardly be said to be situated on, or even near the Pactolus. [L. S.]

THYMBRES, a tributary of the Sangarius in Phrygia (Liv. xxxviii. 18), is no doubt the same as the Tembrogius of Pliny (vi. 1) and the Timbrius in the Argonautica bearing the name of Orpheus (713), where the river is described as abounding in fish. [L. S.]

THY'MBRIA (Θυμϐρία), a small town of Caria, only 4 stadia east of Myus on the banks of the Maeander; in its neighbourhood there was a so-called Charonium, or cave from which poisonous vapours issued. (Strab. xiv. p. 636.) [L. S.]

THY'MBRIUM (Θύμϐριον: *Eth.* Thymbrianus), a town of Phrygia, at a distance of 10 parasangs to the west of Tyriaeum (Xenoph. *Anab.* i. 2. § 13; Hierocl. p. 673; *Conc. Constant.* iii. p. 505.) Vibius Sequester (p. 25. ed. Oberlin) mentions a forest Thymbra in Phrygia, which seems to have been near the town of Thymbrium. [L. S.]

THY'MBRIUS (Θύμϐριος), a small river of Troas in the neighbourhood of Ilium; it was a tributary of the Scamander, and on its banks stood the town of Thymbra (Strab. xiii. p. 598; Eustath. *ad Hom. Il.* x. 430.) There still exists in that district a small river called *Timbrek*, which, however, does not flow into the Scamander, but into a bay of the sea; if this be the ancient Thymbrius, the plain of Thymbra must have been at a considerable distance from Ilium. For this reason, Col. Leake is inclined to identify the Thymbrius rather with the *Kamara Su*, which still is a tributary of the Scamander or *Mendere Su* (*Asia Minor*, p. 289.) [L. S.]

THYME'NA (Θύμηνα), a place on the coast of Paphlagonia, at a distance of 90 stadia from Aegialus. (Arrian, *Peripl. P. E.* p. 15; Anonym. *Peripl. P. E.* p. 6.) Ptolemy (v. 4. § 2) mentions it under the name of Thymaena, and states that it was also called Teuthrania. [L. S.]

THYMIATE'RION (*Θυμιατήριον*, Hanno, *Peripl.* p. 2), called by Scylax (p. 23) *Θυμιατηρίας*, the first Carthaginian colony planted by Hanno on the west coast of Mauretania, 26 miles south-west of Lixus, on the Sinus Emporicus. There is no further mention of it. It has been variously identified with *Marmora, Larache*, and *Tangier*, but perhaps most correctly with the first. [T. H. D.]

THY'MNIAS, a bay on the south-west coast of Caria, on the south-west of the bay of Schoenus, and between Capes Aphrodisium and Posidium. (Pomp Mela, i. 16; Plin. v. 29.) [L. S.]

THYMOETADAE. [Attica, p. 325, b.]

THYNI (Plin. iv. 11. s. 18, v. 32. s. 43 ; *Θυνοί*, Herod. i. 28), a people in the SE. part of Thrace, between the Agrianes and the mountains which separate its head-waters from the Euxine. At a very early period, a portion of the tribe, along with the related race of the Bithyni, emigrated to Asia Minor, where they occupied the district afterwards called Bithynia; but part of which seems originally to have been named more directly from the Thyni, since we find the names *Θυνιακὴ Θρᾴκη* (Memnon. *c.* 18), *Θυνιάς* (Scymn. 727, and 236), *Θυνία* (Steph. B. p. 315), and Thynia (Amm. xxii. 8. § 14). Respecting the Asiatic Thyni, see also Strabo, vii. p. 295, xii. p. 541; and the article Bithynia.

Of the Thyni who remained in Europe scarcely any notice is taken by the ancient historians. When Xenophon and the remnant of the 10,000 Greeks entered the service of Seuthes, one expedition in which they were employed had for its object the subjugation of the Thyni, who were said to have defeated Teres, an ancestor of Seuthes (*Anab.* vii. 2. § 22). Xenophon gives them the somewhat equivocal character of being the most warlike of all people, especially by night: and he had personal experience of their fondness for nocturnal fighting; for, having encamped in their villages at the foot of the mountains, to which the Thyni had retired on the approach of Seuthes and his forces, he was attacked by them on the next night, and narrowly escaped being burnt to death in the house in which he had taken up his quarters (*Ib.* 4. § 14, seq.). But this attack having failed, the Thyni again fled to the mountains, and soon afterwards submitted to Seuthes. Xenophon visited the country of the Thyni in the winter (*Ib.* 6. § 31), which he describes as being extremely severe, there being deep snow on the ground, and so low a temperature, that not only water, but even wine in the vessels was frozen ; and many of the Greeks lost noses and ears through frostbite. (*Ib.* 4. § 3.) [J. R.]

THY'NIAS (*Θυνίας*), a small island in the Euxine at a distance of one mile from the coast of Thynia or Bithynia; its distance from the port of Rhoë was 20 stadia, and from Calpe 40. (Plin. vi. 13; Arrian, *Peripl. P. E.* p. 13.) The island had only 7 stadia in circumference, and had at first been called Apollonia from a temple of Apollo which existed in it. (Plin., Arrian, *ll. cc.*; Apollon. Rhod. ii. 177, 675; Anon. *Peripl. P. E.* p. 3.) According to Ptolemy (v. 1. § 15) it was also called Daphnusia, and obtained its name of Thynias from the Thyni, who inhabited the opposite coast. The island had a port and a naval station belonging to Heracleia (Scylax, p. 34; Arrian, *l. c.*); and Mela (ii. 7) is probably mistaken in believing that the island contained a town of the same name. (Comp. Strab. xii. p. 543, where it is called Thynia; Marcian, p. 69; Steph. B. *s. v.*; Orph. *Argon.* 717, where it bears the name Thyneis.) The modern name of the island is *Kirpeh.* [L. S.]

THY'NIAS (Mela ii. 2. § 5; Plin. iv. 11. s. 18; *Θυνίας*, Strabo vii. p. 319, xii. p. 541 : Scymn. 727; Arrian. *Per. P. Eux.* p. 24; Anon. *Per. P. Eux.* p. 15; Ptol. iii. 11. § 4; Steph. B. *s. v.*), a promontory on the Thracian coast of the Euxine, N. of Salmydessus, which was probably at one time in the territories of the Thyni, although Strabo (vii. p. 319) speaks of the district as belonging to the people of Apollonia. Pliny (*l. c.*) mentions a town of the same name, which in some maps is placed a little to the south of the promontory, on the site of the modern *Inada* or *Iniada;* but which, according to Dapper (*de l'Archip.* p. 515), is still called *Thinno.* [J. R.]

THYNOS or TYNOS, a town mentioned only by Pliny (v. 22) as situated between Mopsus and Zephyrium in Cilicia. [L. S.]

THYRAEUM (*Θυραῖον*: *Eth.* *Θυραῖος*), a town of Arcadia in the district Cynuria, said to have been founded by Thyraeus, a son of Lycaon. It is placed by Leake at *Palamári.* (Paus. viii. 3. § 3, 35. § 7; Steph. B. *s. v.*; Leake, *Peloponnesiaca*, p. 240.)

THYRAEUM. [Megalopolis, p. 310, a.]

THY'REA, THYREA'TIS. [Cynuria.]

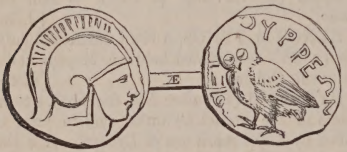
THYREA'TES SINUS. [Cynuria, p. 727, a.]

THYREUM. [Thyrium.]

THYRGO'NIDAE. [Attica, p. 330, a,]

THYRIDES (*Θυρίδες*), a promontory of Laconia, on the western coast of the Taÿgetic peninsula, now called *Cape Grosso.* It is of a semicircular form, nearly 7 miles in circumference, and rises from the sea to the height of 700 feet. There are many apertures and clefts in the rocks, the abodes of innumerable pigeons, and from the window-like form of these holes the whole promontory has received the name of Thyrides. Strabo describes it as a *ῥοώδης κρημνὸς*, "a precipitous cape beaten by the winds," distant 130 stadia from Taenarum (reckoning from the northern point of Thyrides) ; Pausanias, as a promontory (*ἄκρα*), situated 70 stadia from Taenarum (reckoning from the southern point of the promontory). Pausanias likewise calls it a promontory of Taenarum, using the latter word in its widest sense, to signify the whole peninsula of *Mani.* According to Strabo, the Messenian gulf terminated at this promontory. Pliny (iv. 12. s. 56) mentions three islands of the name of Thyrides in the Asinaean gulf. (Paus. iii. 25. § 9; Strab. viii. pp. 360, 362; Leake, *Morea*, vol. i. p. 302, seq.; Boblaye, *Recherches, &c.* p. 91; Curtius, *Peloponnesos*, vol. ii. p. 281.)

THY'RIUM, or THY'REUM (*Θύριον*, Pol. iv. 25; *Θύρεον*, Pol. iv. 6; *Θούριον*, Pol. xxviii. 5; *Θύῤῥειον*, Anth. Graec. ix. 553: *Eth.* *Θυριεύς*, Thyriensis), a city in Acarnania, the exact site of which is unknown. It placed by Pouqueville in the interior near the sources of the Anapus; and his authority is followed by K. O. Müller and others. This, however, is evidently a mistake. Cicero tells us (*ad Fam.* xvi. 5) that in sailing from Alyzia to Leucas, he touched at Thyrium, where he remained two hours; and from this statement, as well as from the history of the events in which Thyrium is mentioned, we may infer that it was situated on or near the Ionian sea, and that it was the first town on the coast S. of the canal which separated Leucas from the mainland. It is placed by Leake in the plain of *Zavérdha*, but no ruins of it have been discovered. Its name does not occur in Strabo. Thyrium is first mentioned in B. C. 373, when its territory was invaded by Iphicrates. (Xen. *Hell.* vi. 2. § 37.) Xenophon describes it as a place of importance; and it appears as one of the chief cities of Acarnania at the time of the Roman wars in Greece, when its name frequently occurs. At this period Thyrium was one of the places at which the meetings of the Acarnanian League were usually held. [ACARNANIA.] It was one of the many towns whose ruin was occasioned by the foundation of NICOPOLIS, to which its inhabitants were removed by order of Augustus. (Pol. iv. 6, 25, xvii. 10, xxii. 12, xxviii. 5; Liv. xxxvi. 11, 12, xxxviii. 9, xliii. 17; Anth. Graec. *l. c.*; Leake, *Northern Greece*, vol. iv. p. 16.)



COIN OF THYRIUM.

THYRSUS or TYRSUS (*Θύρσος ποταμός*, Ptol.; *Θόρσος*, Paus.: *Tirso*), the most considerable river of Sardinia, which still retains its ancient name almost unaltered. It has its sources in the mountains in the NE. corner of the island, and flows into the *Gulf of Oristano* on the W. coast, after a course of above 75 miles. About 20 miles from its mouth it flowed past Forum Trajani, the ruins of which are still visible at *Fordungianus;* and about 36 miles higher up are the *Bagni di Benetutti*, supposed to be the Aquae Lesitanae of Ptolemy. The Itineraries give a station "ad Caput Tyrsi" (*Itin. Ant.* p. 81), which was 40 M.P. from Olbia by a rugged mountain road: it must have been near the village of *Budusò*. (De la Marmora, *Voy. en Sardaigne*, vol. ii. p. 445.) Pausanias tells us that in early times the Thyrsus was the boundary between the part of the island occupied by the Greeks and Trojans and that which still remained in the hands of the native barbarians. (Paus. x. 17. § 6.) [E. H. B.]

THYSDRUS (*Θύσδρος*, Ptol. iv. 3. § 39), the oppidum Tusdritanum or Thysdritanum of Pliny (v. 4. s. 4), a city of Byzacium, in the Roman province of Africa, lying midway between Thenae and Thapsus, and west of the promontory Brachodes. It was here that the emperor Gordianus first set up the standard of rebellion against Maximin (Herodian. vii. 4, seq.; Capitol. *Gord.* c. 7, seq.), and it was from him, probably, that it derived its title of a Roman colony. We find the name variously written, as Tusdra, by Hirtius or whoever was the author of the history of the African War (*B. Afr.* 26, 27, &c.), and Tusdrus, in the *Itin. Ant.* (p. 59). Now *El Jemme* or *Legem*, with extensive ruins, especially of a fine amphitheatre in a tolerably perfect state. (Shaw, *Travels*, vol. i. p. 220, sqq.) [T. H. D.]

THYSSA'GETAE (*Θυσσαγέται*, Herod. iv. 22), a numerous people of Asiatic Sarmatia, living principally by the chase. They dwelt to the north-east of a great desert of 7 days' journey, which lay between them and the Budini. Stephanus B. (*s. v.*) erroneously places them on the Maeotis, apparently from misunderstanding Herodotus. They are called Thussagetae by Mela (i. 19) and Pliny (iv. 12 s. 26), and Thyssagetae by Valerius Flaccus (vi. 140). [T. H. D.]

THYSSUS (*Θύσσος*), a town of Chalcidice in Macedonia, situated on the W. or S. side of the peninsula of Acte or Mt. Athos. Its exact position is uncertain, but it appears that Thyssus and Cleonae occupied the central part of the W. or S. coast of the peninsula, and that one of them may be placed at *Zográfu* or *Dhokhiári*, and the other at *Xeropotámi.* (Herod. vii. 22; Thuc. iv. 109, v. 35; Scylax, p. 26; Strab. vii. p. 331; Plin. iv. 10. s. 17; Leake, *Northern Greece*, vol. iv. pp. 149—152.)

TIARANTUS (*Τιαραντός*, Herod. iv. 48), a river in Scythia, flowing into the Ister from the N. Mannert identifies it with the *Syl* (iv. p. 105; cf. Ukert, iii. 2. p. 184). [T. H. D.]

TIARIULIA. [TEARI JULIENSES.]

TIASA. [LACONIA, p. 110, a.]

TIASUM (*Τίασον* or *Τίασσον*, Ptol. iii. 8. § 9), a town in Dacia, in the neighbourhood of the modern *Fokschani.* [T. H. D.]

TIBARANI, a tribe of Cilicia, about Mount Amanus and in the vicinity of Pindenissus, which was subdued by Cicero during his proconsular administration of that country, but is otherwise unknown. (Cic. *ad Fam.* xv. 4.) [L. S.]

TIBARE'NI (*Τιϐαρηνοί*), a tribe on the coast of Pontus, occupying the country between the Chalybes and the Mosynoeci, on the east of the river Iris. They are mentioned as early as the time of Herodotus (iii. 94), and were believed to be of Scythian origin. (Schol. *ad Apoll. Rhod.* ii. 378, 1010; Xen. *Anab.* v. 5. § 2; Scylax, p. 33; Steph. B. *s. v. Τιϐαρηνία.*) Strabo (xi. p. 527) describes them as inhabiting the mountains branching off from the Montes Moschici and Colchici, and mentions Cotyura as their principal town. (Comp. Xen. *l. c.*; Plin. vi. 4.) They appear to have been a harmless and happy people, who performed all their duties in a joyous manner. (Schol. *ad Apoll. Rhod. l. c.*; Steph. B. *l. c.*; Anon. *Peripl. P. E.* p. 12; Pomp. Mela, i. 19.) Their arms consisted of wooden helmets, small shields, and short spears with long points. (Herod. vii. 78.) Xenophon and his Greeks spent three days in travelling through their country. (Xen. *l. c.*, vii. 8. § 25; Diod. Sic. xiv. 30; Dionys. Per. 767; Pomp. Mela, i. 2; Val. Flacc. v. 149; Strab. ii. p. 129, vii. p. 309, xi. p. 549, xii. p. 555.) [L. S.]

TIBERIACUM, in North Gallia, is placed in the Antonine Itin. between Juliacum (*Juliers*) and Colonia Agrippina (*Cologne*), viii. from Juliacum and x. from Colonia. D'Anville and others fix Tiberiacum at *Berghem*, at the passage of the river *Erfft*, which flows between *Juliers* and *Cologne.* Others place Tiberiacum at *Tarren*, south of *Berghem*, where the bridge is. D'Anville adds "that a place situated in the direction between *Juliers* and *Berghem* is called *Stein-Stras*, that is to say, Lapidea Strata (*Stone Street*), just as in our provinces they say *Chemin Perré.*" (D'Anville, *Notice, &c.*; Ukert, *Gallien*, p. 544.) [G. L.]

TIBE'RIAS (*Τιϐεριάς*, Joseph. *Ant.* xviii. 3, *B. J.* ii. 8, iii. 16; Steph. B. *s. v.*; Ptol. viii. 20. § 16), the principal town of Galilaea, on the SW. bank of the sea of Tiberias or Gennesareth. It was situated in the most beautiful and fruitful part of that state (Joseph. *Ant.* xviii. 2. § 3), and was adorned with a royal palace and stadium. (Joseph. *Vit* 12, 13, 64.) It was built by the tetrarch Herodes Antipas, in honour of the Roman emperor Tiberius, from whom it derived its name. (Joseph. *l. c.*) It is stated to have been 30 stadia from Hippo, 60 from Gadara, and 120 from Scythopolis (Joseph. *Vit.* 65); distances which are not much at variance with that of Joliffe, who states that it is 20 miles English from Nazareth and 90 from Jerusalem. (*Travels*, p. 40.)

From the time of Herodes Antipas to that of the reign of Agrippa II., Tiberias was probably the capital of the province (Joseph. *Vit.* 9), and it was one of the four cities which Nero added to the kingdom of Agrippa. (Joseph. *Ant.* xx. 8. § 4.) In the last Jewish War, Tiberias, from its great strength, played an important part (Joseph. *B. J.* ii. 20); as, after Sepphoris, it was held to be the largest place in Galilaea (Joseph, *Vit.* 65), and was very strongly fortified. (*B. J.* iii. 10. § 1.) The inhabitants derived their sustenance in great measure from their fisheries in the adjoining sea. (Joseph. *Vit.* 12.) On the destruction of Jerusalem, and for several centuries subsequently, Tiberias was famous for its academy of learned Jews. (Lightfoot, *Hor. Hebr.* p. 140.)

In the immediate neighbourhood of Tiberias were the celebrated hot springs of Emmaus (Joseph. *B. J.* ii. 21, *Ant.* xviii. 2.) [EMMAUS.] It is not certain whether Tiberias occupied the site of Chinnereth, though Hieronymus thinks so (*Onom. s. v. Chinnereth*); it seems more likely that this place belonged to the tribe of Naphthali. (Josh. xix. 35; Reland, *Palaest.* p. 161.) Nor is there any better reason for identifying it, as some have done, with Chammath (Joseph. xix. 35) or Rakkah, which was the Rabbinical notion. (Cf. Hieron. *Megil.* fol. 701; Lightfoot, *Chorograph. Cent.* cap. 72—74.) The modern name of Tiberias is *Tabarieh*: it is not, however, built actually on the site of the old town, though close to its ruins. When Joliffe was there, it had a population of 11,000 (*Travels*, pp. 48—58.) It was nearly destroyed by an earthquake on New Year's Day, 1837, since which time it has never been completely rebuilt. (Russegger, iii. p. 132; Strauss, p. 356; Robinson, iii. p. 500.) [V.]

TIBE'RIAS MARE (*λίμνη Τιϐερίας*, Pausan. v. 7. § 4; Ptol. v. 16. § 4; *λίμνη ἡ Τιϐερίων*, Joseph. *B. J.* iv. 26), the principal lake or sea of Palestine in the province of Galilaea. It was bordered on the W. side by the tribes of Issachar and Zabulon, and on the E. by the half-tribe of Manasseh. The waters were fresh (Joseph. *B. J.* iii. 35) and full of fish (Joseph. *B. J.* iv. 26; *Matth.* iv. 18; *Luke*, v. 1, &c.), and its size is variously stated, by Josephus (*l. c.*), to have been 140 stadia long by 40 broad, and by Pliny, to have been 16 M. P. long and 6 M. P. broad (v. 15). It was traversed in a direction NW. and SE. by the river Jordan. [JORDANES; PALAESTINA.] This sea is known by many different names in the Bible and profane history. Its earliest title would seem to have been Chinnereth (*Numb.* xxxiv. 11; *Josh.* xiii. 27; LXX. Χεννερέθ.) From this form has probably arisen its second appellation of Gennesareth (*ἡ λίμνη Γεννεσαρὲτ*, *Matth.* xiv. 34, &c.; *ὕδωρ Γεννησὰρ*, 1 *Maccab.* ii. 67; *ἡ λίμνη Γεννησὰρ*, Joseph. *B. J.* *ἡ λίμνη Γεννεσαρῖτις*, Joseph. *Ant.* xviii. 3; Strab. xvi. p. 755; Genasara, Plin. v. 15.) A third appellation it has derived from the province with which it was most nearly connected, viz. the sea of Galilee (*ϑάλασσα τῆς Γαλιλαίας*, *Matth.* iv. 18; *Mark*, vii. 31, &c.; and with a double title, *ϑάλασσα τῆς Γαλιλαίας, τῆς Τιϐερίαδος*, *John* vi. 1). Pliny, in describing the same localities, speaks of a town called Tarichaea, from whence also he says the adjoining lake was sometimes named (*l. c.*; cf. also Strab. xvi. p. 764). The present name is *Bahr-al-Tabarieh.* (Pococke, ii. p. 103; Thevenot, p. 387; Haselquist, i. p. 181; Robinson, iii. pp. 499—509, &c.) [V.]

TIBERIO'POLIS (Τιϐεριούπολις), a town in Phrygia Major, in the neighbourhood of Eumenia. (Ptol. v. 2. § 25; Socrat. *Hist. Eccles.* vii. 46.) Its site is yet uncertain, but Kiepert (in Franz, *Fünf Inschriften*, p. 33) is disposed to regard the extensive ruins near *Suleiman* as the remnants of Tiberiopolis. Hamilton (*Researches*, i. p. 127, foll.), probably more correctly, regards them as the ruins of Blaundos. (Comp. Arundell, *Discoveries*, i. p. 81, foll.) [L. S.]

TI'BERIS (*ὁ Τίϐερις*: *Tevere*, *Tiber*: the forms Tibris, Tybris, and Thybris are chiefly poetical, as is *Θύμϐρις* also in Greek: the Latin poets use also Tiberinus as an adjective form, as Tiberinus pater, Tiberinum flumen, &c., and thence sometimes Tiberinus by itself as the name of the river), one of the most important rivers of Central Italy. It has its sources in the Apennines above Tifernum, but in the territory of Arretium (Plin. iii. 5. s. 9), on the confines of Etruria and Umbria, and flows at first in a southerly direction, passing by the walls of Tifernum, which derived from it the name of Tiberinum (*Città di Castello*), and afterwards within a few miles of Perusia on the E., and within a still shorter distance to the W. of Tuder (*Todi*). From thence it still preserves a general S. direction, notwithstanding considerable windings, till it receives the waters of the Anio (*Teverone*), a few miles from the walls of Rome, from which point it has a general SW. course to the sea at Ostia. Pliny estimates the upper part of its course at 150 miles, to which must be added about 35 more for the lower part, giving as a total 185 miles (Plin. *l. c.*; Strab. v. p. 218); but this estimate is below the truth, the whole course of the river being about 180 geogr. or 225 Roman miles. During the whole of its course from Tifernum to the sea the Tiber formed in ancient times the eastern boundary of Etruria, separating that country from Umbria in the upper part of its course, afterwards from the territory of the Sabines, and, in the lower part, from the mouth of the Anio downwards, dividing it from Latium. (Strab. v. p. 219; Plin. *l.c.*) It receives numerous confluents or tributaries, of which the most important are, the TINIA, an inconsiderable stream which joins it from the E. a little below Perusia, bringing with it the waters of the more celebrated Clitumnus; the CLANIS, which falls into it from the right bank, descending from the marshy tract near Clusium; the NAR, a much more considerable stream, which is joined by the VELINUS a few miles above Interamna, and discharges their combined waters into the Tiber, a few miles above Ocriculum; and the ANIO, which falls into the Tiber at Antemnae, 3 miles above Rome. These are the only affluents of the Tiber of any geographical importance, but among its minor tributaries, the ALLIA on its left bank, a few miles above the Anio, and the CREMERA on the right, are names of historical celebrity, though very trifling streams, the identification of which is by no means certain. [See the respective articles.] Two other streams of less note, which descend from the land of the Sabines and fall into the Tiber between Ocriculum and Eretum, are, the Himella (*Aia*) and the Farfarus or Fabaris (*Farfa*).

The Tiber is unquestionably, in a merely geographical point of view, the most important river of Central Italy, but its great celebrity is derived from its flowing under the walls of Rome, or rather through the heart of the city, after this had attained to its full extension. The detailed account of the river in this part of its course must be sought in the article Roma: we need here only mention that after flowing under the Milvian Bridge [Pons Milvius or Mulvius] the river makes a considerable bend to the W. so as to approach the foot of the Vatican hills, and leave, on the other side, between its left bank and the nearest ridge of hills, a broad tract of plain, early known as the Campus Martius, the whole of which was eventually included within the imperial city. A short distance lower down, but still within the walls of the city, its stream was divided into two by an island known as the Insula Tiberina, and reported by tradition to have been formed by alluvial accumulations within the period of Roman history. It is remarkable that this is the only island of any consideration in the whole course of the river, with the exception of that called the Insula Sacra, at its mouth, formed by the two arms of the river, and which is undoubtedly of late growth, and in great part of artificial formation.

The Tiber was at all times, like most rivers which are supplied principally by mountain streams, a turbid, rapid, and irregular river, that must always have presented considerable difficulties to navigation. The yellow and muddy hue of its turbid waters is repeatedly alluded to by the Roman poets ("flavum Tiberim," Hor. *Carm.* i. 2. 13; "suo cum gurgite flavo," Virg. *Aen.* ix. 816; &c.), and the truth of Virgil's description, "Vorticibus rapidis et multa flavus arena," (*Aen.* vii. 31), must be familiar to every one who has visited Rome. In the upper part of its course, as we learn from Pliny, the river was with difficulty navigable, even for small boats; nor did its first tributaries, the Tinia and Clanis contribute much to its facilities in this respect, though their waters were artificially dammed up, and let off from time to time in order to augment the main stream. (Plin. iii. 5. s. 9.) But from the point of its junction with the Nar, the Tiber became navigable for larger vessels, and even from an early period extensive supplies of various kinds were brought down the river to Rome. (Liv. ii. 34, v. 54; Cic. *de Rep.* ii. 5; &c.) In the more flourishing period of the city the navigation of the Tiber was of course enormously increased; and vast supplies of timber, stone, and other materials for building, as well as corn and provisions, were continually introduced by means of the river and its tributaries. (Strab. v. p. 235.) Corn was brought down the Tiber even from the neighbourhood of Tifernum, when the upper part of the stream was navigable. (Plin. *Ep.* v. 6.) It seems also to have been used as an ordinary mode of travelling, as we are told that in A. D. 20, Piso, the murderer of Germanicus, proceeded from Narnia to Rome by descending the Nar and the Tiber. (Tac. *Ann.* iii. 9.) At the present day the river is navigated by boats of large size as far as the confluence of the *Nera*, and small steamers ascend as far as *Borghetto*, a few miles from *Otricoli*.

But it was from Rome itself to the sea, a distance of 27 miles by the river (Strab. v. p. 232), that the navigation of the Tiber was the most important. Pliny speaks of it as in this part of its course navigable for the largest vessels ("quamlibet magnarum navium ex Italo mari capax"), and as becoming the receptacle of merchandise from every part of the world. The latter statement may be readily admitted; but the former is calculated to astonish any one acquainted with the river in its present condition yet it is partly confirmed by the distinct statement of Strabo (v. p. 232), that the larger class of merchant vessels used to ride at anchor in the open sea off the mouth of the river, until they had been lightened of a part of their cargoes, which they discharged into barges, and afterwards proceeded up the river to Rome. Dionysius gives the same account, with the exception that vessels which exceeded 3000 amphorae in burden were unable to enter the river at all, and forced to send their cargoes up by barges. (Dionys. iii. 44.) But all kinds of rowing vessels, not excepting the largest ships of war, were able to ascend the river (*Ib.*); and thus we find the younger Cato on his return from Cyprus proceeding at once in his galley to the Navalia within the walls of Rome. (Plut. *Cat. Min.* 39.) We learn also from Livy that the ships of war which had been taken from Perseus king of Macedonia, though of unusual size ("inusitatae ante magnitudinis"), were carried up the river as far as the Campus Martius (Liv. xlv. 42); and even the gigantic vessel constructed for the purpose of bringing the obelisk that was set up in the Circus Maximus, was able to ascend as far as the Vicus Alexandri, within three miles of Rome (Ammian. xvii. 4. § 14). The chief difficulties that impeded the navigation of the river in the time of Strabo were caused by its own accumulations at its mouth, which had destroyed the port of Ostia. These were afterwards in great measure removed by the construction of an artificial port, called the Portus Augusti, commenced by Claudius, and enlarged by Trajan, which communicated by an artificial canal or arm with the main stream of the river. (The history of these works, and the changes which the mouths of the Tiber underwent in consequence, are fully given in the article Ostia.) The importance of the navigation of the Tiber led to the formation of distinct bodies or corporations in connection with it, called Navicularii and Lenuncularii, both of which are frequently mentioned in inscriptions of imperial times (Preller, p. 147).

Another disadvantage under which the Tiber laboured, in common with most rivers of mountain origin, arose from the frequent inundations to which it was subject. These appear to have occurred in all ages of the Roman history; but the earliest recorded is in B. C. 241, immediately after the close of the first Punic War (Oros. iv. 11), which is said to have swept away all the houses and buildings at Rome in the lower part of the city. Similar inundations, which did more or less damage to the city are recorded by Livy in B. C. 215, 202, 193, and again in 192 and 189 (Liv. xxiv. 9, xxx. 38, xxxv. 9, 21, xxxviii. 28) and there is little doubt that it is only from the loss of the detailed annals that we do not hear again of the occurrence of similar catastrophes till near the close of the Republic. Thus we find a great inundation of the Tiber noticed as taking place in B. C. 54 (Dion Cass. xxxix. 61), which is alluded to by Cicero (*ad Q. Fr.* iii. 7); and several similar inundations are known to have occurred in the time of Augustus, in B. C. 27, 23 and 22, of which the first is probably that alluded to by Horace in a well-known ode. (Hor. *Carm.* i. 2. 13; Orell. *Excurs. ad l. c.*; Dion Cass. liii. 20, 33, liv. 1.) Great attention was bestowed by Augustus upon the subject, and he first instituted magistrates with the title of Curatores Tiberis, whose special duty was to endeavour to restrain the river within due bounds, to preserve the embankments, &c. (Suet. *Oct.* 37.) These officers received increased powers under Tiberius, and continued down to the close of the Empire. We frequently meet with mention in inscriptions of the "Curatores alvei Tiberis et riparum," and the office seems to have been regarded as one of the most honourable in the state. (Dion Cass. lvii. 14; Orell. *Inscr.* 1172, 2284, &c.; Gruter, *Inscr.* pp. 197, 198.) But it is evident that all their efforts were ineffectual. In the reign of Tiberius so serious was the mischief caused by an inundation in A. D. 15 that it was proposed in the senate to diminish the bulk of the waters by diverting some of the chief tributaries of the stream, such as the Nar, Velinus and Clanis. (Tac. *Ann.* i. 76; Dion Cass. lvii. 14.) This plan was, however, abandoned as impracticable; and in A. D. 69 another inundation took place, which appears to have caused still more damage than any that had preceded it (Tac. *Hist.* i. 86). It is strange that in face of these facts Pliny should assert that the Tiber was so confined within artificial banks as to have very little power of outbreak, and that its inundations were rather subjects of superstitious alarm than formidable in themselves. (Plin. iii. 5. s. 9.) During the later ages of the Empire indeed we hear but little of such outbreaks of the Tiber, but this is very probably owing only to the scanty nature of our records. One great inundation is, however, recorded as doing great mischief in the reign of Trajan, another in that of Macrinus, and a third in that of Valerian. (Dion Cass. lxxviii. 25; Vict. *Caes.* 34, *Epit.* 13.) One of the most destructive of all is said to have been that of A. D. 590, which added to the various calamities that at that time almost overwhelmed the city. (*Hist. Miscell.* xviii. p. 583; Greg. Turon. x. 1.) At the present day the lower parts of Rome are still frequently flooded by the river, for though the soil of these parts of the city has unquestionably been raised, in some places many feet, the bed of the Tiber has undoubtedly been also elevated, though probably in a less degree. The whole subject of the inundations and navigation of the Tiber, and the measures taken in ancient times in connection with them, is fully illustrated by Preller in an article entitled *Rom und der Tiber* in the *Berichte der Sächsischen Gesellschaft* for 1848 and 1849.

The Tiber appears to have been in ancient times occasionally frozen, at least partially; a circumstance to which the Latin poets repeatedly allude. But we must not construe their rhetorical expressions too strictly; and it is clear from the terms in which Livy notices its being frozen over in the extraordinary winter of B. C. 398, that such an occurrence was of extreme rarity. ("Insignis annus hieme gelida ac nivosa fuit, adeo ut viae clausae, Tiberis innavigabilis fuerit, Liv. v. 13.) St. Augustin also alludes to such a winter (apparently the same noticed by Livy), "ut Tiberis quoque glacie duraretur," as a thing unheard of in his times. (Augustin, *Civ. Dei*, iii. 17.)

It was a tradition generally received among the Romans that the Tiber had been originally called Albula; and that it changed its name in consequence of Tiberinus, one of the fabulous kings of Alba, having been drowned in its waters. (Liv. i. 3; Dionys. i. 71; Vict. *Orig. G. Rom.* 18.) Virgil, however, who calls the king Thybris, assigns him to an earlier period, prior to the landing of Aeneas (*Aen.* viii. 330). Hence the river is not unfrequently called by the Roman poets Albula. (Sil. Ital. vi. 391, viii. 455, &c.) It had naturally its tutelary divinity or river-god, who, as we learn from Cicero, was regularly invoked in their prayers by the augurs under the name of Tiberinus (Cic. *de N. D.* iii. 20). He is frequently introduced by the Roman poets as "pater Tiberinus" (Enn. *Ann.* i. p. 43; Virg. *Aen.* viii. 31, 72; &c.) [E. H. B.]

TIBIGENSE OPPIDUM, a town in Africa Propria, apparently the Thigiba (Θιγίβα) of Ptolemy (iv. 3. § 29; Plin. v. 4. s. 4). [T. H. D.]

TIBILIS, a town in the interior of Numidia, 54 miles from Cirta, having hot mineral springs (Aquae Tibilitanae) (August. *Ep.* 128; *Itin. Ant.* p. 42), commonly identified with *Hammam Meskutin* in the mountains near the river *Seibouse;* but, according to D'Avezac and the map of the province of Constantine (Par. 1837), it is *Hammam-el-Berda*, somewhat more to the N. [T. H. D.]

TIBISCUM (Τίβισκον, Ptol. iii. 8. § 10), a town of Dacia, on the river Tibiscus. By the Geogr. Rav. it is called Tibis (iv. 14), and in the *Tab. Peut.* Tiviscum. Its ruins exist at *Kavaran*, at the junction of the *Temesz* (Tibiscus) and *Bistra* (cf. Ukert, iii. 2. p. 616). [T. H. D.]

TIBISCUS (Τίβισκος, Ptol. iii. 8. § 1), a tributary river of the Danube in Dacia. We also find it called Tibissus (*Inscr.* Grut. p. 448. 3) and Tibisia (Geogr. Rav. iv. 14). Several authors identify it with the Tisianus or Tysia (the modern *Theiss*), with which, indeed, Ptolemy seems to have confounded it, as he does not mention the latter (Mannert, iv. p. 203; Sickler, i. p. 196; cf. Ukert, iii. 2. p. 603). But Forbiger, after Reichard, identifies it with the *Temesz;* his grounds for that opinion being that Jornandes (*Get.* c. 34) and the Geographer of Ravenna (*l. c.*) mention the Tysia and Tibisia as two distinct rivers, and that the site of the ancient town of Tibiscum appears to point to the *Donesz* (*Handb. d. alt. Geogr.* iii. p. 1103, note). It is probable that the Pathissus of Pliny (iv. 12. s. 25) and Parthiscus of Ammianus Marcellinus (xvii. 13. § 4) are the same river, though some identify them with the Tisianus. [T. H. D.]

TIBISIS (Τίβισις), a large river of Scythia, which Herodotus describes as rising in Mt. Haemus, and flowing into the Maris (iv. 49). It is identified by some with the *Kara Low.*

TIBULA (Τίβουλα, Ptol.), a town of Sardinia, near the N. extremity of the island, which appears to have been the customary landing-place for travellers coming from Corsica; for which reason the Itineraries give no less than four lines of route, taking their departure from Tibula as a starting-point. (*Itin. Ant.* pp. 78—83.) It is very unfortunate therefore that its position is a matter of great uncertainty. That assigned to it by Ptolemy would place it on the site of *Castel Sardo* on the N. coast of the island, and only about 18 miles from *Porto Torres*, but this is wholly incompatible with the statements of the Itineraries, and must certainly be erroneous. Indeed Ptolemy himself places the Tibulates, or Tibulatii (Τιβουλάτιοι), who must have been closely connected with the town of that name, in the extreme N. of the island (Ptol. iii. 3. § 6), and all the data derived from the Itineraries concur in the same result. The most probable position is, therefore, that assigned it by De la Marmora, who fixes it on the port or small bay called *Porto di Lungo Sardo*, almost close to the northernmost point of the island, the Errebantium Prom. of Ptolemy. (De la Marmora, *Voy. en Sardaigne*, vol. ii. pp. 421—432, where the whole question is fully examined and discussed.) [E. H. B.]

TIBUR (*ἡ Τιϐουρίνων* or *Τιϐουρήνων πόλις*, Polyb. vi. 14; *τὰ Τίϐουρα*, Strab. v. p. 238; *τὸ Τιϐούρ*, Ptol. iii. 1. § 58; *ἡ Τίϐυρις*, Steph. B. p. 564: *Eth.* Tiburs, Liv. vii. 9; Virg. *Aen.* xi. 757; Hor. *S.* i. 6. 108; Tac. *Ann.* xiv. 22, &c.; Tiburtinus, Cic. *Phil.* v. 7; Prop. iv. 7. 85; Plin. *Ep.* vii. 29, &c.; Tiburnus, Stat. *Silv.* i. 3. 74; Prop. iii. 22, 23: now *Tivoli*), an ancient and celebrated town of Latium, seated on the Anio, to the NE. of Rome, from which it was distant 20 Roman miles (*Itin. Ant.* p. 309; cf. Mart. iv. 57; Procop. *B. G.* ii. 4). Tibur lies on an offshoot or spur thrown out from the northern side of what is now called *Monte Ripoli*, at a level of between 800 and 900 feet above the sea. This ledge extends across the bed of the Anio to *Monte Catillo* on its north bank, thus forming a natural barrier over which the river leaps into the valley below, from a height of about 80 feet, and forms the celebrated waterfall so frequently mentioned by the ancient writers (Strab. *l. c.*; Dionys. H. v. 37; Hor. *Od.* i. 7. 13, &c.). The town lay principally on the cliff on the left or southern bank, where it is half encircled by the Anio. It is probable that at a remote period the waterfall was lower down the river than it is at present, since there are tokens that the stream once washed the substructions of the terrace on which the round temple is built; especially a broken wheel embedded in the cliff at a height of 150 feet above the abyss called the *Grotto of Neptune*. The awful catastrophe in A. D. 105 recorded by the younger Pliny (*Ep.* viii. 17), when the Anio burst its banks and carried away whole masses of rock — *montes* he calls them — with the groves and buildings upon them, must have produced a remarkable change in the character of the fall. We may gather, from some descriptions in Propertius (iii. 16. 4) and Statius (*Silv.* i. 3. 73), that previously to that event the Anio leaped indeed from a high rock, but that its fall was broken towards its lower part by projecting ledges, which caused it to form small lakes or pools. From the time of Pliny the cataract probably remained much in the same state down to the year 1826, when the river again swept away a number of houses on the left bank, and threatened so much danger to the rest that it was found necessary to divert its course by forming a tunnel for its waters through *Monte Catillo* on the right bank. This alteration spoiled the romantic points of view on the side of the grottoes of Neptune and the Sirens; but the fall is still a very fine one. Scarcely inferior to it in picturesque beauty are the numerous small cascades, called *Cascatelle*, on the western side of the town. These are formed by water diverted from the Anio for the supply of various manufactories, which, after passing through the town, seeks its former channel by precipitating itself over the rock in several small streams near what is commonly called the villa of Maecenas. Nothing can be finer than the view of these cascades from the declivities of *Monte Peschiavatore*, whence the eye ranges over the whole of the *Campagna*, with Rome in the distant background.

The country around Tibur was not very fertile in grain; but it was celebrated for its fruit-trees and orchards ("pomosi Tiburis arva," *Col. R. R.* x. p. 347, ed. Lugd 1548; cf. Propert. iv. 7. 81: "Pomosis Anio qua spumifer incubat arvis"), and especially for its grapes and figs (Plin. xiv. 4. s. 7, xv. 19). Its stone, now called *travertino*, was much used at Rome for building, whither it was easily conveyed by means of the Anio, which became navigable at Tibur (Strab. *l. c.*). Vast remains of ancient quarries may still be seen on the banks of that river (Nibby, *Viaggio Ant.* i. 112). Of this material were constructed two of the largest edifices in the world, the Colosseum and the Basilica of St. Peter. The air of Tibur was healthy and bracing, and this was one of the recommendations, together with its beautiful scenery, which made it a favourite retirement of the wealthy Romans. Besides its salubrity, the air was said to possess the peculiar property of bleaching ivory (Sil. It. xii. 229; Mart. viii. 28. 12). Tibur was also famed for its pottery (Sen. *Ep.* 119).

The foundation of Tibur was long anterior to that of Rome (Plin. xvi. 87). According to Dionysius of Halicarnassus (i. 16), it was one of the cities founded by the Siculi when they had possession of Italy; in proof of which statement he adduces the fact that in his own time part of the town was still called Sicelion; a name which would also indicate its having been one of the chief cities of that people. Another legend affirmed that the Siculi were expelled by Tiburtus, Coras and Catillus II., sons of Catillus I. The last was the son of Amphiaraus, the celebrated Theban king and prophet, who flourished about a century before the Trojan War. Catillus migrated to Italy in consequence of a ver sacrum. Tiburtus, or Tiburnus, the eldest of his three sons, became the eponymous hero of the newly founded city; for such it may be called, since the Siculi dwelt only in unwalled towns, which were subsequently fortified by the Greek colonists of Italy. According to Cato's version of the legend, Tibur was founded by Catillus, an officer of Evander (Solin. i. 2). From these accounts we may at all events infer the high antiquity of Tibur. The story of its Greek origin was very generally adopted by the Roman poets, whence we find it designated as the "moenia Catili" by Horace (*Od.* i. 18. 2; cf. *Ib.* ii. 6. 5; Virg. *Aen.* vii. 670; Ov. *Fast.* iv. 71, *Amor.* iii. 6. 45; Stat. *Silv.* i. 3. 74: Sil. It. iv. 225, viii. 364). Tibur possessed a small surrounding territory, the limits of which, however, we are unable to fix, all that we know respecting it being that the towns of Empulum and Sassula, besides one or two others, at one time belonged to it. Both these places lay in what is called the *Valle di Siciliano*, to the NE. of the town, the name of which is probably connected with the Sicelion of Dionysius. Empulum is identified with the present *Ampiglione*, a place about 4 miles distant from Tibur. Sassula probably lay 2 or 3 miles beyond Empulum, in the same direction. The boundary between the Tiburtine territory and that of the Sabines was very uncertain. Augustus adopted the Anio as the limit; yet considerable uncertainty seems to have prevailed even subsequently to the assumption of that boundary. Thus according to Tacitus (*Ann.* xiv. 22), the territory of Tibur extended beyond the Anio, and included Sublaqueum, the modern *Subiaco*, which is commonly assigned to the Aequi. Originally Tibur with its territory seems to have belonged to the Sabines. Pliny enumerates Tibur among the Sabine towns (iii. 12. s. 17).

We know nothing of the history of Tibur except in connection with that of Rome. The first occasion on which we find it mentioned is in the time of the decemvirate, B. C. 446, when M. Claudius, the infamous tool of the decemvir Appius, went into exile there (Liv. iii. 58). It does not appear, however, as taking any active part in affairs till B. C. 357; in which year the Tiburtines shut their gates against the Roman consuls C. Sulpicius and C. Licinius Calvus, who were returning from a successful expedition against the Hernici. There appear to have been previous disputes and complaints between the Tiburtines and Romans, and the latter seized the opportunity to declare war (Liv. vii. 9). But hostilities were suspended for a time by an incursion of the Gauls, who crossed the Anio and advanced to within 3 miles of Rome. This invasion of the Gauls was assisted by the Tiburtines; and therefore, after the barbarians had been repulsed by the prodigious valour of Manlius Torquatus, the consul C. Poetelius was sent against them with an army in the following year. But the Gauls returned to the assistance of the Tiburtines; and, to meet this emergency, Q. Servilius Ahala was named dictator. The Gauls again advanced close to the walls of Rome, and a great battle was fought just outside the Porta Collina, in the sight of all the citizens. After a desperate conflict, the barbarians were defeated and fled to Tibur for refuge. Here they were intercepted by the consul Poetelius, who drove them into the city, as well as the Tiburtines who had come to their aid. For this achievement a triumph was awarded to Poetelius, which we find recorded in the *Fasti Capitolini* as well as by Livy. This triumph, however, excited the ridicule of the Tiburtines, who denied that the Romans had ever met them in a fair and open field: and in order to wipe out this affront, they made, in the following year, a nocturnal attempt upon Rome itself. But when day dawned and two armies, led by the two consuls, marched out against them from different gates, they were scarcely able to sustain the first charge of the Romans (Liv. vii. 11, 12). Yet the war continued for several years. In B. C. 350, the consul M. Popilius Laenas devastated their territory (*ib.* 17), and in the following year Valerius Poplicola took Empulum, one of their dependent cities (*ib.* 18; cf. Empulum). Sassula also yielded in 348 to the arms of M. Fabius Ambustus; and the Tiburtines would have lost all the rest of their territory had they not laid down their arms and submitted to the Roman consul. The triumph of Fabius is recorded in the *Fasti* and by Livy (*ib.* 19). Yet a few years later we find the Tiburtines joining the Latin league against the Romans; and even after the overthrow of the Latins they allied themselves with the Praenestini and Veliterni to defend Pedum (Id. viii. 12). In B. C. 335, the consul L. Furius Camillus, attacked and completely defeated them under the walls of that place, in spite of a sortie of the inhabitants, and then took the town by escalade. All Latium was now subdued, and we do not again hear of the Tiburtines taking up arms against Rome (*ib.* 13). For this exploit Camillus not only obtained a triumph, but also an equestrian statue in the forum, a rare honour in that age. In the Senatusconsultum subsequently drawn up for the settlement of Latium, Tibur and Praeneste were treated with more severity than the other cities, except Velitrae. They were deprived of part of their territory, and were not admitted to the Roman franchise like the rest. The cause of this severity was not their recent insurrection, the guilt of which they shared with the rest of the Latin cities, but their having formerly joined their arms with those of the Gauls (*ib.* 14). Thus Tibur remained nominally free and independent, so that Roman exiles might resort to it (Polyb. vi. 14). Hence we find the tibicines taking refuge there when they fled from the rigour of the censors (B. C. 310), who had deprived them of the good dinners which they were accustomed to enjoy in the temple of Jupiter; an event more important than at first sight it might seem to be, since, without the tibicines, neither sacrifices, nor several other important ceremonies, could be performed at Rome. On this occasion the rights of the Tiburtines were respected. The senators sent ambassadors to them as to an independent city, to request their assistance in procuring the return of the fugitives. The Tiburtines, like able diplomatists, took the pipers by their weak side. They invited them to dinner and made them drunk, and during the night carted them in waggons to Rome, so that when they awoke in the morning sober, they found themselves in the Forum (Liv. ix. 30). The story is also told by Ovid with his usual felicity (*Fast.* vi. 665, sqq.). Other instances might be adduced in which Tibur enjoyed the privilege of affording an asylum. That of M. Claudius, before alluded to, was of course previous to the conquest of Latium by the Romans; but we find Cinna taking refuge at Tibur after the murder of Caesar (App. *B. C.* i. 65): and Ovid (*ex Ponto*, i. 3, 81, sq.) notes it as the most distant land of exile among the ancient Romans.

It was at Tibur that Syphax, king of Numidia, expired, in B. C. 201, two years after being captured in Africa. He had been brought thither from Alba, and was destined to adorn the triumph of Scipio; a humiliation which he escaped by his death (Liv. xxx. 45). Some centuries later Tibur received a more interesting captive, the beautiful and accomplished Zenobia. The former queen of the East resided near the villa of Hadrian, in the unostentatious manner of a Roman matron; and at the time when Trebellius Pollio wrote her history, the estate still bore her name. (Poll. *XXX. Tyr.* 26.)

In the Barberini palace at Rome is preserved a bronze tablet on which is engraved the following fragment of a Senatusconsultum: *Propterea . quod . scibamus . ea . vos . merito . nostro . facere . non . potuisse . neque . vos . dignos . esse . quei . faceretis . neque . id . vobeis . neque . rei . poplicae . vostrae . oitile . esse . facere.* This monument, first acquired by Fulvio Orsini, and left by him to Cardinal Farnese, is published by Gruter (*Inscr.* ccccxcix. 12). The tenour seems to show that the Tiburtines had been accused of some grave offence from which they succeeded in exculpating themselves; but, as there is nothing to fix the date of the inscription, various opinions have been entertained respecting the occasion of it. As the style seems to belong to about the middle of the 7th century of Rome, Nibby (*Dintorni*, iii. p. 172) is of opinion that the document refers to the social war; that the Tiburtines had cleared themselves from the charge of taking part in that league, and were in consequence admitted to the Roman franchise, at the same time with many other Latin and Etruscan cities. This conjecture is by no means improbable. If, however, Tibur received the franchise before the civil wars of Marius and Sulla, the latter must have taken it away when he deprived the rest of the municipal cities of it, with the exception of Anagnia (Cic. *pro Dom.* 30), but it was probably regained on the abdication of the dictator. The treasure deposited at Tibur in the temple of Hercules was appropriated by Octavian during his war against Lucius Antonius, when so many other temples were plundered at Rome and in its neighbourhood. (App. *B. C.* v. 24.) From this period we have no notices of Tibur till the time of the Gothic war in the 6th century of our era. During the siege of Rome by Vitiges, Belisarius placed 500 men in it, and afterwards garrisoned it with Isaurians. (Procop. *B. G.* ii. 4.) But under his successor Totila a party of the Tiburtines having introduced the Goths by night into the city, the Isaurians fled, and the Goths murdered many of the inhabitants with circumstances of great cruelty (*Ib.* iii. 10.) Great part of the city must have been destroyed on this occasion, since it appears further on (c. 24) that Totila having retired to Tivoli, after a vain attempt upon Rome, rebuilt the fortress.

At present there are but few traces of the boundaries of the ancient city; yet there are certain points which, according to Nibby (*Dintorni*, iii. p. 186, seq.), enable us to determine the course of the walls with some degree of accuracy, and thus to estimate its circumference, at all events during the time of its subjection to the Romans. These points are determined partly by the nature of the ground, partly by existing remains, and partly by positive testimony. The nature of the ledge upon which the town is built shows that the walls must have traversed the edge of it towards the N. and E.; and this assumption is confirmed by some remains. The two temples commonly known as those of the Sibyl and of Drusilla in the quarter called *Castro Vetere*, and the evident pains taken to isolate this part, indicate it to have been the ancient acropolis or arx, and probably the Sicelion of Dionysius. On the W. the boundary is marked by some remains of the walls and of the gate opening on the road to Rome. On investigating this track, we find that it inclined inwards towards the church of the *Annunziata*, leaving out all that part now occupied by the *Villa d'Este* and its appurtenances. From that church it proceeded towards the modern gate of *Santa Croce* and the citadel built by Pope Pius II. on the site of the ancient amphitheatre. Thence to the Anio two points serve to fix the direction of the walls: first, the church of *S. Clemente*, which was certainly outside of them, since, according to the testimony of Marzi, some sepulchral stones were discovered there; second, the church of *S. Vincenzo*, which was certainly within them, as vestiges of ancient baths may still be seen at that spot. From the fortress of Pius II. the wall seems to have proceeded in an almost direct line to the Anio between the church of *S. Bartolommeo* and the modern gate of *S. Giovanni*. It did not extend to the opposite bank, as a small sepulchre of the imperial times has recently been discovered there, at the spot where the tunnel for diverting the Anio was opened; where also were found remains of an ancient bridge. Thus the plan of the city, with the abatement of some irregularities, formed two trapeziums joined together at their smallest sides. The arx also formed a trapezium completely isolated, and was connected with the town by a bridge on the same site as the present one of *S. Martino*. The circumference of the city, including the arx, was about 8000 Roman feet, or $1\frac{1}{2}$ miles. The remains of the wall which still exist are of three different epochs. The rarest and most ancient consist of trapezoidal masses. Others, near the *Porta Romana* or *del Colle*, are of opus incertum, and belong to the time of Sulla. The gate itself, though composed of quadrilateral masses, is of the style of the gates of Rome of the age of Justinian. From the nature of the place and the direction of the ancient roads, Tibur must have had five gates; namely, three towards the W., one towards the S., and one towards the E., without counting that which communicated with the citadel; but with the exception of the Reatina, where the aqueduct called Anio Vetus began, their names are unknown, and even with regard to that the reading is doubtful. (Front. *Aq.* p. 30.)

The ancient remains existing at *Tivoli*, to call them by the names under which they commonly pass, are, the temple and portico of Hercules, the temples of Vesta and Sibylla, the thermae or baths, the two bridges and the little tomb recently discovered, the temple of Tussis, the villas of Maecenas, of Varus, &c.

Tibur was famed for the worship of Hercules, and hence the epithet of Herculean, so frequently applied to it by the Roman poets (Prop. ii. 32. 5; Sil. It. iv. 224; Mart. i. 13. 1, &c.; cf. Stat. *Silv.* iii. 1. 183.) The temple of that demigod at Tibur was, with the exception of the vast temple of Fortune at Praeneste, the most remarkable presented by any city in the neigbourhood of Rome. Thus Strabo (*l. c.*) mentions the Heracleum and the waterfall as the distinguishing features of Tibur, just as he alludes to the temple of Fortune as the principal object at Praeneste. And Juvenal (xiv. 86, seq.) censures the extravagance of Cetronius in building by saying that his villas at Tibur and Praeneste outdid the fanes of Hercules and Fortune at those places. The name of Heracleum used by Strabo of the former, as well as the term τέμενος applied to it by Stephanus Byzantinus, show that it embraced a large tract of ground, and as Augustus is said to have frequently administered justice in its porticoes (Suet. *Oct.* 72), they must have been of considerable size. It possessed a library, which, however, in the time of the Antonines appears to have fallen into decay. (A. Gell. *N. A.* xix. 5.) We have already seen that it had a treasury. There was also an oracle, which, like that at Praeneste, gave responses by means of sortes. (Stat. *Silv.* i. 3. 79.) Some antiquaries seek this vast temple behind the tribune of the present cathedral, where there are some remains of a circular cella composed of materials of a rhomboidal shape, thus marking the transition in the mode of building which took place about the age of Augustus from the opus incertum to the opus reticulatum. But it would be difficult to regard these vestiges as forming part of a temple 150 feet in circumference; nor was it usual to erect the principal Christian church on the foundations of a heathen temple. Nibby therefore (*Dintorni*, iii. p. 193), after a careful investigation, and a comparison of the remains at *Palestrina* with those of the so-called villa of Maecenas at *Tivoli*, is inclined to regard the latter, which will be described further on, as belonging to the celebrated temple of Hercules. It is probable, however, that there were several temples to that deity at Tibur, just as there were at Rome. The principal one was doubtless that dedicated to Hercules Victor Tiburs; but there was also one of Hercules Saxanus, which will be described by and by; and the remains at the cathedral may have belonged to a third. It is pretty certain, however, that the Forum of Tibur was near the cathedral, and occupied the site of the present *Piazza dell' Ormo* and its environs, as appears from a Bull of Pope Benedict VII. in the year 978, referred to by Ughelli in his *Italia Sacra* (t. i. p. 1306), and copied by Marini (*Papiri Diplomatici*, p. 316). In this Bull, the object of which was to determine the rights and jurisdiction of the bishop of *Tivoli*, many places in the town are mentioned by their ancient names; as the Forum, the Vicus Patricius, the Euripus, the Porta Major, the Porta Obscura, the walls, the postern of Vesta, the district of Castrum Vetus, &c. The round temple at the cathedral belonged therefore to the Forum, as well as the crypto-porticus, now called *Porto di Ercole* in the street *del Poggio*. The exterior of this presents ten closed arches about 200 feet in length, which still retain traces of the red plaster with which they were covered. Each arch has three loopholes to serve as windows. The interior is divided into two apartments or halls, by a row of twenty-eight slender pillars. Traces of arabesque painting on a black ground may still be seen. The mode of building shows it to be of the same period as the circular remains.

In that part of the city called *Castro Vetere*, which Nibby identifies with the arx, are two temples, one round, the other oblong, both of which have been variously identified. The round one, a charming relic of antiquity, is commonly regarded as the temple of the Sibyl. We know that the tenth and last of the Sibyls, whose name was Albunea, was worshipped at Tibur (Varro, ap. Lactant. *de Falsa Rel.* i. 6; cf. δεκάτη ἣ Τιϐουρτία ὀνόματι 'Αλϐουναία, Suid. p. 3302 Gaisf.); and Horace evidently alludes to her when he speaks of the "domus Albuneae resonantis" at that place. (*Od.* i. 7. 12.) It can scarcely be doubted therefore that she had a fane at Tibur. But Nibby is of opinion that the epithet of "resonantis," which alludes to the noise of the waterfall, is inapplicable to the situation of the round temple on the cliff; for though it immediately overhung the fall, before the recent diversion of the stream, the cataract, as before shown, must in the time of Horace have been lower down the river. This objection however, may perhaps be considered as pressing a poetical epithet rather too closely; nor is there anything to show how far the fall may have been removed by the catastrophe described by the younger Pliny. Some writers have ascribed the temple to Vesta, an opinion which has two circumstances in its favour: first, we know that Vesta was worshipped at Tibur, from inscriptions recording the Vestal virgins of the Tiburtini; secondly, the temples of Vesta were round, like the celebrated one near the Roman forum. Unfortunately, however, for this hypothesis, the Bull of Pope Benedict before referred to shows that the district of Vesta was on the opposite side of the river. Hence Nibby (*Dintorni*, iii. p. 205) regards the building in question as the temple of Hercules Saxanus. We know that round temples were sometimes erected to that deity, as in the Forum Boarium at Rome; and the epithet of Saxanus is applicable to the one in question, from its being seated on a rock. It may be observed, however, that Saxanus is not a usual derivative form from Saxum; and on the whole it may perhaps be as satisfactory to follow the ancient tradition which ascribes the temple to the Sibyl. It is of the style called peripteral, or having columns all round. These were originally eighteen in number, but only ten now remain, of which seven are isolated and three are built into the wall of a modern structure; but in such a manner that the sides towards the cell are visible. The columns are of *travertino*, of the Corinthian order, and channelled: hence the temple bears considerable resemblance to that in the Forum Boarium at Rome. According to the Bull before quoted, it was, in the 10th century, a church dedicated to the Virgin Mary.

The same was the case with the adjoining temple, which was dedicated to S. George. This building is also principally of *travertino*. It has four columns in front, now hidden by modern houses, and six at each side, five of which are built into the walls of the cella to the extent of two-thirds of their circumference. Hence it was of the style called prostylos tetrastylos pseudo-peripteros. The columns are of the Ionic order. From an inscription found near it, some writers have inferred that the temple was dedicated to the worship of Drusilla, the sister of Caligula: but the style of building is considerably earlier, and belongs to the age of Sulla. Others have called it the temple of the Sibyl. Professor Nibby (*Dintorni*, iii. p. 210) started a novel hypothesis, and regarded it as the temple of Tiburtus, or Tiburnus. It is certain that the eponymous founder of the city enjoyed divine honours in it, as we see from Horace ("Tiburni lucus," *Od.* i. 7. 13) and Statius ("illa recubat Tiburnus in umbra," *Silv.* i. 3. 74). But these expressions refer to a sacred grove or *τέμενος*, probably with a shrine, or perhaps merely an altar, and therefore situated, in all likelihood, in the outskirts of the town, and not in a narrow crowded place like the arx. And we must here point out a little inconsistency into which the learned professor has fallen: for whilst he objects to the round temple being called that of Vesta, on the ground that it was not within hearing of the waterfall, when that was in its ancient state, yet he regards the square one, which immediately adjoins it, as the temple of Tiburnus, because it was close to the cataract. On the whole, therefore, we must for the present content ourselves with one of the ancient names for this building, or else, which may perhaps be the safer course, leave it altogether unidentified.

The catastrophe of 1826 brought to light the remains of a bridge; and another still more perfect one was discovered in 1832, in the progress of the works for diverting the course of the river. At the same time the workmen came upon a small tomb, between the Via Valeria and the banks of the river, containing several skeletons and monumental stones. Among these was a cenotaph to Senecio, who was consul for the fourth time A. D. 107, and several inscriptions. Under this tomb was an ancient aqueduct, intended to distribute the waters of the Anio among the adjacent villas.

There are no other remains in the town except some fine opus reticulatum et lateritium, near the church of S. Andrea. At this spot were discovered, in 1778, some large and handsome columns with Corinthian capitals, and also the pedestal of a statue to Fur. Maecius Graccus, with an inscription connecting it with some embellishment of the baths. Hence we may conclude that the thermae were situated here.

Outside the city, on the Via Constantiana, is the building known as the temple of Tussis, for which appellation, however, no authority exists. Externally it is of an octagon form, but round inside.

Nibby holds that it is not anterior to the 4th century of our era, its construction resembling that of the villa of Maxentius on the Via Appia. There are traces of painting of the 13th century, showing that then, if not previously, it was a Christian church. A little further on we come to an inscription which records the levelling of the Clivus Tiburtinus in the time of Constantius and Constans. The name of the latter is purposely effaced, no doubt by the order of Magnentius. This monument was discovered in 1736, and re-erected by order of the magistrates of Tibur at the same spot where it was found.

The delightful country in the vicinity of Tibur caused many villas to be erected there during the latter period of the Republic and under the first Caesars, as we see from the writings of Catullus, Horace, Propertius, Statius, and other poets. Of these villas, however, of which we shall mention only the more interesting, there are but few remains, and scarcely any that can be identified with certainty. The most striking are those commonly called the villa of Maecenas on the SW. side of the town, near the *Cascatelle.* Ligorio was the first who called this building the villa of Maecenas; but there is no authority for the assumption. It was probably founded on a wrong conception of a passage in Horace (*Od.* iii. 29. 6, seq.), which is also quoted by Mr. Cramer (*Italy*, vol. ii. p. 60) under a misapprehension that it contains an allusion to a residence possessed by Maecenas at Tibur, instead of to his town-house on the Esquiline. The plan of this building published by Marquez and Uggeri is correct. It was founded on gigantic substructions, the magnitude of which may be best observed on the N. side, or that towards the valley of the Anio. It is an immense quadrilateral edifice, 637½ feet long, and 450 broad, surrounded on three sides by sumptuous porticoes. The fourth side, or that which looks towards Rome, which is one of the long sides, had a theatre in the middle of it, with a hall or saloon on each side. The porticoes are arched, and adorned on the side towards the area with half columns of the Doric order. Behind is a series of chambers. An oblong tumulus now marks the site of the house, or, according to Nibby, who regards it as the temple of Hercules, of the Cella. The pillars were of travertine, and of a beautiful Ionic order. One of them still existed on the ruins as late as 1812. This immense building intercepted the ancient road, for which, as appears from an inscription preserved in the Vatican, a vault or tunnel was constructed, part of which is still extant. Hence it gave name to the *Porta Scura*, or *Obscura*, mentioned in the Bull of Benedict, which it continued to bear at least as late as the 15th century.

To our apprehension, the plan here laid down is rather that of a palace or villa, than of a temple, nor do we perceive the resemblance, insisted on by Nibby, to the temple of Fortune at Praeneste. It is not probable that the chief fane of Hercules, the patron deity of Tibur, should have been erected outside the town, nor would it have been a convenient spot for Augustus to administer justice, as we have mentioned that he did in his frequent retirements to Tibur, in the porticoes of the temple of Hercules. The precincts of the Forum would have been more adapted to such a purpose. But if that emperor so much frequented Tibur, evidently the favourite among all his country retreats (Suet. *l. c.*), he must have had a suitable residence for his reception. Might not this villa have been his palace? Nibby himself observes that the style of building is of the Augustan, or transition, period; and a subject would scarcely have ventured to occupy the highroad with his substructions. But we offer this notion as a mere conjecture in favour of which we can adduce nothing but its probability.

Catullus had a paternal estate in the neighbourhood of Tibur; and the pretended site of his house is still pointed out in the valley by *Monte Catillo.* It is evident, however, from his address to his farm (*Carm.* 42), that it was more distant from the town, and lay at a point where the boundary between the Sabine and the Tiburtine territory was uncertain. He himself wished it to be considered as in the latter, probably as the more fashionable and aristocratic situation; but his ill-wishers persisted in asserting that it was Sabine. Horace had also a residence at Tibur, besides his Sabine farm; and, according to his biographer, it was situated near the grove of Tiburnus (Suet. *Vit. Hor.*); but whether it was at the spot now pointed out, near the hermitage of *S. Antonio*, on the road from *Tivoli* to the *Cascatelle*, is very problematical, the remains there being, according to Nibby (*Dintorni*, iii. p. 221), of a period anterior to that of Horace. Nibby would identify them as belonging to the villa of Sallust, who, if we may trust the *Declamatio in Sallustium* (c. 7) falsely ascribed to Cicero, had a residence at Tibur. But this is mere conjecture. Equally uncertain is the site of the villa of Vopiscus, a poet of the age of Domitian, of which Statius has left us a pretty description (*Silv.* i. 3). The grounds seem to have extended on both sides of the river, and from certain particulars in the description, Nibby (*Dintorni*, iii. p. 216) imagines that he has discovered the spot near the place commonly assigned to the villa of Catullus and the grove of Tiburnus, in the valley between *M. Catillo* and *M. Peschiavatore.* The Cynthia of Propertius, whose real name was Hostia (Appul. *Apol.* ii. p. 405, ed. Bosscha), lived and died at Tibur (Prop. iii. 30, iv. 7. 85, &c.); so that scarcely any place was more associated with the domestic life of the Roman poets. The situation of the villa of Quintilius Varus, a little further on the same road, is rather better supported than most of the others. Horace alludes to the estate of Varus at Tibur, which appears to have lain close to the town (*Od.* i. 18. 2). A tract on the declivity of *Monte Peschiavatore*, opposite to the *Cascatelle*, bore the name of *Quintiliolo* as far back as the 10th century, and the little church at this spot is called *La Madonna di Quintiliolo*, an appellation which may possibly have been derived from the family name of Varus. Here are the remains of a magnificent villa, in which marble pavements, columns, capitals, statues, consular coins, &c., have been discovered, and especially, in 1820, two beautiful marble Fauns, now in the Vatican. Just below this villa is the *Ponte Acquoria*, which, as well as the surrounding district, takes its name, literally "the golden water," from a beautifully clear spring which rises near it. This bridge was traversed by the primitive Via Tiburtina. One arch of it still remains, constructed of large blocks of travertine. Near it is another bridge of bricks of the imperial times, as well as a modern one of the 15th century, but none of these are at present in use. On the other side of the river, which is crossed by a rude wooden bridge, the road ascends the Clivus Tiburtinus in returning towards the town. Portions of the pavement are in complete preservation. Under a rock on the right is an ancient artificial cave, called by the local antiquaries *Il Tempio del Mondo*, but which was probably either a sepulchre, or one of those caves consecrated by the ancients to the rustic tutelary deities. This road joins the Via Constantia before mentioned, leading up to the ruins of the so-called villa of Maecenas.

Outside the *Porta S. Croce* is a district called *Carciano*, a corruption of the name of Cassianum which it bore in the 10th century, derived from a magnificent villa of the gens Cassia which was situated in it. In the time of Zappi, in the 16th century, a great part of this building was extant. The splendour of this residence is attested by the numerous beautiful statues found there, many of which were acquired by Pope Pius VI. and now adorn the Vatican. In the neighbourhood of Tibur are also the remains of several aqueducts, as the Anio Vetus, the Aqua Marcia, and the Aqua Claudia. The ruins of the sumptuous villa of Hadrian lie about 2 miles S. of the town. A description of it would be too long for this place, and it will suffice to say that, in a circuit of about 8 miles, it embraced, besides the imperial palace and a barracks for the guard, a Lyceum, an Academy, a fac-simile of the Poecile at Athens and of the Serapeum at Alexandria, a vale of Tempe, a Tartarus, a tract called the Elysian Fields, a stream called the Euripus, numerous temples, &c. (Cf. Nibby, *Viaggio Antiquario*, vol. i.; *Analisi della Carta de' Dintorni di Roma*, v. viii.; Gell, *Topography of Rome and its vicinity*, ed. Bunbury; Ant. del Ré, *Antichità Tiburtine*; Cabrale and F. del Ré, *Della Villa e de' Monumenti antichi della Città e del Territorio di Tivoli*; Santo Viola, *Storia di Tivoli*; Keller, *De vetere cum novo Tibure comparato*: concerning the villa of Hadrian, Piero Ligorio, *Pianta della Villa Tiburtina*; Fea, *ap. Winckelmann*, ii. p. 379.) [T. H. D.]

TIBURES or TIBURI (Τειϐούρων in gen., Ptol. ii. 6. § 37), a branch of the Astures in Hispania Tarraconensis, whose principal town was Nemetobriga. [T. H. D.]

TICHIS (*Tech*), a river of Gallia Narbonensis, placed by Mela (ii. 5) in the "Ora Sardonum" [Sardones]. The Tichis is the Tecum of Pliny (iii. 4). The *Tet* and the *Tech*, two small rivers, cross the territory of *Roussillon* from west to east. The Tichis is named Illiberis or Illeris by other writers. [Illiberis.] [G. L.]

TI'CHIUM. [Teichium.]

TICHIUSSA (Τειχιοῦσσα), is mentioned twice by Thucydides (viii. 26, 28) as a fortified place in Caria in the territory of Miletus. Stephanus B. speaks of it under the name of Τειχιόεσσα, and Athenaeus knew it under the name of Τειχιοῦς (viii. p. 351.) It seems to have been situated on the north coast of the bay of Iassus. [L. S.]

TICHOS or TEICHOS. [Dyme.]

TICINUM (Τίκινον: *Eth.* Ticinensis: *Pavia*), a city of Gallia Transpadana, situated on the river Ticinus, from which it derived its name, about 5 miles above the junction of that stream with the Padus. According to Pliny it was founded by the two tribes of the Laevi and Marici, at the period of the first Gaulish immigrations into this part of Italy. (Plin. iii. 17. s. 21.) But it is remarkable that no mention is found of any town on the site during the operations of P. Scipio against Hannibal in B. C. 218, though he must have crossed the Ticinus in the immediate neighbourhood of the spot where the city afterwards stood. It is probable, indeed, that in this, as in many other cases, the rise of a town upon the spot was mainly owing to the existence of a convenient passage across the river. There seems no reason to doubt that under the Roman government Ticinum had grown up into a considerable municipal town before the close of the Republic, though its name is not noticed in history. But it is mentioned by all the geographers, and repeatedly figures in history during the Roman Empire. It is included by Ptolemy among the cities of the Insubres, and would naturally be so reckoned, though not of Insubrian origin, as soon as the river Ticinus came to be considered as the boundary of that people. (Strab. v. p. 217; Plin. iii. 17. s. 21; Ptol. iii. 1. § 36.)

The earliest mention of Ticinum in history is on occasion of the death of Drusus, the father of Germanicus, when we are told that Augustus advanced as far as Ticinum to meet his funeral procession. (Tac. *Ann.* iii. 5.) Its name is also repeatedly mentioned during the civil wars of A.D. 69, when its position on the great highroad that led from the foot of the Alps to join the Aemilian Way at Placentia, rendered it an important post. It was the scene of a serious sedition among the troops of Vitellius, while that emperor halted there. (Id. *Hist.* ii. 17, 27, 30, 68, 88.) At a later period it was at Ticinum that the emperor Claudius (the second of the name) was saluted with the imperial title, while he was commanding the garrison of the city. (Vict. *Caes.* 33, *Epit.* 34.) It was there also that Constantius took leave of his nephew Julian, whom he had just raised to the rank of Caesar. (Ammian. xv. 8. § 18.) From these frequent notices of Ticinum it seems probable that it had already risen under the Roman Empire into a flourishing municipal town, and derived importance from its position, the great highroad which formed the continuation of the Aemilian Way from Placentia to the foot of the Alps passing through Ticinum, until the increasing importance of Mediolanum, which became the second capital of Italy, made it customary to proceed through that city instead of following the direct route. (*Itin. Ant.* pp. 283, 340, 347.)

But though Ticinum was undoubtedly a considerable town under the Roman Empire, it was not till after the fall of that empire that it rose to the position it subsequently occupied. In A. D. 452, indeed, it had sustained a great calamity, having been taken and devastated by Attila (Jornand. *Get.* 42); but the Gothic king Theodoric, being struck with the importance of its position, not only raised it from its ruins, but erected a royal palace there, and strengthened the city with fresh fortifications, until it became one of the strongest fortresses in this part of Italy. It consequently bears an important part in the Gothic wars, that people having made it their chief stronghold in the north of Italy (Procop. *B. G.* ii. 12, 25, iii. 1, iv. 32, &c.), in which the royal treasures and other valuables were deposited. At the time of the Lombard invasion, it offered a prolonged resistance to the arms of Alboin, and was not taken by that monarch till after a siege of more than three years, A. D. 570 (P. Diac. *Hist. Lang.* ii. 26, 27). It thenceforth became the residence of the Lombard kings, and the capital of the kingdom of Italy, and continued to hold this position till A. D. 774, when Desiderius, the last of the Lombard kings, was compelled to surrender the city to Charlemagne, after a blockade of more than 15 months.

From this time Ticinum sank again into the condition of an ordinary provincial town, which it has retained ever since. Before the close of the Lombard period we find that it was already designated by the name of Papia, from which its modern appellation of *Pavia* is derived. Paulus Diaconus calls it "Ticinus quae alio nomine Papia appellatur" (P. Diac. ii. 15); and the anonymous Geographer of Ravenna gives the same double appellation (Geogr. Ravenn. iv. 30). The most probable explanation of this change of name is that when Ticinum became admitted to the rights of a Roman municipium its inhabitants were enrolled in the Papian tribe, a fact which we learn from inscriptions (Gruter, *Inscr.* p. 1093. 7; Murat. *Inscr.* p. 1087. 1, p. 1119. 4), and that in consequence of this the city came to be known as "Civitas Papia," in contradistinction to Mediolanum, which belonged to the Ufentine tribe. (Aldini, *Antiche Lapidi Ticinesi*, pp. 43—60.)

The modern city of *Pavia* contains no remains of antiquity except a few sarcophagi and inscriptions. These confirm the municipal condition of the city under the Roman Empire, but are not in themselves of much interest. [E. H. B.]

TICINUS (Τίκινος: *Ticino*), a considerable river of Northern Italy, and one of the most important of the northern tributaries of the Padus. It has its sources among the high Alps, in the Mons Adula or *Mont St. Gothard*, and, where it first emerges from the Alpine valleys forms an extensive lake, called the LACUS VERBANUS or *Lago Maggiore*. Where it issues from this again it is a deep, clear, and rapid stream, and flows through the level plains of *Lombardy*, with a course of above 60 miles, passing under the walls of Ticinum (*Pavia*), and discharging its waters into the Padus or *Po*, about 3 miles below that city. (Strab. iv. p. 209, v. p. 217; Plin. ii. 103. s. 106, iii. 19. s. 23.) Throughout this lower part of its course (from the *Lago Maggiore* to the *Po*) it is navigable for vessels of considerable burden; but the extreme rapidity of the current renders the navigation inconvenient if not dangerous. Its banks are low and marshy, the river being bordered on each side by a belt of thickets and marshy woods. This character of its banks is noticed by Claudian (*de VI. Cons. Hon.* 194), while Silius Italicus alludes to the beautiful clearness of its waters. (Sil. Ital. iv. 82.)

The Ticinus appears to have been recognised at an early period as the boundary between the Insubrians and their neighbours the Libicii and Laevi (Liv. v. 34, 35). From its geographical position it must always have presented a formidable barrier to any invader advancing into Italy after having crossed the Cottian, Graian or Pennine Alps, and for this reason its banks have been the scene of many successive battles. Even in the first descent of the Gauls into the plains of Northern Italy, we are told that they defeated the Etruscans in a battle near the river Ticinus (Liv. v. 34). But much the most celebrated of the contests which were fought on its banks was that between Hannibal and P. Scipio in B.C. 218, shortly after the descent of the Carthaginian general into Italy. The precise scene of this action cannot, however, be determined; but it appears to have been fought on the W. or right bank of the Ticinus, at a short distance from the Padus, and probably not far from the site of Ticinum or *Pavia*. Livy marks it more distinctly as being within 5 miles of a place called Victumvii (?); but as no other mention of this obscure name occurs, this lends us no assistance. (Liv. xxi. 45.) The narrative of Polybius is far from clear and has given rise to considerable discussion. Scipio, who had hastened from Pisae into Cisalpine Gaul, on hearing that Hannibal had actually crossed the Alps and descended into the plains of Italy, advanced to meet him, crossed the Padus by a bridge constructed for the occasion, and afterwards crossed the Ticinus in like manner. After this, Polybius tells us, "both generals advanced along the river, on the side facing the Alps, the Romans having the stream on their left hand, the Carthaginians on their right" (iii. 65). It is clear that this is not consistent with the statement that the Romans had crossed the Ticinus*, as in ascending that river they would have had the stream on their right, unless we suppose "the river" to mean not the Ticinus but the Padus, which is at least equally consistent with the general plan of operations. Hannibal was in fact advancing from the country of the Taurini, and no reason can be assigned why he should have turned so far to the N. as to be descending the Ticinus, in the manner supposed by those who would place the battle near *Vigevano* or *Borgo S. Siro*. If we are to understand the river in question to be the Ticinus, the words of Polybius above quoted would necessarily require that the battle should have been fought on the *left* bank of the Ticinus, which is at variance with all the other particulars of the operations, as well as with the probabilities of the case. The battle itself was a mere combat of cavalry, in which the Roman horse was supported by a portion of their light-armed troops. They were, however, defeated, and Scipio at once retreated to the bridge over the Padus, leaving a small body of troops to break up that over the Ticinus. These troops, 600 in number, were cut off and made prisoners by Hannibal, who, however, gave up the attempt to pursue Scipio, and turned up the stream of the Padus, till he could find a point where he was able to construct a bridge of boats across it. (Pol. iii. 65, 66.) The account of Livy (which is based mainly upon that of Polybius, though he must have taken some points, such as the name of Victumvii, from other sources) agrees with the above explanation, though he certainly seems to have transferred what Polybius relates as occurring at the bridge over the Ticinus to that over the Padus. It appears also by his own account that there was considerable discrepancy among his authorities as to the point at which Hannibal eventually crossed the Padus. (Liv. xxi. 45—47.) It may therefore on the whole be assumed as probable that the battle was fought at a short distance W. of the Ticinus, and not close to the banks of that river: the circumstance that Scipio had encamped on the banks of the Ticinus just before, and advanced from thence to meet Hannibal will explain why the battle was always called the "pugna ad Ticinum" or "apud Ticinum."

Two other battles were fought in the same neighbourhood before the close of the Roman empire: one in A.D. 270, in which the Alemanni, who had invaded Italy, were finally defeated by the Emperor Aurelian (Vict. *Epit.* 35): the other in A.D. 352, between the rival emperors Magnentius and Constantius. (*Ib.* 42.) [E. H. B.]

---

* Polybius, indeed, does not distinctly say that the Romans crossed the Ticinus, but it is implied in his whole narrative, as he tells us that the consul ordered a bridge to be built over the Ticinus with the purpose of crossing that river, and afterwards relates their advance without further allusion to it (iii. 64, 65). But after narrating the defeat and retreat of Scipio, he says that Hannibal followed him as far as the bridge on *the first river*, which can be no other than the Ticinus. (*Ib.* 66.)

TIERNA (called by Ptol. Δίερνα, iii. 8. § 10), a town of Dacia on the Danube, opposite to the castle of Zernes (*Old Orsova*) in Moesia. In inscriptions we find it called Statio Tsiernensis (Murat. p. 332. 3; Griselini, i. p. 265); in the Digest (*de Cens.* i. 8), Colonia Zernensium; and in the *Not. Imp.* (c. 3), Trans Diernis. [T. H. D.]

TIFATA (τὰ Τιφατηνὰ ὄρη, Dion Cass.: *Monte di Maddaloni*), a mountain ridge on the borders of Campania and Samnium, only about a mile from the city of Capua. It is one of the last outlying masses of the Apennines, and is a long, narrow ridge of no great elevation, but above 12 miles in length from E. to W., and presenting a bold and steep mountain front towards the Campanian plain, upon which it looks directly down. The name was derived according to Festus from the woods of evergreen oak with which it was covered, "Tifata" being equivalent to "iliceta," though whether it was an Oscan or old Latin word, we are not told. (Fest. *s. v. Tifata.*) It is first mentioned during the war between the Samnites and Campanians which immediately preceded the First Samnite War. On that occasion the Samnites in the first instance occupied the ridge itself with a strong force, and afterwards drew out their main army into the plain below, where they soon defeated the Campanians in a pitched battle. (Liv. vii. 29.) Livy calls it on this occasion "Tifata, imminentes Capuae colles," and elsewhere "montem imminentem Capuae" (xxvi. 5), which well describes its character and situation. It was this opportune position with regard to Capua and the surrounding plain, that caused it to be selected by Hannibal as a post where he established his camp in B. C. 215, and from whence he long carried on his operations against the various cities of Campania. (Id. xxiii. 36, 37, 39, 43, xxvi. 5; Sil. Ital. xii. 487.) At a later period it was in the plain at the foot of Tifata that Sulla defeated the Marian general Norbanus, B. C. 83; and in gratitude for this victory, he consecrated a considerable tract of territory to Diana, the tutelary goddess of the mountain. (Vell. Pat. ii. 25.) We hence learn that that divinity had a celebrated temple on Tifata, and the "Dianae Tifatinae fanum" is noticed also in inscriptions found at Capua. From one of these we learn that the consecrated territory was again assigned to the goddess by Vespasian. (Orell. *Inscr.* 1460, 3055.) As the Tabula marks a station "Ad Dianae" near the W. extremity of the ridge, it is probable that the temple was situated in that neighbourhood. (*Tab. Peut.*) From the same authority we learn that Jupiter, who was worshipped on so many of the highest points of the Apennines, had a temple also on Tifata, to which it gives the name of Jovis Tifatinus. It is placed in the Tabula at the E. extremity of the ridge. (*Tab. Peut.*) Again in B. C. 48 the fastnesses of this mountain ridge afforded a shelter to Milo when driven from Capua. (Dion Cass. xlii. 25.) This is the last time its name is mentioned in history, and it is not noticed by any of the geographers: in the middle ages the name seems to have been wholly forgotten; and the mountain is now called from a neighbouring village the *Monte di Maddaloni.* But the descriptions of Livy and Silius Italicus leave no doubt of the identification. It is indeed, from its proximity to Capua and the abruptness with which it rises from the plain, one of the most striking natural features of this part of Campania. [E. H. B.]

TIFERNUM (Τίφερνον) was the name of two cities or towns of Umbria, which were distinguished by the epithets Tiberinum and Metaurense (Plin. iii. 14. s. 19).

1. TIFERNUM TIBERINUM, which appears to have been the most considerable place of the name, was situated on or near the site of the modern *Città di Castello*, in the upper valley of the Tiber, about 20 miles E. of *Arezzo.* The Tifernates Tiberini are enumerated among the municipal communities of Umbria by Pliny (*l. c.*); but our principal knowledge of the town is derived from the epistles of the younger Pliny, whose Tuscan villa was situated in its neighbourhood. For this reason the citizens had chosen him at a very early age to be their patron; and in return for this honour he had built a temple there at his own expense. (Plin. *Ep.* iv. 1.) He afterwards adorned this with statues of the various Roman emperors, to which he in one of his letters begs leave to add that of Trajan (*Ib.* x. 24). From the circumstance that Pliny's villa itself was in Etruria (whence he always calls it his *Tuscan* villa), while Tifernum was certainly in Umbria, it is evident that the frontier of the two countries ran very near the latter place, very probably as that of the Tuscan and Roman States does at the present day, between *Città di Castello* and *Borgo S. Sepolcro.* The position of Tifernum on nearly the same site with the former of these cities seems to be well established by the inscriptions found there and reported by Cluverius (Cluver. *Ital.* p. 624; Gruter, *Inscr.* p. 494. 5). But it was probably situated rather further from the Tiber, as Pliny describes it as being, like Perugia and Ocriculum, "not far" from that river (Plin. iii. 5. s. 9), while the modern *Città di Castello* almost adjoins its banks.

The precise site of Pliny's Tuscan villa cannot be ascertained, as the terms in which he describes its position (*Ep.* v. 6) will apply to many localities on the underfalls of the Apennines in the upper valley of the Tiber. It is, however, most probable that it was situated (as suggested by Cluverius) in the neighbourhood of *Borgo S. Sepolcro*, about 10 miles N. of *Città di Castello*, rather than in the immediate vicinity of Tifernum. (Cluver. *Ital.* p. 590.)

2. TIFERNUM METAURENSE was evidently, as its name implies, situated on the other side of the Apennines, in the valley of the Metaurus. Its name is mentioned only by Pliny among ancient writers; but it is found in several inscriptions (in which the citizens are termed, as by Pliny, Tifernates Metaurenses), and the discovery of these at *S. Angelo in Vado* leaves no doubt that Tifernum occupied the same site as that town, near the sources of the Metaurus, about 20 miles above *Fossombrone.* (Forum Sempronii). (Cluver. *Ital.* p. 621; Orell. *Inscr.* 3049, 3305, 3902.)

It is uncertain which of the towns above mentioned is the Tifernum of Ptolemy (iii. 1. § 53); perhaps the first has the better claim. [E. H. B.]

TIFERNUS (Φίτερνος, Ptol.: *Biferno*), one of the most considerable rivers of Samnium, which has its sources in the heart of that country, near Bovianum (*Bojano*), in a lofty group of mountains, now known by the same name as the river (*Monte Biferno*). This is evidently the same which is called by Livy the TIFERNUS MONS, which the Samnite army had occupied as a stronghold in B. C. 295; but notwithstanding the strength of the position, they were attacked and defeated there by the Roman consul L. Volumnius Flamma (Liv. x. 30, 31). Upon two other occasions during the Samnite wars Livy speaks of Tifernus or Tifernum in a manner that would leave it uncertain whether this mountain fastness is meant, or a town of the same name (Liv. ix. 44, x. 14); but as we have no other mention of a town of Tifernum in Samnium, it is perhaps more probable that in all these cases the mountain of that name is meant. The group thus named is a part of that known collectively as the *Monte Matese*,—one of the most conspicuous mountain masses in Samnium. [SAMNIUM.] The river Tifernus has a course of above 60 miles from its source to the Adriatic, in a general direction from SW. to NE. In the lower part of its course, after leaving the confines of Samnium, it constituted in ancient times the boundary between Apulia and the Frentani. (Mel. ii. 4. § 6; Plin. iii. 11. s. 16, 12. s. 17; Ptol. iii. 1. § 18, where the MSS. have Φίτερνος; but this is probably a mistake for Τίφερνος.) [E. H. B.]

TIGAVA CASTRA (*It. Ant.* p. 38; Tigavae, Plin. v. 2. s. 1; Τιγαῦα, Ptol. iv. 2. § 26), a fortress in Mauretania Caesariensis, between Oppidum Novum and Malliana, variously identified with *El-Herba*, *Cantara*, *Abd-el-Kader*.

TIGRA (called Τίγα by Procopius, *de Aed.* iv. 7), a fortress in Moesia Inferior, near the Danube, and between Sexantaprista and Appiaria (*Itin. Ant.* p. 222). In the *Not. Imp.* it is called Tegra. Variously identified with *Marotin* and a place near *Olughissar*. [T. H. D.]

TIGRANOCERTA (τὰ Τιγρανόκερτα, Strab. xi. pp. 522, 532; Ptol. v. 13. § 22; ἡ Τιγρανοκέρτα, Plut. *Lucull.* 25, &c.), literally, the city of Tigranes, since κέρτα (*kert*, *gerd*, or *karta*) meant, in the Armenian dialect, *city* (Hesych. iii. p. 237). The later capital of Armenia, built by Tigranes on an eminence by the river Nicephorius, a city of considerable size and strongly fortified. It was in a great measure populated with Greeks and Macedonians, taken thither by force from Cappadocia and Cilicia. After Lucullus gained his victory over Tigranes before its walls, he caused a great part of the still unfinished town to be pulled down, and permitted its kidnapped inhabitants to return to their homes. Nevertheless, the town continued to exist, though we hear but little of it subsequently to this event. (Cf. Strab. *ll. cc.* and xii. p. 539, xvi. p. 747; App. *Mithr.* 67; Plut. *Lucull.* 25, sqq.; Tac. *Ann.* xii. 50, xiv. 24, xv. 4; Plin. vi. 9. s. 10.) It has been variously identified with the ruins of *Sert* on the *Chabur*, with *Mejafurkin*, and with *Amid* or *Amadiah*. (See Ainsworth, ii. p. 361; St. Martin, i. p. 173; Ritter, *Erdk.* x. p. 87, xi. p. 106, sqq.) [T. H. D.]

TIGRIS, a celebrated river of Asia. We find various forms of its name, both in Greek and Latin writers. The earlier and more classical Greek form is ὁ Τίγρης, *gen.* Τίγρητος (Herod. vi. 20; Xen. *Anab.* iv. 1. § 3; Arr. *Anab.* vii. 7, &c.), whilst the form ὁ Τίγρις, *gen.* Τίγριδος, and sometimes Τίγριος, is more usual among the later writers. (Strab. ii. p. 79, xv. p. 728; Ptol. v. 13. § 7; Plut. *Lucull.* 22, &c.) Amongst the Romans the *nom.* is constantly Tigris, with the *gen.* Tigris and *acc.* Tigrin and Tigrim among the better writers (Virg. *Ecl.* i. 63; Lucan, iii. 261; Plin. vi. s. 9; Curt. iv. 5, &c.); but sometimes Tigridis, Tigridem (Lucan, iii. 256; Eutrop. ix. 18; Amm. Marc. xxiii. 6. § 20, &c.) According to Pliny, the river in the upper part of its course, where it flowed gently, was called Diglito; but lower down, where it moved with more rapidity, it bore the name of Tigris, which, in the Median language, signified an arrow (cf. Strab. xi. p. 529; Curt. iv. 9; Isid. *Or.* xii. c. 2, &c.) Josephus (*Ant.* i. 1, 2, sq.) and Zonaras (*Ann.* i. 2) mention that it bore the name of Diglad; and in its earliest course it is still called *Daghele*, *Didschle* or *Dadschla*.

According to the general testimony of the ancients the Tigris rose in Armenia (Xen. *Anab.* iv. 1. § 3; Eratosth. *ap. Strab.* ii. p. 80; Plin. vi. 27. s. 31; Ptol. *l. c.*, &c.). Diodorus, indeed, places its sources in the territory of the Uxii in Persia (xvii. 67); but he has here confounded the Tigris with the Pasitigris. Herodotus (v. 52) observes that there were three rivers bearing the name of Tigris, but that they did not spring from the same source; one of them rising in Armenia, another in the country of the Matieni, whilst he does not mention the origin of the third. These two branches, which are not mentioned by any other ancient writer, are the more western and proper sources of the Tigris in Sophene, to the NE. of the cataracts of the Euphrates. The more eastern of them forms the little river Nymphius or Nymphaeus (now the *Batman Su* or river of *Miafarakin*.) The union of these two sources forms the main western arm of the Tigris, which flows for between 100 and 200 miles, first in a NE., then in a S., and lastly in an E. direction, before it joins the main eastern branch of the river, about 62 miles SE. of Tigranocerta. The authors subsequent to Herodotus do not notice his correct account of these sources, but confine themselves entirely to the eastern branch. According to Strabo (xi. pp. 521, 529) this rose in Mount Niphates, at a distance of 2500 stadia from the sources of the Euphrates. But Pliny, who has written in most detail concerning this eastern branch, describes it as rising in a plain of Armenia Major, at a place called Elegosine (vi. 27. s. 31). It then flowed through the nitrous lake of Arethusa, without, however, mingling its waters with those of the lake, and after losing itself at a place called Zoroanda (near the present *Hazur*), under a chain of the Taurus (the *Nimrud Dagh*), burst again from the earth, and flowed through a second lake, the Thospites. After emerging from this, it again sank into the earth with much noise and foam (cf. Strab. xvi. p. 746; Prisc. *Perieg.* 913; Amm. Marc. xxiii. 6. § 15, &c.), and, after a subterranean passage of 25 miles, reappeared at a place called Nymphaeum (cf. Justin, xlii. 3). The account of Strabo, however, varies very considerably from the preceding one of Pliny. The former writer mentions only one lake (xi. p. 529), the description of which entirely resembles Pliny's Arethusa, but which Strabo calls Arsene or Thopitis, meaning evidently the Thospites of Pliny, the present *Wan* in *Tosp*, on which is situated the town of *Ardschisch*, with which the Tigris is in reality quite unconnected. Subsequently the river approaches the Euphrates in the neighbourhood of Seleucia, forming in this part of its course the boundary between Assyria and Mesopotamia. Diodorus Siculus (ii. 11) and Curtius (v. 1) erroneously represent it as flowing through Media, which it does not even touch. Near Seleucia, it was connected with the Euphrates by means of canals (Arrian, *Anab.* vii. 7). After this, it again retires from the Euphrates, till at last, bending its course to the SW., it completely unites with that river, at a place called by Pliny (*l. c.*) Digba, 1000 stadia above their common embouchure in the Persian gulf. Many of the ancients were aware that the two rivers joined one another, and had a common mouth (Plin. *ib.*; Strab. ii. p. 79; Procop. *B. P.* i. 17, &c.), whilst others were of opinion that the Euphrates had a separate embouchure (Onesicritus, *ap. Strab.* xv. p. 729; Arrian, *Anab. l. c.*; and *Ind.* 41; Nearch. p. 37, Huds.). But even those who recognised their junction were not agreed as to which stream it was that received the other, and whether their united course, now the *Shat-el-Arab*, should be called Tigris or Euphrates. Most writers adopted the former name, but Nearchus and Onesicritus preferred that of the Euphrates (cf. Arrian, *Indic.* 41). It is not impossible, however, that the Euphrates may at one time have had a separate mouth (cf. Plin. *l. c.*; Ritter, *Erdk.* x. p. 27). There was also a difference of opinion as to the number of mouths by which the united stream emptied itself into the Persian gulf. Its western mouths were entirely unknown to the ancient Greeks, as Antiochus Epiphanes was the first who caused the coast to the W. of the Tigris to be accurately surveyed; and amongst later conquerors, Trajan alone penetrated as far as this neighbourhood. Hence the ancient Greeks, as well as Pliny (*l. c.*), speak of only one mouth, the breadth of which is given by the latter at 10 miles. Ptolemy, however, mentions two mouths (vi. 3. § 2) at a distance of 1½ degrees apart, which is confirmed by Onesicritus (ap. Philostorg. *Hist. Eccl.* iii. 7, 8), according to whom the island between these mouths was inhabited by the Meseni. But probably by the eastern mouth was meant that of the river Eulaeus, the present *Karún*, one arm of which unites with the Tigris, whilst the other falls into the sea by an independent mouth. This river was also called Pasitigris by the ancients (Πασίτιγρις, Strab. xv. p. 729), that is, "the little Tigris," from the old Persian word *pas*, signifying "small;" whence also among the modern Persians it bears the name of *Didjlahi-Kudak*, which means the same thing. Hence we may explain how the united stream of the Tigris and Euphrates itself was throughout its course called Pasitigris by some writers (Strab. *l. c.*; Plin. *l. c.*); whilst others regarded the Pasitigris as quite a separate stream, rising in the territory of the Uxii, and disemboguing into the Persian gulf (Nearch. *ap. Strab. l. c.*; Arrian, *Ind.* 42; Diodor. xvii. 67; Curt. v. 3, init). This last view would make it identical with the present *Karún* (cf. Kinneir, *Mem.* p. 59; Gosselin, *Recherches, &c.* ii. p. 86, sqq; Vincent, *Peripl.* iii. p. 67, not. &c.). The other affluents of the Tigris were the Nicephorius or Centritis, the Zabatus or Lycus, the Bumadus, the Caprus, the Tornadotus or Torna, apparently the same as the Physcus of Xenophon (*Anab.* ii. 4. § 25), the Gyndes or Delas, the Choaspes, and the Coprates, which fell into the main stream after joining the Eulaeus. All these rivers were on the left or eastern bank of the Tigris. The stream of the Tigris was very rapid, and according to Strabo (p. 529) from its very source; whilst Pliny (*l. c.*) more correctly ascribes this quality only to its lower course. It was, in fact, owing to the large quantity of water which the Tigris received by means of the canals which connected it with the Euphrates, none of which was returned through the same channels, owing to the bed of the Tigris being at a lower level. (Arrian, *l. c.*; Dion Cass. lxviii. 28; Strab. *l. c.*; Hor. *Od.* iv. 14, 46; Lucan, iii. 256, &c.) In ancient times many dams had been constructed in its course from Opis to its mouth, designed to retain its waters for the purpose of irrigating the adjoining districts (cf. Heeren, *Ideen*, i. 2. p. 171; Tavernier, *Voyages*, i. p. 185; Niebuhr, *Reise*, ii. p. 243). These, however, were all cut through by Alexander, in order to improve the navigation, which began as high up as Opis (Arrian, *l. c.*; Strab. 739, sq.) Between *Mosul* and the confluence of the greater *Zab*, and 3 hours' journey above the latter, there still remains an ancient dam of masonry thrown across the stream (Ritter, *Erdkunde*, x. p. 5, sqq.). [T. H. D.]

TIGUADRA, a small island off the coast of Spain, opposite the town of Palma, in the island of Balearis Major. (Plin. iii. 5. s. 11.) [T. H. D.]

TIGURINUS PAGUS. [HELVETII.]

TILADAE (Τιλάδαι, Ptol. vii. 2. § 15), a race who lived under the Mons Maeandrus in Western India. They are probably the same as the Taluctae of Pliny (vi. 19. s. 22). [TALUCTAE.] [V.]

TILAVEMPTUS (Τιλαούεμπτος: *Tagliamento*), a river of Venetia, which has its sources in the Alps, above 80 miles from the sea, and after traversing the broad plain of the *Frioul*, falls into the Adriatic sea between Aquileia and Concordia. (Plin. iii. 18. s. 22; Ptol. iii. 1. § 26.) It is the most considerable river in this part of Italy, and, like all the neighbouring rivers, is subject to be swollen by floods and winter rains, so that it leaves a broad bed of shingle, great part of which is dry at ordinary seasons. The name is found in Pliny and Ptolemy; and it is doubtless the same river which is described by Strabo, though without mentioning its name, as separating the territory of Aquileia from the province of Venetia, and which he says was navigable for 1200 stadia from its mouth. (Strab. v. p. 214.) This last statement is indeed a great exaggeration; but the valley of the *Tagliamento* is one of the natural openings of this part of the Alps, and was followed by the line of a Roman road, which proceeded from Aquileia by Julium Carnicum (*Zuglio*) over the pass of the *Monte di Sta Croce* into the valley of the *Gail*. [ALPES, p. 110.]

Pliny speaks (*l. c.*) of a "Tilaventum majus minusque," but it is impossible to say what river he meant to designate under the latter appellation. The name is written in the Tabula "Tiliabinte," while it assumes very nearly its modern form in the Geographer of Ravenna. (Taliamentum, Geogr. Rav. iv. 36.) [E. H. B.]

TILENE, in Gallia. The name is File in the Table, or Filena as some say. D'Anville altered it to Tilene, and he finds the place on a road in the Table from Andomatunum (*Langres*) to Cabillonum (*Challon-sur-Saône*). The place is *Til-le-Château*, the Tile Castrum of the eleventh century. Some documents of that time have Tiricastrum and Tricastel, and accordingly the place is vulgarly called *Tré-château* or *Tri-château*. [G. L.]

TILPHOSSA FONS. [BOEOTIA, p. 412, a.]

TILPHO'SSIUM or TILPHOSSAEUM. [BOEOTIA, p. 412, a.]

TILURIUM (Geogr. Rav. iv. 31), or TILURI PONS (*Itin. Ant.* p. 337), a place in Dalmatia, on the river Tilurus. It appears to be the same place as the Tribulium of Pliny (iii. 22. s. 26). Now *Trigl.* [T. H. D.]

TILURUS, a river of Dalmatia falling into the sea near Dalminium. (*Itin. Ant.* p. 337; *Tab. Peut.*) Now the *Czettina*. [T. H. D.]

TIMACHUS, a river in Upper Moesia, a tributary of the Danube, which it joined between Dorticum and Florentiana. (Plin. iii. 26. s. 29; *Tab. Peut.*) Now the *Timok*. [T. H. D.]

TIMACUM MAJUS and MINUS (Τίμακον, Ptol. iii. 9. § 5), two towns of Moesia Superior situated on the Timachus. (Geogr. Rav. iv. 7; *Tab. Peut.*) One still exists by the name of *Timok;* but Mannert seeks the larger town near *Iperik*, and the smaller one near *Geurgowatz*. [T. H. D.]

TIMALINUM, a place in Gallaecia in Hispania Tarraconensis (*Itin. Ant.* pp. 425, 430). Variously identified with *Villartelin* and *Fontaneira*. [T. H. D.]

TIMA'VUS (Τίμαυος: *Timao*), a river of Venetia, flowing into the Adriatic sea between Aquileia and Tergeste, about 12 miles E. of the former city. Notwithstanding its classical celebrity, it is one of the shortest of rivers, being formed by copious sources which burst out from the rock at the foot of a lofty cliff, and immediately constitute a broad and deep river, which has a course of little more than a mile before it discharges itself into the sea. There can be no doubt that these sources are the outlets of some subterranean stream, and that the account of Posidonius (*ap. Strab.* v. p. 215), who says that the river after a course of some length falls into a chasm, and is carried under ground about 130 stadia before it issues out again and falls into the sea, is substantially correct. Such subterranean passages are indeed not uncommon in *Carniola*, and it is impossible to determine from what particular river or lake the waters of the Timavus derive their origin; but the popular notion still regards them as the outflow of a stream which sinks into the earth near *S. Canzian*, about 13 miles from the place of their reappearance. (Cluver. *Ital.* p. 193.) The number of the sources is variously stated: Virgil, in the well-known passage in which he describes them (*Aen.* i. 245), reckons them nine in number, and this agrees with the statement of Mela; while Strabo speaks of seven; and this would appear from Servius to have been the common belief (Serv. *ad Aen. l. c.*; Mel. ii. 4. § 3), which is supported also by Martial, while Claudian follows Virgil (Mart. iv. 25. 6; Claudian, *de VI. Cons. Hon.* 198). Cluverius, on the other hand, could find but six, and some modern travellers make them only four. Strabo adds that, according to Polybius, all but one of them were *salt*, a circumstance which would imply some connection with the sea, and, according to Cluverius, who described them from personal observation, this was distinctly the case in his time; for though at low water the stream issued tranquilly from its rocky sources, and flowed with a still and placid current to the sea, yet at high tides the waters were swollen, so as to rush forth with much greater force and volume, and inundate the neighbouring meadows: and at such times, he adds, the waters of all the sources but one become perceptibly brackish, doubtless from some subterranean communication with the sea. (Cluver. *Ital.* p. 194.) It appears from this account that Virgil's remarkable expressions—

> "Unde per ora novem, vasto cum murmure montis
> It *mare* proruptum, et *pelago* premit arva sonanti"

—are not mere rhetorical exaggerations, but have a foundation in fact. It was doubtless from a reference to the same circumstance that, according to Polybius (*ap. Strab. l. c.*), the stream was called by the natives "the source and mother of the sea" (μητέρα τῆς θαλάττης.) It is probable that the communication with the sea has been choked up, as no modern traveller alludes to the phenomenon described by Cluverius. The *Timao* is at present a very still and tranquil stream, but not less than 50 yards broad close to its source, and deep enough to be navigable for vessels of considerable size. Hence it is justly called by Virgil "magnus Timavus" (*Ecl.* viii. 6); and Ausonius speaks of the "aequoreus amnis Timavi" (*Clar. Urb.* xiv. 34).

Livy speaks of the "lacum Timavi," by which he evidently means nothing more than the basin formed by the waters near their source (Liv. xli. 1): it was close to this that the Roman consul A. Manlius established his camp, while C. Furius with 10 ships appears to have ascended the river to the same point, where their combined camp was attacked and plundered by the Istrians. According to Strabo there was a temple in honour of Diomed erected near the sources of the Timavus, with a sacred grove attached to it. (Strab. v. p. 214). There were also warm springs in the same neighbourhood, which are now known as the *Bagni di S. Giovanni*. [E. H. B.]

TIMOLAEUM (Τιμολαῖον), a fort or castle on the coast of Paphlagonia, 40 or 60 stadia to the north of Climax, and 100 or 150 stadia from Cape Carambis. (Marcian, p. 71; Anon. *Peripl. P. E.* p. 6.) [L. S.]

TIMONI'TIS (Τιμωνῖτις), a district in the interior of Paphlagonia, near the borders of Bithynia. (Strab. xii. p. 562; Ptol. v. 1. § 12.) Pliny (v. 42) mentions its inhabitants under the name of Timoniacenses, and Stephanus B. knows Timonium (Τιμώνιον) as a fort in Paphlagonia, from which the district no doubt derived its name. [L. S.]

TINA (Τίνα or Τίννα, Ptol. ii. 3. § 5), a river on the E. coast of Britannia Romana, forming the boundary between it and Britannia Barbara, and still called the *Tyne*. [T. H. D.]

TINCONCIUM, in Gallia, is placed in the Itins. on a road between Avaricum (*Bourges*) and Decetia (*Décise*). In the Table the name is Tincollo. The distance in the Itins. is the same (xx.) from Avaricum to Tinconcium (*Sancoins*), which is named Tincentium in some middle-age documents. The Itins. do not agree in the distance between Tinconcium and Decetia. [G. L.]

TINFADI, a place in Numidia, 22 miles W. of Theveste (*Itin. Ant.* p. 33). According to Lapie, the ruins on the *Oued Hrhia*. [T. H. D.]

TINGENTERA. [TRANSDUCTA.]

TINGIS (Τίγγις, Strab. iii. p. 140, and Τίγα, xvii. p. 827; in Ptol. iv. 1. § 5, Τίγγις Καισάρεια), a very ancient city on the N. coast of Mauretania. Mela (i. 5) calls it Tinge, Pliny (v. 1. s. 1) Tingi. It lay 60 miles W. of the promontory of Abyla (*Itin. Ant.* p. 9, &c) and 30 miles from Belo on the opposite coast of Spain (Plin. *l. c.*). Mela and Pliny record the tradition of its foundation by Antaeus, whilst according to Plutarch it was founded by Sophax, a son of Hercules and the widow of Antaeus (*Sert.* 9). In that neighbourhood was the fabled grave of Antaeus, and his skeleton 60 cubits long (Strab. xvii. 829, cf. iii. p. 422). These mythic legends serve at least to indicate the great antiquity of the place. (Cf. Strab. *l. c.*; Solin. c. 45.) It was raised by Augustus to the rank of a free city

(Dion Cass. xlviii. 45), and in the time of Claudius became a Roman colony (Plin. *l. c.*; *Itin. Ant.* 8, 12) and the capital of the province of Tingitana. It was also a place of considerable trade. Now *Tangier*. [T. H. D.]

TI'NIA (Τενέας: *Timia*), a small river of Umbria, falling into the Tiber, a few miles below Perusia. The name is given by the ancient geographers to the affluent of the Tiber (one of the first tributaries which that river receives), but at the present day the stream called the *Timia* loses its name after its junction with the *Topino*, a more considerable stream. Four small rivers indeed bring down their united waters to the Tiber at this point: 1, the *Maroggia*, which rises between *Todi* and *Spoleto*, and brings with it the waters of the *Clitunno*, the ancient Clitumnus; 2, the *Timia*, which joins the Clitumnus near Mevania (*Bevagna*); 3, the *Topino*, which descends from the Apennines near *Nocera*, and turns abruptly to the NW., after receiving the waters of the *Timia*; and 4, the *Chiascio*, which joins the *Topino* from the N. only 3 miles from the point where it falls into the Tiber. Though thus augmented from various quarters the Tinia was always an inconsiderable stream. Pliny speaks of it as navigable with difficulty even for boats, and Silius Italicus calls it "Tiniae inglorius humor." (Sil. Ital. viii. 452; Plin. iii. 5. s. 9; Strab. v. p. 227.) [E. H. B.]

TINNE'TIO, a place in Rhaetia, mentioned only in the Antonine Itinerary (p. 277), but still retaining its ancient name in the form of *Tinzen*. [L. S.]

TINU'RTIUM, in Gallia, is placed in the Itins. near the *Saône*, between Cabillonum (*Challon*) and Matisco (*Mâcon*). The Antonine Itin. marks M.P. xxi., leugas xiiii. between Cabillonum and Tinurtium, which is *Tournus*. The Table gives only xii., which appears to be nearer the truth. The two Itins. do not agree in the distance between Tinurtium and Matisco. Spartianus (*Vita Septim. Severi*, c. 11) says that Severus defeated Clodius Albinus at Tinurtium, or Trinurtium, for the reading is perhaps doubtful. (Is. Casaubon, in Aelium Spartianum notae). Dion (lxxv. c. 6), Herodian (iii. 7), and Eutropius (viii. 18) speak of Clodius Albinus being defeated by Severus at or near Lugdunum (*Lyon*). The name Tinurtium appears to be sometimes miswritten Tiburtium. [G. L.]

TIORA MATIENA. [Aborigines.]

TIPARENUS, an island off the coast of Hermionis in Argolis, mentioned only by Pliny (iv. 12. s. 19). It is frequently identified with *Spétzia*; but Leake remarks that Tiparenus has no appearance of a Greek name, and conjectures that it is an error for Tricarenus, the same as the Tricrana of Pausanias (ii. 34. § 8) and the modern *Tríkhiri*. (Leake, *Morea*, vol. ii. p. 465; Ross, *Wanderungen in Griechenland*, vol. ii. p. 21).

TIPASA (Τίπασα, Ptol. iv. 2. § 5). 1. A town in Mauretania Caesariensis, endowed with the jus Latii by the emperor Claudius (Plin. v. s. 1) and subsequently a Roman colony (*Itin. Ant.* p. 15). It lay between Icosium and Caesarea (*Ib.*). Procopius (*B. V.* ii. 10) mentions two columns near Tipasa in the SE. of Mauretania, which had on them the following inscription in the Phoenician language: "We are fugitives from the face of Joshua, the robber, and his son Nave." Now *Tefessad* or *Tefesah*.

2. A town in Numidia, on the road from Sicca to Cirta (*Itin. Ant.* p. 41). Now *Tebessa* or *Tifech*. [T. H. D.]

TIPHAE. [Siphae.]

TIPHSAH. [Thapsacus.]

TIPSUM or TIPSUS (*It. Hier.* p. 569), a place in Thrace, now *Sundukli* or *Karassiui*, according to Lapie. [J. R.]

TIRIDA. [Stabulum Diomedis.]

TIRISSA (Geogr. Rav. iv. 6), called by Arrian Τετρισίας (*Per. P. Eux.* p. 24), and in the Tab. Peut. Trissa; a fortified place on the promontory of Tirizis. From its situation on this bold headland it was sometimes called simply Ἄκρα (Steph. B. p. 53; Hierocl. p. 637), and hence at present *Ekerne* or *Kavarna*. [T. H. D.]

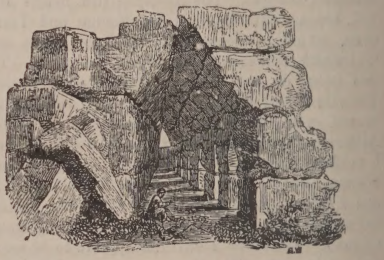
TIRISTASIS (Plin. iv. 11. s. 18; Τειρίστασις, Scyl. p. 28; Τιρίστασις, *Epist. Phil. ad Ath.* ap. Dem. p. 159, R.), a town of the Thracian Chersonesus, on the coast of the Propontis. It was included in the dominions of Philip, who in the letter above referred to complains that the Athenian general Diopeithes had taken it and sold its inhabitants for slaves (B. C. 340) [Diopeithes, *Dict. Biog.*] According to Choiseul, its site is still occupied by a village bearing the same name. [J. R.]

TIRIZIS (Τίριζις, Strab. vii. p 319), a very projecting headland of Moesia in the Pontus Euxinus. The name varies, being written Τίριζα in Anon. (*Perip. P. Eux.* p. 13), Τιριστρίς or Τιριστρία ἄκρα by Ptolemy (iii. 10. § 8), and Tiristis by Mela (ii. 2). Now *Cape Gülgrad*. [T. H. D.]

TIRYNS (Τίρυνς: *Eth.* Τιρύνθιος: the name is perhaps connected with τύῤῥις, Lepsius, *Tyrrh. Pelasger*, p. 13), one of the most ancient cities of Greece, lay a short distance SE. of Argos, on the right of the road leading to Epidaurus (Paus. ii. 25. § 8), and at the distance of 12 stadia from Nauplia. (Strab. viii. p. 373.) Its massive walls, which have been regarded with wonder in all ages, are said to have been the work of the Cyclopes, and belong to the same age as those of Mycenae. (Paus. ii. 16. § 5, ii. 25. § 8, vii. 25. § 6, ix. 36. § 5; Strab. *l. c.*; Plin. vii. 56. s. 57.) Hence Homer calls the city Τίρυνς τειχιόεσσα. (*Il.* ii. 559.) Pindar speaks of the Κυκλώπια πρόθυρα of Tiryns (*Fragm.* 642, ed. Böckh), and Pausanias says that the walls are not less worthy of admiration than the pyramids of Egypt (ix. 36. § 5.) In another passage he describes the walls as consisting of wide masses of stone (ἀργοὶ λίθοι), of such a size, that a yoke of oxen could not stir the least of them, the interstices being filled in with smaller stones to make the whole more compact and solid. (Paus. ii. 25. § 8.) The foundation of Tiryns ascends to the earliest mythical legends of the Argeia. It was said to have derived its name from Tiryns, the son of Argus (Paus. ii. 25. § 8), and to have been founded by Proetus. (Strab. viii. p. 372; Paus. ii. 16. § 2.) According to the common tradition, Megapenthes, the son of Proetus, ceded Tiryns to Perseus, who transmitted it to his descendant Electryon. Alcmena, the daughter of Electryon, married Amphitryon, who would have succeeded to the crown, had he not been expelled by Sthenelus, king of Argos. Their son Hercules afterwards regained possession of Tiryns, where he lived for many years, and hence is frequently called Tirynthius by the poets. (Hes. *Scut.* 81; Pind. *Ol.* x. 37, *Isthm.* vi. 39; Virg. *Aen.* vii. 662; Ov. *Met.* vii. 410.) Although Tiryns was thus closely connected with the Heraclidae, yet the city remained in the hands of the old Achaean population after the return of the Heraclidae and the conquest of Peloponnesus by the

Dorians. The strong fortress of Tiryns was dangerous to the neighbouring Dorian colony of Argos. After the dreadful defeat of the Argives by Cleomenes, their slaves took possession of Tiryns and held it for many years, (Herod. vi. 83.) In the Persian War the Tirynthians sent some men to the battle of Plataea. (Herod. ix. 28.) Subsequently their city was taken by the Argives, probably about the same time as Mycenae, B. C. 468. The lower city was entirely destroyed; the citadel was dismantled; and the inhabitants fled to Epidaurus and Halieis, a town on the coast of Hermionis. (Strab. viii. p. 373; Ephorus, *ap. Steph. B. s. v.* Ἁλιεῖς; Eustath. *ad Hom. Il.* ii. 559, p. 286,) It was probably owing to this circumstance that Stephanus B. (*s. v.* Τίρυνς) was led into the mistake of saying that Tiryns was formerly called Halieis. The Tirynthians, who did not succeed in effecting their escape, were removed to Argos. (Paus. ii. 25. § 8.) From this time Tiryns remained uninhabited; and when Pausanias visited the city in the second century of our era, he saw nothing but the remains of the walls of the citadel, and beneath them towards the sea the so-called chambers of the daughters of Proetus. No trace of the lower city appears to have been left. The citadel was named Licymna, after Licymnius, son of Electryon, who was slain at Tiryns by Tleptolemus, son of Hercules. (Strab. vii. p. 373; Pind. *Ol.* vii. 47.) Hence Statius calls the marshes in the neighbourhood of Tiryns "stagna Licymnia." (*Theb.* iv. 734.) Theophrastus represents the Tirynthians as celebrated for their laughing propensities, which rendered them incapable of attention to serious business (*ap. Athen.* vi. p. 261, d.).

The ruins of the citadel of Tiryns are now called *Paleó Anápli.* They occupy the lowest and flattest of several rocky hills, which rise like islands out of the plain. The impression which they produce upon the beholder is well described by Col. Mure: "This colossal fortress is certainly the greatest curiosity of the kind in existence. It occupies the table summit of an oblong hill, or rather knoll, of small extent or elevation, completely encased in masses of enormous stones, rudely piled in tiers one above another, into the form alternately of towers, curtain walls, abutments, gates, and covered ways. There is not a fragment in the neighbourhood indicating the existence of suburb or outer town at any period; and the whole, rising abruptly from the dead level of the surrounding plain, produces at a distance an effect very similar to that of the hulk of a man-of-war floating in a harbour." The length of the summit of the rock, according to Col. Leake's measurement, is about 250 yards, the breadth from 40 to 80, the height above the plain from 20 to 50 feet, the direction nearly N. and S. The entire circuit of the walls still remains more or less preserved. They consist of huge masses of stone piled upon one another, as Pausanias describes. The wall is from about 20 to 25 feet in thickness, and it had two entrances, one on the eastern, and the other on the southern side. "In its general design the fortress appears to have consisted of an upper and lower enclosure of nearly equal dimensions, with an intermediate platform, which may have served for the defence of the upper castle against an enemy in possession of the lower. The southern entrance led by an ascent to the left into the upper inclosure, and by a direct passage between the upper inclosure and the eastern wall of the fortress into the lower inclosure, having also a branch to the left into the middle platform, the entrance into which last was nearly opposite to the eastern gate. Besides the two principal gates, there was a postern in the western side. On either side of the great southern entrance, that is to say, in the eastern as well as in the southern wall, there were galleries in the body of the wall of singular construction. In the eastern wall, where they are better preserved, there are two parallel passages, of which the outer has six recesses or niches in the exterior wall. These niches were probably intended to serve for the protracted defence of the gallery itself, and the galleries for covered communications leading to towers or places of arms at the extremity of them. The passage which led directly from the southern entrance, between the upper inclosure and the eastern wall into the lower division of the fortress, was about 12 feet broad. About midway, there still exists an immense door-post, with a hole in it for a bolt, showing that the passage might be closed upon occasion. The lower inclosure of the fortress was of an oval shape, about 100 yards long and 40 broad; its walls formed an acute angle to the north, and several obtuse angles on the east and west. Of the upper inclosure of the fortress very little remains. There is some appearance of a wall of separation, dividing the highest part of all from that next to the southern entrance; thus forming four interior divisions besides the passages." (Leake.) The general appearance of these covered galleries is shown in the accompanying drawing from Gell's *Itinerary.* (Leake, *Morea*, vol. ii. p. 350, seq.; Mure, *Tour in Greece*, vol. ii. p. 173, seq.; Curtius, *Peloponnesos*, vol. ii. p. 388, seq.)



GALLERY AT TIRYNS.

TISAEUM (Τισαῖον: *Bardjóia*), a lofty mountain on the promontory of Aeantium in Magnesia in Thessaly, at the entrance of the Pagasaean gulf, on which stood a temple of Artemis, and where in B. C. 207 Philip V., son of Demetrius, caused watch-fires to be lighted, in order to obtain immediate knowledge of the movements of the Roman fleet. (Apoll. Rhod. i. 568; Val. Flacc. ii. 6; Polyb. x. 42; Liv. xxviii. 5; Leake, *Northern Greece*, vol. iv. p. 397.)

TISCANUS (Jornand. *Get.* 5), or Tysca (*Ib.* 34; Geogr. Rav. iv. 14); a river in Thrace, a tributary of the Danube, the modern *Theiss.* [T.H.D.]

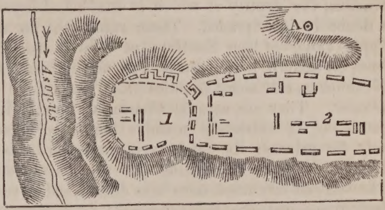
TISEBARICE. [Tesebarica.]

TI'SIA (Τισία: *Eth.* Τισιάτης), a town of the Bruttii, mentioned by Appian in his account of the operations of Hannibal in that country. It had been occupied by that general with a Carthaginian garrison, but was betrayed by one of the citizens into the hands of the Romans, who held it for a short time, but it was soon recovered by Hannibal. (Appian, *Hann.* 44.) It is probably the same place which is called Isia by Diodorus, from whom we learn that it was besieged without success by the leaders of the Italian forces during the Social War. (Diod. xxxvii. *Exc. Phot.* p. 240.) On both occasions it appears as a strong fortress, situated apparently in the neighbourhood of Rhegium; but no other mention is found of the city, which is not noticed by any of the geographers, and must probably have ceased to exist, like so many of the smaller towns of Bruttium. The name is, however, found in Stephanus of Byzantium, who confirms the correctness of the form Tisia, found in Appian. (Steph. B. *s. v.*) Its site is wholly uncertain. [E. H. B.]

TISSA (*Τίσσα*, Ptol.; *Τίσσαι*, Steph. B.: *Eth.* *Τισσαῖος*, Tissiensis, Cic., Tissinensis, Plin.), a town in the interior of Sicily, repeatedly mentioned by ancient authors, but without any clue to its position. As its name is cited from Philistus by Stephanus of Byzantium (*s. v.*), it must have existed as a Siculian town from an early period, but its name is not found in history. Under the Romans it continued to subsist as a municipal town, though a very small place. Cicero calls it "perparva et tenuis civitas," and Silius Italicus also terms it "parvo nomine Tisse." (Cic. *Verr.* iii. 38; Sil. Ital. xiv. 267.) It is again noticed by Pliny and Ptolemy among the towns of the interior of Sicily, but all trace of it is subsequently lost. The only clue to its site is derived from Ptolemy, who places it in the neighbourhood of Aetna. It has been fixed by Cluverius and others on the site of the modern town of *Randazzo*, at the northern foot of Aetna, but this is a mere conjecture. (Plin. iii. 8. s. 14; Ptol. iii. 4. § 12; Cluver. *Sicil.* p. 308.) [E. H. B.]

TITACIDAE. [ATTICA, p. 330, a.]

TITANE (*Τιτάνη*, Paus.; *Τίτανα*, Steph. B. *s. v.*: *Eth.* *Τιτάνιος*), a place in the Sicyonia, upon the left bank of the Asopus, distant 60 stadia from Sicyon, and 40 from Phlius. It was situated upon the summit of a hill, where Titan, the brother of the Sun, is said to have dwelt, and to have given his name to the spot. It was celebrated for a temple of Asclepius, reported to have been built by Alexander, the son of Machaon, the son of Asclepius. This temple still existed in the time of Pausanias, in the middle of a grove of cypress trees, in which the servants of the god attended to the patients who came thither for the recovery of their health. Within the temple stood statues of Asclepius and Hygieia, and of the heroes Alexanor and Euamerion. There was also a temple of Athena at Titane, situated upon a hill, and containing an ancient wooden statue of the goddess. In descending from the hill there was an altar of the Winds. (Paus. ii. 11. §§ 5—8, ii. 12. § 1, ii. 27. § 1.) Stephanus B. (*s. v.*) refers the *Τιτάνοιό τε λευκὰ κάρηνα* of Homer (*Il.* ii. 735) to Titane, but those words indicate a mountain in Thessaly. [Vol. I. p. 248, b.] The ruins of Titane were first discovered by Ross. Leake heard that there were some ancient foundations on the summit of the hill above *Liópesi*, which he supposed to be the remains of the temple of Asclepius at Titane; but although Hellenic remains exist at this site, there can be no doubt that Titane is represented by the more important *Paleókastron* situated further S., and a few minutes N. of the village of *Voivónda*. This *Paleókastron* stands upon a projecting spur of the mountains which run eastward towards the Asopus, and terminate just above the river in a small hill, which is surrounded by beautiful Hellenic walls, rising to the height of 20 or 30 ft. on the S. and SW. side, and flanked by three or four quadrangular towers. On this hill there stands a chapel of St. Tryphon, containing fragments of Doric columns. This was evidently the acropolis of the ancient city, and here stood the temple of Athena mentioned by Pausanias. The other parts of this projecting ridge are covered with ancient foundations; and upon this part of the mountain the temple of Asclepius must have stood. (Leake, *Morea*, vol. iii. p. 354, seq.; Ross, *Reisen im Peloponnes*, p. 49, seq.; Curtius, *Peloponnesos*, vol. ii. p. 500, seq.)



PLAN OF TITANE.

A. Village of *Voivónda*.
1. Acropolis of Titane.
2. Temple of Asclepius and surrounding Buildings.

TI'TANUS. [ASTERIUM.]

TITARE'SIUS. [THESSALIA, p. 1166, a.]

TITARUS. [THESSALIA, p. 1166, a.]

TITHOREA. [NEON.]

TITHRO'NIUM (*Τιθρώνιον*: *Eth.* *Τιθρωνιεύς*), a frontier town of Phocis, on the side of Doris. Livy, who calls it Tritonon, describes it as a town of Doris (xxviii. 7), but all other writers place it in Phocis. It was destroyed by the army of Xerxes together with the other Phocian towns. It is placed by Pausanias in the plain at the distance of 15 stadia from Amphicleia. The site of Tithronium is probably indicated by some ruins at *Mulki* below *Verzaná*, where a torrent unites with the Cephissus. (Herod. viii. 33; Paus. x. 3. § 2, x. 33. § 11; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. p. 87.)

TITTHIUM. [EPIDAURUS, p. 841, a.]

TITULCIA, a town of the Carpetani in Hispania Tarraconensis, on the road from Emerita to Caesaraugusta (*Itin. Ant.* pp. 436, 438, &c.) It seems to be the same town called *Τιτουακία* by Ptolemy (ii. 6. § 57). Variously placed near *Torrejon*, at *Getafe*, and at *Bayona*. [T. H. D.]

TITYRUS (*Τίτυρος*, Strab. x. p. 479), a mountain in the NW. part of Crete, not far from Cydonia. Upon it was the sanctuary or temple called Dictynnaeum. (Strab. *ib.*) One of its spurs formed the headland also called Tityrus (*Stadiasm.* p. 302) or Psacum. (*Cape Spada.*) [T. H. D.]

TIUS or TIUM (*Τῖος* or *Τίον*: *Eth.* *Τιανός*), a town on the coast of Bithynia, or, according to others, belonging to Paphlagonia. It was a Greek town situated at the mouth of the river Billaeus, and seems to have belonged to Paphlagonia until Prusias annexed it to Bithynia. (Memnon, 17—19; Pomp. Mela, i. 19; Marcian, p. 70; Arrian, *Peripl. P. E.* p. 14; Anon. *Peripl. P. E.* p. 2.) In Strabo's (xii. pp. 542, 543, 565) time, Tius was only a small place but remarkable as the birthplace of Philetaerus, the founder of the royal dynasty of Pergamum. (Comp. Plin. vi. 1.) There are coins of Tius as late as the reign of Gallienus, on which the ethnic name appears as *Τιανοί*, *Τεῖοι*, and *Τειανοί*. (Sestini, p. 71; Eckhel, ii. p. 438.) [L. S.]

TLOS (*Τλώς* or *Τλῶς*), an ancient and important city of Lycia. It is not often mentioned by ancient writers, but we know from Artemidorus (*ap. Strab.* xiv. p. 665) that it was one of the six cities forming the Lycian confederacy. Strabo only remarks further that it was situated on the road to Cibyra. (Comp. Plin. v. 28; Ptol. v. 3. § 5; Steph. B. *s. v.*; Hierocl. p. 659.) Until recently the site of this town was unknown, though D'Anville had correctly conjectured that it ought to be looked for in the valley of the Xanthus. Sir C. Fellows was the first modern traveller who saw and described its beautiful remains, the identity of which is established beyond a doubt by inscriptions. These ruins exist in the upper valley of the Xanthus, at a little distance from its eastern bank, almost due north of the city of Xanthus, and about 5 miles from the village of *Doover*. They are, says Sir Charles, very extensive, consisting of extremely massive buildings, suited only for palaces; the design appears to be Roman, but not the mode of building nor the inscriptions. The original city must have been demolished in very early times, and the finely wrought fragments are now seen built into the strong walls, which have fortified the town raised upon its ruins. The theatre was large, and the most highly and expensively finished that he had seen; the seats not only are of marble, but the marble is highly wrought and has been polished, and each seat has an overhanging cornice often supported by lions' paws. There are also ruins of several other extensive buildings with columns; but the most striking feature in the place is the perfect honeycomb formed in the sides of the acropolis by excavated tombs, which are cut out of the rock with architectural ornaments, in the form of triangles, &c., some showing considerable taste. (Fellows, *Asia Minor*, p. 237, foll., *Lycia*, p. 132, foll., where some of the remains are figured and a number of inscriptions given.) [L. S.]

TMARUS. [Dodona, p. 783, b.]

TMOLUS (Τμῶλος), a mountain range on the south of Sardes, forming the watershed between the basins of the Hermus in the north and the Cayster in the south, and being connected in the east with Mount Messogis. It was said to have received its name from a Lydian king Timolus, whence Ovid (*Met.* vi. 16) gives this name to the mountain itself. Mount Tmolus was celebrated for the excellent wine growing on its slopes (Virg. *Georg.* ii. 97; Senec. *Phoen.* 602; Eurip. *Bacch.* 55, 64; Strab. xiv. p. 637; Plin. v. 30). It was equally rich in metals; and the river Pactolus, which had its source in Mount Tmolus, at one time carried from its interior a rich supply of gold. (Strab. xiii. pp. 591, 610, 625; Plin. xxxiii. 43; comp. Hom. *Il.* ii. 373; Aesch. *Pers.* 50; Herod. i. 84, 93, v. 101; Ptol. v. 2. § 13; Dion. Per. 831.) On the highest summit of Mount Tmolus, the Persians erected a marble watch-tower commanding a view of the whole of the surrounding country (Strab. xiii. p. 625). The Turks now call the mountain *Bouz Dagh.* (Richter, *Wallfahrten*, pp. 512, 519.) [L. S.]

TMOLUS, a town of Lydia, situated on Mount Tmolus, which was destroyed during the great earthquake in A. D. 19. (Tac. *Ann.* ii. 47; Plin. v. 30; Euseb. *Chron. ad Ann. V. Tib.*; Niceph. Call. i. 17.) Some coins are extant with the inscription Τμωλειίτων. (Sestini, p. 114.) [L. S.]

TO'BIUS (Τόϐιος or Τούϐιος, Ptol. ii. 3. § 5), a river on the western coast of Britannia Romana, now the *Towy.* [T. H. D.]

TOCAE (Τῶκαι), a very large city of Numidia, mentioned only by Diodorus (xx. 57), is perhaps the same as Tucca.

TOCHARI (Τόχαροι, Ptol. vi. 11. § 6), a powerful Scythian people in Bactriana, which also spread itself to the E. of the Jaxartes over a portion of Sogdiana, and even as far as the borders of Serica. (Plin. vi. 17. s. 20; Amm. Marc. xxiii. 6. § 57.) [T. H. D.]

TOCOLOSIDA (Τοκολόσιδα, Ptol. iv. 1. § 14), the most southern place in the Roman possession in Mauretania Tingitana. (*Itin. Ant.* p. 23.) Variously identified with *Magilla*, *Fortin* near *Sidi Casseni*, and *Mergo* or *Amergo.* [T. H. D.]

TOCOSANNA (Τοκοσάννα, Ptol. vii. 2. § 2), a river which falls into the *Bay of Bengal* at its NE. end. It is probably that now called the river of *Arracan*, which is formed by the junction near its mouth of three other rivers. (Lassen, *Map of Anc. India.*) [V].

TODUCAE (Τοδοῦκαι, also Δοῦκαι or Τοδούκωνες, Ptol. iv. 2. § 21), a people in Mauretania Caesariensis, on the left bank of the Ampsaga. [T. H. D.]

TOE'SOBIS (Τοίσοϐις, Ptol. ii. 3. § 2), a river on the western coast of Britannia Romana, now the *Conway.* [T. H. D.]

TOGARMAH. [Armenia.]

TOGISONUS (*Bacchiglione*), a river of Venetia, mentioned only by Pliny, who describes it as flowing through the territory of Patavium, and contributing a part of its waters to the artificial canals called the Fossiones Philistinae, as well as to form the port of Brundulus (Plin. iii. 16. s. 20.) The rivers in this part of Italy have changed their course so frequently that it is very difficult to identify them: but the most probable conjecture is that the Togisonus of Pliny is the modern *Bacchiglione*, one arm of which still flows into the sea near the *Porto di Brondolo*, while the other joins the *Brenta* (Medoacus) under the walls of *Padoua* (Patavium). [E. H. B.]

TOLBIACUM, in North Gallia, on the road from Augusta Trevirorum (*Trier*) to Colonia Agrippina (*Cologne*). The distance of Tolbiacum from Colonia is xvi. in the Antonine Itin. Tolbiacum is *Zülpich*, south-west of *Bonn*, on the direct road from *Trier* to *Cologne.* The words "vicus supernorum" or "vicus supenorum," which occur in the MSS. of the Itin. after the name "Tolbiaco," have not been explained. Several writers have proposed to alter them. Tacitus (*Hist.* iv. 79) places Tolbiacum within the limits of the territory of the Agrippinenses or the Colonia Agrippina. [G. L.]

TOLENTI'NUM or TOLLENTI'NUM (*Eth.* Tolentinas, ātis: *Tolentino*), a town of Picenum, in the valley of the Flusor or *Chienti*, about 12 miles below Camerinum (*Camerino*). It is mentioned by Pliny among the municipal towns of Picenum, and its municipal rank is attested by the Liber Coloniarum, which mentions the "ager Tolentinus," and by inscriptions. (Plin. iii. 13. s. 18; *Lib. Col.* pp. 226, 259; Orell. *Inscr.* 2474; Gruter, *Inscr.* pp. 194. 2, 410. 2.) The modern city of *Tolentino*, which retains the ancient site as well as name, is situated on the present highroad from Rome to Ancona; but as no ancient road descended the valley of the Flusor, the name is not found in the Itineraries. [E. H. B.]

TOLE'NUS (*Turano*), a river of Central Italy, which rises in the mountains between Carseoli and the lake Fucinus, flows within a short distance of the walls of the former city, and falls into the Velinus a few miles below Reate. Its name is mentioned only by Ovid and Orosius, in reference to a great battle fought on its banks during the Social War, between the Roman consul Rutilius and the Marsi, in which the Romans were defeated with great slaughter and Rutilius himself slain. (Ovid, *Fast.* vi. 565; Oros. v. 18.) [E. H. B.]

TOLE'RIUM (Τολέριον, Steph. B.: *Eth.* Τολερῖνος, Toleriensis: *Valmontone?*), an ancient town of Latium, the name of which occurs in the early Roman history, but which appears to have ceased to exist at an early period. Its name is found in the list given by Dionysius of the thirty Latin cities which formed the league in B. C. 493 (Dionys. v. 61, according to the Vatican MS.; Niebuhr, vol. ii. note 21): and it is again mentioned among the places taken by Coriolanus at the head of the Volscian army in B.C. 486 (Dionys. viii. 17; Plut. *Coriol.* 28). According to the narrative given by Dionysius, and by Plutarch who copies him, it was the first place attacked by Coriolanus in that campaign, and its reduction was followed in succession by that of Bola, Labicum, Pedum and Corbio. It is singular that no mention of Tolerium occurs in the narrative of the same operations by Livy (ii. 39), and it seems probable that the name of Trebiam, which is found in that author (for which the best MSS. give Trebium), is a corruption for Tolerium, a name otherwise little known and therefore liable to alteration by copyists. (Cluver. *Ital.* p. 969; Bormann, *Alt-Latinische Chorographie*, p. 203.) The only other notice of Tolerium is found in Pliny, who enumerates the "Tolerienses" among the "populi" of Latium who had formerly shared in the sacrifices on the Alban Mount, but were in his time utterly extinct (iii. 5. s. 9). We have no account of the period of its destruction or final decay. The only clue to its position is that derived from the narratives above referred to, and it seems very doubtful how far we are justified in drawing strict topographical inferences from such relations. It may, however, be admitted as probable that Tolerium was situated in the same neighbourhood with Bola, Labicum, and Pedum; and the conjecture of Nibby, who would place it at *Valmontone*, derives at least some support from the circumstance that the latter town stands just at the source of the river *Sacco*, called in ancient times the Trerus or Tolerus [TRERUS]. The name of *Valmontone*, is of modern origin, but it in all probability occupies an ancient site: some vestiges of its ancient walls are still visible, as well as some remains of Roman date, while the scarped sides of the rocks which surround it, and render the position one of great natural strength, abound in ancient sepulchres. Gell, however, regards it as the site of Vitellia rather than Tolerium, a conjecture which has also much to recommend it. [VITELLIA.] *Valmontone* is 5 miles S. of *Palestrina* and about 3 miles beyond *Lugnano*, on the line of the modern Via Latina, and 26 from Rome. (Nibby, *Dintorni*, vol. iii. pp. 370, 377; Gell, *Top. of Rome*, p. 436; Abeken, *Mittel-Italien*, p. 76.) [E. H. B.]

TOLE'TUM (Τώλητον, Ptol. ii. 6. § 57: *Eth.* Toletani, Plin. iii. 3. s. 4; Orelli, *Inscr.* no. 980), the capital of the Carpetani, in Hispania Tarraconensis, situated on the Tagus, and on the road from Emerita to Caesaraugusta, and connected also by another road with Laminium. (*Itin. Ant.* pp. 438, 446.) It was a very strong town, though only of moderate size, and famed for its manufacture of arms and steel-ware. (Liv. xxxv. 7, 22, xxxix, 30; Grat. *Cyneg.* 341; cf. Miñano, *Diccion.* viii. p. 453.) According to an old Spanish tradition, Toledo was founded in the year 540 B. C. by Jewish colonists, who named it *Toledoch*, that is, "mother of people," whence we might perhaps infer a Phoenician settlement. (Cf. Miñano, *l. c.*; Puente, *Travels*, i. p. 27.) It is still called *Toledo*, and contains several remains of Roman antiquities, and especially the ruins of a circus. (Cf. Florez, *Esp. Sagr.* v. p. 22; Puente, i. p. 165, seq.) [T. H. D.]

TOLIAPIS (Τολιάπις, Ptol. ii. 3. § 33), a small island on the E. coast of Albion, opposite to the country of the Trinobantes. *Sheppy* seems the only island with which it is at all possible to identify it; yet it lies farther S. than the account of Ptolemy appears to indicate. [T. H. D.]

TOLISTOBOGII, TOLISTOBOGI, or TOLISTOBOII. [GALATIA.]

TOLLENTI'NUM. [TOLENTINUM.]

TOLOBIS, a coast town of the Ilercaones, in Hispania Tarraconensis. (Mela, ii. 6.) [T. H. D.]

TO'LOPHON (Τολοφών: *Eth.* Τολοφώνιος), a town of the Locri Ozolae, possessing a large harbour according to Dicaearchus (66; comp. Thuc. iii. 101; Steph. B. *s. v.*). According to Leake it occupied the valley of *Kiselí.* (*Northern Greece*, vol. ii. p. 620.)

TOLO'SA or THOLO'SA (Τολώσσα, Τολῶσα, Τόλοσα, Dion Cass. xxxviii. c. 32: *Eth.* Tolosates, Tolosenses, Tolosani), in Gallia, is *Toulouse*, in the department of *Haute-Garonne*, on the right bank of the *Garonne.*

The identity of Tolosa and *Toulouse* is easily proved from the Itineraries and other evidence. In Caesar's time Tolosa was within the Roman Provincia. (*B. G.* i. 10.) When Caesar is speaking of the intention of the Helvetii to migrate into the country of the Santones, he remarks that the Santones are not far from the territory of the Tolosates, who are in the Provincia. He considered that it would be dangerous to the Provincia if the warlike Helvetii, the enemies of Rome, should be so near to an open country, which produced a great deal of grain. The commentators have found some difficulty in Caesar's expression about the proximity of the Santones and the Tolosates, for the Nitiobriges and Petrocorii were between the Santones and the Tolosates; but Caesar only means to say that the Helvetii in the country of the Santones would be dangerous neighbours to the Provincia. In Caesar's time Tolosa and Carcaso, both in the basin of the *Garonne*, were fully organised as a part of the Provincia; for when P. Crassus invaded Aquitania, he summoned soldiers from the muster-rolls of these towns to join his army. (*B. G.* iii. 20.) Tolosa being situated on the neck of land where Gallia is narrowest [GALLIA TRANSALPINA, Vol. I. p. 949] and in a position easy of access from the west, north, and east, was one of the places threatened by the Galli in the great rising of B. C. 52; but Caesar with his usual vigilance protected the province on this side by placing a force at Tolosa. (*B. G.* vii. 7.)

Tolosa was an old town of the Volcae Tectosages which existed probably many centuries before it was conquered by the Romans. A great quantity of gold and silver was collected there, the gold the produce of the auriferous region near the Pyrenees, and both the precious metals the offerings of Gallic superstition. The treasure was kept in chambers in the temples, and also in sacred tanks. This is the story of Posidonius (Strab. iv. p. 188), who had travelled in Gallia; and it is more probable than the tradition that the gold of Tolosa was the produce of the plunder of Delphi by Brennus and his men, among whom it is said there were some Tectosages (Justin, xxxii. c. 3); for it is very doubtful if any of Brennus' soldiers got back to Gallia, if we admit that they came from Gallia. Tolosa was in some kind of alliance with Rome (Dion Cass. xxxiv. 97) about B. C. 106; but the Teutones and Cimbri at this time had broken into Gallia, and fear or policy induced the Tolosates to side with them. Q. Servilius Caepio (consul B. C. 106) made this a pretext for attacking Tolosa, which he took and plundered of its treasures, either in B. C. 106 or in the following year. This act of sacrilege was supposed to have been punished by the gods, for Caepio was defeated by the Cimbri B. C. 105, and his army was destroyed. (Liv. *Epit.* 67; Orosius, v. 15; Gell. iii. 9.) The treasure of Tolosa never reached Rome, and perhaps Caepio himself laid hold of some of it. However this may be, the "Aurum Tolosanum" became a proverb. All who had touched the consecrated treasure came to a miserable end. It seems that there was inquiry made into the matter at Rome, for Cicero (*De Nat. Deorum*, iii. 30) speaks of a "quaestio auri Tolosani."

The Tolosani or Tolosates were that division of the Tectosages which was nearest to the Aquitani. A place called Fines, between Tolosa and Carcaso, denotes the boundary of the territory of Tolosa in that direction, as this term often indicates a territorial limit in the Roman geography of Gallia [Fines]; and another place named Fines marks the boundary on the north between the Tolosates and the Cadurci.

Pliny (iii. 4) mentions Tolosa among the Oppida Latina of Narbonensis, or those towns which had the Latinitas, and, as Ptolemy (ii. 10. § 9) names it a Colonia, we must suppose that it was made a Colonia Latina. Tolosa maintained its importance under the Empire. Ausonius (*Ordo Nob. Urb.* xii.) describes Tolosa as surrounded by a brick wall of great circuit, and as a populous city, which had sent out inhabitants enough to found four other cities. The name Palladia, which Martial (*Ep.* ix. 101), Sidonius Apollinaris, and Ausonius give to Tolosa appears to refer to the cultivation of the liberal arts in this Gallic city —

> "Te sibi Palladiae antetulit toga docta Tolosae."

(Auson. *Parent.* iii. 6; and *Commem. Profess. Burdig.* xvii. 7.) [G. L.]

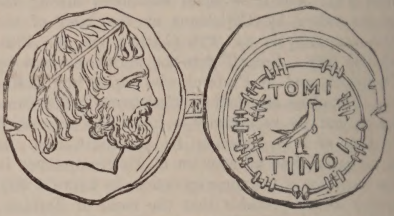
TOLOUS, a place of the Ilergetes in Hispania Tarraconensis. (*Itin. Ant.* p. 391.) Probably *Monzon.* [T. H. D.]

TO'MARUS. [Dodona, p. 783, b.]

TOME'RUS (Τόμηρος, Arrian, *Ind.* 24), a river, or rather torrent of Gedrosia, called Tonberos or Tomberos by Pliny (vi. 23. s. 25. § 93, ed. Sillig.), and Tubero by Mela (iii. 7). According to the distances in Arrian, this river is the *Muklow* or *Hingul.*

TOMEUS. [Messenia, p. 341, b.]

TOMIS or TOMI (Τόμις, Strab. vii. p. 319; Ov. *Tr.* iii. 9. 33; Geogr. Rav. iv. 6, &c.: Τόμαι, Ptol. iii. 10. § 8; Tomi, Plin. iv. 11. s. 18; Stat. *S.* i. 2, 255; *Itin. Ant.* p. 227, &c.; in Mela, ii. 2, Tomoe: we also find the Greek form Τομεύς, Steph. B. *s. v.*; Arrian, *Per. P. Eux.* p. 24), a town of Lower Moesia, on the Euxine, and the capital of the district of Scythia Minor (Sozom. *H. Eccl.* vii. 25; Hierocl. p. 637). It was situated at a distance of about 300 stadia or 36 miles from Istros or Istropolis (Anon. *Per. P. Eux.* p. 12; *Itin. Ant.* p. 227), but according to the Tab. Peut. 40 miles. It was a Milesian colony, and according to the legend the place where Medea cut up her brother's body, or where their father Aeëtes got together and buried the pieces (Ov. *l. c.*; Apollod. i. 9, 25; Hygin. *Fab.* 13.) The legend is no doubt connected with the name of the town, which, however, is still better known as the place of banishment of Ovid. Now *Tomisvar* or *Jeni Pangola.* [T. H. D.]



COIN OF TOMIS OR TOMI.

TO'MISA (Τόμισα: *Eth.* Τομισηνός, Τομισεύς, a town of Sophene, in Armenia, was ceded by Lucullus to the Cappadocians. (Polyb. xxxiv. 13; Strab. xii. p. 535, xiv. pp. 663, 664; Steph. B. *s. v.*)

TONBEROS. [Tomerus.]

TONICE. [Niconis Dromus.]

TONOSA, a town of Cappadocia, 50 miles from Sebastia, still called *Tonus.* (*It. Ant.* pp. 181, 182, 212.)

TONSUS, or TONZUS (Τόνσος, Zos. ii. 22. § 8; cf. Lampr. *Elag.* 7), the principal tributary of the Hebrus in Thrace. It rises in the Haemus: its general course for about 70 miles is almost due E.; it then makes a sudden bend to the S., and, after a farther southerly course of nearly the same length, falls into the Hebrus, a short distance from Hadrianopolis. Now *Tuncza* or *Toondja.* [J. R.]

TOPI'RIS (Plin. iv. 11. s. 18; Τοπιρίς or Τοπηρίς, Ptol. iii. 11. § 13), or Topirus (*It. Ant.* p. 321; in p. 331, it is corrupted into Otopisus; and in *It. Hier.* p. 603, into Epyrus; *Tab. Peut.*; Τόπειρος, Hierocl. p. 634), a town in the SW. of Thrace, a little NE. from the mouth of the Nestus, and a short distance W. of Abdera. In the time of Procopius (*B. G.* iii. 38) it was the first of the maritime cities of Thrace, and is described as distant 12 days' journey from Byzantium. Very little is known about this place. In later times it was called Rhusion (Ῥούσιον, Hierocl. *l. c.*; cf. Apospozm. Geo. in Hudson. iv. p. 42; and Anna Comn. p. 212), and was the seat of a bishopric. (*Conc. Chalced.*) Justinian rebuilt its walls, which had been demolished, and made them stronger than before. (Procop. *de Aed.* iv. 11.) According to Paul Lucas and Boudoue, the modern *Tosbur* occupies its site; but Lapie identifies it with *Kara-Giuenzi.* [J. R.]

TOREA'TAE. [Toretae.]

TORECCADAE. [Toretae.]

TO'RETAE (Τορεταί, Steph. B. *s. v.*; Dionys. Per. 682; Plin. vi. 5; Mela, i. 2; Avien. *Orb. Terr.* 867) or TOREA'TAE (Τορεᾶται, Strab. xi. p. 495), a tribe of the Maeotae in Asiatic Sarmatia. Ptolemy (v. 9. § 9) mentions a Τορετικὴ ἀκρὰ in Asiatic Sarmatia; and in another passage (iii. 5. § 25) he speaks of the Τορεκκάδαι as a people in European Sarmatia, who are perhaps the same as the Toretae or Toreatae.

TORNADOTUS, a small river of Assyria, mentioned by Pliny (vi. 27. s. 31), and a tributary of the Tigris. It is probably the same stream as that noticed by Xenophon under the name of the Physcus. (*Anab.* ii. 4. § 25.) It may be the modern *Torna* or *Odorneh.* Mannert (vi. 2. p. 317) takes it to be the same as the Adiabas of Ammianus (xxiii. 6); but the Adiabas is more likely to be that elsewhere called the Zabatus (now *Záb*). [V.]

TORNATES, an Aquitanian people, whose name is preserved in Pliny (iv. 19). There is no indication of their position, unless it be the name *Tournai*, a small town on the *Arros*, a branch of the *Adour*, and in the diocese of *Tarbes*, which, under the name of Turba, was the chief place of the Bigerriones. [BIGERRIONES.] [G. L.]

TORONAICUS SINUS. [TORONE.]

TORO'NE (Τορώνη: *Eth.* Τορωναῖος), a town of Chalcidice in Macedonia, situated upon the SW. coast of the peninsula of Sithonia. It was said to have derived its name from Torone, a daughter of Proeteus or Poseidon and Phoenice. (Steph. B. *s. v.* Τορώνη.) It was a Greek colony, founded by the Chalcidians of Euboea, and appears to have been originally the chief settlement of the Chalcidians in these parts. Hence the gulf lying between the peninsulas of Sithonia and Torone was generally called the Toronaean, now the *Gulf of Kassándhra.* (Τορωναϊκὸς κόλπος, Steph. B. *s. v.* Τορώνη; Ptol. iii. 13. § 13; Τορωνικὸς κόλπος, Strab. vii. p. 330; Scymn. Ch. 640; Toronaicum mare, Liv. xliv. 11; Toronaeus sinus, Tac. *Ann.* v. 10.) Like the other Greek cities in these parts, Torone furnished ships and men to the army of Xerxes in his invasion of Greece. (Herod. vii. 122.) After the Persian War Torone came under the dominion of Athens. In B.C. 424 a party in the town opened the gates to Brasidas, but it was retaken by Cleon two years afterwards. (Thuc. iv. 110, seq., v. 2.) At a later time it seems to have been subject to Olynthus, since it was recovered by the Athenian general Timotheus. (Diodor. xv. 81.) It was annexed by Philip, along with the other Chalcidian cities, to the Macedonian empire. (Diodor. xvi. 53.) In the war against Perseus, B. C. 169, it was attacked by a Roman fleet, but without success. (Liv. xliv. 12.) Theophrastus related that the Egyptian bean grew in a marsh near Torone (*ap. Athen.* iii. p. 72, d.); and Archestratus mentions a particular kind of fish, for which Torone was celebrated (*ap. Athen.* vii. p. 310, c.). The harbour of Torone was called Cophos (Κωφός), or "deaf," because being separated from the sea by two narrow passages, the noise of the waves was never heard there: hence the proverb κωφότερος τοῦ Τορωναίου λιμένος. (Strab. vii. p. 330; Mela, ii. 3; Zenob. *Prov. Graec.* cent. iv. pr. 68.) This port is apparently the same as the one called by Thucydides (v. 2) the harbour of the Colophonians, which he describes as only a little way from the city of the Toronaeans. Leake conjectures that we ought perhaps to read Κωφῶν instead of Κολοφωνίων. It is still called *Kufó*, and Torone likewise retains its ancient name. (Leake, *Northern Greece*, vol. iii. pp. 119, 155, 455.)

TORYNE (Τορύνη, Plut. *Ant.* 62; Τορώνη, Ptol. iii. 14. § 5), a town of Thesprotia in Epeirus, off which the fleet of Augustus was moored a short time before the battle of Actium, seems from the order of the names in Ptolemy to have stood in one of the bays between the mouth of the river Thyamis and Sybota, probably at *Parga.* (Leake, *Northern Greece*, vol. i. p. 103, vol. iii. p. 8.)

TOTTAEUM, a place in Bithynia of uncertain site (*It. Ant.* p. 141; *It. Hieros.* p. 573, where it is called Tutaium; *Concil. Chalced.* p. 98); but some look for its site near *Geiveh*, and others near *Karakaia.* [L. S.]

TOXANDRI. These inhabitants of North Gallia are first mentioned by Pliny (iv. 17) in a passage which has been interpreted several ways. Pliny's Belgica is limited on the north by the Scaldis (*Schelde*). [GALLIA TRANS., Vol. I. p. 960.] Pliny says: "A Scaldi incolunt extera Toxandri pluribus nominibus. Deinde Menapii, Morini." D'Anville and others explain "extera" to signify beyond the limits of the *Schelde*, that is, north and east of this boundary; and Cluver places the Toxandri in the islands of *Zeeland.* D'Anville supposes that they took a part of their territory from the Menapii, and that this newly acquired country was the *Campen* north of *Brabant* and the bishopric of *Liège.* This conjecture is supposed to be confirmed by the passage of Ammianus Marcellinus (xvii. 8), in which he says that Julian marched against the Franci named Salii, who had dared to fix themselves on Roman ground "apud Toxiandriam locum." The geographers who are best acquainted with the Netherlands fix Toxiandri locus at *Tessender Lo*, a small place in the *Campen* to the north of *Brabant.* Ukert (*Gallien*, p. 372) gives a different meaning to the word "extera." He remarks that Pliny, describing the north coast of Europe (iv. 14), says: "Toto autem hoc mari ad Scaldim usque fluvium Germanicae accolunt gentes," and he then enumerates the peoples as far as the Scaldis. Afterwards (c. 17) he adds "a Scaldi incolunt," &c.; and a few lines further, a word "introrsus" is opposed tô this "extera"; from which Ukert concludes that "extera" here means the coast country, a meaning which it has in two other passages of Pliny (ii. 67, iv. 13). After describing the nations which occupy the "extera," or coast, Pliny mentions the peoples in the interior, and in the third place the Germanic peoples on the Rhine. Accordingly Ukert concludes that we must look for the Toxandri in the neighbourhood of *Ghent* and *Bruges.* [G. L.]

TRACANA (Τράκανα, Ptol. iii. 5. § 27), an inland city of European Sarmatia. [T. H. D.]

TRACHIS or TRACHIN (Τραχίς, Herod., Thuc., et alii; Τραχίν, Strab.: *Eth.* Τραχίνιος). 1. A city of Malis, in the district called after it Trachinia. It stood in a plain at the foot of Mt. Oeta, a little to the N. or rather W. of Thermopylae, and derived its name from the rocks which surrounded the plain. It commanded the approach to Thermopylae from Thessaly, and was, from its position, of great military importance. (Herod. vii. 176; Strab. ix. p. 428; Steph. B. *s. v.*) The entrance to the Trachinian plain was only half a plethrum in breadth, but the surface of the plain was 22,000 plethra, according to Herodotus. The same writer states that the city Trachis was 5 stadia from the river Melas, and that the river Asopus issued from a gorge in the mountains, to the S. of Trachis. (Herod. vii. 198.) According to Thucydides, Trachis was 40 stadia from Thermopylae and 20 from the sea (Thuc. iii. 92.) Trachin is mentioned in Homer as one of the cities subject to Achilles (*Il.* ii. 682), and is celebrated in the legends of Hercules as the scene of this hero's death. (Soph. *Trach.* passim.) It became a place of historical importance in consequence of the colony founded here by the Lacedaemonians in the sixth year of the Peloponnesian War, B. C. 426. The Trachinians and the neighbouring Dorians, who suffered much from the predatory incursions of the Oetaean mountaineers, solicited aid from the Spartans, who eagerly availed themselves of this opportunity to plant a strong colony in this commanding situation. They issued an invitation to the other states of Greece to join in the colony; and as many as 10,000 colonists, under three Spartan oecists, built and fortified a new town, to which the name of HERACLEIA was given, from the great hero, whose name was so closely associated with the surrounding district. (Thuc. iii. 92; Diod. xii. 59.) It was usually called the Trachinian Heracleia, to distinguish it from other places of the same name, and by later writers Heracleia in Phthiotis, as this district was subsequently included in the Thessalian Phthiotis. (Ἡράκλεια ἡ ἐν Τραχινίᾳ, Xen. *Hell.* i. 2. § 18; Diod. xii. 77, xv. 57; Ἡρακλεῶται οἱ ἐν Τραχῖνι, Thuc. v. 51; Ἡ. ἡ Τραχὶν καλουμένη πρότερον, Strab. ix. p. 428; Heraclea Trachin dicta, Plin. iv. 7. s. 14; Ἡ. Φθιώτιδος, Ptol. iii. 13. § 46.) The new colonists also built a port with docks near Thermopylae. It was generally expected that this city, under the protection of Sparta, would become a formidable power in Northern Greece, but it was attacked from the beginning by the Thessalians, who regarded its establishment as an invasion of their territory; and the Spartans, who rarely succeeded in the government of dependencies, displayed haughtiness and corruption in its administration. Hence the city rapidly dwindled down; and in B. C. 420 the Heracleots were defeated with great loss by the neighbouring Thessalian tribes, and Xenares, the Lacedaemonian governor, was slain in the battle. Sparta was unable at the time to send assistance to their colony; and in the following year the Boeotians, fearing lest the place should fall into the hands of the Athenians, took possession of it, and dismissed the Lacedaemonian governor, on the ground of misconduct. (Thuc. v. 51, 52.) The Lacedaemonians, however, regained possession of the place; and in the winter of B. C. 409—408, they experienced here another disaster, 700 of the Heracleots being slain in battle, together with the Lacedaemonian harmost. (Xen. *Hell.* i. 3. § 18.) But, after the Peloponnesian War, Heracleia again rose into importance, and became the head-quarters of the Spartan power in Northern Greece. In B. C. 399 Herippidas, the Lacedaemonian, was sent thither to repress some factious movements in Heracleia; and he not only put to death all the opponents of the Lacedaemonians in the town, but expelled the neighbouring Oetaeans and Trachinians from their abodes. (Diod. xiv. 38; Polyaen. ii. 21.) In B. C. 395 the Thebans, under the command of Ismenias, wrested this important place from the Spartans, killed the Lacedaemonian garrison, and gave the city to the old Trachinian and Oetaean inhabitants. (Diod. xiv. 82.) The walls of Heracleia were destroyed by Jason, lest any state should seize this place and prevent him from marching into Greece. (Xen. *Hell.* vi. 4. § 27.) At a later time Heracleia came into the hands of the Aetolians, and was one of the main sources of their power in Northern Greece. After the defeat of Antiochus at Thermopylae, B. C. 191, Heracleia was besieged by the Roman consul Acilius Glabrio, who divided his army into four bodies, and directed his attacks upon four points at once; one body being stationed on the river Asopus, where was the gymnasium; the second near the citadel outside of the walls (extra muros), which was almost more thickly inhabited than the city itself; the third towards the Maliac gulf; and the fourth on the river Melas, opposite the temple of Diana. The country around was marshy, and abounded in lofty trees. After a siege of twenty-four days the Romans succeeded in taking the town, and the Aetolians retired to the citadel. On the following day the consul seized a rocky summit, equal to the citadel in height, and separated from it only by a chasm so narrow that the two summits were within reach of a missile. Thereupon the Aetolians surrendered the citadel. (Liv. xxxvi. 24.) Leake remarks that it seems quite clear from this account of Livy that the city occupied the low ground between the rivers *Karvunariá* (Asopus) and *Mavra-Néria* (Melas), extending from the one to the other, as well as a considerable distance into the plain in a south-eastern direction. There are still some vestiges of the citadel upon a lofty rock above; and upon its perpendicular sides there are many catacombs excavated. "The distance of the citadel above the town justifies the words *extra muros*, which Livy applies to it, and may explain also the assertion of Strabo (*l. c.*), that Heracleia was six stadia distant from the ancient Trachis; for, although the town of Heracleia seems to have occupied the same position as the Trachis of Herodotus, the citadel, which, according to Livy, was better inhabited in the Aetolian War than the city, may very possibly have been the only inhabited part of Heracleia two centuries later." (Leake, *Northern Greece*, vol. ii. pp. 26—29.)

2. Surnamed PHOCICA (ἡ Φωκική), a small city of Phocis, situated upon the confines of Boeotia, and on the road to Lebadeia. (Strab. ix. p. 423; Paus. x. 3. § 2.)

TRACHONI'TIS (Τραχωνῖτις, *Luke*, iii. 1; Joseph. *Ant.* xvi. 9, *B. J.* iii. 3; Plin. v. 18. s. 16; Τράχων, Joseph. *Ant.* xiii. 16), according to Josephus, a portion of Palestine which extended in a NE. direction from the neighbourhood of the sea of Galilee in the direction of Damascus, having the Syrian desert and Auranitis on its eastern frontier, Ituraea on the S., and Gaulanitis on the W. It was considered as the northern portion of Peraea (Περαία, i. e. Πέραν τοῦ Ἰορδανου, *Judith*, i. 9; *Matth.* iv. 25.) According to Strabo, it lay between Damascus and the Arabian mountains (xvi. p. 755); and from other authorities we may gather that it adjoined the province of Batanaea (Joseph. *B. J.* i. 20. § 4), and extended between the Regio Decapolitana (Plin. v. 15) as far S. as Bostra (Euseb. *Onomast. s. v. Ituraea.*) It derived its name from the rough nature of the country (τραχών, i. e. τραχὺς καὶ πετρώδης τόπος); and Strabo mentions two τραχῶνες (xvi. p. 755, 756), which Burckhardt considers to be the summits of two mountain ranges on the road from *Mekka* to *Damascus*, near the village of *Al-Kessue.* (*Travels*, p. 115.) The inhabitants of Trachonitis are called by Ptolemy, οἱ Τραχωνῖται Ἄραβες (v. 15. § 26), and they seemed to have maintained their character for remarkable skill in shooting with the bow and plundering (Joseph. *B. J.* ii. 4. § 2), for which the rocky nature of the country they inhabited, full as it was of clefts, and holes and secret fastnesses, was peculiarly well suited (Joseph. *Ant.* xv. 10. § 1.) Trachonitis belonged originally to the tetrarchy of Philippus, the son of Herod the

Great (Joseph. *Ant.* xvii. 8. § 1, *B. J.* ii. 6. § 3); but it subsequently formed part of the dominion of Herodes Agrippa. (Joseph. *Ant.* xviii. 6. § 10, *B. J.* iii. 3. § 5; Philo, *Opp.* ii. p. 593.)

The whole district has been recently explored and examined with much care and judgment by the Rev. J. L. Porter of Damascus, who has shown that the ancient accounts of this province, properly weighed, coincide with remarkable accuracy with what we know of it now. According to him, it must have been to the NW. of Batanaea, and have extended along the stony tract at the base of the *Jebel Haurán*, as Kenath (now *Kunawát*) was a city of Trachon (Euseb. *Onomast. s. v. Canath*), while the Targums extend it, though improbably, as far S. as Bostra. Mr. Porter observes that the name is sometimes applied in a more general sense by ancient writers, so as to include the neighbouring provinces (as in *Luke*, iii. 1, where the "Region of Trachonitis" must be understood as embracing Batanaea and Auranitis; Joseph. *Ant.* xvii. 14. § 4.) He thinks, too, that the plain on the western side as far as the *Háj* road was embraced in Trachonitis, and likewise that on the north to the *Jebel Khiyárah*, with a considerable section of the plain on the east, N. of *Ard-al-Bathanyeh.* The Argob of *Numb.* xxxiv. 15, 1 *Kings*, iv. 13, &c., Mr. Porter considers to be the same district as Trachonitis, the latter being the Greek rendering of the Hebrew form. (Porter, *Five Years in Damascus*, ii. pp. 259—262, 268—272; Robinson, iii. p. 907; Russegger, iii. p. 279; Winer, *Bibl. Realwörterbuch.*) [V.]

TRACHY. [Orchomenus, p. 490, a.]

TRACTARI, a tribe in the Chersonesus Taurica (Plin. iv. 12. s. 26). [T. H. D.]

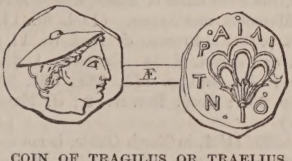
TRAELIUS. [Tragilus.]

TRAENS or TRAÏS (*Τράεις* or *Τράευς, -ευτος*: *Trionto*), a river of Bruttium celebrated for the sanguinary defeat of the Sybarites on its banks by their rivals the Crotoniats, which led to the destruction of the city of Sybaris, B. C. 510. (Iambl. *Vit. Pyth.* § 260.) It is singular that the banks of a stream which had been the scene of such a catastrophe should be again selected by the remnant of the Sybarites who were expelled from the new colony of Thurii shortly after its foundation [Thurii] for the site of their settlement. They, however, did not remain long, being expelled and put to the sword by the neighbouring barbarians, whom Diodorus by a remarkable anachronism calls Bruttians, apparently within a few years of their establishment. (Diod. xii. 22.) The name of the river is not found in any of the geographers, but there can be little doubt of its being the one still called the *Trionto*, which falls into the gulf of Tarentum a few miles E. of *Rossano*, and gives name also to an adjoining headland, the *Capo di Trionto.* [E. H. B.]

TRA'GIA (*Τραγία*), also called Tragiae (*Τραγίαι*), Tragia, Tragaeae (*Τραγαῖαι*), or Tragaea (*Τραγαία*), a small island off the south coast of Samos, near which Pericles, in B. C. 440, defeated the Samians in a naval engagement. (Thucyd. i. 116; Plin. iv. 71, v. 135; Plut. *Per.* 25; Strab. xiii. p. 635; Steph. B. *s. v. Τραγαία.*) Respecting the Tragasaeae Salinae, see Halesion. [L. S.]

TRA'GIA or TRAGAEA. [Naxos, p. 406, a.]

TRA'GILUS (*Τράγιλος* : *Eth. Τραγιλεύς*, Steph. B. *s. v.*), a town of Macedonia, and doubtless the same as the *Βράγιλος* or *Δράγιλος* found in Hierocles (p. 639) among the towns of the first or consular Macedonia. In the Table there is a place "Triulo" marked as 10 miles from Philippi. This is apparently a corruption of "Traelio," since numerous coins (one of which is figured below) have been found near Amphipolis with the inscription TRAIΛIΩN. Leake conjectures with much probability that the real name was Tragilus, and that in the local form of the name the Γ may have been omitted, so that the ΤΡΑΙΛΙΩΝ of the coin may represent the Hellenic *Τραγιλίων.* (Eckhel, vol. ii. p. 81 ; Leake, *Northern Greece*, vol. iii. p. 228.)



COIN OF TRAGILUS OR TRAELIUS.

TRAGU'RIUM (*Τραγούριον*, Strab., Ptol.; *Τραγύριον*, Polyb.), an important town of Dalmatia, situated upon an island, which was separated from the mainland by an artificial canal. According to the Antonine Itinerary, it was distant 16 miles from Praetorium and 13 from Salonae. Pliny calls it "Tragurium civium Romanorum," and says that it was celebrated for its marble. Its name is preserved in the modern *Trau.* (Polyb. xxxii. 18 ; Strab. ii. p. 124, vii. p. 315 ; Ptol. ii. 17. § 14 ; Plin. iii. 22. s. 26 ; Mela, ii. 3 ; *It. Ant.* p. 272 ; *Tab. Peut.*; Geogr. Rav. iv. 16.)

TRAGUS. [Caphyae.]

TRAIA CAPITA (*Itin. Ant.* p. 399), more correctly Tria Capita (Geog. Rav. v. 3), since it lay near the three mouths of the Iberus, a town of the Cosetani, in Hispania Tarraconensis, between Dertosa and Tarraco. Variously identified with *Tivisa* and *Torre del Aliga.* [T. H. D.]

TRAJA'NI MUNIMENTUM, a fort or castle built by Trajan on the southern bank of the river Moenus, not far from its junction with the Rhenus. (Amm. Marc. xvii. 1.) The site is uncertain, nor is it known what the Munimentum really was. [L. S.]

TRAJA'NI PORTUS. [Ostia.]

TRAJANO'POLIS (*Τραϊανόπολις*), a town in Mysia, in the district occupied by the tribe of the Thraemenothyritae, on the frontiers of Phrygia. (Ptol. v. 2. §§ 14, 15.) The Cilician city of Selinus also for a time bore the name of Trajanopolis. [Selinus.] [L. S.]

TRAJANO'POLIS (*Τραϊανόπολις*), an important town in the S. of Thrace, which was probably founded by or in honour of the emperor Trajan, about the time when Plotinopolis was founded, to perpetuate the name of his wife Plotina. Its exact site appears to be somewhat doubtful. Some authorities describe it as situated on the right bank of the Hebrus, near the pass in the range of Mount Rhodope, through which that river flows, and about 40 miles from its mouth. Now this is the site of the modern *Orikhova*, with which accordingly it is by some identified. It would be difficult, however, to reconcile this with the various distances given in the Itineraries: e. g. Trajanopolis is stated to be 9000 paces from Tempyra, and 29,000 from Cypsela ; whereas the site above mentioned is nearly equidistant from those assigned to Tempyra and Cypsela, being, however, more distant from the former. But this is only one example out of many showing how extremely imperfect is our knowledge of the geography of Thrace, both ancient and modern. In the map of the Society for the Diffusion of Useful Knowledge Trajanopolis is placed on the Egnatian Way at a considerable distance W. of the Hebrus, and at a point which fulfils tolerably well the conditions of distance from the two places above mentioned.

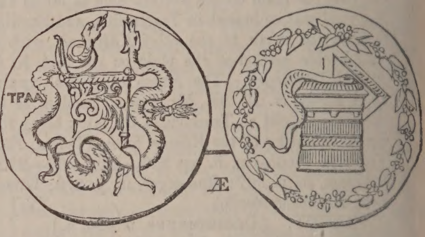
Trajanopolis became the capital of the province of Rhodope, and continued to be a place of importance until the fourth century. It is remarkable, however, that it is not mentioned by Ammianus in his general description of Thrace (xxvii. 4); according to him, the chief cities of Rhodope were Maximianopolis, Maroneia, and Aenus. (Ptol. iii. 11. § 13; Hierocl. p. 631: Procop. *de Aed.* iv. 11; Const. Porph. *de Caerim.* ii. 54; Cantacuz. i. 38, iii. 67, et alibi; *It. Ant.* pp. 175, 322, 332, 333; *It. Hier.* p. 602; Geog. Rav. iv. 6; cf. Mannert, vii. p. 224.) [J. R.]

TRAJECTUM, in North Gallia, is not mentioned in any Roman writing before the Itin. of Antoninus. It was on the Roman road which ran along the Rhine from Lugdunum Batavorum, and the site is *Utrecht* in the kingdom of the *Netherlands*, at the bifurcation of the old Rhine and the *Vecht.* The modern name contains the Roman name abbreviated, and the part U seems to be a corruption of the word *Oude* (Vetus); but D'Anville observes that the name is written *Utrecht* as early as 870. [G. L.]

TRAJECTUS in Gallia, placed by the Antonine, Itin. on a road which runs from Aginnum (*Agen*) through Excisum and Trajectus to Vesunna (*Perigueux*). Trajectus is xxi. from Excisum (*Ville Neuve*), and xviii. from Vesunna, and it marks the passage of the Duranius (*Dordogne*) between these two positions at a place called *Pontons* on the *Dordogne*, opposite to which on the other bank of the river is *La Linde*, mentioned in the Table under the name of Diolindum. [DIOLINDUM.] [G. L.]

TRAIS. [TRAENS.]

TRALLES or TRALLIS (Τράλλεις, Τράλλις: *Eth.* Τραλλιανός), a large and flourishing city of Caria, on the southern slope of mount Messogis, a little to the north of the Scamander, a small tributary of which, the Eudon, flowed close by the city, while another passed right through it. Its acropolis was situated on a lofty eminence in the north of the city. Tralles was said to have been founded by Argives in conjunction with a body of Thracians, whence its name Tralles was believed to be derived (Strab. xiv. pp. 648, 649; Hesych, *s. v.*; Diod. Sic. xvii. 65; Plut. *Ages.* 16), for it is said to have previously been called Anthea, Evanthea, Erymna, Charax, Seleucia, and Antiochia (Steph. B. *s. vv.* Τράλλις, Χάραξ; *Etym. M.* p. 389; Plin. v. 29). Others, however, state that it was a Pelasgian colony, and originally bore the name of Larissa (Agath. ii. 17; Schol. *ad Hom. Il.* x. 429). It was situated in a most fertile district, at a point where highroads met from the south, east, and west; so that it must have been a place of considerable commerce. (Cic. *ad Att.* v. 14, *ad Fam.* iii. 5, *ad Quint. Frat.* i. 1; Strab. xiv. p. 663.) The inhabitants of Tralles were celebrated for their great wealth, and were generally appointed asiarchs, that is, presidents of the games celebrated in the district. But the country in which Tralles was situated was much subject to earthquakes; in the reign of Augustus many of its public buildings were greatly damaged by a violent shock; and the emperor gave the inhabitants a handsome sum of money to repair the losses they had sustained. (Strab. xii. p. 579.) Out of gratitude, the Trallians petitioned to be permitted to erect a temple in honour of Tiberius, but without effect. (Tac. *Ann.* iv. 55.) According to Pliny (xxxv. 49), king Attalus had a palace at Tralles. A statue of Caesar was set up in the temple of Victoria at Tralles; and during the presence of Caesar in Asia a miracle is said to have happened in the temple, respecting which see Caes. *Bell. Civ.* iii. 105; Plut. *Caes.* 47; and Val. Max. i. 6. The city is very often mentioned by ancient writers (Xen. *Anab.* i. 4. § 8, *Hist. Gr.* iii. 2. § 19; Polyb. xxii. 27; Liv. xxxvii. 45, xxxviii. 39; Diod. xiv. 36, xix. 75; Juven. iii. 70; Ptol. v. 2. § 19; Hierocl. p. 659). During the middle ages the city fell into decay, but was repaired by Andronicus Palaeologus (G. Pachymer, p. 320). Extensive ruins of the place still exist above the modern *Ghiuzel Hissar*, in a position perfectly agreeing with the description of Strabo. (See Arundell, *Seven Churches*, pp. 58, 65, 293; Leake, *Asia Minor*, pp. 243, 246; Fellows, *Asia Minor*, p. 276, *Lycia*, p. 16; Hamilton, *Researches*, i. p. 533.) As to the coins of Tralles, which are very numerous, see Sestini, p. 89. [L. S.]



COIN OF TRALLES.

TRALLES or TRALLIS (Τράλλης), a town in Phrygia, on the west of Apamea, and 15 miles east of Hierapolis, not far from the banks of the Maeander (Hierocl. p. 667; *Conc. Const.* ii. p. 243; *Conc. Nicaen.* ii. p. 51; *Tab. Peut.*). The ruins seen by Arundell (*Seven Churches*, p. 231) near the village of *Kuslar* are probably those of Tralles. [L. S.]

TRA'LLIA (Τραλλία: *Eth.* Τραλλός, Τραλλεύς, Steph. B. *s. v.*), a district of Illyria, whose inhabitants, the Tralli, are mentioned several times by Livy (xxvii. 32, xxxi. 35, xxxiii. 4).

TRALLICON, a town of Caria, mentioned only by Pliny (v. 29), situated on the river Harpasus; but in his time it had already ceased to exist. [L. S.]

TRAMPYA. [TYMPHAEA.]

TRANSCELLENSIS MONS, a mountain in Mauretania, between Caesarea and the river Chinalaph. (Amm. Marc. xxix. 5. § 20.) [T. H. D.]

TRANSDUCTA (Τρανσδοῦκτα, Ptol. ii. 4. § 6), and in a fuller form, JULIA TRANSDUCTA or TRADUCTA, a town of the Bastuli, in Hispania Baetica, to the E. of Mellaria. It is doubtless the same place which Strabo (ii. p. 140) calls 'Ιουλία 'Ιόζα, and sets down between Belon and Gades, whither the Romans transplanted the inhabitants of Zelis, in Mauretania Tingitana. According to Ukert (ii. pt. i. p. 345) it is also the Tingentera of Mela (ii. 6), who informs us that he was born there; though it is not easy to see how it could have had so many names. But the ground for the conjecture is that Tingentera, according to Mela, was inhabited by Phoenicians, who had been transported thither, which in some respects resembles Strabo's account of Julia Ioza. It is sought at the modern *Tarifa*, or in its neighbourhood. For coins see Florez, *Med.* ii. p. 596; Eckhel, *Doctr. Num.* i. 1. p. 30; Mionnet, i.

p. 26, and Suppt. i. pp. 19, 45; Sestini, p. 90; Florez, *Esp. Sagr.* x. p. 50; *Mém. de l'Acad. des Inscr.* xxx. p. 103.) [T. H. D.]

TRANSMARISCA (Τρομάρισκα, Ptol. iii. 10. § 11; Τραμαρίσκας and Τρασμάρικα, Procop. *de Aed.* iv. 7. p. 292; Stamarisca, Geogr. Rav. iv. 7), a strong fortress of Lower Moesia, opposite to the spot where the Mariscus flows into the Danube. It was the head-quarters of two cohorts of the Legio XI. Claudia, and also of some light-armed troops. (*Itin. Ant.* p. 223; *Not. Imp.*; *Tab. Peut*). Now *Turtukai*, *Tuturkai*, or *Toterkan*. [T. H. D.]

TRANSMONTA'NI (Τρανσμοντανοί, Ptol. iii. 5. § 21), the name of a tribe in European Sarmatia dwelling between the sources of the Borysthenes and the Peucinian mountains. [T. H. D.]

TRAPEZO'POLIS (Τραπεζόπολις or Τραπεζούπολις: *Eth.* Trapezopolitae), a town situated, according to Ptolemy (ii. 2. § 18), in Caria, but according to Socrates (*Hist. Eccles.* vii. 36) and Hierocles (p. 665), in Phrygia. The former is the more correct statement, for the town stood on the southern slope of Mount Cadmus, to the south-east of Antiochia, and, according to the Notitia Imperii, afterwards belonged to the province of Pacatiana. It is possible that the ruins which Arundell (*Discoveries*, ii. p. 147) found at *Kesiljah-bouluk* may be those of Trapezopolis. [L. S.]

TRA'PEZUS (Τραπεζοῦς: *Eth.* Τραπεζούντιος: now *Tarabosan* or *Trebizond*), an important city on the coast of Pontus, on the slope of a hill, 60 stadia to the east of Hermonassa, in the territory of the Macrones (Anon. *Peripl. P. E.* p. 13), was a colony founded by the Sinopians, who formed many establishments on this coast. (Xenoph. *Anab.* iv. 8. § 22; Arrian, *Peripl. P. E.* pp. 1, 3, 6; Scylax, p. 33.) It derived its name probably from its form, being situated on an elevated platform, as it were a table above the sea; though the town of Trapezus in Arcadia pretended to be the mother-city of Trapezus in Pontus (Paus. viii. 27. § 4). Trapezus was already a flourishing town when Xenophon arrived there on his memorable retreat; and he and his men were most hospitably treated by the Trapezuntians. (Xen. *Anab.* v. 5. § 10.) At that time the Colchians were still in possession of the territory, but it afterwards was occupied by the Macrones. The real greatness of Trapezus, however, seems to have commenced under the dominion of the Romans. Pliny (vi. 4) calls it a free city, a distinction which it had probably obtained from Pompey during his war against Mithridates. In the reign of Hadrian, when Arrian visited it, it was the most important city on the south coast of the Euxine, and Trajan had before made it the capital of Pontus Cappadocicus, and provided it with a larger and better harbour. (Arrian, *Peripl. P. E.* p. 17; comp. Tac. *Ann.* xiii. 39, *Hist.* iii. 47; Pomp. Mela, i. 19; Strab. vii. pp. 309, 320, xi. p. 499, xii. p. 548; Steph. B. *s. v.*) Henceforth it was a strongly fortified commercial town; and although in the reign of Gallienus it was sacked and burnt by the Goths (Zosim. i. 33; Eustath. *ad Dion. Per.* 687), it continued to be in such excellent condition, that in the reign of Justinian it required but few repairs. (Procop. *de Aed.* iii. 7.) From the Notitia Imperii (c. 27) we learn that Trapezus was the station of the first Pontian legion and its staff. Some centuries later a branch of the imperial house of the Comneni declared themselves independent of the Greek Empire, and made Trapezus the seat of their principality. This small principality maintained its independence even for some time after the fall of Constantinople; but being too weak to resist the overwhelming power of the Turks, it was obliged, in A. D. 1460, to submit to Mohammed II., and has ever since that time been a Turkish town. (Chalcond. ix. p. 263, foll.; Duc. 45; comp. Gibbon, *Decline*, c. xlviii. foll.) The port of Trapezus, called Daphnus, was formed by the acropolis, which was built on a rock running out into the sea. (Anon. *Peripl. P. E.* p. 13.) The city of Trebizond is still one of the most flourishing commercial cities of Asia Minor, but it contains no ancient remains of any interest, as most of them belong to the period of the Lower Empire. (Tournefort, *Voyage au Levant*, iii., lettre 17, p. 79, foll.; Fontanier, *Voyages dans l'Orient*, p. 17—23; Hamilton's *Researches*, i. p. 240.) The coins of Trapezus all belong to the imperial period, and extend from the reign of Trajan to that of Philip. (Eckhel, i. 2. p. 358; Sestini, p. 60.) [L. S.]

TRA'PEZU'S (Τραπεζοῦς, -οῦντος: *Eth.* Τραπεζούντιος), a town of Arcadia, in the district Parrhasia, a little to the left of the river Alpheius, is said to have derived its name from its founder Trapezeus, the son of Lycaon, or from *trapeza* (τράπεζα), "a table," because Zeus here overturned the table on which Lycaon offered him human food. (Paus. viii. 3. §§ 2, 3; Apollod. iii. 8. § 1.) It was the royal residence of Hippothous, who transferred the seat of government from Tegea to Trapezus. On the foundation of Megalopolis, in B. C. 371, the inhabitants of Trapezus refused to remove to the new city; and having thus incurred the anger of the other Arcadians, they quitted Peloponnesus, and took refuge in Trapezus on the Pontus Euxeinus, where they were received as a kindred people. The statues of some of their gods were removed to Megalopolis, where they were seen by Pausanias. Trapezus stood above the modern *Mavriá*. (Paus. viii. 5. § 4, 27. §§ 4—6, viii. 29. § 1, 31. § 5; Herod. vi. 127; Steph. B. *s. v.*; Leake, *Morea*, vol. ii. p. 292; Ross, *Reisen im Peloponnes*, vol. i. p. 90.)

TRAPEZUS MONS. [TAURICA CHERSONESUS.]

TRA'RIUM (Τράριον), a town of Mysia, mentioned by Strabo in conjunction with Perperena (xiii. p. 607.) Tzetzes (*ad Lycophr.* 1141, 1159) mentions a mountain named Traron (Τράρων) in the Troad.

TRASIMENUS LACUS* (ἡ Τρασουμέννα or Τρασυμένα λίμνη, Strab.; ἡ Ταρσιμένη λίμνη, Pol.: *Lago di Perugia*), one of the most extensive and important of the lakes of Etruria, situated between Cortona and Perusia. It is the largest of all the lakes of Etruria, being above 10 miles in length by 8 in breadth: and differs from all the other considerable lakes of that country in not being of volcanic origin. It is merely formed in a depressed basin, surrounded on all sides by hills of moderate elevation, and having no natural outlet. The hills on the N. side of the lake, which extend from Crotona to Perusia, are considerably more elevated than those that form the other sides of the basin, but even these scarcely rise to the dignity of mountains. The lake itself is of small depth, nowhere exceeding 30 feet, and its banks are almost everywhere low, flat, and covered with reeds. No considerable town was situated on its shores: Perusia, from which it derives its modern name of the *Lago di Perugia*, stands on a lofty hill about 10 miles to the E. of it; Clusium is situated about 9 miles to the SW. and Cortona between 6 and 7 to the NW. The highroad from Arretium to Perusia followed the northern shore of the lake for a considerable distance.

---

* This is the form universally found in the best MSS. of Latin writers: there is no good ancient authority for the orthography of THRASIMENUS or THRASYMENUS, so generally adopted by modern writers.

The lake Trasimenus derives its chief celebrity from the great victory obtained upon its shores by Hannibal over the Roman consul, C. Flaminius, B. C. 217, one of the greatest defeats sustained by the Roman arms during the whole course of their history. The circumstances of this battle are more clearly related and more readily understood with reference to the actual localities than those of any of the other great battles of Hannibal. The Carthaginian general, after crossing the Apennines, and effecting his toilsome march through the marshes of Etruria, had encamped in the neighbourhood of Faesulae (Pol. iii. 80, 82). Flaminius was at this time posted with his army at Arretium, and Hannibal, whose object was to draw him into a general battle, moved along the upper valley of the Arnus, and passing within a short distance of the consul's camp, advanced along the road towards Rome (i. e. by Perusia), laying waste the country as he advanced. Flaminius on this hastily broke up his camp, and followed the Carthaginian army. Hannibal had already passed the city of Cortona on his left, and was advancing along the N. shore of the lake, which lay on his right hand, when, learning that Flaminius was following him, he determined to halt and await his attack, taking advantage of the strong position which offered itself to him. (Pol. iii. 82; Liv. xxii. 4.) The hills which extend from Cortona to the lake, called by Livy the "montes Cortonenses," and now known as the *Monte Gualandro*, descend completely to the bank of the lake, or at least to the marshes that border it, at a point near the NW. angle of the lake, now marked by a village and a round tower called *Borghetto*. This spur of the hills completely separates the basin of the lake from the plains below Cortona, and it is not until after surmounting it that the traveller by the modern road comes in sight of the lake, as well as of the small plain or valley, shut in between its N. shore and the *Gualandro*, which was the actual scene of the catastrophe. "Arrived at the highest point of the road, the traveller has a partial view of the fatal plain, which opens fully upon him as he descends the *Gualandro*. He soon finds himself in a vale, enclosed to the left, and in front, and behind him by the *Gualandro* hills, bending round in a segment larger than a semicircle, and running down at each end to the lake, which obliques to the right and forms the chord of this mountain arc. The position cannot be guessed at from the plains of Cortona, nor appears to be so completely enclosed, unless to one who is fairly within the hills. It then indeed appears a place made as it were on purpose for a snare, 'locus insidiis natus.' (Liv. xxii. 4.) *Borghetto* is then found to stand in a narrow marshy pass close to the hill and to the lake, whilst there is no other outlet at the opposite turn of the mountains than through the little town of *Passignano*, which is pushed into the water by the foot of a high rocky acclivity. There is a woody eminence branching down from the mountains into the upper end of the plain nearer to the site of *Passignano*, and on this stands a village called *Torre*" (more properly *Tuoro*). (Hobhouse, *Notes and Illustrations to Childe Harold*, canto iv. st. 63.)

From this description of the localities by an eyewitness, which agrees almost exactly with that given by Livy (xxii. 4), the details of the battle are rendered perfectly clear. Hannibal occupied the hill last-mentioned with the main body of his troops, his heavy-armed African and Spanish infantry, while he sent round his light-armed troops to occupy the slopes of *Monte Gualandro* on his right, so as to threaten the left flank of the advancing Roman army, while he posted his cavalry and the Gaulish troops on the hills on the left between *Borghetto* and the present road. Flaminius advanced the next morning almost before daylight, while a thick fog rising from the lake still further concealed the position of the enemy. He therefore advanced through the pass, in ignorance of the bodies of troops that hung upon both his flanks, and, seeing only the array in front on the hill of *Tuoro*, began to draw up his forces for battle in the plain in front of them. But before he was able to commence the engagement, he found himself suddenly attacked on all sides at once: the surprise was complete, and the battle quickly became a mere promiscuous massacre. Flaminius himself fell early in the day, and numbers of the Roman troops were driven into the lake, and either perished in its waters or were put to the sword by the enemy's cavalry. A body of about 6000 men having forced their way through the enemy, occupied a hill on which there stood an Etruscan village, but finding themselves wholly isolated, surrendered the next day to Maharbal. Sixteen thousand Roman troops perished in this disastrous battle: the site of the chief slaughter is still marked by a little rivulet which traverses the plain, and is known at the present day by the name of the *Sanguineto*.* (Hobhouse, *l. c.*) The details of the battle are given by Polybius (iii. 83, 84) and Livy (xxii. 4—6). It is remarkable that in this instance the localities are much more clearly and accurately described by Livy than by Polybius: the account given by the latter author is not incompatible with the existing local details, but would not be easily understood, unless we were able to correct it by the certainty that the battle took place on this particular spot. The narratives of Appian and Zonaras add nothing to our knowledge of the battle. (Appian, *Annib.* 9, 10; Zonar. viii. 25.) Numerous allusions to and notices of the memorable slaughter at the lake of Trasimene are found in the later Roman writers, but they have preserved no additional circumstances of interest. The well-known story related by Livy, as well as by Pliny and later writers, that the fury of the combatants rendered them unconscious of the shock of an earthquake, which occurred during the battle, is easily understood without any prodigy, such shocks being frequently very local and irregular phenomena. (Plin. ii. 84. s. 86, xv. 18. s. 20; Cic. *de N. D.* ii. 3,

---

* The name of *Ossaja*, a village on the road from Cortona to the lake, has been thought to be also connected with the slaughter of the battle, but this is very improbable. *Ossaja* is several miles distant from the lake, and on the other side of the hills. (Hobhouse, *l. c.*) It is probable moreover that the modern name is only a corruption of *Orsaja* or *Orsaria*. (Niebuhr, *Lectures*, vol. ii. p. 102.)

de Div. ii. 8; Eutrop. iii. 9; Flor. ii. 6. § 13; Oros. iv. 15; Val. Max. i. 6. § 6; Sil. Ital. i. 49, v. 1, &c.; Ovid, *Fast.* vi. 770; Strab. v. p. 226.)

The lake is now commonly known as the *Lago di Perugia*, though frequently called on maps and in guide-books the *Lago Trasimeno*. [E. H. B.]

TRAUSI (*Τραυσοί*, Herod. v. 3, 4; Thrausi, Liv. xxxviii. 41), a Thracian people, who appear, in later times at least, to have occupied the SE. offshoots of Mount Rhodope, to the W. of the Hebrus, and about Tempyra. Herodotus tells us that the Trausi entertained peculiar notions respecting human life, which were manifested in appropriate customs. When a child was born, his kinsfolk, sitting around him, bewailed his lot in having to encounter the miseries of mortal existence; whereas when any one died, they buried him with mirth and rejoicing, declaring him to have been freed from great evils, and to be now in perfect bliss.*

As to the Thrausi spoken of by Livy, see TEMPYRA.

Suidas and Hesychius (*s. v.*) mention a Scythian tribe called the Trausi, who, according to Steph. B. (*s. v.*), were the same people as the Agathyrsi. The last-named author speaks of a Celtic race also, bearing this appellation. On this slight foundation the strange theory has been built that the Thracian Trausi were the original stock of the Celts; and by way of supporting this notion, its propounders arbitrarily read Τραυσοί instead of Πραῦσοι in Strabo, iv. p. 187, where Strabo expressly says that he was unable to state what was the original abode of the Prausi: had he been writing about the Thracian Trausi we may safely assume that no such ignorance would have been acknowledged. (Cf. Ukert, ii. 2. § 230.) [J. R.]

TRAVUS (Τραῦος, Herod. vii. 109), a small river in the S. of Thrace, which falls into the *λίμνη Βιστονίς*, a shallow aestuary penetrating far into the land, NE. of Abdera. The Travus is the principal outlet for the drainage of that part of southern Thrace which is included between the Nestus and the Hebrus. [J. R.]

TREBA or TRE'BIA. 1. (*Eth.* Trebias, ātis: *Trevi*), a municipal town of Umbria, situated at the western foot of the Apennines, between Fulginium and the sources of the Clitumnus, about 4 miles from the latter. It is mentioned by Pliny among the municipal cities of Umbria, and its name is found in an inscription among the "xv Populi Umbriae:" in both these authorities the name of the people is written Trebiates. The Jerusalem Itinerary, which places it on the Via Flaminia, 4 miles from Sacraria (at the sources of the Clitumnus) and 5 from Fulginium, writes the name Trevis, thus approximating closely to the modern name of *Trevi*. The modern town is still a considerable place standing on a hill which rises abruptly from the valley of the Clitumnus. (Plin. iii. 14. s. 19; *Itin. Hier.* p. 613; Orell. *Inscr.* 98).

2. (*Τρῆβα*, Ptol.: *Eth.* Trebanus: *Trevi*), a city of Latium, in the upper valley of the Anio, about 5 miles from the sources of that river and 10 above *Subiaco*. It is mentioned both by Pliny and Ptolemy, as well as by Frontinus, who calls it Treba Augusta (Plin. iii. 5. s. 9; Ptol. iii. 1. § 62; Frontin. *de Aquaed.* 93); and in an inscription, which proves it to have been a town of municipal rank under the Roman Empire. (Orell. *Inscr.* 4101.) But its name is not mentioned in history, and it was apparently never a place of importance, for which its secluded position is alone sufficient to account. The ancient name and site are retained by the modern village of *Trevi*, a poor place, surrounded on all sides by lofty mountains. [E. H. B.]

TRE'BIA (ὁ Τρεβίας: *Trebbia*), a considerable river of Gallia Cispadana, falling into the Padus about 2 miles W. of Placentia. From its proximity to the latter city Pliny designates it as "Trebias Placentinus." (Plin. iii. 16. s. 20; Strab. v. p. 217.) It has its sources in the Ligurian Apennines near *Montebruno*, and has a course of above 50 miles from thence to the *Po*. Throughout the greater part of this course it flows through a mountain valley, passing under the walls of *Bobbio* (celebrated in the middle ages for its convent, from which some of the most valuable MSS. of ancient authors have been derived), and does not emerge from the hills which form the underfalls of the Apennines till within about 12 miles of its mouth. For the remainder of its course it flows through the fertile plain of the Padus, and crosses the Via Aemilia about 3 miles W. of Placentia. It appears probable that the Trebia was fixed by Augustus as the western limit of the Eighth Region, and continued from that period to be regarded as the limit of Gallia Cispadana towards Liguria. This is not distinctly stated, but may probably be inferred from the circumstance that Placentia was situated in the Eighth Region, while Iria (*Voghera*), the next town to the W., was certainly in Liguria. (Plin. iii. 5. s. 7, 15. s. 20.) Like most of the rivers which flow from the Apennines, the Trebia varies very much according to the season: in summer it is but a scanty stream, winding through a broad bed of stones, but in winter and after heavy rains it becomes a formidable torrent.

The chief celebrity of the Trebia is derived from the battle which was fought on its banks in B.C. 218 between Hannibal and the Roman consul Sempronius, and which was the first of the decisive victories obtained by the Carthaginian general. Unfortunately the movements which preceded and led to this battle, and the exact site on which it occurred, are very difficult to determine. Scipio after his defeat on the Ticinus had recrossed the Padus and withdrawn to Placentia, where the presence of a Roman colony afforded him a secure stronghold. Hannibal on the other hand effected his passage of the Padus higher up, above its junction with the Ticinus, and then advanced along the right bank of the river, till he approached Placentia, and established his camp within 5 miles of that of Scipio. (Pol. iii. 66.) The defection of the Boian Gauls having soon after given the alarm to Scipio, he broke up his camp and withdrew "to the hills that bordered the river Trebia." (*Ib.* 67.) In this movement, it is clear, from what we are told immediately afterwards that, he *crossed* the river Trebia (*Ib.* 68): his former camp therefore, though in the neighbourhood of Placentia, must have been on the W. side of the Trebia. In this new position, which was one of considerable natural strength (*Ib.* 67), Scipio awaited the arrival of Sempronius with his army, who was advancing from Ariminum, and succeeded in effecting a junction with his colleague, without opposition from Hannibal. (*Ib.* 68.) The attention of the Carthaginian general had been apparently drawn off to the W.; where the town of Clastidium was betrayed into his hands. Meanwhile Sempronius, who was newly arrived, after a short interval of repose, was eager for a general engagement, and his confidence was increased by a partial success in a combat of cavalry, in the plain between the Trebia and the Padus (*Ib.* 69.) Hannibal, who on his side was equally desirous of a battle, took advantage of this disposition of Sempronius, and succeeded in drawing him out of his camp, where he could not venture to attack him, into the plain below, which was favourable to the operations of the Carthaginian cavalry and elephants. For this purpose he sent forward a body of Numidian horse, who crossed the Trebia and approached the Roman camp, but, as soon as a body of Roman cavalry and light-armed troops were sent out against them, retreated skirmishing until they had recrossed the river. Sempronius followed with his whole army, and crossed the Trebia, not without difficulty, for the river was swollen with late rains, and was only just fordable for the infantry. His troops suffered severely from cold and wet, and when the two armies met in order of battle, early began to feel themselves inferior to the enemy: but the victory was decided by a body of 1000 foot and 1000 horse, under the command of Mago, the brother of Hannibal, which had been placed by that general in ambuscade, in the hollow bed of a stream which crossed the field of battle, and by a sudden onset on the rear of the Roman army, threw it into complete confusion. A body of about 10,000 Roman infantry succeeded in forcing their way through the centre of the enemy's line, but finding themselves isolated, and their retreat to their camp quite cut off, they directed their march at once towards Placentia, and succeeded in reaching that city in safety. The other troops were thrown back in confusion upon the Trebia, and suffered very heavy loss in passing that river; but those who succeeded in crossing it, fell back upon the body already mentioned and made good their retreat with them to Placentia. Thither also Scipio on the following day repaired with that part of the Roman forces which had not been engaged in the battle. (Pol. iii. 70—74.)

---

* Mela has followed Herodotus very closely in the following passage (ii. 2): "Lugentur apud quosdam puerperia, natique deflentur: funera contra festa sunt, et veluti sacra, cantu lusuque celebrantur."

From the view above given of the battle and the operations that preceded it, which coincides with that of General Vaudoncourt (*Campagnes d'Annibal en Italie*, vol. i. pp. 93—130), it seems certain that the battle itself was fought on the *left* bank of the Trebia, in the plain, but a short distance from the foot of the hills; while the Roman camp was *on* the hills, and on the right bank of the Trebia. It is certain that this view affords much the most intelligible explanation of the operations of the armies, and there is nothing in the narrative of Polybius (which has been exclusively followed in the above account) *inconsistent* with it, though it must be admitted that some difficulties remain unexplained. Livy's narrative on the contrary is confused, and though based for the most part on that of Polybius, seems to be mixed up with that of other writers. (Liv. xxi. 52—56.) From his account of the retreat of the Roman army and of Scipio to Placentia after the battle, it seems certain that he considered the Roman camp to be situated on the left bank of the river, so that Scipio must necessarily cross it in order to arrive at Placentia, and therefore he must have conceived the battle as fought on the right bank: and this view has been adopted by many modern writers, including Niebuhr and Arnold; but the difficulties in its way greatly exceed those which arise on the contrary hypothesis. Niebuhr indeed summarily disposes of some of these, by maintaining, in opposition to the distinct statements of Polybius, that Hannibal had crossed the Padus below Placentia, and that Sempronius joined Scipio from Genua and not from Ariminum. Such arbitary assumptions as these are worthless in discussing a question, the decision of which must rest mainly, if not entirely, on the authority of Polybius. (Niebuhr's *Lectures on Roman History* vol. ii. pp. 94—96; Arnold, *Hist. of Rome*, vol. iii. pp. 94—101.) Cramer adopts the views of General Vaudoncourt. (*Anct. Italy*, vol. i. p. 82.)

The battle on the Trebia is alluded to by Lucan, and described by Silius Italicus: it is noticed also by all the epitomisers of Roman history; but none of these writers add anything to our knowledge of the details. (Lucan, ii. 46; Sil. Ital. iv. 484—666; Corn. Nep. *Hann.* 4; Eutrop. iii. 9; Oros. iv. 14; Flor. ii. 6. § 12.) [E. H. B.]

TREBULA (Τρήβουλα: *Eth.* Trebulanus: *Treglia*), a city of Campania, situated in the district N. of the Vulturnus, in the mountain tract which extends from near *Cajazzo* (Calatia) to the Via Latina. Pliny terms the citizens "Trebulani cognomine Balinienses," probably to distinguish them from those of the two cities of the same name among the Sabines (Plin. iii. 5. s. 9); but the Campanian town seems to have been the most considerable of the three, and is termed simply Trebula by Ptolemy, as well as by Livy. The first mention of the name occurs in B. C. 303, when we are told that the Trebulani received the Roman franchise at the same time with the Arpinates. (Liv. x. 1.) There seems no doubt that the Campanian city is here meant: and this is quite certain in regard to the next notice in Livy, where he tells us that the three cities of Compulteria, Trebula, and Saticula, which had revolted to Hannibal, were recovered by Fabius in B. C. 215. (Id. xxiii. 39.) The "Trebulanus ager" is mentioned also by Cicero among the fertile districts of Campania, which Rullus proposed to distribute among the poorer Roman citizens (Cic. *de Leg. Agr.* ii. 25); and we learn from Pliny that it was noted for its wines, which had rapidly risen in estimation in his day. (Plin. xiv. 6. s. 8.) The Liber Coloniarum also mentions Trebula among the municipal towns of Campania. It appears to have received a fresh body of settlers under Augustus, but without attaining the rank of a colony. (*Lib. Col.* p. 238; Plin. iii. 5. s. 9; Ptol. iii. 1. § 68.) The site of Trebula, which was erroneously fixed by Cluverius and some local writers to the S. of the Vulturnus, appears to be correctly identified by local antiquarians with a place called *Treglia* or *Tregghia*, at the foot of the *Pizzo S. Salvatore*, about 6 miles N. of the Vulturnus and 8 NE. of *Capua*. There are said to be considerable ancient remains upon the spot, which together with the resemblance of name would seem clearly to establish the position of the ancient city. (Romanelli, vol. iii. pp. 575, 576; Trutta, *Antichità Allifane. Diss.* xxiii; Abeken, *Mittel-Italien*, p. 99.) [E. H. B.]

TREBULA (Τρήβουλα: *Eth.* Trebulanus), was the name of two cities or towns of the Sabines, apparently at no great distance from one another, which were called for the sake of distinction Trebula Mutusca and Trebula Suffenas.

1. TREBULA MUTUSCA, called by Virgil simply MUTUSCAE, while the full name is preserved to us by Pliny, the only author who mentions both places ("Trebulani qui cognominantur Mutuscaei, et qui

Suffenates," Plin. vi. 12. s. 17). Its site is clearly fixed at *Monte Leone*, sometimes called *Monte Leone della Sabina*, a village about 2 miles on the right of the Via Salaria, between *Osteria Nuova* and *Poggio S. Lorenzo*. Here there are considerable ruins, including those of a theatre, of thermae or baths, and portions of the ancient pavement. Several inscriptions have also been found here, some of which have the name of the people, "Plebs Trebulana," "Trebulani Mutuscani," and "Trebulani Mut.," so that no doubt can remain of their attribution. (Chaupy, *Maison d'Horace*, vol. iii. pp. 93—96; Orell. *Inscr.* 923, 3442, 3963.) As this seems to have been much the most considerable place of the two, it is probably that meant by Strabo, who mentions Trebula without any distinctive adjunct but in conjunction with Eretum (Strab. v. p. 228). The Liber Coloniarum also mentions a "Tribule, municipium" (p. 258) which is probably the same place. Martial also alludes to Trebula as situated among cold and damp mountain valleys (v. 72), but it is not certain which of the two places he here refers to. Virgil speaks of Mutusca as abounding in olives ("oliviferaeque Mutuscae," *Aen.* vii. 711), which is still the case with the neighbourhood of *Monte Leone*, and a village near it bears in consequence the name of *Oliveto*.

2. Trebula Suffenas, the name of which is known only from Piny, is of very uncertain site. Chaupy would place it at *Rocca Sinibaldi*, in the valley of the *Turano*, but this is mere conjecture. Guattani on the other hand fixes it on a hill near *Stroncone*, between *Rieti* and *Terni*, where there are said to be distinct traces of an ancient town. (Chaupy, *l. c.*; Guattani *Mon. della Sabina*, vol. i. p. 190.) It is probable that the Tribula (Τρίβολα) of Dionysius, mentioned by him among the towns assigned by Varro to the Aborigines (Dionys. i. 14) may be the same with the Trebula Suffenas of Pliny. In this case we know that it could not be far from Reate. [E. H. B.]

TREIA (*Eth.* Treiensis: Ru. near *Treja*), a municipal town of Picenum, situated on the left bank of the river Potentia, about 9 miles below Septempeda (*S. Severino*) and 5 above Ricina. Pliny is the only geographer that mentions it; but it is probable that the Τραΐανα of Ptolemy is only a corruption of its name. (Plin. iii. 13. s. 18; Ptol. iii. 1. § 52.) The Treienses are enumerated by Pliny among the municipal communities of Picenum, and the municipal rank of the town is further attested by several inscriptions. (Orell. *Inscr.* 516, 3899.) It seems indeed to have been a considerable place. The Itinerary of Antoninus places it on the branch of the Via Flaminia which led direct to Ancona: it was 9 miles from Septempeda and 18 from Auximum. (*Itin. Ant.* p. 312.) Cluverius says that he could find no trace either of the place or the name; but the ruins were pointed out by Holstenius as still existing on the left bank of the *Potenza*, at the foot of the hill occupied by the village of *Montecchio*. The latter place has since adopted the ancient name of *Treja*, and having been augmented by the population of several neighbouring villages, is now become a considerable town. (Cluver. *Ital.* p. 738; Holsten. *Not. ad Cluv.* p. 136.) [E. H. B.]

TREMERUS INS. [Diomedeae Insulae.]

TRE'MITHUS (Τρεμιθοῦς, Steph. B. *s. v.*; Τρεμηθοῦς, Ptol. v. 14. § 6; Τρίμυθος, Constant. *de Them.* i. 15, p. 39, ed. Bonn; Τρεμιθούντων, Hierocl. p. 707: *Eth.* Τρεμιθούσιος, Τρεμιθοπολίτης), a town in the interior of Cyprus, was the seat of a bishopric and a place of some importance in the Byzantine times. According to the Peutinger Table it was 18 miles from Salamis, 24 from Citium, and 24 from Tamassus. Stephanus B. calls it a village of Cyprus, and derives its name from the turpentine trees (τερέβινθοι) which grew in its neighbourhood. (Engel, *Kypros*, vol. i. p. 148.)

TRE'MULA, a town in Mauretania Tingitana. (*Itin. Ant.* p. 24.) Variously identified with *Ezadschen* and *Soe el Campa*. [T. H. D.]

TREPONTIUM or TRIPUNTIUM, a place on the Appian Way near the entrance of the Pontine Marshes, 4 miles nearer Rome than Forum Appii. It is not mentioned as a station in the Itineraries, but we learn from an inscription of the time of Trajan that it was from thence the part of the road which was restored by that emperor began. This important work, as we are informed by another inscription, was continued for *nineteen miles*, a circumstance that explains the origin of the name of Decennovium, which occurs at a later period in connection with the Pontine Marshes. Procopius calls the Decennovium a *river;* but it is evident that it was in reality an artificial cut or canal, such as must always have accompanied the highroad through these marshes, and as we know already existed in the days of Horace from Forum Appii. The importance of this work will account for the circumstance that we find the Pontine Marshes themselves called by Cassiodorus "Decennovii Paludes." (Cassiod. *Var.* ii. 32, 33; Procop. *B. G.* i. 11.) The site of Trepontium is clearly marked at the distance of 39 miles from Rome, by the name of *Torre di Treponti*, together with the remains of the 3 ancient bridges, from which it derives its name (Chaupy, *Maison d'Horace*, vol. iii. pp. 387—392; D'Anville, *Analyse de l'Italie*, pp. 184—187.)

The inscriptions above cited are given by Sir R. Hoare, *Class. Tour*, vol. i. pp. 97, 98; and by the Abbé Chaupy (*l. c.*). The name of Τραπόντιον, found in Strabo (v. p. 237) among the cities on the left of the Appian Way, can hardly be other than a corruption of Trepontium, but it is wholly out of place in that passage, and is supposed by Kramer to be an interpolation. [E. H. B.]

TRERES (Τρῆρες), a people repeatedly mentioned by Strabo, generally as a tribe of, or at least as closely connected with, the Cimmerii, but in a few passages as Thracians. They are not named by Homer or Herodotus. Strabo was evidently undecided whether to regard them as a distinct race, or as identical with the Cimmerii, in whose company they several times made destructive inroads into Asia Minor. "The Cimmerii, whom they name Treres also, or some tribe of them, often overran the southern shores of the Euxine and the adjoining countries, sometimes throwing themselves upon the Paphlagonians, at other times upon the Phrygians, at the time when they say Midas died from drinking bull's blood. And Lygdamis led his army as far as Lydia and Ionia, and took Sardes, but perished in Cilicia. And the Cimmerii and Treres often made such expeditions. But they say that the Treres and Cobus [their leader] were at last driven out [of Asia] by Madys, the king of the Scythians."* (Strab. i. p. 61). "Callisthenes states that Sardes was taken several times; first by the Cimmerians; then by the Treres and Lycians, as Callinus also shows; lastly in the time of Cyrus and Croesus." (Id. xiii. p. 627). "In olden times, it befel the Magnetes [the people of Magnesia on the Maeander] to be utterly destroyed by the Treres, a Cimmerian tribe." (Id. xiv. p. 647; see also xi. p. 511, xii. p. 573; Cimmerii, Vol. I. p. 623, seq.; Müller, *Hist. Lit. Anc. Greece*, pp. 108, 109; and cf. Herod. i. 6, 15, 16, 103.)

---

* The reading in the text is ὑπὸ Μάδυος τοῦ τῶν Κιμμερίων βασιλέως; but as just before we find Μάδυος τοῦ Σκυθικοῦ, we can have no hesita-

Various attempts have been made to fix the dates of these events; but the means of doing so appear to be wanting, and hence scholars have arrived at very different conclusions on the subject. Strabo infers from some expressions of Callinus that the destruction of Sardes preceded that of Magnesia, which latter occurred, he considers, after the time of that poet, and during the age of Archilochus, who alludes to it.

Thucydides (ii. 96) states that the kingdom of Sitalces was bounded on the side next to the Triballi by the Treres and Tilataei, who dwelt on the northern slope of Mount Scombrus (Scomius), and extended towards the W. as far as the river Oscius (Oescus). Whether this relative clause applies to the Treres as well as to the Tilataei is doubtful; but the collocation of the words seems to confine it to the latter.

Strabo (i. p. 59) speaks of the Treres as dwelling with the Thracians; and says that the Treres, who were Thracians, possessed a part of the Troad after the time of Priam (xiii. p. 586).

Pliny does not mention the Treres as a Thracian people; but in the description of Macedonia (iv. 10. s. 17), says that they, with the Dardani and Pieres, dwelt on its borders; it is not clear, however, which borders are meant. (Cf. Theopom. *Frag.* 313, where they are called Τρᾶρες; and Steph. B. p. 664, where also a district of Thrace inhabited by them is named Τρῆρος.)

It is possible that these Thracian Treres were the descendants of a body of the Cimmerian Treres, left N. of the Haemus when the main body advanced to Asia Minor; for there can be little doubt that Niebuhr's view respecting the course of their inroads is correct. "The general opinion, which is presupposed in Herodotus also, is that the Cimmerians invaded Asia Minor from the E., along the coasts of the Euxine. But it would seem that, on the contrary, they came through Thrace, for they make their first appearance in Ionia and Lydia. The former road is almost entirely impassable for a nomadic people, as the Caucasus extends to the very shores of the Euxine." (*Lect. Anc. Hist.* i. p. 32, note.)

In confirmation of the conjecture above made, we may refer to the parallel case mentioned by Caesar (*B. G.* ii. 29), that the Aduatuci, a Belgian tribe, were the descendants of the 6000 men whom the Cimbri and Teutoni, on their march towards Italy, left behind them W. of the Rhine, to guard that part of their property which they were unable to take with them any farther. [J. R.]

TRERUS (Τρῆρος, Strab.: *Sacco*), a river of Latium, and one of the principal tributaries of the Liris (*Garigliano*), into which it discharges its waters close to the ruins of Fabrateria. (Strab. v. p. 237.) Its name is mentioned only by Strabo, but there is no doubt of its identification: it is still called the *Tolero* in the lower part of its course, near its junction with the *Garigliano*, but more commonly known as the *Sacco*. It has its sources in the elevated plain which separates the mountains about Praeneste from the Volscian group; and the broad valley through which it flows for above 40 miles before it joins the *Garigliano* must always have formed a remarkable feature in this part of Italy. Throughout its extent it separates the main or central ranges of the Apennines from the outlying mass of the *Monti Lepini* or Volscian mountains, and hence it must, from an early period, have constituted one of the natural lines of communication between the plains of Latium proper (the modern *Campagna di Roma*) and those of Campania. After the whole district had fallen under the power of Rome it was the line followed by the great highroad called the Via Latina. [Via Latina.] [E. H. B.]

TRES ARBORES, the Three Trees, was a Mutatio or relay for horses mentioned in the Jerusalem Itin. between Vasatae and Elusa (*Eause*). The site is unknown. [G. L.]

TRES TABERNAE, was the name of a station on the Via Appia, between Aricia and Forum Appii, which is noticed not only in the Itineraries (*Itin. Ant.* p. 107; *Tab. Peut.*), but by Cicero and in the Acts of the Apostles. From the former we learn that a branch road from Antium joined the Appian Way at this point (Cic. *ad Att.* ii. 12); while in the latter it is mentioned as the place where many of the disciples met St. Paul on his journey to Rome. (*Acts*, xxviii. 15.) It was probably therefore a village or place of some importance from the traffic on the Appian Way. Its position would appear to be clearly determined by the Antonine Itinerary, which gives 17 miles from Aricia to Tres Tabernae, and 10 from thence to Forum Appii: and it is a strong confirmation of the accuracy of these data that the distance thus obtained from Forum Appii to Rome corresponds exactly with the true distance of that place, as marked by ruins and ancient milestones. It is therefore wholly unnecessary to change the distances in the Itinerary, as proposed by D'Anville and Chaupy, and we may safely fix Tres Tabernae at a spot about 3 miles from the modern *Cisterna*, on the road to *Terracina*, and very near the commencement of the Pontine Marshes. The Abbé Chaupy himself points out the existence of ancient remains on this spot, which he supposes to be those of the station Ad Sponsas mentioned only in the Jerusalem Itinerary. It is far more likely that they are those of Tres Tabernae; if indeed the two stations be not identical, which is very probable. This situation would also certainly accord better than that proposed by Chaupy with the mention of Tres Tabernae in Cicero, who there joined the Appian Way on his road from Antium to his Formian villa, not to Rome. (Cic. *ad Att.* ii. 12, 13, 14; Chaupy, *Maison d'Horace*, vol. iii. p. 383; D'Anville, *Analyse de l'Italie*, p. 195; Westphal, *Röm. Kampagne*, p. 69.) [E. H. B.]

TRES TABERNAE, in Gaul. [Tabernae.]

TRETA (Τρῆτα, Strab. xiv. p. 683), in Cyprus, called Τρίτοι in the *Stadiasmus Maris Magni* (p. 285, ed. Hoffmann), where it is placed 50 stadia from Palaepaphus or Old Paphus, was apparently a promontory in the SW. of the island, and probably the same as the one called Φρούριον by Ptolemy (v. 14. § 2).

TRETUM (Τρῆτον ἄκρον, Ptol. iv. 3. § 3), a

---

tion in adopting Kramer's emendation of Σκυθικῶν for Κιμμερίων.

promontory of Numidia at the W. point of the Sinus Oleachites. (Strab. xvii. p. 829, 832.) It probably derived its name from the numerous caves in the cliffs, which are still the lurking places of the piratical tribes of this coast. Now *Sebba Rus.* [T. H. D.]

TRETUM PROM. (Τρητόν, *Stadiasm.* § 327), the NW. promontory of Crete now called *Grabúsa*, the Corycus of Ptolemy. [E. B. J.]

TRETUS. [Argos, p. 201, b.]

TREVA (Τρηούα), a town of the Saxones in north-western Germany (Ptol. ii. 11. § 27), which must have been situated somewhere on the *Trave*, but as no further details are known, it is impossible to fix its site with any degree of certainty. [L. S.]

TREVENTUM or TEREVENTUM (*Eth.* Treventinas, Plin.; but inscriptions have Terventinas and Tereventinas: *Trivento*), a town of Samnium, in the country of the Pentri, situated on the right bank of the Trinius (*Trigno*), not far from the frontiers of the Frentani. Its name is not noticed in history, but Pliny mentions it among the municipal towns of Samnium in his time: and we learn from the Liber Coloniarum that it received a Roman colony, apparently under the Triumvirate (Plin. iii. 14. s. 17; *Lib. Colon.* p. 238). It is there spoken of as having been thrice besieged ("ager ejus . . . post tertiam obsidionem adsignatus est"), probably during the Social War and the civil wars that followed; but we have no other account of these sieges; and the name is not elsewhere mentioned. But from existing remains, as well as inscriptions, it appears to have been a place of considerable importance, as well as of municipal rank. The modern *Trivento*, which is still the see of a bishop and the capital of the surrounding district, stands on a hill above the river *Trigno*, but the ruins of ancient buildings and fragments of masonry are scattered to a considerable extent through the valley below it. (Romanelli, vol. ii. p. 473.) The inscriptions which have been discovered there are given by Mommsen (*Inscr. R. N.* pp. 269, 270). [E. H. B.]

TREVERI or TREVIRI (Τρηούϊροι, Τριϐηροί, Ptol.). There is authority for both forms of the name. The position of the Treviri is determined by several passages of Caesar. The Treviri bordered on the Rhine (*B. G.* iii. 11, iv. 10), and south of them along the Rhine were the Triboci or Tribocci. The Arduenna Silva extended through the middle of the territory of the Treviri from the Rhine to the commencement of the territory of the Remi (*B. G.* v. 3). The Treviri were separated from the Germans by the Rhine (*B. G.* vii. 63, viii. 25); the Ubii were their neighbours on the opposite side of the Rhine (*B. G.* vi. 29, 35). In Caesar's time the Treviri differed little from the Germans in their way of living and their savage temper. Tacitus remarks (*de Mor. Germ.* c. 28) that the Treviri and Nervii affected a Germanic origin, and it is probable that the Treviri were mixed with Germans, but Caesar supposed them to be a Gallic people. Mela (iii. 2) calls them the most renowned of the Belgae. When Hieronymus speaks of the resemblance between the language of the Galatae of Asia and of the Treviri, he means to say that the Treviri are Galli [Galatia, Vol. I. p. 931]. Strabo (iv. p. 194) speaks of the Nervii as being German. He says: "The Nervii are neighbours of the Treviri, and they (the Nervii) are also a German people;" which remark about the Nervii being also German does not refer to the Treviri, but to the Triboci, whom he had just spoken of as a German nation which had settled on the Gallic side of the Rhine.

It seems impossible to determine whether Caesar includes the Treviri among the Belgae or the Celtae. Some geographers include them in the Gallia of Caesar in the limited sense, that is, in the country of the Celtae, which lay between the *Garonne* and the *Seine*, and between the Ocean and the Rhine. If this determination is correct, the Mediomatrici also of course belong to Caesar's Gallia in the limited sense. [Mediomatrici.]

The Treviri are often mentioned by Caesar, for they had a strong body of cavalry and infantry, and often gave him trouble. From one passage (*B. G.* vi. 32) it appears that the Segni and Condrusi, German settlers in Gallia, were between the Treviri and the Eburones; and the Condrusi and Eburones were dependents of the Treviri (*B. G.* iv. 6). Caesar constructed his bridges over the Rhine in the territory of the Treviri (*B. G.* vi. 9); and Strabo speaks of a bridge over the Rhine in the territory of the Treviri. It appears then that the Treviri occupied a large tract of country between the Mosa (*Maas*) and the Rhine, which country was intersected by the lower course of the Mosella (*Mosel*), for Augusta Trevirorum (*Trier*), on the Mosella, was the chief town of the Treviri in the Roman imperial period and probably a town of the Treviri in Caesar's time. It is not possible to fix the exact limits of the Treviri on the Rhine, either to the north or the south. When the Germans were settled on the west side of the Rhine by Agrippa and after his time, the Treviri lost part of their territory; and some modern writers maintain that they lost all their country on the Rhine, a conclusion derived from a passage of Pliny (iv. c. 17), but a conclusion by no means certain. Another passage of Pliny, cited by Suetonius (*Calig.* c. 8), says that Caligula was born "in Treveris, vico Ambiatino, supra Confluentes," and this passage places the Treviri on the Rhine. Ptolemy in his geography gives the Treviri no place on the Rhine: he assigns the land on the west bank of the river to the Germania Inferior and Germania Superior. The bishopric of *Trier* used to extend from the *Maas* to the *Rhine*, and along the Rhine from the *Ahr* below *Andernach* as far south as *Bingen*. The limits of the old country of the Treviri and of the diocese may have been the same, for we find many examples of this coincidence in the geography of Gallia. The rugged valley of the *Ahr* would be a natural boundary of the Treviri on the north.

Tacitus gives the Treviri the name of Socii (*Ann.* i. 63); and in his time, and probably before, they had what the Romans called a Curia or senate. The name of the Treviri often appears in the history of the war with Civilis (Tacit. *Hist.* iv.). The Treviri under the Empire were in that part of Gallia which was named Belgica, and their city Augusta Trevirorum was the chief place, and under the later emperors frequently an imperial residence. [Augusta Trevirorum.] [G. L.]

TREVIDON, a place in Gallia, mentioned by Sidonius Apollinaris (*Propempt.*), the position of which is partly determined by the fact of the poet fixing Trevidon in the mountainous region of Central France, and partly by the existence of a place named *Trève* on the boundary of the old province of *Rouergue*, and on a little river named *Trevesel.* The mountain in which the *Trevesel* rises (*Lesperou*) is the

> "Vicinum nimis heu! jugum Rutenis"

of Sidonius. [Ruteni.] [G. L.]

TREVIRI. [TREVERI.]

TRIACONTASCHOENUS (Τριακοντάσχοινος, Ptol. iv. 7. § 32), a district so named by Ptolemy after the analogy of the Dodecaschoenus of Egypt, and forming the most northern part of Aethiopia on the W. side of the Nile, between the cataracts of that river and the Aethiopian mountains. [T. H. D.]

TRIADITZA (Τριάδιτζα; Nicet. Chon. iii. p. 214; *Apost. Geog.* Huds. iv. p. 43), a town in Upper Moesia, at the confluence of the sources of the Oescus, and the capital of the district called in late times Dacia Interior. It was situated in a fertile plain, and its site is identified with that of some extensive ruins S. of *Sophia*. [J. R.]

TRIBALLI (Τριϐαλλοί), a Thracian people which appears to have been in early times a very widely diffused and powerful race, about the Danube; but which, being pressed upon from the N. and W. by various nations, became gradually more and more confined, and at length entirely disappeared from history. Herodotus speaks of the Triballic plain, through which flowed the river Angrus, which fell into the Brongus, a tributary of the Ister (iv. 49). This is probably the plain of *Kossovo* in the modern *Servia*.

Thucydides states (ii. 96) that on the side of the Triballi, who were independent at the beginning of the Peloponnesian War, the territories of Sitalces were bounded by the Treres and Tilataei, whose W. limit was the river Oscius (Oescus), which must therefore, at that time, have been the E. frontier of the Triballi. (Cf. Plin. iii. 29, iv. 17; Strab. vii. pp. 317, 318.) Strabo (vii. p. 305) informs us that the Triballi were much exposed to the inroads of migrating hordes driven out of their own countries by more powerful neighbours, some expelled by the Scythians, Bastarnae, and Sauromatae, from the N. side of the Danube, who either settled in the islands of that river, or crossed over into Thrace; others from the W., set in motion by the Illyrians.

The earliest event recorded of them is the defeat which they gave to Sitalces, king of the Odrysae, who made an expedition against them, B. C. 424, in which he lost his life (Thuc. iv. 101). In B. C. 376 the Triballi crossed the Haemus, and with 30,000 men advanced as far S. as the territory of Abdera, which they ravaged without opposition. On their return, however, loaded with booty, the people of Abdera took advantage of their careless and disorderly march, to attack them, killing upwards of 2000 men. The Triballi thereupon marched back to take revenge for this loss; and the Abderites, having been joined by some of the neighbouring Thracians, gave them battle; in the midst of which they were deserted by their treacherous allies and, being surrounded, were slain almost to a man. The Triballi then prepared to lay siege to Abdera which would now have been quite unable to resist them for more than a very short time; but at this critical moment, Chabrias appeared before the town with the Athenian fleet, which had recently defeated the Lacedaemonian fleet at Naxos. Chabrias compelled the Triballi to retire from Abdera, and garrisoned the city when he departed. (Diod. xv. 36). In B. C. 339, Philip II., after raising the siege of Byzantium, marched to the Danube, where he defeated the Getae, and took much booty. On his return through the country of the Triballi, the latter posted themselves in a defile, and refused to allow the Macedonian army to pass, unless Philip gave to them a part of the plunder. A fierce battle ensued, in which Philip was severely wounded, and would have been slain, but for his son Alexander, who threw himself before his father, and thus saved his life. The Triballi were at length defeated, and probably professed submission to Philip, so long, at least, as he was in their country.

On Alexander's accession to the throne, he thought it necessary to make his power felt by the barbarians on the frontiers of his kingdom, before he quitted Europe for his great enterprise against the Persian empire. Accordingly, in the spring of B. C. 335, he marched from Amphipolis in a north-easterly direction, at the head of a large force. In ten days he reached the pass by which he intended to cross the Haemus, where a body of Thracians had assembled to oppose his progress. They were defeated, and Alexander advanced against the Triballi, whose prince, Syrmus, having had timely information of Alexander's movements, had already withdrawn, with the old men, women, and children into an island of the Danube, called Peuce, where many other Thracians also had sought refuge. The main force of the Triballi posted themselves in woody ground on the banks of the river Lyginus, about 3 days' march from the Danube. Having ventured out into the open plain, however, they were completely defeated by the Macedonians, with a loss of 3000 men. (Arrian, *Anab.* i. 2.)

Alexander then marched to the Danube, opposite to Peuce; but he was unable to make himself master of that island, because he had few boats, and the enemy were strongly posted at the top of the steep sides of the island. Alexander therefore abandoned the attempt to take it, and crossed the Danube to make war on the Getae. It would appear, however, that he had made sufficient impression on the Triballi to induce them to apply to him for peace, which he granted before his return to Macedonia. It was probably some time after these events that the Triballi were attacked by the Autariatae, a powerful Illyrian tribe, who seem to have completely subdued them, great numbers being killed, and the survivors driven farther towards the east. (Strab. vii. pp. 317, 318.) Hence, in B. C. 295, the Gauls, with only 15,000 foot and 3000 horse, defeated the combined forces of the Triballi and Getae (Just. xxv. 1.) When the Romans began to extend their dominion in the direction of the Danube, the Triballi were a small and weak people, dwelling about the confluence of the Oescus with the Danube, near the town Oescus (cf. Ptol. iii. 10. § 10, viii. 11. § 6).

Pliny (vii. 2) states that, according to Isigonus, there were people among the Triballi who fascinated by their look, and destroyed those whom they gazed upon too long, especially with angry eyes: adults were more liable to be injured by them than children. This is probably the same superstition as the modern one respecting the "evil eye," which is peculiarly prevalent among the Slavonian races. (Arrian, *Anab.* i. 1. § 4, 2. § 4, seqq., 3. § 3, seq., 4. § 6, v. 26. § 6, vii. 9. § 2; Steph. B. *s. v.*; Mannert, vii. § 25, seqq.] [J. R.]

TRIBOCI or TRIBOCCI, a German people in Gallia. Schneider (Caesar, *B. G.* i. 51) has the form "Triboces" in the accusative plural. Pliny has Tribochi, and Strabo Tribocchi (Τριϐόκχοι). In the passage of Caesar (*B. G.* iv. 10) it is said that all the MSS. have "Tribucorum" (Schneider, note).

The Triboci were in the army of the German king Ariovistus in the great battle in which Caesar defeated him; and though Caesar does not say that they were Germans, his narrative shows that he considered them to be Germans. In another passage (*B. G.* iv. 10) Caesar places the Triboci on the Rhine between the Mediomatrici and the Treviri, and he means to place them on the left or Gallic side of the Rhine. Strabo (iv. p. 193), after mentioning the Sequani and Mediomatrici as extending to the Rhine, says, "Among them a German people has settled, the Tribocchi, who have passed over from their native land." Pliny also (iv. 17) and Tacitus (*German.* c. 28) say that the Tribocci are Germans. The true conclusion from Caesar is that he supposed the Tribocci to be settled in Gallia before B. C. 58.

Ptolemy (ii. 9. § 17) places the Tribocci in Upper Germania, but he incorrectly places the Vangiones between the Nemetes and the Tribocci, for the Nemetes bordered on the Tribocci. However he places the Tribocci next to the Rauraci, and he names Breucomagus (Brocomagus) and Elcebus (Helcebus) as the two towns of the Tribocci. D'Anville supposes that the territory of the Tribocci corresponded to the diocese of *Strassburg*. Saletio (*Seltz* or *Setz*), we may suppose, belonged to the Nemetes, as in modern times it belonged to the diocese of *Speier;* and it is near the northern limits of the diocese of *Strassburg*. On the south towards the Rauraci, a place named *Markelsheim*, on the southern limit of the diocese of *Strassburg* and bordering on that of *Basle*, indicates a boundary by a Teutonic name (*mark*), as Fines does in those parts of Gallia where the Roman tongue prevailed. The name of the Tribocci does not appear in the Notit. Provinc., though the names of the Nemetes and Vangiones are there; but instead of the Tribocci we have Civitas Argentoratum (*Strassburg*), the chief place of the Tribocci. Ptolemy makes Argentoratum a city of the Vangiones. [G.L.]

TRI'BOLA (Τριϐόλα, App. *Hisp.* 62, 63), a town of Lusitania, in the mountainous regions S. of the Tagus, probably the modern *Trevoens*. [T.H.D.]

TRIBULIUM. [TRILURIUM].

TRIBUNCI, a place in Gallia, which we may assume to have been near Concordia, for Ammianus (xvi. 12), after speaking of the battle near *Strassburg*, in which Chnodomarius, king of the Alemanni, was defeated by Julian, says that the king hurried to his camp, which was near Concordia and Tribunci. But neither the site of Concordia nor of Tribunci is certain. [CONCORDIA.] [G. L.]

TRICARA'NUM. [PHLIUS, p. 602, a.]

TRICASSES, a people of Gallia Lugdunensis. (Plin. iv. 18.) In Ptolemy (ii. 8. § 13) the name is Tricasii (Τρικάσιοι), and their city is Augustobona (Αὐγουστόϐονα). They border on the Parisii. The name appears in the form Tricassini in Ammianus (xvi. 1) and in an inscription. In the Notit. Provinc. the name Civitas Tricassium occurs; and the name of the people has been transferred to the town, which is now *Troyes* on the *Seine*, the chief town of the French department of *Aube*. Caesar does not mention the Tricasses, and his silence has led to the conjecture that in his time they were comprised within the powerful state of the Senones. [G. L.]

TRICASTI'NI (Τρικαστινοί), a Gallic people between the Rhone and the Alps. Livy (v. 34) describing the march of Bellovesus and his Galli into Italy, says they came to the Tricastini: "The Alps next were opposed to them;" from which it is inferred that the Tricastini were near the Alps. But nothing exact can be inferred from the narrative, nor from the rest of this confused chapter. In the description of Hannibal's march (Liv. xxi. 34) it is said that Hannibal, after settling the disputes of the Allobroges, being now on his road to the Alps, did not make his march straight forward, but turned to the left into the territory of the Tricastini; and from the country of the Tricastini he went through the uttermost part of the territory of the Vocontii into the country of the Tricorii, and finally reached the Druentia (*Durance*.) It would be out of place to examine this question fully, for it would require some pages to discuss the passages in Livy. He means, however, to place the Tricastini somewhere between the Allobroges and part of the border of the Vocontian territory. The capital of the Vocontii is Dea Vocontiorum, or *Die* in the department of *Drome;* and the conclusion is that the Tricastini were somewhere between the Isara (*Isère*) and the Druna (*Drome*). This agrees with the position of Augusta Tricastinorum [AUGUSTA TRICASTINORUM] as determined by the Itins.

Ptolemy (ii. 10. § 13) places the Tricastini east of the Segallauni, whose capital is Valentia, and he names as the capital of the Tricastini a town Noeomagus, which appears to be a different place from Augusta Tricastinorum. D'Anville places the Tricastini along the east bank of the Rhone, north of Arausio (*Orange*), a position which he fixes by his determination of Augusta Tricastinorum: and he adds, "that the name of the Tricastini has been preserved pure in that of *Tricastin*." But the Tricastini of Livy and Ptolemy are certainly not where D'Anville places them. [G. L.]

TRICCA (Τρίκκη: *Eth.* Τρικκαῖος: *Trikkala*), an ancient city of Thessaly in the district Histiaeotis, stood upon the left bank of the Peneius, and near a small stream named Lethaeus. (Strab. ix. p. 438, xiv. p. 647.) This city is said to have derived its name from Tricca, a daughter of Peneius. (Steph. B. *s. v.*) It is mentioned in Homer as subject to Podaleirius and Machaon, the two sons of Asclepius or Aesculapius, who led the Triccaeans to the Trojan War (Hom. *Il.* ii. 729, iv. 202); and it possessed a temple of Asclepius, which was regarded as the most ancient and illustrious of all the temples of this god. (Strab. ix. p. 437.) This temple was visited by the sick, whose cures were recorded there, as in the temples of Asclepius at Epidaurus and Cos. (Strab. viii. p. 374.) There were probably physicians attached to the temple; and Leake gives an inscription in four elegiac verses, to the memory of a "god-like physician named Cimber, by his wife Andromache," which he found upon a marble in a bridge over the ancient Lethaeus. (*Northern Greece*, vol. iv. p. 285.) In the edict published by Polysperchon and the other generals of Alexander, after the death of the latter, allowing the exiles from the different Greek cities to return to their homes, those of Tricca and of the neighbouring town of Pharcadon were excepted for some reason, which is not recorded. (Diod. xviii. 56.) Tricca was the first town in Thessaly at which Philip V. arrived after his defeat on the Aous. (Liv. xxxii. 13.) Tricca is also mentioned by Liv. xxxvi. 13; Plin. iv. 8. s. 15; Ptol. iii. 13. § 44; Them. *Orat.* xxvii. p. 333.

Procopius, who calls the town Tricattûs (Τρικάττους), says that it was restored by Justinian (*de Aedif.* iv. 3); but it is still called Tricca by Hierocles (p. 642) in the sixth century, and the form in Justinian may be a corruption. In the twelfth century it already bears its modern name (Τρίκκαλα, Anna Comn. v. p. 137, ed. Paris.; Eustath. *ad Il.* ii. p.

330.) *Trikkala* is now one of the largest towns in this part of Greece. The castle occupies a hill projecting from the last falls of the mountain of *Khassiá;* but the only traces of the ancient city which Leake could discover were some small remains of Hellenic masonry, forming part of the wall of the castle, and some squared blocks of stone of the same ages dispersed in different parts of the town. (Leake, *Northern Greece*, vol. i. p. 425, seq., vol. iv. p. 287.)

TRICCIA'NA, a place in Pannonia, in the valley called Cariniana (*It. Ant.* p. 267). It is probably the same as the Gurtiana noticed in the Peut. Table, as the difference in the statements about the distances amounts only to 2 miles. [L. S.]

TRICESIMAE, in Gallia, one of the places mentioned by Ammianus Marcellinus (xviii. 2) in the list of those places along the Rhenish frontier which Julian repaired. Ammianus mentions Tricesimae between Quadriburgium and Novesium. [Quadriburgium.] [G. L.]

TRICESIMUM, AD, in Gallia. D'Anville observes that the ancient Itins. contain many positions with similar names, which names of places are derived from the distances which they indicate from the principal towns; for the distances within the dependent territory were measured from the principal towns. This Tricesimum is measured from Narbo (*Narbonne*), as the Jerusalem Itin. shows, on the road to *Toulouse*, through *Carcassonne*. *Trebes* on the canal of Languedoc may represent the name; and Tricesimum may be near that place. [G. L.]

TRICHO'NIS LACUS. [Aetolia, p. 64, a.]

TRICHO'NIUM (Τριχώνιον: *Eth.* Τριχωνιεύς), a town of Aetolia, from which the lake Trichonis derived its name. [Respecting the lake, see Vol. I. p. 64, a.] Its position is uncertain. Leake places it S. of the lake at a place called *Gavala*, and Kiepert, in his map E. of the lake. But since Strabo mentions it along with Stratus as situated in a fertile plain, it ought probably to be placed N. of the lake (Strab. x. p. 450; Pol. v. 7; Steph. B. *s. v.*). It was evidently a place of importance, and several natives of this town are mentioned in history. (Pol. iv. 3, v. 13, xvii. 10; Paus. ii. 37. § 3; Leake, *Northern Greece*, vol. i. p. 155.)

TRICOLO'NI. [Megalopolis, p. 309.]

TRICO'MIA (Τρικωμία), a place in the eastern part of Phrygia, on the road from Dorylaeum to Apamea Cibotus (Ptol. v. 2. § 22; *Tab. Peut.*), is placed by the Table at a distance of 28 miles from Midaeum and 21 from Pessinus. [L. S.]

TRICORII (Τρικόριοι), a people between the Rhone and the Alps. Hannibal in his march from the Rhone to the Alps passed into the country of the Tricorii, as Livy says [Tricastini]. Strabo (iv. pp. 185, 203) says in one passage that above the Cavares are "the Vocontii and Tricorii and Iconii and Meduli," from which we learn that he considered the Tricorii as neighbours of the Vocontii; and in another passage he says, "after the Vocontii are the Iconii and Tricorii, and next to them the Meduli, who occupy the highest summits of the Alps." Some geographers conclude that the Tricorii must be on the *Drac*, a branch of the *Isère*, in the southern part of the diocese of *Grénoble*, But if the Tricorii were in the valley of the *Drac*, we do not therefore admit that Hannibal's march to the Alps was through that valley. [G. L.]

TRICORNE'NSII. [Tricornium.]

TRICO'RNIUM (Τρικόρνιον, Ptol. iii. 9. § 3), or Tricornia Castra (*Itin. Hieros.* p. 564), a town in the territory of the Tricornensii, a people of Upper Moesia, on the borders of Illyria.. Variously identified with *Ritopk* and *Tricorni* or *Kolumbacz*. [T. H. D.]

TRICORYTHUS [Marathon.]

TRICRANA (Τρίκρανα), an island off the coast of Hermionis in Argolis (Paus. ii. 34. § 8), perhaps the same as the Tiparenus of Pliny. [Tiparenus.]

TRICRE'NA. [Pheneus, p. 595, a.]

TRIDENTI'NI (Τριδεντῖνοι), an Alpine tribe occupying the southern part of Rhaetia, in the north of Lacus Benacus, about the river Athesis. (Strab. iv. p. 204; Plin. iii. 23.) They, with many other Alpine tribes, were subdued in the reign of Augustus. [L. S.]

TRIDENTUM or TRIDENTE (Τριδέντε: *Trento* or *Trent*), the capital of the Tridentini in the south of Rhaetia, on the eastern bank of the Athesis, and on the highroad from Verona to Veldidena. (Plin. iii. 23; Justin, xx. 5; *It. Ant.* pp. 275, 281; Paul. Diac. i. 2, iii. 9, iv. 42, v. 36; Flor. iii. 3; Ptol. iii. 1. § 31; *Tab. Peut.*) The town is said to have derived its name from the trident of Neptune, which is still shown fixed in the wall of the ancient church of S. Vigil. The place seems to have been made a Roman colony (Orelli, *Inscript.* Nos. 2183, 3744, 3905, 4823). Theodoric the Great surrounded Tridentum with a wall, of which a considerable portion still exists. (Comp. Pallhausen, *Beschreib. der Röm. Heerstrasse von Verona nach Augsburg*, p. 28, foll.; Benedetto Giovanelli, *Discorso sopra un' Iscrizione Trentina*, Trento, 1824, and by the same author, *Trento, Citta de' Rezj e Colonia Romana*, Trento, 1825.) [L. S.]

TRIE'RES (Τριήρης, Polyb. v. 68; Strab. xvi. p. 754), a small fortified place in Phoenicia, on the northern declivity of Lebanon, and about 12 miles distant from Tripolis. It is in all probability the same place as the Tridis of the *Itin. Hierosol.* (p. 583). Lapie identifies it with *Enty*, others with *Belmont*. [T. H. D.]

TRIE'RUM (Τριήρων or Τρίηρον ἄκρον, Ptol. iv. 3. § 13), a headland of the Regio Syrtica in Africa, Propria. Ritter (*Erdk.* i. p. 928) identifies it with the promontory of Cephalae mentioned by Strabo (xvii. p. 836), the present *Cape Cefalo* or *Mesurata*. Ptolemy indeed mentions this as a separate and adjoining promontory; but as *Cefalo* still exhibits three points, it is possible that the ancient names may be connected, and refer only to this one cape. (See Blaquiere, *Letters from the Mediterranean*, i. p. 18; Della Cella, *Viaggio*, p. 61.) [T. H. D.]

TRIFANUM. [Vescia.]

TRIGABOLI. [Padus.]

TRIGISAMUM, a town of Noricum, mentioned only in the Peuting. Table, as situated not far from the mouth of the river Trigisamus (*Trasen*), which flows into the Danubius. It still bears the name of *Traismaur*. (See Muchar, *Norikum*, vol. i. p. 269.) [L. S.]

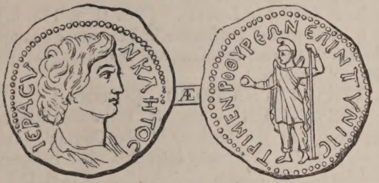
TRIGLYPHON (Τρίγλυφον τὸ καὶ Τρίλιγγον, Ptol. vii. 2. § 23), the metropolis and royal residence (βασίλειον) of Cirrhadia, a district at the NE. corner of the *Bay of Bengal*. It is doubtless the present *Tipperah* (*Tripúra*), which is situated on the *Gumpty* (*Gomáti*), a small river which flows into the *Brachmaputra* near its mouth. [V.]

TRIGUNDUM, a place in the territory of the Callaici Lucenses, in Gallaecia. (Hispania Tarraconensis). (*Itin. Ant.* p. 424.) Variously identified with *Berreo* and *Arandon*. [T. H. D.]

TRILEUCUM (Τρίλευκον ἄκρον, Ptol. ii. 6. § 4), a promontory in the territory of the Callaici Lucenses, on the N. coast of Hispania Tarraconensis, known also by the name of Κώρου ἄκρον. (Marcian, p. 44.) Now *Cape Ortegal.* [T. H. D.]

TRIMA'MMIUM (Τριμμάνιον or Τριμάμμιον, Ptol. iii. 10. § 10), a castle on the Danube, in Lower Moesia. (*Itin. Ant.* p. 222; called Trimamium in the *Tab. Peut.* and by the Geogr. Rav. iv. 7.) Variously identified with *Murotin*, *Dikalika*, and the ruins near *Pirgo* or *Birgos.* [T. H. D.]

TRIMENOTHYRA. [TEMENOTHYRA.]



COIN OF TRIMENOTHYRA.

TRIMONTIUM (Τριμόντιον, Ptol. ii. 3. § 8), a town of the Selgovae, in Britannia Barbara, probably near *Longholm*, in the neighbourhood of the *Solway Frith.* [T. H. D.]

TRI'MYTHUS. [TREMITHUS.]

TRINA'CIA. [TYRACIA.]

TRINA'CRIA. [SICILIA.]

TRINA'SUS (Τρινασός, Paus. iii. 22. § 3; Τρίνασσος, Ptol. iii. 16. § 9), a town or rather fortress of Laconia, situated upon a promontory near the head of the Laconian gulf, and 30 stadia above Gythium. It is opposite to three small rocks, which gave their name to the place. The modern village is for the same reason still called *Trinisa* (τὰ Τρίνησα). There are considerable remains of the ancient walls. The place was built in a semi-circular form, and was not more than 400 or 500 yards in circuit. (Leake, *Morea*, vol. i. p. 232; Boblaye, *Recherches*, *&c.* p. 94; Ross, *Wanderungen in Griechenland*, vol. ii. p. 239; Curtius, *Peloponnesos*, vol. ii. p. 287.)

TRINEMEIA. [ATTICA, p. 330, b.]

TRI'NIUS (*Trigno*), a considerable river of Samnium, which has its sources in the rugged mountain district between *Agnone* and *Castel di Sangro*, and has a course of about 60 miles from thence to the Adriatic. During the lower part of its course it traverses the territory of the Frentani, and falls into the sea about 5 miles SE. of Histonium (*Il Vasto*). The only ancient writer who mentions it is Pliny (iii. 12. s. 17), who calls it "flumen portuosum:" it is, indeed, the only river along this line of coast the mouth of which affords shelter even for small vessels. [E. H. B.]

TRINOBANTES (called by Ptolemy Τριυόαντες, ii. 3. § 22), a people on the E. coast of Britannia Romana, situated N. of *London* and the *Thames*, in *Essex* and the southern parts of *Suffolk*, whose capital was Camalodunum (*Colchester*). They submitted to Caesar when he landed in Britain, but revolted against the Romans in the reign of Nero. (Caes. *B. G.* v. 20; Tac. *Ann.* xiv. 31.) [T. H. D.]

TRINURTIUM. [TINURTIUM.]

TRIOBRIS, a river of Gallia named by Sidonius Apollinaris (*Propempt.*). It is a branch of the Oltis (*Lot*), and is now named *Truyère.* [G. L.]

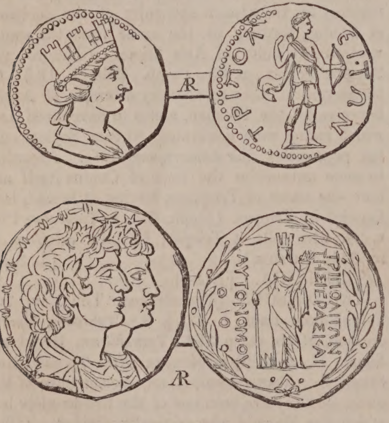
TRIO'CALA (Τριόκαλα: *Eth.* Triocalinus: Ru. near *Calatabellotta*), a city of Sicily, situated in the interior of the island, about 12 miles from Thermae Selinuntiae (*Sciacca*). As the name is cited by Stephanus of Byzantium (who writes the name Τρίκαλα) from Philistus, it is probable that it was a Siculian town or fortress as early at least as the time of the elder Dionysius; but no notice of it is now found in history until the second Servile War in Sicily in B. C. 103—100. On that occasion Triocala was selected, on account of its great natural strength and other advantages, by Tryphon, the leader of the insurgents, as his chief stronghold: he fortified the rocky summit on which it was situated, and was able to hold out there, as in an impregnable fortress, after his defeat in the field by L. Lucullus. (Diod. xxxvi. 7, 8.) The circumstances of its fall are not related to us, but Silius Italicus alludes to it as having suffered severely from the effects of the war. ("Servili vastata Triocala bello," xiv. 270). Cicero nowhere notices the name among the municipal towns of Sicily, but in one passage mentions the "Triocalinus ager" (*Verr.* v. 4); and the Triocalini again appear in Pliny's list of the municipal towns of Sicily. The name is also found in Ptolemy, but in a manner that gives little information as to its position. (Plin. iii. 8. s. 14; Ptol. iii. 4. § 14.) It was an episcopal see during the early part of the middle ages, and the site is identified by Fazello, who tells us that the ruins of the city were still visible in his time a short distance from *Calatabellotta*, a town of Saracen origin, situated on a lofty hill about 12 miles inland from *Sciacca;* and an old church on the site still preserved the ancient appellation. (Fazell. *de Reb. Sic.* x. 472; Cluver. *Sicil.* p. 374). [E. H. B.]

TRIO'PIUM (Τριόπιον ἄκρον: *C. Crio*), the promontory at the ~~eastern~~ extremity of the peninsula of Cnidus, forming at the same time the south-western extremity of Asia Minor. (Thucyd. viii. 35, 60; Scylax, p. 38; Pomp. Mela, i. 16.) On the summit of this promontory a temple of Apollo, hence called the Triopian, seems to have stood, near which games were celebrated, whence Scylax calls the promontory the ἀκρωτήριον ἱερόν. According to some authorities the town of Cnidus itself also bore the name of Triopium, having, it is said, been founded by Triopas. (Steph. B. *s. v.* Τριόπιον; Plin. v. 29, who calls it Triopia; Eustath. *ad Hom. Il.* iv. 341; CNIDUS.) [L. S.]

TRIPHYLIA. [ELIS.]

TRIPODISCUS (Τριποδίσκος, Thuc. iv. 70; Τριποδίσκοι, Paus. i. 43. § 8; Τρίποδοι, Τριποδίσκιον, Strab. ix. p. 394; Τριποδίσκη, Herod. *ap. Steph. B. s. v.* Τριποδίσκος: *Eth.* Τριποδίσκιος, Steph. B.; Τριποδισκαῖος), an ancient town of Megaris, said to have been one of the five hamlets into which the Megarid was originally divided. (Plut. *Quaest. Graec.* c. 17.) Strabo relates that, according to some critics, Tripodi was mentioned by Homer, along with Aegirusa and Nisaea, as part of the dominions of Ajax of Salamis, and that the verse containing these names was omitted by the Athenians, who substituted for it another to prove that Salamis in the time of the Trojan War, belonged to Athens. (Strab. *l. c.*) Tripodiscus is celebrated in the history of literature as the birthplace of Susarion, who is said to have introduced comedy into Attica, and to have removed from this place to the Attic Icaria. (Aspas. *ad Aristot. Eth. Nic.* iv. 2; *Dict. of Biogr.* Vol. III. p. 948.) We learn from Thucydides (*l. c.*) that Tripodiscus was situated at the foot of Mount Geraneia, at a spot convenient for the junction of troops marching from Plataea in the one direction, and from the Isthmus in the other. Pausanias (*l. c.*) also describes it as lying at the foot of Geraneia on the road from Delphi to Argos. This author relates that it derived its name from a tripod, which Coroebus the Argive brought from Delphi, with the injunction that wherever the tripod fell to the ground he was to reside there and build a temple to Apollo. (Comp. Conon, *Narrat.* 19.) Leake noticed the vestiges of an ancient town at the foot of Mt. Geraneia, on the road from Plataea to the Isthmus, four or five miles to the NW. of Megara. (Leake, *Northern Greece*, vol. ii. p. 410.)

TRI'POLIS (Τρίπολις, Ptol. v. 15. § 4: *Eth.* Τριπολίτης: *Adj.* Tripoliticus, Plin. xiv. 7. s. 9), an important maritime town of Phoenicia, situated on the N. side of the promontory of Theuprosopon. (Strab. xvi. p. 754.) The site of Tripolis has been already described, and it has been mentioned that it derived its name, which literally signifies *the three cities*, from its being the metropolis of the three confederate towns, Tyre, Sidon, and Aradus [PHOENICIA, Vol. II. p. 606]. Each of those cities had here its peculiar quarter, separated from the rest by a wall. Tripolis possessed a good harbour, and, like the rest of the Phoenician towns, had a large maritime commerce. (Cf. Joannes Phocas, c. 4; Wesseling, *ad Itin. Ant.* p. 149.) Respecting the modern *Tripoli* (*Tarablus* or *Tripoli di Soria*); see Pococke, vol. ii. p. 146, seq.; Maundrell, p. 26; Burckhardt, p. 163, seq., &c.; cf. Scylax, p. 42; Mela, i. 12; Plin. v. 20. s. 17; Diod. xvi. 41; Steph. B. *s. v.*; Eckhel, vol. iii. p. 372.) [T. H. D.]



COINS OF TRIPOLIS IN PHOENICIA.

TRI'POLIS (Τρίπολις: *Eth.* Τριπολίτης). 1. A town of Phrygia, on the northern bank of the upper course of the Maeander, and on the road leading from Sardes by Philadelphia to Laodiceia. (*It. Ant.* p. 336; *Tab. Peut.*) It was situated 12 miles to the north-west of Hierapolis, and is not mentioned by any writer before the time of Pliny (v. 30), who treats it as a Lydian town, and says that it was washed by the Maeander. Ptolemy (v. 2. § 18) and Stephanus B. describe it as a Carian town, and the latter (*s.v.*) adds that in his time it was called Neapolis. Hierocles (p. 669) likewise calls it a Lydian town. Ruins of it still exist near *Yeniji* or *Kash Yeniji.* (Arundell, *Seven Churches*, p. 245; Hamilton, *Researches*, i. p. 525; Fellows, *Asia Minor*, p. 287.)

2. A fortress in Pontus Polemoniacus, on a river of the same name, and with a tolerably good harbour. It was situated at a distance of 90 stadia from Cape Zephyrium. (Arrian, *Peripl. P. E.* p. 17; Anon. *Peripl. P.E.* p. 13; Plin. vi. 4.) The place still exists under the name of *Tireboli*, and is situated on a rocky headland. (Hamilton, *Researches*, i. p. 257.) [L. S.]

TRI'POLIS (Τρίπολις). 1. A district in Arcadia. [Vol. I. p. 193, No. 12.]

2. A district in Laconia. [Vol. II. p. 113, b.]

3. A district of Perrhaebia in Thessaly, containing the towns Azorus, Pythium, and Doliche. (Liv. xlii. 53.) [AZORUS.]

TRIPOLITA'NA REGIO. [SYRTICA.]

TRIPO'NTIUM, a town of Britannia Romana, apparently in the territory of the Coritani. (*Itin. Ant.* p. 477.) Variously identified with *Lilbourn*, *Calthorpe*, and *Rugby.* [T. H. D.]

TRIPY'RGIA. [AEGINA, p. 34, b., p. 35, a.]

TRISANTON (Τρισάντων, Ptol. ii. 3. § 4), a river on the S. coast of Britannia Romana; according to Camden (p. 137) the river *Test*, which runs into *Southampton Water;* according to others the river *Arun.* [T. H. D.]

TRISCIANA (Τρισκίανα, Procop. *de Aed.* iv. 4, p. 282), a place in Moesia Superior, perhaps the present *Firistina* or *Pristina.* [T. H. D.]

TRISSUM (Τρισσόν, Ptol. iii. 7. § 2), a place in the country of the Jazyges Metanastae. [Cf. JAZYGES, Vol. II. p. 7.] [T. H. D.]

TRITAEA. 1. (Τριταία: *Eth.* Τριταιεύς; in Herod. i. 145, Τριταιέες is the name of the people), a town in Achaia, and the most inland of the 12 Achaean cities, was distant 120 stadia from Pharae. It was one of the four cities, which took the lead in reviving the Achaean League in B.C. 280. In the Social War (B.C. 220, seq.) it suffered from the attacks of the Aetolians and Eleians. Its territory was annexed to Patrae by Augustus, when he made the latter city a colony after the battle of Actium. Its site is probably represented by the remains at *Kastritza*, on the Selinus, near the frontiers of Arcadia. (Herod. i. 145; Pol. ii. 41, iv. 6, 59, 60; Strab. viii. p. 386; Paus. vii. 22. § 6. seq.; Steph. B. *s. v.*; Leake, *Morea*, vol. ii. p. 117.)

2. (Tritea, Plin. iv. 3. s. 4: *Eth.* Τριτέες, Herod. viii. 33), one of the towns of Phocis, burnt by Xerxes, of which the position is uncertain. (Leake, *Northern Greece*, vol. ii. p. 89.)

3. (Τρίτεια, Steph. B. *s. v.*: *Eth.* Τριταιέες, Thuc. iii. 101), a town of the Locri Ozolae, described by Stephanus B. as lying between Phocis and the Locri Ozolae. Hence it is placed by Leake not far from Delphi and Amphissa, on the edge, perhaps, of the plain of *Sálona.* (Leake, *Northern Greece*, vol. ii. p. 621.)

TRI'TIUM, a town of the Autrigones, in Hispania Tarraconensis, in the jurisdiction of Clunia. (Plin. iii. 3. s. 4; *Itin. Ant.* pp. 450, 454.) Variously identified with *Carceda*, *Rodilla*, and a place near *Monasterio.* [T. H. D.]

TRI'TIUM METALLUM (Τρίτιον Μέταλλον, Ptol. ii. 6. § 55), a town of the Berones, in Hispania Tarraconensis, now called *Tricio*, near *Najera.* (Florez, *Cantabr.* p. 182.) [T. H. D.]

TRI'TIUM TUBO'RICUM (Τρίτιον Τουβόρικον, Ptol. ii. 6. § 66), a town of the Barduli, in Hispania Tarraconensis, on the river Deva or Devales. (Mela, iii. 1.) It is commonly identified with *Motrico*, which, however, does not lie on the Deva; and Mannert (i. p. 365) seeks it near *Mondragon*, in *Guipuscoa*. [T. H. D.]

TRITON (ὁ Τρίτων ποταμός, Ptol. iv. 3. § 19, &c.), a river of Libya, forming, according to Ptolemy, the boundary of the Regio Syrtica towards the W. It rose in Mount Vasalaetus, and, flowing in a northerly direction, passed through three lakes, the Libya Palus, the lake Pallas, and the lake Tritonitis (ἡ Τριτωνῖτις λίμνη, *Ib.*); after which it fell into the sea in the innermost part of the Syrtis Minor between Macomada and Tacape, but nearer to the latter.

The lake Tritonitis of Ptolemy is called, however, by other writers Tritonis (ἡ Τριτωνὶς λίμνη, Herod. iv. 179). Herodotus seems to confound it with the Lesser Syrtis itself; but Scylax (p. 49), who gives it a circumference of 1000 stadia, describes it as connected with the Syrtis by a narrow opening, and as surrounding a small island,—that called by Herodotus (*ib.* 178) Phla (Φλά), which is also mentioned by Strabo (xvii. p. 836), as containing a temple of Aphrodite, and by Dionysius. (*Perieg.* 267.) This lake Tritonis is undoubtedly the present *Schibkah-el-Lovdjah*, of which, according to Shaw (*Travels*, i. p. 237), the other two lakes are merely parts; whilst the river Triton is the present *El-Hammah*. This river, indeed, is no longer connected with the lake (Shaw, *Ib.*); a circumstance, however, which affords no essential ground for doubting the identity of the two streams; since in those regions even larger rivers are sometimes compelled by the quicksands to alter their course. (Cf. Ritter, *Erdkunde*, i. p. 1017). Scylax (*l. c.*) mentions also another island called Tritonos (Τρίτωνος) in the Syrtis Minor, which last itself is, according to him, only part of a large Sinus Tritonites (Τριτωνίτης κόλπος).

Some writers confound the lake Tritonis with the lake of the Hesperides, and seek it in other districts of Libya; sometimes in Mauretania, in the neighbourhood of Mount Atlas and the Atlantic Ocean, sometimes in Cyrenaica near Berenice and the river Lathon or Lethon. The latter hypothesis is adopted by Lucan (ix. 346, seq.), the former by Diodorus Siculus (iii. 53), who also attributes to it an island inhabited by the Amazons. But Strabo (*l. c.*) especially distinguishes the lake of the Hesperides from the lake Tritonis.

With this lake is connected the question of the epithet *Tritogeneia*, applied to Pallas as early as the days of Homer and Hesiod. But though the Libyan river and lake were much renowned in ancient times (cf. Aeschyl. *Eum.* 293; Eurip. *Ion*, 872, seq.; Pind. *Pyth.* iv. 36, &c.), and the application of the name of Pallas to the lake connected with the Tritonis seems to point to these African waters as having given origin to the epithet, it is nevertheless most probable that the brook Triton near Alalcomenae in Boeotia has the best pretensions to that distinction. (Cf. Pausan. ix. 33. § 5; Schol. *ad Apollon. Rhod.* i. 109, iv. 1315; Müller, *Orchomenos*, p. 355; Leake, *Northern Greece*, vol. ii. p. 136, seq.; Kruse, *Hellas*, vol. ii. pt. 1 p. 475. [T. H. D.]

TRITON (Τρίτων, Diod. v. 72), a river of Crete at the source of which Athene was said to have been born. From its connection with the Omphalian plain, it is identified with the river discharging itself into the sea on the N. coast of the island which is called *Platypérama*, but changes its name to *Ghiófiro* as it approaches the shore. (Pashley, *Travels*, vol. i. p. 225.) [E. B. J.]

TRITON (Τρίτων), a river of Boeotia. [Vol. I. p. 413, a.]

TRITURRITA. [PISAE.]

TRIVICUM (*Trevico*), a town of Samnium, in the country of the Hirpini, not far from the frontiers of Apulia. Its name is known to us only from Horace, who slept there (or at least at a villa in its immediate neighbourhood) on his well-known journey to Brundusium. (Hor. *Sat.* i. 5. 79.) It appears therefore that it was situated on the Via Appia, or the line of road then frequented from Rome to Brundusium. But this was not the same which was followed in later times, and is given in the Itineraries under that name, a circumstance which has given rise to much confusion in the topography of this part of Italy. [VIA APPIA.] There can be no doubt that Trivicum occupied nearly, if not exactly, the same site with the modern *Trevico:* the ancient road appears to have passed along the valley at the foot of the hill on which it was situated. It was here that stood the villa to which Horace alludes, and some remains of Roman buildings, as well as of the pavement of the ancient road, still visible in the time of Pratilli, served to mark the site more accurately. (Pratilli, *Via Appia*, iv. 10. p. 507; Romanelli, vol. ii. p. 350.) It probably never was a municipal town, as its name is not mentioned by any of the geographers. [E. H. B.]

TRIUMPILI'NI, an Alpine people of Northern Italy, who are mentioned by Augustus in the inscription in which he recorded the final subjugation of the Alpine tribes (*ap.* Plin. iii. 20. s. 24). It appears from Pliny that the whole people was reduced to slavery and sold together with their lands. According to Cato they were of Euganean race, as well as their neighbours the Camuni, with whom they are repeatedly mentioned in common. (Plin. *l. c.*) Hence there is little doubt that they were the inhabitants of the district still called *Val Trompia*, the upper valley of the *Mella*, and separated only by an intervening ridge of mountains from the *Val Camonica*, the land of the Camuni. [E. H. B.]

TROAS (Τρωάς, Τροίη, Τροία, or Ἰλιὰς γῆ), the territory ruled over by the ancient kings of Troy or Ilium, which retained its ancient and venerable name even at a time when the kingdom to which it had originally belonged had long ceased to exist. Homer himself nowhere describes the extent of Troas or its frontiers, and even leaves us in the dark as to how far the neighbouring allies of the Trojans, such as the Dardanians, who were governed by princes of their own, of the family of Priam, were true allies or subjects of the king of Ilium. In later times, Troas was a part of Mysia, comprising the coast district on the Aegean from Cape Lectum to the neighbourhood of Dardanus and Abydus on the Hellespont; while inland it extended about 8 geographical miles, that is, as far as Mount Ida, so as to embrace the south coast of Mysia opposite the island of Lesbos, together with the towns of Assus and Antandrus. (Hom. *Il.* xxiv. 544; Herod. vii. 42.) Strabo, from his well-known inclination to magnify the empire of Troy, describes it as extending from the Aesepus to the Caicus, and his view is adopted by the Scholiast on Apollonius Rhodius (i. 1115). In its proper and more limited sense, however, Troas was an undulating plain, traversed by the terminal branches of Ida running out in a north-western direction, and by the small rivers Satniois, Scamander, Simois, and Thymbrius. This plain gradually rises towards Mount Ida, and contained, at least in later times, several flourishing towns. In the Iliad we hear indeed of several towns, and Achilles boasts (*Il.* ix. 328) of having destroyed eleven in the territory of Troy; but they can at best only have been very small places, perhaps only open villages. That Ilium itself must have been far superior in strength and population is evident from the whole course of events; it was protected by strong walls, and had its acropolis. [Ilium.]

The inhabitants of Troas, called Troes (Τρῶες), and by Roman prose-writers Trojani or Teucri, were in all probability a Pelasgian race, and seem to have consisted of two branches, one of which, the Teucri, had emigrated from Thrace, and become amalgamated with the Phrygian or native population of the country. Hence the Trojans are sometimes called Teucri and sometimes Phryges. (Herod. v. 122, vii. 43; Strab. i. p. 62, xiii. p. 604; Virg. *Aen.* i. 38, 248, ii. 252, 571, &c.) The poet of the Iliad in several points treats the Trojans as inferior in civilisation to his own countrymen; but it is impossible to say whether in such cases he describes the real state of things, or whether he does so only from a natural partiality for his own countrymen.

According to the common legend, the kingdom of Troy was overturned at the capture and burning of Ilium in B. C. 1184; but it is attested on pretty good authority that a Trojan state survived the catastrophe of its chief city, and that the kingdom was finally destroyed by an invasion of Phrygians who crossed over from Europe into Asia. (Xanthus, *ap. Strab.* xiv. p. 680, xii. p. 572.) This fact is indirectly confirmed by the testimony of Homer himself, who makes Poseidon predict that the posterity of Aeneas should long continue to reign over the Trojans, after the race of Priam should be extinct. [L. S.]

TROCHOEIDES LACUS. [Delos, p. 759, b.]

TROCHUS. [Cenchreae, p. 584, a.]

TROCMADA (Τρόκμαδα), a place of uncertain site in Galatia, which probably derived its name from the tribe of the Trocmi, is mentioned only by late Christian writers (*Conc. Chalced.* pp. 125, 309, 663; *Conc. Constant.* iii. p. 672; *Conc. Nicaen.* ii. p. 355, where its name is Τρόκναδα; Hierocl. p. 698, where it is miswritten Ῥεγετνακάδη.) [L. S.]

TROCMI [Galatia].

TROES. [Troas.]

TROESA. [Tesa.]

TROEZEN (Τροιζήν), a city in "Massilia of Italy," as Stephanus (*s. v.*) says, if his text is right; but perhaps he means to says "a city of Massilia in Italy." Eustathius (*ad Il.* p. 287) says that it is in "Massaliotic Italy." Charax is Stephanus' authority. This brief notice adds one more to the list of Massaliotic settlements on the coast of the Mediterranean; but we know nothing of Troezen. [G. L.]

TROEZEN (Τροιζήν; also Τροιζήνη, Ptol. iii. 16. § 12: *Eth.* Τροιζήνιος: the territory γῆ Τροιζηνία, Eurip. *Med.* 683; ἡ Τροιζηνὶς γῆ, Thuc. ii. 56), a city of Peloponnesus, whose territory formed the south-eastern corner of the district to which the name of Argolis was given at a later time. It stood at the distance of 15 stadia from the coast, in a fertile plain, which is described below. (Strab. viii. p. 373.) Few cities of Peloponnesus boasted of so remote an antiquity; and many of its legends are closely connected with those of Athens, and prove that its original population was of the Ionic race. According to the Troezenians themselves, their country was first called Oraea from the Egyptian Orus, and was next named Althepia from Althepus, the son of Poseidon and Leis, who was the daughter of Orus. In the reign of this king, Poseidon and Athena contended, as at Athens, for the land of the Troezenians, but, through the mediation of Zeus, they became the joint guardians of the country. Hence, says Pausanias, a trident and the head of Athena are represented on the ancient coins of Troezen. (Comp. Mionnet, *Suppl.* iv. p. 267. § 189.) Althepus was succeeded by Saron, who built a temple of the Saronian Artemis in a marshy place near the sea, which was hence called the Phoebaean marsh (Φοιβαία λίμνη), but was afterwards named Saronis, because Saron was buried in the ground belonging to the temple. The next kings mentioned are Hyperes and Anthas, who founded two cities, named Hypereia and Antheia. Aëtius, the son of Hyperes, inherited the kingdom of his father and uncle, and called one of the cities Poseidonias. In his reign, Troezen and Pittheus, who are called the sons of Pelops, and may be regarded as Achaean princes, settled in the country, and divided the power with Aëtius. But the Pelopidae soon supplanted the earlier dynasty; and on the death of Troezen, Pittheus united the two Ionic settlements into one city, which he called Troezen after his brother. Pittheus was the grandfather of Theseus by his daughter Aethra; and the great national hero of the Athenians was born and educated at Troezen. The close connection between the two states is also intimated by the legend that two important demi of Attica, Anaphlystus and Sphettus, derived their names from two sons of Troezen. (Paus. ii. 30. §§ 5—9.) Besides the ancient names of Troezen already specified, Stephanus B. (*s. v.* Τροιζήν) mentions Aphrodisias, Saronia, Poseidonias, Apollonias and Anthanis. Strabo likewise says (ix. p. 373) that Troezen was called Poseidonia from its being sacred to Poseidon.

At the time of the Trojan War Troezen was subject to Argos (Hom. *Il.* ii. 561); and upon the conquest of the Peloponnesus by the Dorians, it received a Dorian colony from Argos. (Paus. ii. 30. § 10.) The Dorian settlers appear to have been received on friendly terms by the ancient inhabitants, who continued to form the majority of the population; and although Troezen became a Doric city, it still retained its Ionic sympathies and traditions. At an early period Troezen was a powerful maritime state, as is shown by its founding the cities of Halicarnassus and Myndus in Caria. (Paus. ii. 30. § 8; Herod. vii. 99; Strab. viii. p. 374.) The Troezenians also took part with the Achaeans in the foundation of Sybaris, but they were eventually driven out by the Achaeans. (Aristot. *Pol.* v. 3.) It has been conjectured with much probability that the expelled Troezenians may have been the chief founders of Poseidonia (Paestum), which Solinus calls a Doric colony, and to which they gave the ancient name of their own city in Peloponnesus. [Paestum.]

In the Persian War the Troezenians took an active part. After the battle of Thermopylae, the harbour of Troezen was appointed as the place of rendezvous for the Grecian fleet (Herod. viii. 42); and when the Athenians were obliged to quit Attica upon the approach of Xerxes, the majority of them took refuge at Troezen, where they were received with the greatest kindness by the semi-Ionic population. (Herod. viii. 41; Plut. *Them.* 10.) The Troezenians sent 5 ships to Artemisium and Salamis, and 1000 men to Plataeae, and they also fought at the battle of Mycale. (Herod. viii. 1, ix. 28, 102.) After the Persian war the friendly connection between Athens and Troezen appears to have continued; and during the greatness of the Athenian empire before the thirty years' peace (B. C. 455) Troezen was an ally of Athens, and was apparently garrisoned by Athenian troops; but by this peace the Athenians were compelled to relinquish Troezen. (Thuc. i. 115, iv. 45.) Before the Peloponnesian War the two states became estranged from one another; and the Troezenians, probably from hostility to Argos, entered into close alliance with the Lacedaemonians. In the Peloponnesian War the Troezenians remained the firm allies of Sparta, although their country, from its maritime situation and its proximity to Attica, was especially exposed to the ravages of the Athenian fleet. (Thuc. ii. 56, iv. 45.) In the Corinthian War, B. C. 394, the Troezenians fought upon the side of the Lacedaemonians (Xen. *Hell.* iv. 2. § 16); and again in B. C. 373 they are numbered among the allies of Sparta against Athens. (Xen. *Hell.* vi. 2. § 3.) In the Macedonian period Troezen passed alternately into the hands of the contending powers. In B. C. 303 it was delivered, along with Argos, from the Macedonian yoke, by Demetrius Poliorcetes; but it soon became subject to Macedonia, and remained so till it was taken by the Spartan Cleonymus in B. C. 278. (Polyaen. *Strat.* ii. 29. § 1; Frontin. *Strat.* iii. 6. § 7.) Shortly afterwards it again became a Macedonian dependency; but it was united to the Achaean League by Aratus after he had liberated Corinth. (Paus. ii. 8. § 5.) In the war between the Achaean League and the Spartans, it was taken by Cleomenes, in B. C. 223 (Polyb. ii. 52; Plut. *Cleom.* 19); but after the defeat of this monarch at Sellasia in B. C. 221, it was doubtless restored to the Achaeans. Of its subsequent history we have no information. It was a place of importance in the time of Strabo (viii. p. 373), and in the second century of the Christian era it continued to possess a large number of public buildings, of which Pausanias has given a detailed account. (Paus. ii. 31, 32.)

According to the description of Pausanias, the monuments of Troezen may be divided into three classes, those in the Agora and its neighbourhood, those in the sacred inclosure of Hippolytus, and those upon the Acropolis. The Agora seems to have been surrounded with stoae or colonnades, in which stood marble statues of the women and children who fled for refuge to Troezen at the time of the Persian invasion. In the centre of the Agora was a temple of Artemis Soteira, said to have been dedicated by Theseus, which contained altars of the infernal gods. Behind the temple stood the monument of Pittheus, the founder of the city, surmounted by three chairs of white marble, upon which he and two assessors are said to have administered justice. Not far from thence was the temple of the Muses, founded by Ardalus, a son of Hephaestus, where Pittheus himself was said to have learnt the art of discourse; and before the temple was an altar where sacrifices were offered to the Muses and to Sleep, the deity whom the Troezenians considered the most friendly to these goddesses.

Near the theatre was the temple of Artemis Lyceia, founded by Hippolytus. Before the temple there was the very stone upon which Orestes was purified by nine Troezenians. The so-called tent of Orestes, in which he took refuge before his expiation, stood in front of the temple of Apollo Thearius, which was the most ancient temple that Pausanias knew. The water used in the purification of Orestes was drawn from the sacred fountain Hippocrene, struck by the hoof of Pegasus. In the neighbourhood was a statue of Hermes Polygius, with a wild olive tree, and a temple of Zeus Soter, said to have been erected by Aëtius, one of the mythical kings of Troezen.

The sacred enclosure of Hippolytus occupied a large space, and was a most conspicuous object in the city. The Troezenians denied the truth of the ordinary story of his being dragged to death by his horses, but worshipped him as the constellation Auriga, and dedicated to him a spacious sanctuary, the foundation of which was ascribed to Diomede. He was worshipped with the greatest honours; and each virgin, before her marriage, dedicated a lock of her hair to him. (Eurip. *Hippol.* 1424; Paus. ii. 32. § 1.) The sacred enclosure contained, besides the temple of Hippolytus, one of Apollo Epibaterius, also dedicated by Diomede. On one side of the enclosure was the stadium of Hippolytus, and above it the temple of Aphrodite Calascopia, so called because Phaedra beheld from this spot Hippolytus as he exercised in the stadium. In the neighbourhood was shown the tomb of Phaedra, the monument of Hippolytus, and the house of the hero, with the fountain called the Herculean in front of it.

The Acropolis was crowned with the temple of Athena Polias or Sthenias; and upon the slope of the mountain was a sanctuary of Pan Lyterius, so called because he put a stop to the plague. Lower down was the temple of Isis, built by the Halicarnassians, and also one of Aphrodite Ascraea.

The ruins of Troezen lie west of the village of *Dhamalá*. They consist only of pieces of wall of Hellenic masonry or of Roman brickwork, dispersed over the lower slopes of the height, upon which stood the Acropolis, and over the plain at its foot. The Acropolis occupied a rugged and lofty hill, commanding the plain below, and presenting one of the most extensive and striking prospects in Greece. There are in the plain several ruined churches, which probably mark the site of ancient temples; and several travellers have noticed the remains of the temple of Aphrodite Calascopia, overlooking the cavity formerly occupied by the stadium. The chief river of the plain flows by the ruins of Troezen, and is now called *Potámi.* It is the ancient Taurius, afterwards called Hyllicus (Paus. ii. 32. § 7), fed by several streams, of which the most important was the Chrysorrhoas, flowing through the city, and which still preserved its water, when all the other streams had been dried up by a nine years' drought. (Paus. ii. 31. § 10.)

The territory of Troezen was bounded on the W. by that of Epidaurus, on the SW. by that of Hermione, and was surrounded on every other side by the sea. The most important part of the territory was the fertile maritime plain, in which Troezen stood, and which was bounded on the south by a range of mountains, terminating in the promontories Scyllaeum and Bucephala, the most easterly points of the Peloponnesus. [SCYLLAEUM.] Above the promontory Scyllaeum, and nearly due E. of Troezen, was a large bay, protected by the island of

Calaureia, named Pogon, where the Grecian fleet was ordered to assemble before the battle of Salamis (Herod. viii. 42; Strab. viii. p. 373.) The port-town, which was named Celenderis (Paus. ii. 32. § 9), appears to have stood at the western extremity of the bay of Pogon, where some ancient remains are found. The high rocky peninsula of Methana, which belonged to the territory of Troezen and is united to the mainland by a narrow isthmus, is described in a separate article. [METHANA.] There were formerly two islands off the coast of Troezen, named Calaureia and Sphaeria (afterwards Hiera), which are now united by a narrow sandbank. (Leake, *Morea*, vol. ii. p. 442, seq.; Boblaye, *Recherches, &c.* p. 56; Curtius, *Peloponnesos*, vol. ii. p. 431, seq.)

TROGI'LIUM (*Τρωγίλιον*), a promontory formed by the western termination of Mount Mycale, opposite the island of Samos. Close to this promontory there was an island bearing the same name. (Strab. xiv. p. 636; Steph. B. *s. v.* *Τρώγιλος*, according to whom it was also called Trogilia; *Act. Apost.* xx. 15, where its name is Trogyllion.) Pliny (v. 31. s. 37) speaks of three islands being called Trogiliae, their separate names being Philion, Argennon, and Sandalion. [L. S.]

TROGI'LIUM, a town of Lusitania, according to Luitprand (*Adversaria*, § 30, ap. Wessel. *ad Itin.* p. 438), the same place which Pliny (iv. 35) calls Castra Julia. It is incontestably the Turcalion of the Geogr. Rav. (iv. 35) and the modern *Truxillo*. (Cf. Florez, *Esp. Sagr.* xiii. p. 114, and Ukert, ii. pt. i. p. 395.) [T. H. D.]

TROGI'TIS (*Τρωγῖτις*), a small lake in Lycaonia, mentioned only by Strabo (xii. p. 568), and probably the same as the one now called *Ilghun.* [L. S.]

TROGLO'DYTAE (*Τρωγλοδύται*, Ptol. iii. 10. § 9; Diodor. iii. 14; Strab. xvii. pp. 786, 819; Agatharchid. *ap. Phot.* p. 454, ed. Bekker; Plin. ii. 70. s. 71 vi. 29. s. 34; *ἡ Τρωγλοδύτις* or *Τρωγλοδυτική*, sc. *χώρα*, Diodor. i. 30; Ptol. iv. 7, 27.) Under the term Troglodytae the ancients appear to have included various races of men. For we meet with them in Mauretania (Strab. xvii. p. 828); in the interior of Libya east of the Garamantes, along the Arabian shore of the Red Sea, as well as on the opposite coast of Aethiopia and Aegypt, and on both in such numbers that the districts were each of them named "Regio Troglodytica;" and even on the northern side of the Caucasus (Strab. xi. p. 506). The Caucasian Troglodytae were in a higher state of civilisation than their eastern namesakes, since they cultivated corn.

But the race most commonly known as Troglodytae inhabited either shore of the Red Sea, and were probably a mixture of Arabian and Aethiopian blood. Their name, as its composition imports (*τρώγλη, δύω*), was assigned to them because they either dug for themselves cabins in the lime and sandstone hills of that region, or availed themselves of its natural caverns. Even in the latter case, the villages of the Troglodytae were partly formed by art, since long tunnels, for the passage or stabling of their herds, were cut between village and village, and the rocks were honeycombed by their dwellings. Bruce saw at *Gojam* in Nubia a series of such caverns, inhabited by herdsmen, and witnessed the periodical passage of the cattle in *Sennaar* from the lowlands to the hills. The same cause led to similar migrations in ancient times, viz., the appearance of the gadfly in the marshes, immediately after the cessation of the periodical rains.

The accounts of the Regio Troglodytica that extended from the Sinus Arsinoites to Berenice may be assumed as applicable to the Troglodytae generally. The catacombs of Naples will perhaps give the most accurate image of their dwellings. The *Ababdeh*, who now inhabit this region, exhibit many of their peculiar manners and customs. Their language was described by the Greeks as a shriek or whistle, rather than as articulate speech; a portion at least of them were serpent-eaters. (Herod. iv. 183.) But their general occupation was that of herdsmen.

Agatharchides of Cnidos is the earliest writer who mentions the Troglodytae (*ap. Photium*, p. 454, ed. Bekker). According to him and Strabo (xvii. p. 786) animal food was their staple diet; and they eat not only the flesh but also the bones and hides of their cattle. Their drink was a mixture of milk and blood. Since, however, only the older and sicklier beasts were slaughtered for food, it may be presumed that the better animals were reserved for the Aegyptian and Aethiopian markets. The hides supplied their only article of raiment; but many of them went naked, and the women tattooed their bodies, and wore necklaces of shells. The pastoral habits of the Troglodytae rendered them so swift of foot as to be able to run down the wild beasts which they hunted; and they must have been acquainted with the use of weapons, since they were not only hunters, but robbers, against whom the caravans passing from the interior of Libya to Berenice on the Red Sea were obliged to employ a guard of soldiers, stationed at Phulacôn (*Φυλάκων κώμη*; *Tab. Peut.*), about 25 miles from Berenice. Troglodytae also served among the light troops in the army of Xerxes, B. C. 480, and acted as guides to the caravans, since the Ichthyophagi whom Cambyses employed as explorers of Meroe were a tribe of Troglodytae. (Herod. iii. 19.) Among the common people a community of women existed: the chiefs alone, who may have been of a superior race, having wives appropriated. For the abstraction or seduction of a chieftain's wife an ox was the penalty. During their retirement in caverns they seem to have lived peaceably together, but as soon as they sallied forth with their herds into the pastures they were incessantly at war with one another, on which occasions the women were wont to act as mediators. They practised the rite of circumcision, like the Arabians and Aethiopians generally. According to Agatharchides the Troglodytae differed as much from the rest of mankind in their sepulchral customs as in their habitations. They bound the corpse neck and heels together, affixed it to a stake, pelted it with stones amid shouts of laughter, and when it was quite covered with stones, placed a horn upon the mound, and went their ways. But they did not always wait for natural death to perform this ceremony, since, accounting inability to procure a livelihood among intolerable evils, they strangled the aged and infirm with an ox-tail. Their civilisation appeared so low to Aristotle (*Hist. Anim.* viii. 12) that he describes the Troglodytae as pigmies who, mounted on tiny horses, waged incessant wars with the cranes in the Aethiopian marshes. A tribe on the frontiers of *Abyssinia*, called *Barnagas* by the natives, corresponds, according to modern accounts, with the ancient Troglodytae. (Vincent, *Commerce and Navigation of the Ancients*, vol. ii. p. 89.) [W. B. D.]

TROICUS MONS (Τρωικὸν ὄρος, Strab. xvii. p. 809; Steph. B. *s. v.*; Τρωικοῦ λίθου ὄρος, Ptol. iv. 5. § 27), was a long range of hills east of the Nile, which threw out several abrupt spurs into the Heptanomis of Aegypt. It stood in the parallel of Heracleopolis, i. e. in Lat. 31° N. From this calcareous range was quarried, according to Strabo, the stone used in the construction of the Pyramids. [W. B. D.]

TROJA. [Ilium; Troas.]

TRONIS. [Daulis, p. 756, b.]

TROPAEA AUGUSTI. [Monoeci Portus.]

TROPAEA DRUSI (Τρόπαια Δρούσου), a trophy erected on a hill on the banks of the *Elbe* by Drusus, to mark the point to which he had advanced in the north of Germany. (Dion Cass. lv. 1; Flor. iv. 12; Ptol. ii. 11. § 28, who speaks of it as if it were a town.) [L. S.]

TROPAEA POMPEII (τὰ Πομπηΐου τρόπαια, or ἀναθήματα, Strab. iii. p. 160, iv. p. 178), a trophy or monument erected by Pompey on the summit of the Pyrenees, recording the subjugation of 876 Spanish cities. (Plin. iii. 3. s. 4, iv. 7. s. 27, xxxvii. 2. s. 6.) It stood at the spot named Summum Pyrenaeum in the *Itin. Ant.* (p. 397), and according to some on the boundary between Gaul and Spain. [T. H. D.]

TROSMIS (Τροσμίς, Hierocl. p. 637; Τρισμίς or Τροισμίς, Ptol. iii. 10. § 11), a town of some importance in Lower Moesia, on the Danube, where, according to the *Itin. Ant.* (p. 225), the Legio i. Jovia had its head quarters, though the *Not. Imp.* (c. 28) more correctly mentions the Legio ii. Herculea. Lapie identifies it with *Matchin.* (Cf. Ovid, *ex Pont.* iv. 9, v. 79.) [T. H. D.]

TRO'SSULUM, a town of Etruria, which, according to a story current among the Romans, was taken by a body of cavalry alone, unsupported by infantry; an exploit thought to be so singular, that the Roman knights were for some time called Trossuli on account of it. (Plin. xxxiii. 2. s. 9; Festus, *s. v.* Trossuli, p. 367.) No other mention is found of it; and it was probably a small place which had disappeared in the time of the geographers, but Pliny tells us (*l. c.*) that it was situated 9 miles from Volsinii, on the side towards Rome. It is said that the name was still retained by a place called *Trosso* or *Vado di Trosso*, about 2 miles from *Monte Fiascone*, as late as the 17th century, but all trace of it is now lost. (Holsten. *Not. ad Cluver.* p. 67; Dennis's *Etruria*, vol. i. p. 517.) [E. H. B.]

TRUENTUM. [Castrum Truentinum.]

TRUENTUS or TRUENTI'NUS (Τρουεντῖνος: *Tronto*), a considerable river of Picenum, which rises in the Apennines above *Amatrice*, flows under the walls of *Ascoli* (Asculum), and falls into the Adriatic about 5 miles S. of *S. Benedetto*. It gave name to a town which was situated at its mouth, and is called by Pliny Truentum, but more commonly Castrum Truentinum. Though one of the most considerable of the rivers of Picenum, the Truentus has very much the character of a mountain torrent, and is only navigable for about 5 miles near its mouth. (Strab. v. p. 241; Plin. iii. 13. s. 18; Mel. ii. 4. § 6; Ptol. iii. 1. § 21.) [E. H. B.]

TRUTULENSIS PORTUS. [Rutupiae.]

TRYBACTRA (Τρυϐάκτρα, Ptol. vi. 12. § 6), a place to the NW. of Alexandreia Oxiana, probably represented by the present *Bokhára.* [V.]

TUAESIS (Τούαισις, Ptol. ii. 3 § 13), a town on the E. coast of Britannia Barbara, which stood on an estuary of the same name (Ptol. *ib.* § 5), now the *Murray Frith.* [T. H. D.]

TUATI VETUS, a town in Hispania Baetica, belonging to the jurisdiction of Corduba. (Plin. iii. 3. s. 3.) Ukert (ii. pt. i. p. 370) is of opinion that it should be call Tucci Vetus. [T. H. D.]

TUBANTES or TUBANTII (Τούϐαντοι or Τουϐάττιοι), a German tribe which was allied with the Cherusci, and seems originally to have dwelt between the *Rhine* and *Yessel;* but in the time of Germanicus they appear in the country south of the *Lippe*, that is, the district previously occupied by the Sigambri (Tac. *Ann.* i. 51, xiii. 55, foll.) They seem to have followed the Cherusci still farther to the south-east, as Ptolemy (ii. 11. § 23) places them on the south of the Chatti, near the *Thüringer Wald*, between the rivers *Fulda* and *Werra* (Comp. Tac. *Germ.* 36). In the end we find them again as a member of the confederacy of the Franks. (Nazarius, *Paneg. Const.* 18.) The name Subattii in Strabo (vii. p. 292) is probably only an error of the transcriber, whence Kramer has changed it into Τουϐάττιοι. (Wilhelm, *Germanien*, p. 130.) [L.S.]

TUBUCCI, a place in Lusitania between Scalabris and Mundobriga. (*Itin. Ant.* p. 420.) Probably *Abrantes.* [T. H. D.]

TUBURBO MAJUS and MINUS (Θουϐουρϐώ, Ptol. iv. 3. § 35), two neighbouring towns in the interior of Byzacium. The latter is still called *Tebourba;* the former is variously identified with *Tubersole* and *Zaghouan.* Pliny (v. 4. s. 4) writes the name Tuburbis. (*Itin. Ant.* pp. 44, 48; *Tab. Peut.*) [T.H.D.]

TUBUSUPTUS (Τουϐούσουπτος, Τουϐούσουππος, or Τουϐούσιππος, Ptol. iv. 2. § 31, viii. 13. § 12), a town of Mauretania Caesariensis, 18 miles SE. of Saldae. (*Itin. Ant.* p. 32.) According to Ammianus Marcellinus it was situated close to Mons Ferratus (xxix. 5. § 11). From Pliny (v. 2. s. 1) we learn that it was a Roman colony since the time of Augustus. It was once a place of some importance, but afterwards declined, though even at a late period it seems to have had a Roman garrison (*Not. Imp.*, where it is called Tubusubdus). Variously identified with *Burg*, *Bordj*, *Ticla*, and a place on the *Djebel Afroun.* [T. H. D.]

TUCABA (Τούκαϐα, Ptol. iv. 6. § 25), a place in the interior of Libya. [T. H. D.]

TUCCA (Τοῦκκα, Ptol. iv. 2. § 28). 1. A town of Mauretania Caesariensis. Ptolemy places it in the interior; but according to Pliny (v. 2. s. 1) it was on the sea, at the mouth of the river Ampsaga. (Cf. *Tab. Peut.*)

2. A town in the district of Byzacium in Africa Proper. (Ptol. iv. 3. § 32.) From inscriptions found in a village still called *Dugga* it may be inferred that the place should be more correctly called Tugga. According to the *Itin. Ant.* (pp. 47, 49, 51) it lay 50 miles N. of Sufetula, the modern *Sbaitha* or *Sfaitla*, and also bore the name of Terebentina or Terebinthina, probably from its being situated in a neighbourhood abounding with the Terebinth tree. Tucca was a fortified town. (Procop. *de Aed.* vi. 5.) It is probably the same place called Tuccabori by St. Augustin (*adv. Donat.* vi. 24.) (Cf. Wessel. *ad Itin.* p. 48.)

3. A town of Numidia. (Ptol. iv. 3. § 29.) [T. H. D.]

TUCCI (Τοῦκκι, Ptol. ii. 4. § 11), a town of Hispania Baetica, between Ilipla and Italica (*Itin. Ant.* p. 432.) According to Pliny (iii. 3. s. 3) it had the surname of Augusta Gemella. Commonly identified with *Tejada*. (Cf. Florez, *Esp. Sagr.* xii. p. 355.) [T. H. D.]

TUCRIS (Τουκρίς, Ptol. ii. 6. § 56), a town of the Arevaci in Hispania Tarraconensis. [T. H. D.]

TUDE (Τοῦδαι and Τοῦνδαι, Ptol. ii. 6. § 45), a fort or castle of the Gruii or Gravii, in Hispania Tarraconensis, E. of Limia, and on the road from Bracara to Asturica. (*Itin. Ant.* p. 429.) It is called Tyde by Pliny (iv. 20. s. 34), and according to an ancient tradition it was the seat of an Aetolian colony under Diomed; a tale probably occasioned by the similarity of its name to that of Tydeus. (Sil. Ital. iii. 367, xvi. 369; Plin. *l. c.*; Avien. *Descr. Orb.* 650.) It is the modern *Tuy*. [T. H. D.]

TUDER (Τοῦδερ: *Eth.* Tudertinus: *Todi*), one of the most considerable cities of Umbria, situated on a lofty hill, rising above the left bank of the Tiber, about 26 miles S. of Perusia and 18 W. of Spoletium. There is no doubt that it was an ancient Umbrian city, but no mention of the name occurs in history previous to the Roman conquest. Silius Italicus tells us that it was celebrated for the worship of Mars (Sil. Ital. iv. 222, viii. 462), and notices its position on a lofty hill. (Id. vi. 645.) The first notice of it in history is on occasion of a prodigy which occurred there at the time of the invasion of the Cimbri and Teutones (Plut. *Mar.* 17; Plin. ii. 57. s. 58); and shortly after we learn that it was taken by Crassus, as the lieutenant of Sulla, during the wars of the latter with the partisans of Marius. (Plut. *Crass.* 6.) It received a colony under Augustus, and assumed the title of "Colonia Fida Tuder," probably in consequence of some services rendered during the Perusian War, though its name is not mentioned by Appian. (Plin. iii. 14. s. 19; *Lib. Colon.* p. 214; Murat. *Inscr.* pp. 1111. 4, 1120. 3; Orell. *Inscr.* 3726.) It appears from inscriptions to have been a flourishing and important town under the Roman Empire, and is mentioned by all the geographers among the chief towns of Umbria. (Strab. v. p. 227; Plin. *l. c.*; Ptol. iii. 1. § 54.) It was not situated on the Flaminian Way, but the Tabula gives a line of road, which led from Ameria to Tuder, and thence to Perusia. (*Tab. Peut.*) Its great strength as a fortress, arising from its elevated position, is already alluded to by Strabo (*l. c.*), and rendered it a place of importance during the Gothic Wars, after the fall of the Western Empire. (Procop. *B. G.* ii. 10, 13.) It is again mentioned as a city under the Lombards (P. Diac. iv. 8); and there can be no doubt that it continued throughout the middle ages to be a considerable city. It is now much decayed, and has only about 2500 inhabitants, but still retains the title of a city.

Considerable ancient remains still attest its former consideration. Among these the most remarkable are the walls of the city, some portions of which are apparently of great antiquity, resembling those of Perusia, Volaterrae, and other Etruscan cities, but they are in general more regular and less rude. Other parts of the walls, of which three distinct circuits may be traced, are of regular masonry and built of travertine. These are certainly of Roman date. There are also the remains of an ancient building, called by local antiquarians the temple of Mars, but more probably a basilica of Roman date. Numerous coins and other small objects have been found at *Todi:* among the latter the most interesting is a bronze statue of Mars, now in the *Museo Gregoriano* at Rome. The coins of Tuder, which are numerous, belong to the class called Aes Grave, being of brass and of large size, resembling the earliest coinage of Volaterrae, Iguvium, &c. They all have the name written in Etruscan characters TVTERE, which we thus learn to have been the native form of the name. [E. H. B.]

TUE'ROBIS (Τουέροϐις, Ptol. ii. 3. § 11), a river on the W. coast of Britannia Romana, now the *Tivy*. [T. H. D.]

TUFICUM (Τούφικον: *Eth.* Tuficanus), a municipal town of Umbria, mentioned both by Pliny and Ptolemy, as well as in an inscription, which confirms its municipal rank; but its site is wholly uncertain. (Plin. iii. 14. s. 19; Ptol. iii. 1. § 53; Orell. *Inscr.* 87.) [E. H. B.]

TU'GENI (Τωΰγενοί). [HELVETII, Vol. I. p. 1041.]

TUGIA, a town of the Oretani, in Hispania Tarraconensis. (Plin. iii. 3. s. 4; *Itin. Ant.* p. 404.) Its site is marked by some ruins at *Toya*, near *Quesada*, at the sources of the *Guadalquivir*. (Cf. Florez, *Esp. Sagr.* v. pp. 24, 34; D'Anville, *Geogr. Anc.* i. p. 34.) [T. H. D.]

TUGIENSIS SALTUS, a part of the chain of Mount Orospeda, which derived its name from the town of Tugia, and in which, according to Pliny (iii. 1. s. 3), the Baetis had its source, whence it would appear to be the same branch called by others Mons Argentarius. [Cf. OROSPEDA.] [T. H. D.]

TUICIAE or TERICIAE, as some read it, in Gallia Narbonensis, between Glanum [GLANUM] and Aquae Sextiae (*Aix*). It is placed in the Table between Glanum and Pisavae, xi. from Glanum and xv. from Pisavae. D'Anville fixes Tuiciae or Tericiae, as he reads the name, about *Aiquières* or *Aureille*. This second name, as he observes, seems to have some relationship to that of the Roman road described in the Antonine Itin. under the name of Via Aurelia as far as Arelate (*Arles*). It is said that there are many remains at a place named *Jean-Jean* about a mile from *Aiquières*. [G. L.]

TULCIS, a small river on the E. coast of Hispania, near Tarraco. (Mela, ii. 6.) It is probably the modern *Gaya*. [T. H. D.]

TULINGI. [HELVETII, Vol. I. p. 1042.]

TULIPHURDUM (Τουλίφουρδον), a place in Germany, probably in the country of the Chauci Minores, on the right bank of the Visurgis. (Ptol. ii. 11. § 28.) Wilhelm (*Germanien*, p. 161) identifies it with the modern *Verden;* but this is a mere conjecture. [L. S.]

TULISU'RGIUM (Τουλισούργιον), a town in Germany, probably belonging to the country of the Dulgibini. (Ptol. ii. 11. § 28.) Not to mention other conjectures as to its modern representative, Zeuss (*Die Deutschen*, p. 7) and Wilhelm (*Germanien*, p. 46) are of opinion that the reading in Ptolemy is wrong, and that we should read Τευτιϐούργιον, which they regard as the place from which the Teutoburgiensis Saltus derived its name; and it is accordingly believed that the remains of an ancient wall, now called the *Hünenring*, on Mount *Grotenburg*, near *Detmold*, marks the site of the ancient Teutoburgium. But all this is no more than a plausible conjecture. [L. S.]

TULLICA (Τούλλικα, Ptol. ii. 6. § 64), a town of the Caristi in Hispania Tarraconensis. [T.H.D.]

TULLO'NIUM (Τουλόνιον, Ptol. ii. 6. § 66), a town of the Barduli in Hispania Tarraconensis, on the road from Pompelo to Asturica. (*Itin. Ant.* p. 455.) Probably the modern *Alegria*. [T. H. D.]

TULLUM (Τοῦλλον), in Gallia Belgica, is one of the cities of the Leuci, who bordered on the Mediomatrici. (Ptol. ii. 9. § 13.) Nasium is the other city [NASIUM]. The Notitia of the Provinces of Gallia mentions Tullum thus: "Civitas Leucorum Tullo." *Toul*, which is Tullum, has preserved its name instead of taking the name of the people, like most other capital towns. *Toul* is in the department of the *Meurthe*. [G. L.]

TUNES (Τύνης, Polyb. i. 30; Τούνις, or Τύνις, Strab. xvii. p. 834, &c.), a strongly fortified town, once of some importance, in the Roman province of Africa. According to Polybius (xiv. 20), who is followed by Livy (xxx. 9), it was 120 stadia or 15 miles from Carthage, from which it lay in a SW. direction; but the Tab. Peut., in which it is written Thunis, places it more correctly at a distance of only 10 miles from that city. It is said to have been situated at the mouth of a little river called Catada, in the bay of Carthage, but there are now no traces of any such river. On the present state of *Tunis*, see Blaquière, *Lett.* i. p. 161, seq.; Ritter *Erdkunde*, i. p. 914, seq. [T. H. D.]

TUNGRI (Τοῦγγροι), are placed by Ptolemy (ii. 9. § 9) east of the Tabullas river, and their chief place is Atuacutum, which is Aduatuca or *Tongern* [ADUATICA]. Tacitus (*German.* c. 2) says, "Those who first crossed the Rhine and expelled the Galli, are now called Tungri, but were then named Germani." Tacitus speaks of the Tungri in two other passages (*Hist.* iv. 55, 79); and in one of them he appears to place the Tungri next to the Nervii. The name of the Eburones, whom Caesar attempted to annihilate [EBURONES], disappears in the later geography, and the Tungri take their place. (Plin. iv. 31.) D'Anville observes (*Notice, &c.*) that the name of the Tungri extended over a large tract of country, and comprehended several peoples; for in the Notit. of the Provinces of Gallia, the Tungri divide with the Agrippinenses all Germania Secunda; and there is some evidence that the bishops of *Tongern* had once a territory which bordered on that of *Reims*.

Ammianus (xv. 11) gives the name of the people, Tungri, to one of the chief cities of Germania Secunda; the other is Agrippina (*Cologne*). This shows that *Tongern* under the later Empire was a large place. Many Roman remains have been dug up there; and it is said that the old Roman road may still be traced through the town. [G. L.]

TUNNOCELUM, according to the Notitia Imp. a place on the coast of Britannia Romana, at the end of the wall of Hadrian, the station of the Cohors I. Aelia Classica. Horsley (p. 91) and others place it at *Boulness*, on *Solway Frith;* Camden, with less probability, seeks it at *Tynemouth*, on the E. coast. [T. H. D.]

TUNTOBRIGA (Τουντόϐριγα, Ptol. ii. 6. § 39), a town of the Callaici in Hispania Tarraconensis. [T. H. D.]

TURANIANA, a place in Hispania Baetica, not far from the coast, between Murgis and Urci. (*Itin. Ant.* p. 405.) Variously identified with *Torque*, *Torbiscon*, and *Tabernas*. [T. H. D.]

TURBA, a town of the Edetani in Hispania Tarraconensis. (Liv. xxxiii. 44.) Perhaps the modern *Tuejar* on the *Guadalaviar*. [T. H. D.]

TURBA. [BIGERRIONES.]

TURBULA (Τούρϐουλα, Ptol. ii. 6. § 61), a town of the Bastetani in Hispania Tarraconensis. D'Anville (*Geogr. An.* i. p. 28) and Mentelle (*Esp. Anc.* p. 177) identify it with *Teruel;* but Ukert (ii. pt. i. p. 407) more correctly declares it to be *Tovorra* in *Murcia*. The inhabitants are called Τορϐολῆται by App. *Hisp.* 10. [T. H. D.]

TURCAE (Τοῦρκοι, Suid. *s. v.*), a Scythian people of Asiatic Sarmatia, dwelling on the Palus Maeotis, which appears to be identical with the Ἰῦρκαι of Herodotus (iv. 22, &c.). The various hypotheses that have been started respecting the Turcae only show that nothing certain is known respecting them. (Cf. Mannert, iv. p. 130; Heeren, *Ideen*, i. 2, pp. 189, 281, 307; Schaffarik, *Slav. Alterth.* i. p. 318, &c.) Humboldt (*Central-Asien*, i. p. 245, ed. Mahlmann) opposes the notion that these Turcae or Jyrcae were the ancestors of the present Turks. [T. H. D.]

TURCILINGI, a tribe in northern Germany which is not noticed before the fifth century of our era, and then is occasionally mentioned along with the Rugii. (Jornand. *Get.* 15; Paul. Diac. i. 1.) [L. S.]

TURDETA'NI (Τουρδητανοί, Ptol. ii. 4. § 5, &c.), the principal people of Hispania Baetica; whence we find the name of Turdetania (Τουρδητανία or Τουρτυτανία) used by Strabo (iii. p. 136) and Stephanus Byz. (p. 661) as identical with Baetica. Their territory lay to the W. of the river Singulis (now *Xenil*), on both sides of the Baetis as far as Lusitania on the W. The Turdetani were the most civilised and polished of all the Spanish tribes. They cultivated the sciences; they had their poets and historians, and a code of written laws, drawn up in a metrical form (Strab. iii. pp. 139, 151, 167; Polyb. xxxiv. 9). Hence they were readily disposed to adopt the manners and customs of their conquerors, and became at length almost entirely Romans; but with these characteristics we are not surprised to find that they are at the same time represented by Livy (xxxiv. 17) as the most unwarlike of all the Spanish races. They possessed the Jus Latii. Some traits in their manners are noted by Diodorus Sic. (v. 33), Silius Italicus (iii. 340, seq.), and Strabo (iii. 164). Their superior civilisation was no doubt derived from their intercourse with the Phoenicians whose colony of Tartessus lay in their neighbourhood. [T. H. D.]

TURDULI (Τουρδοῦλοι, Ptol. ii. 4. § 10), a people in Hispania Baetica, very nearly connected with the Turdetani, and ultimately not to be distinguished from them. (Strab. iii. p. 139; Polyb. xxxiv. 9). They dwelt to the E. and S. of the Turdetani, down to the shores of the Fretum Herculeum. A branch of them called the Turduli Veteres appears to have migrated into Lusitania, and to have settled to the S. of the Durius; where it is probable that in process of time they became amalgamated with the Lusitanians (Strab. iii. p. 151; Mela, iii. 1. § 7; Plin. iii. 1. s. 3, iv. 21. s. 35; cf. Florez, *Esp. Sagr.* ix. p. 7). [T. H. D.]

TURECIONICUM or TURECIONNUM, in Gallia Narbonensis, is placed in the Table on a road between Vienna (*Vienne*) and Cularo (*Grenoble*). Turecionicum is between Vienna and Morginnum (*Moirans*). The site is unknown. [G. L.]

TURIA or TURIUM, a river in the territory of the Edetani in Hispania Tarraconensis, which enters the sea in the neighbourhood of Valentia (Mela, ii. 6; Plin. iii. 3. s. 4; Vib. Seq. p. 227, ed. Bip.) It was famed for the proelium Turiense between Pompey and Sertorius (Plut. *Pomp.* 18, *Sert.* 19; Cic. *p. Balb.* 2). Now the *Guadalaviar*. [T. H. D.]

TURIASO (Τουριασώ and Τουριασσώ, Ptol. ii. 6. § 58; Turiasson, Geogr. Rav. iv. 43: *Eth.* Turiasonensis, Plin. iii. 3. s. 4), a town of the Celtiberi in Hispania Tarraconensis, on the road from Caesaraugusta to Numantia (*Itin. Ant.* pp. 442, 443). According to Pliny (*l. c.*) it was a civitas Romana in the jurisdiction of Caesaraugusta. A fountain in its neighbourhood was said to have the quality of hardening iron (Id. xxxiv. 14. s. 41). The town is now called *Tarrazona.* For coins see Florez, *Med.* ii. p. 600, iii. p. 124; Mionnet, i. p. 53, and Suppl. i. p. 167; Sestini p. 207. [T. H. D.]

TURICUM. [Helvetii, Vol. I. p. 1041.]

TURIGA. [Curgia.]

TURISSA (called by Ptolemy 'Ιτούρισα, ii. 6. § 67), a town of the Vascones in Hispania Tarraconensis, on the road from Pompelo to Burdigala (*Itin. Ant.* p. 455.) Variously identified with *Ituren* and *Osteriz.* [T. H. D.]

TURMO'DIGI. [Murbogi.]

TU'RMOGUM (Τούρμογον, Ptol. ii. 5. § 8), a town in the interior of Lusitania. [T. H. D.]

TURMULI, a town of Lusitania on the Tagus, and on the road from Emerita to Caesaraugusta. (*Itin. Ant.* p. 433.) Variously identified with *Alconetar* and *Puente de Alcuñete.* [T. H. D.]

TURNACUM or TORNACUM, a city of North Gallia, is first mentioned in the Roman Itins. In the Notit. Imp. mention is made of a military force under the name of Numerus Turnacensium; and of a "Procurator Gynaecii Tornacensis Belgicae Secundae." This procurator is explained to be a superintendent of some number of women who were employed in making clothing for the soldiers. Hieronymus about A. D. 407 speaks of Turnacum as one of the chief towns of Gallia; and Audoenus, in his life of S. Eligius (St. Eloi) in the seventh century, says of it, "quae quondam regalis extitit civitas." Turnacum was within the limits of the ancient territory of the Nervii. The Flemish name is *Doòrnick*, which the French have corrupted into *Tournai.* *Tournai* is on the *Schelde*, in the province of *Hainault*, in the kingdom of *Belgium.*

There are silver corns of Turnacum, with the legend DVRNACOS and DVRNACVS. On one side there is the head of an armed man, and on the other a horseman armed. On some there is said to be the legend DVBNO REX. Numerous Roman medals have been found at *Tournai*, some of the time of Augustus and others as late as Claudius Gothicus and Tetricus, and even of a later date. The tomb of Childeric I., who died A. D. 481, was discovered at *Tournai* in the seventeenth century, and a vast quantity of gold and silver medals, and other curious things; among which was the golden ring of Childeric, with his name on it, CHILDIRICI REGIS. Such discoveries as these, which have been made in various places in Belgium, show how little we know of the Roman history of this country. (D'Anville, *Notice, &c.*; Ukert, *Gallien*; *Recueil d'Antiquités Romaines et Gauloises trouvées dans la Flandre proprement dite*, par M. J. de Bast.) [G.L.]

TUROBRICA, a town of Hispania Baetica in the jurisdiction of Hispalis (Plin. iii. 1. s. 3). [T.H.D.]

TU'RODI (Τουροδοί, Ptol.ii. 6. § 40), a people in Hispania Tarraconensis, probably a subdivision of the Callaici Bracarii, in whose territory were the baths called "Υδατα λαιά. [T. H. D.]

TU'RONES, TU'RONI, TURO'NII. Some of Caesar's troops wintered in the country of the Turones after the campaign of B. C. 57 (*B. G.* ii. 35). The Turones are mentioned again (*B. G.* viii. 46), where we learn that they bordered on the Carnutes; and in another place (vii. 4) they are mentioned with the Pictones, Cadurci, Aulerci, and other states of Western Gallia. When Vercingetorix (B. C. 52) was rousing all Gallia against Caesar, he ordered the Turones to join him. The contingent which they were called on to furnish against Caesar, during the siege of Alesia was 8000 men (vii. 75). But the Turones never gave Caesar much trouble, though Lucan calls them "instabiles" (i. 437), if the verse is genuine.

In Ptolemy (ii. 8. § 14), the name is Τουρογιεῖς, and the capital is Caesarodunum or *Tours* on the *Loire.* In the insurrection of Sacrovir in the time of Tiberius, the Turonii, as Tacitus calls them (*Ann.* iii. 41, 46), rose against the Romans, but they were soon put down. They are in the Lugdunensis of Ptolemy. The chief part of the territory of the Turones was south of the *Loire*, and their name is the origin of the provincial name *Touraine.* Ukert (*Gallien*, p. 329) mentions a silver coin of the Turoni. On one side there is a female head with the legend "Turonos," and on the other "Cantorix" with the figure of a galloping horse. [G. L.]

TURO'NI (Τούρωνοι), a German tribe, described as occupying a district on the south of the country once inhabited by the Chatti, perhaps on the northern bank of the Moenus. (Ptol. ii. 11. § 22.) [L. S.]

TUROQUA (in the Geogr. Rav. iv. 43, Turaqua), a town of the Callaici in Hispania Tarraconensis on the road from Bracara to Lucus Augusti (*Itin. Ant.* p. 430.) Variously identified with *Touren* (or *Turon*) and *Ribavadia.* [T. H. D.]

TURRES, a place in the interior of Moesia Superior. (*Itin. Ant.* p. 135; *Itin. Hieros.* p. 566; Geogr. Rav. iv. 7.) Procopius (*de Aed.* iv. 4. p. 285) calls it Τουββίβας, which is intended for Turribus. Variously identified with *Szarköi* and *Tchardah.* [T. H. D.]

TURRES (AD). 1. A town of the Oretani in Hispania Tarraconensis (*Itin. Ant.* p. 445). Variously identified with *Calatrava* and *Oreto.*

2. A town in the territory of the Contestani in the same province (*Itin. Ant.* p. 400). Identified either with *Castralla* or *Olleria.* [T.H.D.]

TURRES ALBAE (Πύργοι λευκοί, Ptol. ii. 5. § 6), a place of the Celtici in Lusitania. [T. H. D.]

TURRIGA (Τούρριγα or Τούργινα, Ptol. ii. 6. § 23), a town of the Callaici Lucenses in Hispania Tarraconensis. [T. H. D.]

TURRIM, AD, in Gallia Narbonensis, east of Aquae Sextiae (*Aix*), is placed in the Antonine Itin. between Matavonium and Tegulata [Tegulata]. The name Turris is preserved in that of *Tourves*, which is written *Torrevez* and *Torvis* in some middle age documents. (D'Anville, *Notice, &c.*) [G. L.]

TURRIS. 1. Turris Caesaris, a place in Numidia, whence there was a road through Sigus to Cirta. (*Itin. Ant.* p. 34.) Usually identified with *Twill*, but by Lapie with *Djebel Guerionu.*

2. [Euphranta Turris.]

3. Turris Hannibalis, a strong fortress in the territory of Carthage, where Hannibal took ship when flying to king Antiochus. (Liv. xxxiii. 48.) Justin calls it the Rus urbanum Hannibalis (xxxi. 2). It seems to have been situated between Acholla and Thapsus, at the spot where the *Tab. Peut.* places Sullectis.

4. Turris Tamalleni, in Africa Proper, on the road from Tacape to Leptis Magna. (*Itin. Ant.* pp 73, 74.) Now *Telemin.* [T. H. D.]

TURRIS LIBYSSONIS (Πύργος Λιβύσσωνος, Ptol.: *Porto Torres*), a town of Sardinia, and apparently one of the most considerable in the island. It is situated on the N. coast about 15 miles E. of the Gorditanian promontory (the *Capo del Falcone*), and on the spacious bay now called *Golfo dell' Asinara.* Pliny tells us it was a Roman colony, and we may probably infer from its name that there was previously no town on the spot, but merely a fort or castellum. (Plin. iii. 12. s. 17.) It is noticed also by Ptolemy and in the Itineraries, but without any indication that it was a place of any importance. (Ptol. iii. 3. § 5; *Itin. Ant.* p. 83.) But the ancient remains still existing prove that it must have been a considerable town under the Roman Empire; and we learn from the inscriptions on ancient milestones that the principal road through the island ran directly from Caralis to Turris, a sufficient proof that the latter was a place much frequented. It was also an episcopal see during the early part of the middle ages. The existing port at *Porto Torres*, which is almost wholly artificial, is based in great part on Roman foundations; and there exist also the remains of a temple (which, as we learn from an inscription, was dedicated to Fortune, and restored in the reign of Philip), of thermae, of a basilica and an aqueduct, as well as a bridge over the adjoining small river, still called the *Fiume Turritano.* The ancient city continued to be inhabited till the 11th century, when the greater part of the population migrated to *Sassari*, about 10 miles inland, and situated on a hill. This is still the second city of the island. (De la Marmora, *Voy. en Sardaigne*, vol. ii. pp. 363, 468—472; Smyth's *Sardinia*, pp. 263—266.) [E. H. B.]

TURRIS STRATO'NIS. [Caesareia, p. 470, a.]

TURRUS FLUVIUS. [Aquileia.]

TURU'LIS (Τούρουλις, Ptol. ii. 6. § 15), a river in the territory of the Edetani in Hispania Tarraconensis, between the Iberus and the Fretum Herculis. Ukert (ii. pt. i. p. 293) thinks that it is probably identical with the Saetabis of Mela (ii. 6) and the Uduba of Pliny (iii. 3. s. 4), the present *Mijares* or *Myares.* [T. H. D.]

TURUM (*Eth.* Turinus: *Turi*), a town of Apulia, mentioned only by Pliny, who enumerates the Turini among the towns of that province. (Plin. iii. 11. s. 16.) The name is written Tutini in our present text of Pliny; but it is probable that we should read Turini, and that the site is marked by the present village of *Turi*, near *Conversano*, about 6 miles W. of *Polignano.* (Romanelli, vol. ii. p. 180.) [E. H. B.]

TURUNTUS (Τουροῦντος, Ptol. iii. 5. § 2), a river of European Sarmatia which fell into the Northern Ocean, and which, according to Marcian (p. 55), had its source in the Rhipaean mountains, but Ptolemy seems to place it in Mount Alaunus or Alanus. Mannert (iv. p. 258) takes it to be the *Windaw.* [T. H. D.]

TURUPTIA'NA (Τουρουπτίανα, Ptol. ii. 6. § 23), a town of the Callaici Lucenses in Hispania Tarraconensis. [T. H. D.]

TUSCA, a river forming the W. boundary of the Roman province of Africa, which, after a short course to the N., fell into the sea near Tabraca. (Plin. v. ss. 2, 3.) [T. H. D.]

TUSCA'NIA (*Eth.* Tuscaniensis: *Toscanella*), a city of Southern Etruria, situated about 12 miles NE. of Tarquinii. It is mentioned only by Pliny, who enumerates the Tuscanienses among the municipal communities of Etruria, and in the Tabula, which places it on the Via Clodia, between Blera and Saturnia, but in a manner that would afford little clue to its true position were it not identified by the resemblance of name with the modern *Toscanella.* (Plin. iii. 5. s. 8; *Tab. Peut.*) The name is found in an inscription, which confirms its municipal rank. (Murat. *Inscr.* p. 328.) But it appears to have been in Roman times an obscure town, and we find no allusion to it as of ancient Etruscan origin. Yet that it was so is rendered probable by the tombs that have been discovered on the site, and some of which contain sarcophagi and other relics of considerable interest; though none of these appear to be of very early date. The tombs have been carefully examined, and the antiquities preserved by a resident antiquary, Sig. Campanari, a circumstance which has given some celebrity to the name of *Toscanella*, and led to a very exaggerated estimate of the importance of Tuscania, which was apparently in ancient times never a place of any consideration. It was probably during the period of Etruscan independence a dependency of Tarquinii. The only remains of ancient buildings are some fragments of reticulated masonry, undoubtedly of the Roman period. (Dennis's *Etruria*, vol. i. pp. 440—460.) [E. H. B.]

TUSCI (Τοῦσκοι, Ptol. v. 9. § 22), a people of Asiatic Sarmatia between the Caucasus and the Montes Ceraunii. [T. H. D.]

TU'SCIA. [Etruria.]

TUSCULA'NUM. [Tusculum, p. 1243, b.]

TU'SCULUM (Τούσκουλον, Ptol. iii. 1. § 61; Τούσκλον, Strab. v. p. 237; Τούσκλος, Steph. B. p. 673: *Eth.* Tusculanus, Cic. *Balb.* 20; Liv. iii. 7, &c.: *Adj.* Tusculus, Tib. i. 7. 57; Stat. *Silv.* iv. 4. 16; Tusculanensis, Cic. *Fam.* ix. 6: *Frascati* and *Il Tuscolo*), a strong and ancient city of Latium, lying on the hills which form a continuation of Mount Albanus on the W. When Dionysius of Halicarnassus (x. 20) places it at a distance of 100 stadia, or 12½ miles, from Rome, he does not speak with his accustomed accuracy, since it was 120 stadia, or 15 miles, from that city by the Via Latina. Josephus (*Ant.* xviii. 7. § 6) places the imperial villa of Tiberius at Tusculum at 100 stadia from Rome, which, however, lay at some distance to the W. of the town. Festus (*s. v. Tuscos*) makes Tusculum a diminutive of Tuscus, but there is but slight authority to connect the town with the Etruscans. According to common tradition, it was founded by Telegonus, the son of Ulysses and Circe; and hence we find its name paraphrased in the Latin poets as "Telegoni moenia" (Ov. *Fast.* iii. 91, iv. 71; Prop. iii. 30. 4; Sil. It. xii. 535) and "Circaea moenia" (Hor. *Epod.* i. 30); and the hill on which it stood called "Telegoni juga parricidae" (Id. *Od.* iii. 29. 8), "Circaeum dorsum" (Sil. It. vii. 691), and "Telegoni jugera" (Stat. *Silv.* i. 3. 83). Thus Tusculum did not claim so remote an origin as many other Latin cities; and, as being founded a generation after the Trojan War, Virgil, a learned antiquary, consistently omits all notice of it in his *Aeneid.* The author of the treatise entitled *Origo Gentis Romanae* mentions that it was made a dependency or colony of Alba by Latinus Silvius (c. 17. § 6). After the destruction of Alba by Tullus Hostilius it appears to have recovered its independence, and to have become a republic under the government of a dictator.

But to descend from these remote periods to the more historical times. In the reign of Tarquinius

Superbus, who courted the friendship of the Latin cities, Octavius Mamilius of Tusculum was the foremost man of all the race, tracing his descent from Ulysses and Circe. Him Tarquin conciliated by the gift of his daughter in marriage, and thus obtained the powerful alliance of his family and connections. (Liv. i. 49; Dionys. iv. 45.) The genealogical pretensions of the gens Mamilia are still to be seen on their coins, which bear on the obverse the head of Mercury, and on the reverse Ulysses in his travelling dress and with his dog. The alliance of Mamilius with Tarquin, however, was the main cause of the Latin War. After his expulsion from Rome, and unsuccessful attempt to regain his crown by means of the Etruscans, Tarquin took refuge with his son-in-law at Tusculum (Liv. ii. 15), and by his assistance formed an alliance with the confederacy of the thirty Latin cities. (*Ib.* 18). The confederate army took up a position near Lake Regillus, a small sheet of water, now dry, which lay at the foot of the hill on which Tusculum is seated. This was the scene of the famous battle so fatal to the Latins, in B. C. 497. Mamilius, who commanded the Latin army, was killed by the hand of Titus Herminius; Tarquinius Superbus himself, who, though now advanced in years, took a part in the combat, was wounded; and the whole Latin army sustained an irretrievable defeat (*ib.* 19, 20; Dionys. vi. 4, seq.).

After the peace which ensued, the Tusculans remained for a long while the faithful allies of Rome; an attachment which drew down on their territory the incursions of the Volsci and Aequi, B. C. 461, 460. (Liv. iii. 7, 8.) In B. C. 458, when the Roman capitol was seized by the Sabine Appius Herdonius, the Tusculans gave a signal proof of their love and fidelity towards Rome. On the next morning after the arrival of the news, a large body of them marched to that city and assisted the Romans in recovering the capitol; an act for which they received the public thanks of that people (*ib.* 18; Dionys. x. 16); and soon afterwards, Lucius Mamilius, the Tusculan dictator was rewarded with the gift of Roman citizenship. (Liv. *ib.* 29.) In the following year the Romans had an opportunity of repaying the obligation. The Aequi had seized the citadel of Tusculum by a nocturnal assault. At that time, Fabius with a Roman army was encamped before Antium; but, on hearing of the misfortune of the Tusculans, he immediately broke up his camp and flew to their assistance. The enterprise, however, was not of such easy execution as the expulsion of Herdonius, and several months were spent in combats in the neighbourhood of Tusculum. At length the Tusculans succeeded in recapturing their citadel by reducing the Aequi to a state of famine, whom they dismissed after compelling them to pass unarmed under the yoke. But as they were flying homewards the Roman consul overtook them on Mount Algidus, and slew them to a man. (*Ib.* 23; Dionys. x. 20.)

In the following year, the Aequi, under the conduct of Gracchus, ravaged the Labican and Tusculan territories, and encamped on the Algidus with their booty. The Roman ambassadors sent to expostulate with them were treated with insolence and contempt. Then Tit. Quinctius Cincinnatus was chosen dictator, who defeated the Aequi, and caused them, with their commander Gracchus, to pass ignominiously under the yoke. (Liv. *ib.* 25—28.) Algidus became the scene of a struggle between the Romans and Aequi on two or three subsequent occasions, as in B. C. 452 and 447. (*Ib.* 31, 42.) In the latter battle the Romans sustained a severe defeat, being obliged to abandon their camp and take refuge in Tusculum. After this, we do not again hear of the Tusculans till B. C. 416. At that period, the Romans, suspecting the Labicans of having entered into a league with the Aequi, charged the Tusculans to keep a watch upon them. These suspicions were justified in the following year, when the Labicans, in conjunction with the Aequi, ravaged the territory of Tusculum and encamped upon the Algidus. The Roman army despatched against them was defeated and dispersed, owing to the dissensions among its chiefs. Many of these, however, together with the *élite* of the army, took refuge at Tusculum; and Q. Servilius Priscus, being chosen dictator, changed the face of affairs in eight days, by routing the enemy and capturing Labicum. (Id. iv. 45—47.)

This steady friendship between Tusculum and Rome, marked for so many years by the strongest tokens of mutual goodwill, was at length interrupted by an occurrence which took place in B. C. 379. In that year the Tusculans, in conjunction with the Gabinians and Labicans, accused the Praenestines before the Roman senate of making inroads on their lands; but the senate gave no heed to their complaints. Next year Camillus, after defeating the Volscians, was surprised to find a number of Tusculans among the prisoners whom he had made, and, still more so when, on questioning them, he found that they had taken up arms by public consent. These prisoners he introduced before the Roman senate, in order to prove how the Tusculans had abandoned the ancient alliance. So war was declared against Tusculum, and the conduct of it entrusted to Camillus. But the Tusculans would not accept this declaration of hostilities, and opposed the Roman arms in a manner that has scarcely been paralleled before or since. When Camillus entered their territory he found the peasants engaged in their usual avocations; provisions of all sorts were offered to his army; the gates of the town were standing open; and as the legions defiled through the streets in all the panoply of war, the citizens within, like the countrymen without, were seen intent upon their daily business, the schools resounded with the hum of pupils, and not the slightest token of hostile preparation could be discerned. Then Camillus invited the Tusculan dictator to Rome. When he appeared before the senate in the Curia Hostilia, not only were the existing treaties with Tusculum confirmed, but the Roman franchise also was shortly afterwards bestowed upon it, a privilege at that time but rarely conferred.

It was this last circumstance, however, together with their unshaken fidelity towards Rome, that drew down upon the Tusculans the hatred and vengeance of the Latins; who, in the year B. C. 374, having burnt Satricum, with the exception of the temple of Matuta, directed their arms against Tusculum. By an unexpected attack, they obtained possession of the city; but the inhabitants retired to the citadel with their wives and children, and despatched messengers to Rome with news of the invasion. An army was sent to their relief, and the Latins in turn became the besieged instead of the besiegers; for whilst the Romans encompassed the walls of the city, the Tusculans made sorties upon the enemy from the arx. In a short time the Romans took the town by assault and slew all the

Latins. (*Ib.* 33.) Servius Sulpicius and L. Quinctius, both military tribunes, were the Roman commanders on this occasion; and on some rare gold coins, still extant, of the former family, are seen on the obverse the heads of Castor and Pollux, deities peculiarly worshipped at Tusculum (Cic. *Div.* i. 43; cf. Festus, *s. v. Stroppus*), and on the reverse the image of a city with the letters TVSCVL on the gate.

From this period till the time of the great Latin war we have little to record of Tusculum except the frustrated attempt of the Veliterni on its territory (Liv. iv. 36) and the horrible devastations committed on it by the Gauls, when in alliance with the Tiburtines, in B. C. 357. (Id. vii. 11.) After their long attachment to Rome we are totally at a loss to conjecture the motives of the Tusculans in joining the Latin cities against her. The war which ensued is marked by the well-known anecdote of Titus Manlius, who, being challenged by Geminus Mettius, the commander of the Tusculan cavalry, attacked and killed him, against strict orders to the contrary; for which breach of military discipline he was put to death by his father. (Id. viii. 7.) The war ended with the complete subjugation of the Latins; and by the famous senatusconsultum regulating the settlement of Latium, the Tusculans were treated with great indulgence. Their defection was ascribed to the intrigues of a few, and their right of citizenship was preserved to them. (*Ib.* 14.) This settlement took place in B. C. 335. In 321 the Tusculans were accused by the tribune, M. Flavius, of having supplied the Veliterni and Privernates with the means of carrying on war against Rome. There does not appear to have been any foundation for this charge; it seems to have been a mere calumny; nevertheless the Tusculans, with their wives and children, having put on mourning habits, went in a body to Rome, and implored the tribes to acquit them of so odious an imputation. This spectacle moved the compassion of the Romans, who, without further inquiry, acquitted them unanimously; with the exception of the tribe Pollia, which voted that the men of Tusculum should be scourged and put to death, and the women and children sold, agreeably to the laws of war. This vote remained indelibly imprinted on the memory of the Tusculans to the very latest period of the Roman Republic; and it was found that scarce one of the tribe Papiria, to which the Tusculans belonged, ever voted in favour of a candidate of the tribe Pollia. (*Ib.* 37.)

Tusculum always remained a municipium, and some of its families were distinguished at Rome. (Id. vi. 21—26; Orell. *Inscr.* 775, 1368, 3042.) Among them may be mentioned the gens Mamilia, the Porcia, which produced the two Catos, the Fulvia, Coruncania, Juventia, Fonteia, &c. (Cic. *p. Planc.* 8, *p. Font.* 14; Corn. Nep. *Cat.* 1; Val. Max. iii. 4. § 6.)

Hannibal appears to have made an unsuccessful attempt upon, or perhaps rather a mere demonstration against, Tusculum in B. C. 212. (Liv. xxvi. 9; cf. Sil. It. xii. 534.) In the civil wars of Marius and Sulla, its territory seems to have been distributed by the latter. (Auct. *de Coloniis.*) Its walls were also restored, as well as during the wars of Pompey. We have no notices of Tusculum under the Empire. After the war of Justinian and the inroads of the Lombards, Tusculum regained even more than its ancient splendour. For several centuries during the middle ages the counts of Tusculum were supreme in Rome, and could almost dispose of the papal chair. The ancient city remained entire till near the end of the 12th century. At that period there were constant wars between the Tusculans and Romans, the former of whom were supported by the German emperors and protected by the popes. According to Romualdus, archbishop of Salerno (*apud Baronium*, vol. xix. p. 340), the walls of Tusculum were razed in the pontificate of Alexander III. in the year 1168; but perhaps a more probable account by Richard de S. Germano (*ap. Muratori, Script.* t. vii. p. 972) ascribes the destruction of the city to the permission of the German emperor in the year 1191.

Towards the end of the Republic and beginning of the Empire, Tusculum was one of the favourite resorts of the wealthy Romans. Strabo (v. p. 239) describes the hill on which it was built as adorned with many villas and plantations, especially on the side that looked towards Rome. But though the air was salubrious and the country fine, it does not appear, like Tibur, to have been a favourite resort of the Roman poets, nor do they speak of it much in their verses. The Anio, with its fall, besides other natural beauties, lent a charm to Tibur which would have been sought in vain at Tusculum. Lucullus seems to have been one of the first who built a villa there, which seems to have been on a magnificent scale, but with little arable land attached to it. (Plin. xviii. 7. s. 1.) His parks and gardens, however, which were adorned with aviaries and fishponds, extended to the Anio, a distance of several miles; whence he was noted in the report of the censors as making more use of the broom than the plough. (*Ib.* and Varr. *R. R.* i. 13, iii. 3, seq.; Columella, i. 4.) On the road towards Rome, in the *Vigna Angelotti*, is the ruin of a large circular mausoleum, 90 feet in diameter inside, and very much resembling the tomb of Caecilia Metella on the Via Appia. It evidently belongs to the last period of the Republic; and Nibby (*Dintorni*, p. 344) is inclined to regard it as the sepulchre of Lucullus, mentioned by Plutarch (*Vit. Luc.* 43), though that is commonly identified with a smaller mausoleum between *Frascati* and the *Villa Rufinella.* Besides the villa of Lucullus, we hear of those of Cato, of Cicero and his brother Quintus, of Marcus Brutus, of Q. Hortensius, of T. Anicius, of Balbus, of Caesar, of L. Crassus, of Q. Metellus, &c. It would now be vain to seek for the sites of most of these; though it may perhaps be conjectured that Cato's stood on the hill to the NE. of the town, which seems to have been called Mons Porcius from it, and still bears the name of *Monte Porzio.* So much interest, however, is attached to the villa of Cicero (Tusculanum), as the favourite retirement in which he probably composed a great portion of his philosophical works, and especially the *Disputations* which take their name from it, that we shall here present the reader with the chief particulars that can be collected on the subject. Respecting the site of the villa there have been great disputes, one school of topographers seeking it at *Grotta Ferrata*, another at the *Villa Rufinella.* Both these places lie to the W. of Tusculum, but the latter nearer to it, and on an eminence, whilst *Grotta Ferrata* is in the plain. We have seen from Strabo that the Roman villas lay chiefly on the W. side of the town; and it will be found further on that Cicero's adjoined those of Lucullus and Gabinius, which were the most splendid and remarkable, and must therefore have belonged to those noticed by Strabo. The scholiast on Horace (*Epod.* i. 30) describes Cicero's as being "ad latera superiora" of the Tusculan hill; and if this authority may be relied on, it disposes of the claims of *Grotta Ferrata.* The plural "latera" also determines us in favour of the W. side of the town, or *Villa Rufinella,* where the hill has two ridges. At this spot some valuable remains were discovered in 1741, especially a beautiful mosaic, now in the *Museo Pio Clementino.* The villa belonged originally to Sulla (Plin. xxii. 6. s. 6). It was, as we have said, close to that of Lucullus, from which, in neighbourly fashion, Cicero was accustomed to fetch books with his own hand. (*De Fin.* iii. 2.) It was likewise near that of the consul Gabinius (*pro Dom.* 24, *post Red.* 7), which also stood on the Tusculan hill (*in Pis.* 21), probably on the site of the *Villa Falconieri.* In his oration *pro Sestio* (43), Cicero says that his own villa was a mere cottage in comparison with that of Gabinius, though the latter, when tribune, had described it as "pictam," in order to excite envy against its owner. Yet from the particulars which we learn from Cicero himself, his retirement must have been far from deficient in splendour. The money which he lavished on it and on his villa at Pompeii brought him deeply into debt. (*Ep. ad Att.* ii. 1.) And in another letter (*Ib.* iv. 2) he complains that the consuls valued that at Tusculum at only *quingentis millibus,* or between 4000*l.* and 5000*l.* This would be indeed a very small sum, to judge by the description of it which we may collect from his own writings. Thus we learn that it contained two *gymnasia* (*Div.* i. 5), an upper one called Lyceum, in which, like Aristotle, he was accustomed to walk and dispute in the morning (*Tusc. Disp.* ii. 3), and to which a library was attached (*Div.* ii. 3), and a lower one, with shady walks like Plato's garden, to which he gave the name of the Academy. (*Tusc. Disp.* ii. 3.) The latter was perhaps on the spot now occupied by the *Casino* of the *Villa Rufinella.* Both were adorned with beautiful statues in marble and bronze. (*Ep. ad Att.* i. 1, 8, 9, 10.) The villa likewise contained a little atrium (atriolum, *Ib.* i. 10, *ad Quint. Fr.* iii. 1), a small portico with exedria (*ad Fam.* vii. 23), a bath (*Ib.* xiv. 20), a covered promenade ("tecta ambulatiuncula," *ad Att.* xiii. 29), and an horologium (*ad Fam.* xvi. 18). In the excavations made in the time of Zuzzeri, a sun-dial was discovered here, and placed in the *Collegio Romano.* The villa, like the town and neighbourhood, was supplied with water by the Aqua Crabra. (*De Leg. Agr.* iii. 31.) But of all this magnificence scarce a vestige remains, unless we may regard as such the ruins now called *Scuola di Cicerone,* close to the ancient walls. These consist of a long corridor with eight chambers, forming apparently the ground floor of an upper building, and if they belonged to the villa they were probably granaries, as there is not the least trace of decoration.

We will now proceed to consider the remains at *Frascati.* Strabo (v. p. 239) indicates where we must look for Tusculum, when he describes it as situated on the high ridge connected with Mount Albanus, and serving to form with it the deep valley which stretches out towards Mount Algidus. This ridge was known by the name of the Tusculani Colles. We have already seen that Tusculum was composed of two distinct parts, the town itself and the arx or citadel, which was isolated from it, and seated on a higher point; so elevated, indeed, that when the Aequi had possession of it, as before narrated, they could descry the Roman army defiling out of the gates of Rome. (Dionys. x. 20.) It was indeed on the very nut, or pinnacle, of the ridge, a point isolated by cliffs of great elevation, and approachable only by a very steep ascent. According to Sir W. Gell (*Topogr. &c.* p. 429) it is 2079 French feet above the level of the sea. Here a few traces of the walls of the citadel remain, from which, and from the shape of the rock on which the town stood, we may see that it formed an irregular oblong, about 2700 feet in circumference. There must have been a gate towards the town, where the ascent is less steep; and there are also vestiges of another gate on the E. side, towards *La Molara,* and of a road which ran into the Via Latina. Under the rock are caves, which probably served for sepulchres. The city lay immediately under the arx, on the W. side. Its form was a narrow oblong approaching to a triangle, about 3000 feet in length, and varying in breadth from about 1000 to 500 feet. Thus it is represented of a triangular shape on the coins of the gens Sulpicia. Some vestiges of the walls remain, especially on the N. and S. sides. Of these the ancient parts consist of large quadrilateral pieces of local tufo, some of them being 4 to 5 feet long. They are repaired in places with opus incertum, of the age of Sulla, and with opus reticulatum. Including the arx, Tusculum was about 1½ mile in circumference. Between the town and the citadel is a large quadrilateral piscina, 86 feet long by 67½ broad, divided into three compartments, probably intended to collect the rain water, and to serve as a public washing-place. One of the theatres lies immediately under this cistern, and is more perfect than any in the vicinity of Rome. The *scena,* indeed is partly destroyed and covered with earth; but the benches or rows of seats in the *cavea,* of which there are nine, are still nearly entire, as well as the steps cut in them for the purpose of commodious descent. There are three flights of these steps, which consequently divide the *cavea* into four compartments, or *cunei.* The spectators faced the W., and thus enjoyed the magnificent prospect over the Alban valley and the plains of Latium, with Rome and the sea in the distance. Abeken (*Mittel-Italien,* p. 200), considers this theatre to belong to the early times of the Empire. Sir W. Gell, on the other hand, pronounces it to be earlier. (*Topogr. of Rome,* p. 429.) Near this edifice were discovered in 1818, by Lucien Buonaparte, the beautiful bronze statue of Apollo and those of the two Rutiliae. The last are now in the Vatican, in the corridor of the *Museo Chiaramonti.* At the back of this structure are vestiges of another theatre, or odeum; and at its side two parallel walls, which bounded the street leading to the citadel. On the W. of the theatre is an ancient road in good preservation, leading to one of the gates of the city, where it is joined by another road. Close to the walls near the piscina is an ancient cistern, and at its side a small fountain with an inscription; a little further is a Roman milestone, recording the distance of 15 miles. Besides these objects, there are also remains of a columbarium and of an amphitheatre, but the latter is small and not of high antiquity. Many fragments of architecture of an extremely ancient style are strewed around. Within the walls of the town, in what appears to have been the principal street, several inscriptions still remain, the chief of which is one on a kind of pedestal, recording that the object to which it belonged was sacred to Jupiter and Liberty. Other inscriptions found at Tusculum are preserved in the *Villa Rufinella*. One of them relates to M. Fulvius Nobilior, the conqueror of Aetolia; another to the poet Diphilos, mentioned by Cicero in his letters to Atticus (ii. 19).

Near the hermitage at *Camaldoli* was discovered in 1667 a very ancient tomb of the Furii, as recorded by Falconieri, in his *Inscrr. Athleticae*, p. 143, seq. It was cut in the rock, and in the middle of it was a sarcophagus, about 5 feet long, with a pediment-shaped cover. Round it were twelve urns placed in *loculi*, or coffins. The inscriptions on these urns were in so ancient a character that it bore a great resemblance to the Etruscan and Pelasgic. The form of the P resembled that in the sepulchral inscriptions of the Scipios, as well as that of the L. The diphthong OV was used for V, and P for F. The inscriptions on the urns related to the Furii, that on the sarcophagus to Luc. Turpilius. There were also fragments of fictile vases, commonly called Etruscan, and of an elegant cornice of terra cotta, painted with various colours. (Nibby, *Dintorni*, iii. p. 360.)

We shall only add that the ager Tusculanus, though now but scantily supplied with water, formerly contributed to furnish Rome with that element by means of the Aqua Tepula and Aqua Virgo. (Front. *Aq.* 8, seq.)

Respecting Tusculum the reader may consult Canina, *Descrizione dell' antico Tusculo;* Nibby, *Dintorni di Roma*, vol. iii.; Gell, *Topography of Rome and its Vicinity*, ed. Bunbury; Abeken, *Mittel-Italien;* Compagnoni, *Mem. istoriche dell' antico Tusculo.* On Cicero's villa, Cardoni, *De Tuscul. M. T. Ciceronis;* Zuzzeri, *Sopra d' una antica Villa scopertasul Dorso del Tusculo.* [T. H. D.]

TUSCUM MARE. [TYRRHENUM MARE.]

TUTA'TIO, a place in Noricum of uncertain site (*It. Ant.* p. 277; *Tab. Peut.*, where it is called Tutastio.) [L. S.]

TU'THOA (Τουθόα), a river of western Arcadia, flowing into the Ladon, on the confines of Thelpusa and Heraea. It is now called *Langádhia*, and joins the Ladon opposite to the small village of *Renési.* (Paus. viii. 25. § 12; Leake, *Morea*, vol. ii. p. 95, *Peloponnesiaca*, p. 223.)

TU'TIA, a small stream in the neighbourhood of Rome, mentioned only by Livy and Silius Italicus, who inform us that Hannibal encamped on its banks, when he was commencing his retreat from before the walls of Rome. (Liv. xxvi. 11; Sil. Ital. xiii. 5.) Livy places it 6 miles from the city, and it is probable that it was on the Salarian Way, by which Hannibal subsequently commenced his retreat: in this case it may probably be the stream now called the *Fiume di Conca*, which crosses that road between 6 and 7 miles from Rome, and has been supposed by Gell and Nibby to be the Allia. [ALLIA.] Silius Italicus expressly tells us that it was a very small stream, and little known to fame. The name is written Turia in many editions of that poet, but it appears that the best MSS. both of Silius and of Livy have the form Tutia. [E. H. B.]

TU'TIA (Τουττία, Plut. *Sert.* 19), a place in the territory of the Edetani in Hispania Tarraconensis not far from Sucro, the scene of a battle between Pompey and Sertorius (Plut. *l. c.*; Florus, iii. 22.) It is thought to be the modern *Tous.* But perhaps the conjecture of Ukert (ii. pt. i. p. 413) is correct that in both these passages we should read Turia. [T. H. D.]

TUTICUM. [EQUUS TUTICUS.]

TUTZIS (*It. Anton.* p. 162), a small fortified town in Aethiopia, situated 12 miles N. of Tachompso, upon the western side of the Nile. The ruins of Tutzis are supposed to be near, and NW. of the present village of *Gyrseh.* (Belzoni, *Travels*, vol. i. p. 112.) [W. B. D.]

TY'ANA (τὰ Τύανα: *Eth.* Τυανεύς or Τυανίτης), also called Thyana or Thiana, and originally Thoana, from Thoas, a Thracian king, who was believed to have pursued Orestes and Pylades thus far, and to have founded the town (Arrian, *Peripl. P. E.* p. 6; Steph. B. *s. v.*). Report said that it was built, like Zela in Pontus, on a causeway of Semiramis; but it is certain that it was situated in Cappadocia at the foot of Mount Taurus, near the Cilician gates, and on a small tributary of the Lamus (Strab. xii. p. 537, xiii. p. 587.) It stood on the highroad to Cilicia and Syria at a distance of 300 stadia from Cybistra, and 400 stadia (according to the Peut. Table 73 miles) from Mazaca (Strab. *l. c.*; Ptol. v. 6. § 18; comp. Plin. vi. 3; *It. Ant.* p. 145). Its situation on that road and close to so important a pass must have rendered Tyana a place of great consequence, both in a commercial and a military point of view. The plain around it, moreover, was extensive and fertile, and the whole district received from the town of Tyana the name of Tyanitis (Τυανῖτις, Strab. *l. c.*). From its coins we learn that in the reign of Caracalla the city became a Roman colony; afterwards, having for a time belonged to the empire of Palmyra, it was conquered by Aurelian, in A.D. 272 (Vopisc. *Aurel.* 22, foll.), and Valens raised it to the rank of the capital of Cappadocia Secunda (Basil. Magn. *Epist.* 74, 75; Hierocl. p. 700; Malala, *Chron.*; *Not. Imp.*) Its capture by the Turks is related by Cedrenus (p. 477). Tyana is celebrated in history as the native place of the famous impostor Apollonius, of whom we have a detailed biography by Philostratus. In the vicinity of the town there was a temple of Zeus on the borders of a lake in a marshy plain. The water of the lake itself was cold, but a hot well, sacred to Zeus, issued from it (Philostr. *Vit. Apoll.* i. 4; Amm. Marc. xxiii. 6; Aristot. *Mir. Ausc.* 163.) This well was called Asmabaeon, and from it Zeus himself was surnamed Asmabaeus. These details about the locality of Tyana have led in modern times to the discovery of the true site of the ancient city. It was formerly believed that *Kara Hissar* marked the site of Tyana; for in that district many ruins exist, and its inhabitants still maintain that their town once was the capital of Cappadocia. But this place is too far north to be identified with Tyana; and Hamilton (*Researches*, ii. p. 302, foll.) has shown most satisfactorily, what others had conjectured before him, that the true site of Tyana is at a place now called *Kiz Hissar*, south-west of *Nigdeh*, and between this place and *Erekli.* The ruins of Tyana are considerable, but the most conspicuous is an aqueduct of granite, extending seven or eight miles to the foot of the mountains. There are also massy foundations of several large buildings, shafts, pillars, and one handsome column still standing. Two miles south of these ruins, the hot spring also still bubbles forth in a cold swamp or lake. (Leake, *Asia Minor*, 61; Eckhel, iii. p. 195; Sestini, p. 60.) [L. S.]

TYBIACAE (Τυβιάκαι, Ptol. vi. 14. § 11), a people of Scythia intra Imaum, on the banks of the Rha. [T. H. D.]

TYDE. [Tude.]

TYLE (Τύλη, Polyb. iv. 46), a town of Thrace, on the coast of the Euxine, where the Gauls established a seat of government (*βασίλειον*), and which Reichard identifies with *Kilios*. Steph. B. (p. 670) calls it Τύλις, and places it on the Haemus. [J. R.]

TYLISSUS, a town of Crete (Plin. iv. 20), the position of which can only be conjectured. On its ancient coins are found on the reverse a young man holding in his right hand the head of an ibex or wild goat, and in his left a bow. These types on the coins of Tylissus led the most distinguished numismatist of the last century (Eckhel, vol. ii. p. 321) to fix its situation somewhere between Cydonia and Elyrus, the bow being common on the coins of the one, and the ibex's head on those of the other, of these two cities. Höck (*Kreta*, vol. i. p. 433) and Torres Y. Ribera (*Periplus Cretae*, p. 324) adopt this suggestion of Eckhel, and place Tylissus on the S. coast at the W. extremity of the island near the modern *Sélino-Kastéli*. (Pashley, *Travels*, vol. i. p. 162.) [E. B. J.]

TYLUS or TYRUS (Τύλος, Ptol. vi. 7. § 47; Τύρος, Strab. xvi. p. 766; Steph. B. *s. v.*), an island in the Persian gulf, off the coast of Arabia. It has been already mentioned that according to some traditions, this island was the original seat of the Phoenicians, who named the city of Tyre after it when they had settled on the coasts of the Mediterranean. [Phoenicia, p. 607.] Pliny describes the island as abounding in pearls. (Plin. vi. 28. s. 32, xii. 10. s. 21, xvi. 41. s. 80; Arrian, *Anab.* vii. 20; Theophr. *Hist. Plant.* iv. 9, v. 6) [T. H. D.]

TYMANDUS (Τύμανδος: *Eth.* Τυμανδηνός), a place in Phrygia, between Philomelium and Sozopolis. (*Conc. Chalced.* pp. 244, and 247: in this passage the reading Μανδηνῶν πόλις is corrupt; Hierocl. p. 673, where the name is miswritten Τύμανδρος.) It is possible that Tymandus may be the same as the Dymas mentioned by Livy (xxxviii. 15), for which some MSS. have Dimas or Dinias. [L. S.]

TYMBRES, a tributary of the Sangarius, in the north of Phrygia (Liv. xxxviii. 18), is in all probability the same river as the one called by Pliny (vi. 1) Tembrogius, which joined the Sangarius, as Livy says, on the borders of Phrygia and Galatia, and, flowing in the plain of Dorylaeum, separated Phrygia Epictetus from Phrygia Salutaris. It seems also to be the same river as the Thyaris and Bathys mentioned in Byzantine writers. (Cinnamus, v. 1. p. 111; Richter, *Wallfahrten*, p. 522, foll.) [L. S.]

TYMPHAEA, TYMPHAEI. [Tymphe.]

TYMPHE (Τυμφή), a mountain on the confines of Macedonia, Epeirus, and Thessaly, a part of the range of Pindus, which gave its name to the district Tymphaea (Τυμφαία), and to the people, the Tymphaei (Τυμφαῖοι, Steph. B. *s. v.*). As it is stated that the river Arachthus rose in Mt. Tymphe, and that Aeginium was a town of the Tymphaei (Strab. vii. pp. 325, 327), Mt. Tymphe may be identified with the summits near *Métzovo*, and the Tymphaei may be regarded as the inhabitants of the whole of the upper valley of the Peneius from *Métzovo* or *Kalabáka*. The name is written in some editions of Strabo, Stymphe and Stymphaei, and the form Stymphaea also occurs in Arrian (i. 7); but the orthography without the *s* is perhaps to be preferred. The question whether Stymphalis or Stymphalia is the same district as Tymphaea has been discussed elsewhere. [Stymphalis.] Pliny in one passage calls the Tymphaei an Aetolian people (iv. 2. s. 3), and in another a Macedonian (iv. 10. s. 17), while Stephanus B. describes the mountain as Thesprotian, and Strabo (*l. c.*) the people as an Epirotic race.

Stephanus B. mentions a town Tymphaea, which is probably the same place called Trampya (Τραμπύα) by others, where Polysperchon, who was a native of this district, murdered Hercules, the son of Alexander the Great. (Lycophr. 795; Diodor. xx. 28, with Wesseling's note; Steph. B. *s. v.* Τραμπύα.) (Leake, *Northern Greece*, vol. i. p. 422, vol. ii. pp. 275, 276.)

TYMPHRESTUS. [Pindus.]

TY'NDARIS (Τυνδαρίς, Strab.; Τυνδάριον, Ptol.: *Eth.* Τυνδαρίτης, Tyndaritanus: *Tindaro*), a city on the N. coast of Sicily, between Mylae (*Milazzo*) and Agathyrna. It was situated on a bold and lofty hill standing out as a promontory into the spacious bay bounded by the *Punta di Milazzo* on the E., and the *Capo Calavà* on the W., and was distant according to the Itineraries 36 miles from Messana. (*It. Ant.* p. 90; *Tab. Peut.*) It was a Greek city, and one of the latest of all the cities in Sicily that could claim a purely Greek origin, having been founded by the elder Dionysius in B. C. 395. The original settlers were the remains of the Messenian exiles, who had been driven from Naupactus, Zacynthus, and the Peloponnese by the Spartans after the close of the Peloponnesian War. These had at first been established by Dionysius at Messana, when he repeopled that city [Messana]; but the Spartans having taken umbrage at this, he transferred them to the site of Tyndaris, which had previously been included in the territory of Abacaenum. The colonists themselves gave to their new city the name of Tyndaris, from their native divinities, the Tyndaridae or Dioscuri, and readily admitting fresh citizens from other quarters, soon raised their whole population to the number of 5000 citizens. (Diod. xiv. 78.) The new city thus rose at once to be a place of considerable importance. It is next mentioned in B. C. 344, when it was one of the first cities that declared in favour of Timoleon after his landing in Sicily. (Id. xvi. 69.) At a later period we find it mentioned as espousing the cause of Hieron, and supporting him during his war against the Mamertines, B. C. 269. On that occasion he rested his position upon Tyndaris on the left, and on Tauromenium on the right. (Diod. xxii. *Exc. H.* p. 499.) Indeed the strong position of Tyndaris rendered it in a strategic point of view as important a post upon the Tyrrhenian, as Tauromenium was upon the Sicilian sea, and hence we find it frequently mentioned in subsequent wars. In the First Punic War it was at first dependent upon Carthage; and though the citizens, alarmed at the progress of the Roman arms, were at one time on the point of revolting to Rome, they were restrained by the Carthaginians, who carried off all the chief citizens as hostages. (Diod. xxiii. p. 502.) In B. C. 257, a sea-fight took place off Tyndaris, between that city and the Liparaean islands, in which a Roman fleet under C. Atilius obtained some advantage over the Carthaginian fleet, but without any decisive result. (Poly. i. 25; Zonar. viii. 12.) The Roman fleet is described on that occasion as touching at the promontory of Tyndaris, but the city had not yet fallen into their hands, and it was not till after the fall of Panormus, in B. C. 254, that

Tyndaris expelled the Carthaginian garrison, and joined the Roman alliance. (Diod. xxiii. p. 505.) We hear but little of Tyndaris under the Roman government, but it appears to have been a flourishing and considerable city. Cicero calls it "nobilissima civitas" (*Verr.* iii. 43), and we learn from him that the inhabitants had displayed their zeal and fidelity towards the Romans upon many occasions. Among others they supplied naval forces to the armament of Scipio Africanus the Younger, a service for which he requited them by restoring them a statue of Mercury which had been carried off by the Carthaginians, and which continued an object of great veneration in the city, till it was again carried off by the rapacious Verres. (Cic. *Verr.* iv. 39—42, v. 47.) Tyndaris was also one of seventeen cities which had been selected by the Roman senate, apparently as an honorary distinction, to contribute to certain offerings to the temple of Venus at Eryx. (*Ib.* v. 47; Zumpt, *ad loc.*; Diod. iv. 83.) In other respects it had no peculiar privileges, and was in the condition of an ordinary municipal town, with its own magistrates, local senate, &c., but was certainly in the time of Cicero one of the most considerable places in the island. It, however, suffered severely from the exactions of Verres (Cic. *Verr. ll. cc.*), and the inhabitants, to revenge themselves on their oppressor, publicly demolished his statue as soon as he had quitted the island. (*Ib.* ii. 66.)

Tyndaris again bore a considerable part in the war between Sextus Pompeius and Octavian (B. C. 36). It was one of the points occupied and fortified by the former, when preparing for the defence of the Sicilian straits, but was taken by Agrippa after his naval victory at Mylae, and became one of his chief posts, from which he carried on offensive warfare against Pompey. (Appian, *B. C.* v. 105, 109, 116.) Subsequently to this we hear nothing more of Tyndaris in history; but there is no doubt of its having continued to subsist throughout the period of the Roman Empire. Strabo speaks of it as one of the places on the N. coast of Sicily which, in his time, still deserved the name of *cities*; and Pliny gives it the title of a Colonia. It is probable that it received a colony under Augustus, as we find it bearing in an inscription the titles of "Colonia Augusta Tyndaritanorum." (Strab. vi. p. 272; Plin. iii. 8. s. 14; Ptol. iii. 4. § 2; Orell. *Inscr.* 955.) Pliny indeed mentions a great calamity which the city had sustained, when (he tells us) half of it was swallowed up by the sea, probably from an earthquake having caused the fall of part of the hill on which it stands, but we have no clue to the date of this event; (Plin. ii. 92. s. 94.) The Itineraries attest the existence of Tyndaris, apparently still as a considerable place, in the fourth century. (*Itin. Ant.* pp. 90, 93; *Tab. Peut.*)

The site of Tyndaris is now wholly deserted, but the name is retained by a church, which crowns the most elevated point of the hill on which the city formerly stood, and is still called the *Madonna di Tindaro.* It is 650 feet above the sea-level, and forms a conspicuous landmark to sailors. Considerable ruins of the ancient city are also visible. It occupied the whole plateau or summit of the hill, and the remains of the ancient walls may be traced, at intervals, all round the brow of the cliffs, except in one part, facing the sea, where the cliff is now quite precipitous. It is not improbable that it is here that a part of the cliff fell in, in the manner recorded by Pliny (ii. 92. s. 94). Two gates of the city are also still distinctly to be traced. The chief monuments, of which the ruins are still extant within the circuit of the walls, are: the theatre, of which the remains are in imperfect condition, but sufficient to show that it was not of large size, and apparently of Roman construction, or at least, like that of Tauromenium, rebuilt in Roman times upon the Greek foundations; a large edifice with two handsome stone arches, commonly called a Gymnasium, but the real purpose of which is very difficult to determine; several other edifices of Roman times, but of wholly uncertain character, a mosaic pavement, and some Roman tombs. (Serra di Falco, *Antichità della Sicilia*, vol. v. part vi.; Smyth's *Sicily*, p. 101; Hoare's *Classical Tour*, vol. ii. p. 217, &c.) Numerous inscriptions, fragments of sculpture, and architectural decorations, as well as coins, vases, &c. have also been discovered on the site. [E. H. B.]

TYNDIS (Τύνδις, Ptol. vii. 1. § 16), a river of India intra Gangem, which flowed into the *Bay of Bengal.* There is great doubt which of two rivers, the Manades (*Mahanáda*) or the Maesolus (*Godávery*), represents this stream. According to Mannert it was the southern branch of the former river (v. 1. p. 173). But, on the whole, it is more likely that it is another name for the *Godávery.* [V.]

TYNIDRUMENSE OPP. [THUNUDROMON.]

TYNNA (Τύννα), a place in Cataonia or the southern part of Cappadocia, in the neighbourhood of Faustinopolis, is mentioned only by Ptolemy (v. 7. § 7). [L. S.]

TYPAEUS. [OLYMPIA.]

TYPA'NEAE (Τυπανέαι, Polyb. Steph. B.; Τυμπανέαι, Strab.; Τυμπάνεια, Ptol.: *Eth.* Τυπανεάτης), a town of Triphylia in Elis, mentioned by Strabo along with Hypana. It was taken by Philip in the Social War. It was situated in the mountains in the interior of the country, but its exact site is uncertain. Leake supposes it to be represented by the ruins near *Platianá*; but Boblaye supposes these to be the remains of Aepy or Aepium [AEPY], and that Typaneae stood on the hill of *Makrysia.* (Strab. viii. p. 343; Polyb. iv. 77—79; Steph. B. *s. v*; Ptol. iii. 16. § 18; Leake, *Morea*, vol. ii. p. 82; Boblaye, *Recherches, &c.* p. 133; Ross, *Reisen im Peloponnes*, p. 105; Curtius, *Peloponnesos*, vol. ii. p. 89.)

TYRA'CIA or TYRACI'NA (Τυρακῖναι, Steph. B.: *Eth.* Tyraciensis, Plin.), a city of Sicily, of which very little is known. It is noticed by Stephanus as "a small but flourishing city;" and the Tyracienses are mentioned by Pliny among the municipal communities of the interior of Sicily. (Steph. B. *s. v.*; Plin. iii. 8. s. 14.) It is doubtful whether the "Tyracinus, princeps civitatis," mentioned by Cicero (*Verr.* iii. 56) is a citizen of Tyracia or one of Helorus who bore the proper name of Tyracinus. In either case the name was probably derived from the city: but though the existence of this is clearly established, we are wholly without any clue to its position.

Several writers would identify the TRINACIA (Τρινακία) of Diodorus (xii. 29), which that writer describes as having been one of the chief towns of the Siculi, until it was taken and destroyed by the Syracusans in B. C. 439, with the Tyracinae of Stephanus and Tyracia of Pliny. Both names being otherwise unknown, the readings are in both cases uncertain: but Diodorus seems to represent Trinacia as having been totally destroyed, which would sufficiently account for its not being again mentioned in history: and there is no other reason for assuming the two places to be identical. (Cluver. *Sicil.* p. 388; Holsten. *Not. ad Steph. B. s. v.*; Wesseling, *ad Diod. l. c.*) [E. H. B.]

TYRALLIS (Τυραλλίς), a place in Cappadocia, on the south-west of Cabassus, on the river Cydnus. (Ptol. v. 7. § 7.) [L. S.]

TYRAMBAE (*Τυράμβαι*, Ptol. v. 9. § 17), a people of Asiatic Sarmatia, whose chief city was Tyrambe (*Τυράμβη*, *ib.* § 4, &c.; Strab. xi. p. 494), in the neighbourhood of the river Rhombites Minor. [T. H. D.]

TYRANGI'TAE (*Τυραγγεῖται*, *Τυραγγέται*, or *Τυρεγέται*, Strab. vii. p. 289, &c.; Ptol. iii. 5. § 25), literally, the Getae of the Tyras, an immigrant tribe of European Sarmatia dwelling E. of the river Tyras, near the Harpii and Tagri, and, according to Ptolemy, the northern neighbours of Lower Moesia. Pliny (v. 12. s. 26) calls them, with more correct orthography, Tyragetae, and represents them as dwelling on a large island in the Tyras. [T. H. D.]

TYRANNOBOAS (*Τυραννοβόας*), an emporium on the western coast of *Bengal* between Mandagara and Byzantium, noticed by the author of the Periplus (p. 30.) It cannot now be identified with any place. [V.]

TYRAS (*ὁ Τύρας*, Strab. ii. p. 107), one of the principal rivers of European Sarmatia. According to Herodotus (iv. 51) it rose in a large lake, whilst Ptolemy (iii. 5. § 17, 8. § 1, &c.) places its sources in Mount Carpates, and Strabo (*l. c.*) says that they are unknown. The account of Herodotus, however, is correct, as it rises in a lake in Gallicia. (Georgii, *Alte-Geogr.* p. 269.) It ran in an easterly direction parallel with the Ister, and formed part of the boundary between Dacia and Sarmatia. It fell into the Pontus Euxinus to the NE. of the mouth of the Ister; the distance between them being, according to Strabo, 900 stadia (Strab. vii. p. 305, seq.), and, according to Pliny (iv. 12. s. 26), 130 miles (from the Pseudostoma). Scymnus (*Fr.* 51) describes it as of easy navigation, and abounding in fish. Ovid (*ex Pont.* iv. 10. 50) speaks of its rapid course. At a later period it obtained the name of Danastris or Danastus (Amm. Marc. xxxi. 3. § 3; Jornand. *Get.* 5; Const. Porphyr. *de Adm. Imp.* 8), whence its modern name of *Dniester* (*Neister*), though the Turks still call it *Tural.* (Cf. Herod. iv. 11, 47, 82; Scylax, p. 29; Strab. i. p. 14; Mela, ii. 1, &c.; also Schaffarik, *Slav. Alterth.* i. p. 505.) The form *Τύρις* is sometimes found. (Steph. B. p. 671; Suid. *s. v.* *Σκύθαι* and *Ποσειδώνιος*.) [T. H. D.]

TYRAS (*Τύρας*, Ptol. iii. 10. § 16), a town of European Sarmatia, situated at the mouth of the river just described. (Herod. iv. 51; Mela, ii. 1.) It was originally a Milesian colony (Scymn. *Fr.* 55; Anon. *Peripl. P. Eux.* p. 9); although Ammianus Marcellinus (xxii. 8. § 41), apparently from the similarity of the name, which he writes "Tyros," ascribes its foundation to the Phoenicians from Tyre. Pliny (iv. 12. s. 26; cf. Steph. B. p. 671) identifies it with an older town named Ophiusa ("gelidis pollens Ophiusa venenis," Val. Flacc. vi. 84). Ptolemy, however (*l. c.*), makes them two different towns; and places Ophiusa somewhat more N., and towards the interior. Scylax knows only Ophiusa, whilst the later writers, on the other hand, knew only Tyras. (Cf. Neumann, *Die Hellenen im Skythenlande*, p. 357, seq.) It probably lay on the site of the present *Ackermann.* (Clarke, *Travels*, ii. p. 124; Kohl, *Reisen in Südrussland*, i. 167.) [T. H. D.]

TYRIAEUM (*Τυριαῖον*: *Eth.* Tyrienses), a town of Lycaonia, which according to Xenophon (*Anab.* i. 2. § 24) was 20 parasangs west of Iconium, and according to Strabo (xiv. p. 663) on the eastern frontier of Phrygia, and probably on the road from Synnada to Laodiceia, and between the latter and Philomelium. Near this town Cyrus the Younger reviewed his forces when he marched against his brother. (Comp. Plin. v. 25; Hierocl. p. 672; and *Conc. Chalced.* p. 401, where the name is written *Τυράϊον*.) It is possible that Tyriaeum may be the same town as the Totarion or Tetradion of Ptolemy (v. 4. § 10), the Tyrasion in the *Conc. Chalced.* (p. 669), and the Tyganion of Anna Comnena (xv. 7, 13). Its site seems to be marked by the modern *Ilgun* or *Ilghun.* (Hamilton, *Researches*, ii. p. 200; Kiepert in Franz, *Fünf Inschriften*, p. 36.) [L. S.]

TYRICTACA (*Τυρικτάκη* or *Τωριτάκη*, Ptol. iii. 6. § 4), a town in the Chersonesus Taurica. (Cf. Anon. *Peripl. P. Eux.* p. 4., where it is written *Τυριστάκη*.) Dubois de Montperreux identifies it with some ruins found on lake *Thurbach.* (*Voy. autour du Caucase*, v. p. 247.) [T. H. D.]

TYRISSA (*Τύρισσα*, Ptol. iii. 13. § 39: *Eth.* Tyrissaeus, Plin. iv. 10. s. 17), a town of Emathia in Macedonia, placed by Ptolemy next to Europus.

TYRI'TAE (*Τυρῖται*, Herod. iv. 51), certain Greeks settled at the mouth of the Tyras, probably Milesians who built the town of that name. [T. H. D.]

TYRRHE'NIA, TYRRHE'NI. [Etruria.]

TYRRHE'NUM MARE (*τὸ Τυῤῥηνικόν πέλαγος*), was the name given in ancient times to the part of the Mediterranean sea which adjoins the W. coast of Italy. It is evident from the name itself that it was originally employed by the Greeks, who universally called the people of Etruria Tyrrhenians, and was merely adopted from them by the Romans. The latter people indeed frequently used the term Tuscum Mare (Liv. v. 33; Mel. ii. 4. § 9), but still more often designated the sea on the W. of Italy simply as "the lower sea," Mare Inferum, just as they termed the Adriatic "the upper sea" or Mare Superum. (Mel. ii. 4. § 1; Plin. iii. 5. s. 10; Liv. *l. c.*) The name of Tyrrhenum Mare was indeed in all probability never in use among the Romans, otherwise than as a mere geographical term; but with the Greeks it was certainly the habitual designation of that portion of the Mediterranean which extended from the coast of Liguria to the N. coast of Sicily, and from the mainland of Italy to the islands of Sardinia and Corsica on the W. (Polyb. i. 10, 14, &c.; Strab. ii. p. 122, v. p. 211, &c.; Dionys. *Per.* 83; Scyl. §§ 15, 17; Agathem. ii. 14.) The period at which it came into use is uncertain; it is not found in Herodotus or Thucydides, and Scylax is the earliest author now extant by whom the name is mentioned. [E. H. B.]

TYRRHINE. [Ogyris.]

TYRSUS. [Thyrsus.]

TYRUS (*Τύρος*, Herod. ii. 44, &c.: *Eth.* *Τύριος*, Tyrius), the most celebrated and important city of Phoenicia. By the Israelites it was called Tsor (*Josh.* xix. 29, &c.), which means a rock but by the Tyrians themselves Sor or Sur (Theodoret. *in Ezek.* xxvi.), which appellation it still retains. For the initial letter *t* was substituted by the Greeks, and from them adopted by the Romans; but the latter also used the form Sara or Sarra, said to be derived from the Phoenician name of the purple fish; whence also the adjective Sarra-nus. (Plaut. *Truc.* 2, 6, 58; Virg. *Georg.* ii. 506; Juv. x. 38; Gell. xiv. 6, &c.) The former of these etymologies is the preferable one. (Shaw, *Travels*, ii. p. 31.) The question of the origin of Tyre has been already discussed, its commerce, manufactures and colonies described, and the principal events of its history narrated at some length [PHOENICIA, p. 608, seq.], and this article will therefore be more particularly devoted to the topography, and to what may be called the material history, of the city.

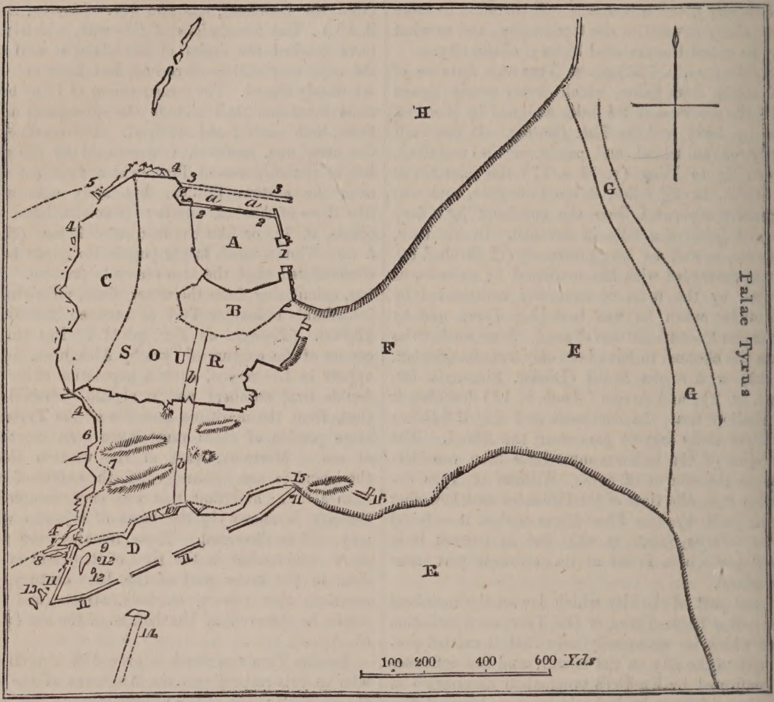
Strabo (xvi. p. 756) places Tyre at a distance of 200 stadia from Sidon, which pretty nearly agrees with the distance of 24 miles assigned by the *Itin. Ant.* (p. 149) and the *Tab. Peuting.* It was built partly on an island and partly on the mainland. According to Pliny (v. 19. s. 17) the island was 22 stadia, or $2\frac{3}{4}$ miles, in circumference, and was originally separated from the continent by a deep channel $\frac{7}{10}$ths of a mile in breadth. In his time, however, as well as long previously (cf. Strab. *l. c.*), it was connected with the mainland by an isthmus formed by the mole or causeway constructed by Alexander when he was besieging Tyre, and by subsequent accumulations of sand. Some authorities state the channel to have been only 3 stadia (Scylax, p. 42) or 4 stadia broad (Diodor. Sic. xvii. 60; Curt. iv. 2); and Arrian (*Anab.* ii. 18) describes it as shallow near the continent and only 6 fathoms in depth at its deepest part near the island. The accretion of the isthmus must have been considerable in the course of ages. William of Tyre describes it in the time of the Crusades as a bow-shot across (xiii. 4); the Père Roger makes it only 50 paces (*Terre Sainte*, p. 41); but at present it is about $\frac{1}{3}$ of a mile broad at its narrowest part, near the island.

That part of the city which lay on the mainland was called Palae-Tyrus, or Old Tyre; an appellation from which we necessarily infer that it existed previously to the city on the island; and this inference is confirmed by Ezekiel's prophetical description of the siege of Tyre by Nebuchadnezzar, king of Babylon, the particulars of which are not suitable to an island city. Palae-Tyrus extended along the shore from the river Leontes on the N., to the fountain of *Ras-el-Ain* on the S., a space of 7 miles; which, however, must have included the suburbs. When Strabo says (xvi. p. 758) that Palae-Tyrus was 30 stadia, or $3\frac{3}{4}$ miles, distant from Tyre, he is probably considering the southern extremity of the former. Pliny (*l. c.*) assigns a circumference of 19 miles to the two cities. The plain in which Palae-Tyrus was situated was one of the broadest and most fertile in Phoenicia. The fountain above mentioned afforded a constant supply of pure spring water, which was received into an octagon reservoir, 60 feet in diameter and 18 feet deep. Into this reservoir the water gushes to within 3 feet of the top. (Maundrell, *Journey*, p. 67.) Hence it was distributed through the town by means of an aqueduct, all trace of which has now disappeared (Robinson, *Palest.* iii. p. 684.) The unusual contrast between the bustle of a great seaport and the more tranquil operations of rural life in the fertile fields which surrounded the town, presented a striking scene which is described with much felicity in the *Dionysiaca* of Nonnus (40, 327, sqq.).

The island on which the new city was built is the largest rock of a belt that runs along this part of the coast. We have no means of determining the origin of the island city; but it must of course have arisen in the period between Nebuchadnezzar and Alexander the Great. The alterations which the coast has undergone at this part render it difficult to determine the original size of the island. Maundrell (p. 66) estimated it at only 40 acres; but he was guided solely by his eye. The city was surrounded with a wall, the height of which, where it faced the mainland, was 150 feet. (Arrian, *Anab.* ii. 18.) The foundations of this wall, which must have marked the limits of the island as well as of the city, may still be discerned, but have not been accurately traced. The measurement of Pliny before cited must doubtless include the subsequent accretions, both natural and artificial. The smallness of the area was, however, compensated by the great height of the houses of Tyre, which were not built after the eastern fashion, but story upon story, like those of Aradus, another Phoenician island city (Mela, ii. 7), or like the insulae of Rome. (Strab. *l. c.*) Thus a much larger population might be accommodated than the area seems to promise. Bertou, calculating from the latter alone, estimates the inhabitants of insular Tyre at between 22,000 and 23,000. (*Topogr. de Tyr*, p. 17.) But the accounts of the capture of Tyre by Alexander, as will appear in the sequel, show a population of at least double that number; and it should be recollected that, from the maritime pursuits of the Tyrians, a large portion of them must have been constantly at sea. Moreover, part of the western side of the island is now submerged, to the extent of more than a mile; and that this was once occupied by the city is shown by the bases of columns which may still be discerned. These remains were much more considerable in the time of Benjamin of Tudela, in the latter part of the 12th century, who mentions that towers, markets, streets, and halls might be observed at the bottom of the sea (p. 62, ed. Asher).

Insular Tyre was much improved by king Hiram, who in this respect was the Augustus of the city. He added to it one of the islands lying to the N., by filling up the intervening space. This island, the outline of which can no longer be traced, previously contained a temple of Baal, or, according to the Greek way of speaking, of the Olympian Jupiter. (Joseph. *c. Apion*, i. 17.) It was by the space thus gained, as well as by substructions on the eastern side of the island, that Hiram was enabled to enlarge and beautify Tyre, and to form an extensive public place, which the Greeks called Eurychorus. The artificial ground which Hiram formed for this purpose may still be traced by the loose rubbish of which it consists. The frequent earthquakes with which Tyre has been visited (Sen. *Q. N.* ii. 26) have rendered it difficult to trace its ancient configuration; and alterations have been observed even since the recent one of 1837 (Kenrick, *Phoenicia*, p. 353, &c.).

The powerful navies of Tyre were received and sheltered in two roadsteads and two harbours, one on the N., the other on the S. side of the island. The northern, or Sidonian roadstead, so called because it looked towards Sidon (Arrian, ii. 20), was protected by the chain of small islands already mentioned. The harbour which adjoined it was formed by a natural inlet on the NE. side of the island. On the N., from which quarter alone it was exposed to the wind, it was rendered secure by two sea-walls running parallel to each other, at a distance of 100 feet apart, as shown in the annexed plan. Portions of these walls may still be traced. The eastern side of the harbour was enclosed by two ledges of rock, with the assistance of walls, having a passage between them about 140 feet wide, which formed the mouth of the harbour. In case of need this entrance could be closed with a boom or chain. At present this harbour is almost choked with sand, and only a small basin, of about 40 yards in diameter, can be traced (Shaw, *Travels*, vol. ii. p. 30); but in its original state it was about 300 yards long, and from 230 to 240 yards wide. Part of the modern town of *Sur*, or *Sour*, is built over its southern portion, and only vessels of very shallow draught can enter.



PLAN OF TYRE.
(From Kenrick's "Phoenicia.")

A. Northern harbour.
B. Supposed limit of ancient harbour
C. Tract of loose sand.
D. Southern, or Egyptian, harbour.
E. Southern, or Egyptian, roadstead.
FF. Isthmus formed by Alexander's mole.
GG. Depression in the sand.
H. Northern, or Sidonian, roadstead.
aa. Portions of inner sea-wall, visible above water.
bb. Ancient canal.
1. Entrance of northern harbour.
2, 2. Original line of sea-wall.
3, 3. Outer wall, now below water.
4, 4, 4, 4. Line of rocks, bordered on the E. by a wall, not of ancient construction.
5. Ledge of rocks projecting 90 feet into the sea.
6. Columns united to the rock.
7. Rock, below 5 feet of rubbish.
8. Ledge of rocks extending 200 feet into the sea.
9. Remains of a wall, with irons for mooring.
10. Masonry, showing the entrance of the canal.
11,11,11,11. Walls of the Cothon or harbour, about 25 feet broad.
12, 12. Portions of wall overturned in the harbour.
13. Rocky islets.
14. Supposed submarine dyke or breakwater.
15. Commencement of the isthmus, covering several yards of the harbour wall.
16. Angle of the ancient wall of circumvallation, and probable limit of the island on the E.

The southern roadstead was called the Egyptian, from its lying towards that country, and is described by Strabo (*l. c.*) as unenclosed. If, however, the researches of Bertou may be relied upon (*Topogr. de Tyr*, p. 14), a stupendous sea-wall, or breakwater, 35 feet thick, and running straight in a SW. direction, for a distance of 2 miles, may still be traced. The wall is said to be covered with 2 or 3 fathoms of water, whilst within it the depth is from 6 to 8 fathoms. Bertou admits, however, that this wall has never been carefully examined; and if it had existed in ancient times, it is impossible to conceive how so stupendous a work should have escaped the notice of all the writers of antiquity. According to the same authority, the whole southern part of the island was occupied by a *cothon*, or dock, separated from the roadstead by a wall, the remains of which are still visible. This harbour, like the northern one, could be closed with a boom; whence Chariton (vii. 2. p. 126, Reiske) takes occasion to compare the security of Tyre to that of a house with bolted doors. At present, however, there is nothing to serve for a harbour, and even the roadstead is not secure in all winds. (Shaw, ii. p. 30.) The northern and southern harbours were connected together by means of a canal, so that ships could pass from one to the other. This canal may still be traced by the loose sand with which it is filled.

We have already adverted to the sieges sustained by Tyre at the hands of Shalmaneser, Nebuchadnezzar, Alexander, and Antigonus. [PHOENICIA, pp. 610—613]. That by Alexander was so remarkable, and had so much influence on the topography of Tyre, that we reserved the details of it for this place, as they may be collected from the narratives of Arrian (*Anab.* ii. 17—26), Diodorus Siculus (xvii. 40—45), and Q. Curtius (iv. 4—27). The insular situation of Tyre, the height and strength of its walls, and the command which it possessed of the sea, seemed to render it impregnable; and hence the Tyrians, when summoned by Alexander to surrender, prepared for an obstinate resistance. The only method which occurred to the mind of that conqueror of overcoming the difficulties presented to his arms by the site of Tyre, was to connect it with the mainland by means of a mole. The materials for such a structure were at hand in abundance. The deserted buildings of Palae-Tyrus afforded plenty of stone, the mountains of Lebanon an inexhaustible supply of timber. For a certain distance, the mole, which was 200 feet in breadth, proceeded rapidly and successfully, though Alexander's workmen were often harassed by parties of Tyrian troops, who landed in boats, as well as by the Arabs of the Syrian desert. But as the work approached the island, the difficulties increased in a progressive ratio. Not only was it threatened with destruction from the depth and force of the current, often increased to violence by a southerly wind, but the workmen were also exposed to the missiles of the Tyrian slingers and bowmen, aimed both from vessels and from the battlements of the city. To guard themselves from these attacks, the Macedonians erected two lofty wooden towers at the extremity of the mole, and covered them with hides as a protection against fire. The soldiers placed on these towers occasioned the Tyrians considerable annoyance. At length, however, the latter succeeded in setting fire to the towers by means of a fire-ship filled with combustibles; and afterwards, making a sortie in their boats, pulled up the stakes which protected the mole, and destroyed the machines which the fire had not reached. To complete the discomfiture of the Macedonians, a great storm arose and carried away the whole of the work which had been thus loosened.

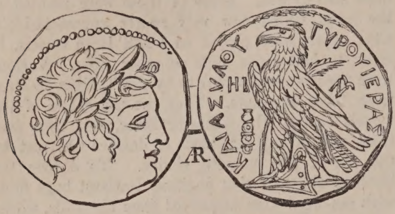
This misfortune, which would have damped the ardour of an ordinary man, only incited Alexander to renew his efforts with greater vigour and on a surer plan. He ordered a new mole to be constructed, broader than the former one; and in order to obviate the danger of destruction by the waves, he caused it to incline towards the SW., and thus to cross the channel diagonally, instead of in a straight line. At the same time he collected a large fleet from Sidon, whither he went in person, from Soli, Mallus, and other places; for, with the exception of Tyre, all Phoenicia was already in the hands of Alexander. He then made an incursion into Coelesyria, and chased away the Arabs who annoyed his workmen employed in cutting timber in Antilibanus. When he again returned to Tyre with his fleet, which he had joined at Sidon, the new mole had already made great progress. It was formed of whole trees with their branches, covered with layers of stone, on which other trees were heaped. The Tyrian divers, indeed, sometimes succeeded in loosening the structure by pulling out the trees; but, in spite of these efforts, the work proceeded steadily towards completion.

The large fleet which Alexander had assembled struck terror into the Tyrians, who now confined themselves to defensive measures. They sent away the old men, women, and children to Carthage, and closed the mouths of their harbours with a line of triremes. It is unnecessary to recount all the incidents which followed, and we shall therefore confine ourselves to the most important. Alexander had caused a number of new machines to be prepared, under the direction of the ablest engineers of Phoenicia and Cyprus. Some of these were planted on the mole, which now very nearly approached the city; others were placed on board large vessels, in order to batter the walls on other sides. Various were the devices resorted to by the Tyrians to frustrate these attempts. They cut the cables of the vessels bearing the battering rams, and thus sent them adrift; but this mode of defence was met by the use of iron mooring chains. To deaden the blows of the battering engines, leathern bags filled with sea-weed were suspended from the walls, whilst on their summit were erected large wheel-like machines filled with soft materials, which being set in rapid motion, either averted or intercepted the missiles hurled by the Macedonians. A second wall also was commenced within the first. On the other hand, the Macedonians, having now carried the mole as far as the island, erected towers upon it equal in height to the walls of the town, from which bridges were projected towards the battlements, in order to take the city by escalade. Yet, after all the labour bestowed upon the mole, Tyre was not captured by means of it. The Tyrians annoyed the soldiers who manned the towers by throwing out grappling hooks attached to lines, and thus dragging them down. Nets were employed to entangle the hands of the assailants; masses of red-hot metal were hurled amongst them, and quantities of heated sand, which, getting between the interstices of the armour, caused intolerable pain. An attempted assault from the bridges of the towers was repulsed, and does not appear to have been renewed. But a breach was made in the walls by battering rams fixed on vessels; and whilst this was assaulted by means of ships provided with bridges, simultaneous attacks were directed against both the harbours. The Phoenician fleet burst the boom of the Egyptian harbour, and took or destroyed the ships within it. The northern harbour, the entrance of which was undefended, was easily taken by the Cyprian fleet. Meanwhile Alexander had entered with his troops through the breach. Provoked by the long resistance of the Tyrians and the obstinate defence still maintained from the roofs of the houses, the Macedonian soldiery set fire to the city, and massacred 8000 of the inhabitants. The remainder, except those who found shelter on board the Sidonian fleet, were sold into slavery, to the number of 30,000; and 2000 were crucified in expiation of the murders of certain Macedonians during the course of the siege. The lives of the king and chief magistrates were spared.

Thus was Tyre captured, after a siege of seven months, in July of the year B. C. 332. Alexander then ordered sacrifices and games in honour of the Tyrian Hercules, and consecrated to him the battering ram which had made the first breach in the walls. The population, which had been almost destroyed, was replaced by new colonists, of whom a considerable portion seem to have been Carians. The subsequent fortunes of Tyre have already been recorded. [PHOENICIA, p. 613.]

For the coins of Tyre see Eckhel, *Doctr. Num.*

P. i. vol. iii. pp. 379—393, and 408, seq. Respecting its history and the present state of its remains, the following works may be advantageously consulted: Hengstenberg, *De Rebus Tyriorum;* Kenrick, *Phoenicia;* Pococke, *Description of the East;* Volney, *Voyage en Syrie;* Richter, *Wallfahrt;* Bertou, *Topographie de Tyr;* Maundrell, *Journey from Aleppo to Damascus;* Shaw's *Travels;* Robinson, *Biblical Researches,* &c. [T. H. D.]



COIN OF TYRUS.

TYSANUSA, a port on the coast of Caria, on the bay of Schoenus, and a little to the east of Cape Posidium (Pomp. Mela, i. 16). Pliny (v. 29) mentions Tisanusa as a town in the same neighbourhood. [L. S.]

TYSIA. [Tisianus.]

TZURU'LUM (Τζουρουλόν, Procop. *B. Goth.* iii. 38; Anna Comn. vii. p. 215, x. p. 279; Theophyl. vi. 5; in Geog. Rav. iv. 6, and *Tab. Peut.*, Surallum and Syrallum; in *It. Ant.* pp. 138, 230, Izirallum, but in p. 323, Tirallum; and in *It. Hier.* p. 569, Tunorullum), a strong town on a hill in the SE. of Thrace, not far from Perinthus, on the road from that city to Hadrianopolis. It has retained its name with little change to the present day, being the modern *Tchorlu* or *Tchurlu.* [J. R.]

U, V.

VABAR, a river of Mauretania Caesariensis, which fell into the sea a little to the W. of Saldae. Ptolemy (iv. 2. § 9) mentions it under the name of Οὔαβαρ as if it had been a town; and Maffei (*Mus. Ver.* p. 463) thought that he had discovered such a place in the name of Bavares, in an African inscription (cf. Orelli, *Inscr.* no. 529). In Pliny (v. 2. s. 1) and Mela (i. 6) the name is erroneously written Nabar. It is probably the present *Buberak.* [T. H. D.]

VACALUS. [Batavi.]

VACCA. 1. (Sall. *J.* 29, &c.) or VAGA (Sil. It. iii. 259; Οὐάγα, Ptol. iv. 3. § 28; Βάγα, Procop. *de Aed.* vi. 5), an important town and place of considerable commerce in the interior of Numidia, lying a long day's journey SW. of Utica. Pliny (v. 4) calls it Vagense Oppidum. It was destroyed by Metellus (Sall. *J.* 69); but afterwards restored and inhabited by the Romans. Justinian surrounded it with a wall, and named it Theodoria, in honour of his consort. (Procop. *l. c.*; cf. Strab. xvii. p. 831; Sall. *J.* 47, 68; Plut. *Mar.* 8. p. 409.) Now *Bayjah* (*Begia, Beggia, Bedsja*) in *Tunis,* on the borders of *Algiers.* (Cf. Shaw, *Travels,* i. p. 183.) Vaga is mentioned by the Geogr. Nub. (*Clim.* iii. 1. p. 88) under the name of Bagia, and by Leo Afric. (p. 406, Lorsbach) under that of Beggia, as a place of considerable commerce.

2. A town in Byzacium in Africa Proper, lying to the S. of Ruspinum (Hirt. *B. Afr.* 74). This is probably the "aliud Vagense oppidum" of Pliny (*l. c.*). [T. H. D.]

VACCAEI (Οὐακκαῖοι, Ptol. ii. 6. § 50), an important people in the interior of Hispania Tarraconensis, bounded on the W. by the Astures, on the N. by the Cantabri, on the E. by the Celtiberi (to whom Appian, *Hisp.* 51, attributes them), and on the S. by the Vettones and the river Durius. Hence their district may be considered as marked by the modern towns of *Zamora, Toro, Palencia, Burgos,* and *Valladolid.* Their chief cities were Pallantia (*Palencia*) and Intercatia. According to Diodorus (v. 34) they yearly divided their land for tillage among themselves, and regarded the produce as common property, so that whoever kept back any part for himself was capitally punished. (Cf. Liv. xxx. 7, xl. 47; Polyb. iii. 14; Strab. iii. pp. 152, 162; Plin. iii. 3. s. 4; Plut. *Sert.* 21.) [T. H. D.]

VACOMAGI (Οὐακομάγοι, Ptol. ii. 3. § 13), a people in Britannia Barbara, near the Taezali, never subdued by the Romans. Camden (p. 1217) seeks them on the borders of *Loch Lomond.* Ptolemy (*l. c.*) ascribes four towns to them. [T. H. D.]

VACUA (Οὐακούα, Strab. iii. p. 153; Οὔακος, Ptol. ii. 5. § 4), a river in Lusitania, which entered the Atlantic ocean between the Durius and Munda, in the neighbourhood of Talabrica. Pliny (iv. 21. s. 35) calls it Vacca. The present *Vouga.* [T. H. D.]

VACUATAE (Οὐακοῦαται or Βακοῦαται, Ptol. iv. 6. § 10), a people in the S. of Mauretania Tingitana, extending as far as the Little Atlas. [T.H.D.]

VADA, a place on or near the Rhine, in North Gallia. Tacitus (*Hist.* v. 21) in his history of the war of Civilis speaks of Civilis attacking on one day with his troops in four divisions, Arenacum, Batavodurum, Grinnes, and Vada. The history shows that Grinnes and Vada were south or on the south side of the stream which Tacitus calls the Rhenus. [Grinnes.] [G. L.]

VADA SABBATA (Σαβάτων Οὔαδα, Strab.; Σάββατα, Ptol.: *Vado*), a town and port on the sea-coast of Liguria, about 30 miles W. of Genua. It was situated on a bay which affords one of the best roadsteads along this line of coast, and seems to have been in consequence much frequented by the Roman fleets. In B. C. 43 it was the first point at which M. Antonius halted after his defeat at Mutina, and where he effected his junction with Ventidius, who had a considerable force under his command. (Cic. *ad Fam.* xi. 10, 13.) D. Brutus, in his letter to Cicero, speaks of it as "inter Apenninum et Alpes," a phrase which obviously refers to the notion commonly entertained that this was the point of demarcation between the two chains of mountains, a view adopted also by Strabo (iv. p. 202). A pass led into the interior across the Apennines from Vada to Aquae Statiellae which was probably that followed by Antony. Brutus speaks in strong terms of the rugged and difficult nature of the roads in all directions from this point, (*Ib.*): but at a later period a regular road was constructed across the mountains from Vada to Aquae Statiellae, as well as in both directions along the coast. (*Itin. Ant.* p. 295; *Tab. Peut.*) Under the Roman Empire we learn that Vada continued to be a place of considerable trade (Jul. Capit. *Pert.* 9, 13); and it is still mentioned as a port in the Maritime Itinerary (p. 502). Some doubt has arisen with regard to its precise position, though the name of *Vado* would seem to be obviously derived from it; but that of Sabbata or Sabatia, on the other hand, is apparently connected with that of *Savona,* a town with a small but secure port about 4 miles N. of *Vado*. Livy indeed mentions Savo (undoubtedly the same with *Savona*) as a sea-port town of the Ligurians, where Mago established himself during the Second Punic War (Liv. xxviii. 46); but the name does not occur again in any writer, and hence Cluverius supposed that this was the place afterwards called Sabbata. There seems, however, no doubt that Sabbata or Sabatia, Vada Sabbata, or Vada Sabatia, and Vada simply (as the name is written by Cicero), are all only different forms of the same name, and that the Roman town of Vada was situated on, or very near, the same site as the present *Vado*, a long straggling fishing village, the bay of which still affords an excellent roadstead. The distinctive epithet of Sabbata or Sabatia was evidently derived from its proximity to the original Ligurian town of Savo. [E. H. B.]

VADA'VERO, a mountain near Bilbilis in the territory of the Celtiberi, in Hispania Tarraconensis. It appears to be mentioned only by Martial (i. 50. 6), who characterises it by the epithet of "sacred," and adverts to its rugged character. [T. H. D.]

VADA VOLATERRANA. [Volaterrae].

VADICASSII (Οὐαδικάσσιοι), a people of Gallia Lugdunensis, whom Ptolemy (ii. 8. § 16) places on the borders of Belgica, and next to the Meldae. He assigns to the Vadicassii a city Noeomagus. D'Anville concludes that following Ptolemy's data we may place his Vadicassii in *Valois*, which is between *Meaux* and *Soissons*. He remarks that *Valois* is Vadisus in the capitularies of Charles the Bald, and Vadensis in the later acts. Other geographers have different opinions. In many of the editions of Pliny (iv. 18) we find enumerated "Andegavi, Viducasses, Vadiocasses, Unelli;" but only one MS. has "Vadiocasses," and the rest have Bodiocasses or Bodicasses, which we must take to be the true reading, and they seem to be the same as the Baiocasses. (D'Anville, *Notice*, *&c.*; Ukert, *Gallien.*) [G. L.]

VADIMO'NIS LACUS (ἡ Οὐάδμων λίμνη, Polyb.: *Laghetto di Bassano*), a small lake of Etruria, between the Ciminian hills and the Tiber, celebrated in history as the scene of two successive defeats of the combined Etruscan forces by the Romans. In the first of these battles, which was fought in B. C. 309, the Etruscans had raised a chosen army, enrolled with peculiar solemnity (lege sacrata); but though they fought with the utmost valour and obstinacy, they sustained so severe a defeat at the hands of the Roman Consul Q. Fabius Maximus, that, as Livy remarks, this disastrous day first broke the power of Etruria (Liv. ix. 39). The second battle was fought near 30 years later (B. C. 283), in which the allied forces of the Etruscans and Gauls were totally defeated by the consul P. Cornelius Dolabella. (Polyb. ii. 20; Eutrop. ii. 10; Flor. i. 13.) But though thus celebrated in history, the Vadimonian lake is a very trifling sheet of water, in fact, a mere pool or stagnant pond, now almost overgrown with reeds and bulrushes. It was doubtless more extensive in ancient times, though it could never have been of any importance, and scarcely deserves the name of a lake. But it is remarkable that the younger Pliny in one of his epistles describes it as a circular basin abounding in floating islands, which have now all disappeared, and probably have contributed to fill up the ancient basin. Its waters are whitish and highly sulphureous, resembling, in this respect, the Aquae Albulae near Tibur, where the phenomenon of floating islands still occasionally occurs. (Plin. *Ep.* viii. 20.) It enjoyed the reputation, probably on account of this peculiar character, of being a sacred lake. But the apparent singularity of its having been twice the scene of decisive conflicts is sufficiently explained by its situation just in a natural pass between the Tiber and the wooded heights of the Ciminian forest, which (as observed by Mr. Dennis) must always have constituted a natural pass into the plains of Central Etruria. The lake itself, which is now called the *Laghetto di Bassano* from a neighbouring village of that name, is only a very short distance from the Tiber, and about 4 miles above *Orte*, the ancient Horta. (Dennis's *Etruria*, vol. i. pp. 167—170.) [E. H. B.]

VAGA, a town of the Cantii in Britannia Romana (*Not. Imp.*) [T. H. D.]

VAGA. [Vacca.]

VAGEDRUSA, the name of a river in Sicily, mentioned by Silius Italicus (xiv. 229), according to the old editions of that author; but there can be no doubt that the true reading is that restored by Ruperti, "vage Chrysa," and that the river Chrysas is the one meant. (Ruperti, *ad l. c.*) [E. H. B.]

VAGIENNI (Βαγιεννοί), a Ligurian tribe, who inhabited the region N. of the Maritime Alps, and S. of the territory of the Taurini. According to Pliny they extended as far to the W. as the Mons Vesulus or *Monte Viso*, in the main chain of the Alps (Plin. iii. 16. s. 20), while their chief town or capital under the Roman rule, called Augusta Vagiennorum, was situated at *Bene*, between the rivers *Stura* and *Tanaro*, so that they must have occupied an extensive territory. But it seems impossible to receive as correct the statement of Velleius (i. 15) that the Roman colony of Eporedia (*Ivrea*) was included within their limits. [Eporedia.] It is singular that Pliny more than once speaks of them as being descended from the Caturiges, while at the same time he distinctly calls them a Ligurian tribe, and the Caturiges are commonly reckoned a Gaulish one. It seems probable, however, that many of the races which inhabited the mountain valleys of the Alps were of Ligurian origin; and thus the Caturiges and Segusiani may very possibly have been of a Ligurian stock like their neighbours the Taurini, though subsequently confounded with the Gauls. We have no account of the period at which the Vagienni were reduced under the Roman yoke, and their name is not found in history as an independent tribe. But Pliny notices them as one of the Ligurian tribes still existing in his time, and their chief town, Augusta, seems to have been a flourishing place under the Roman Empire. Their name is sometimes written Bagienni (Orell. *Inscr.* 76), and is found in the Tabula under the corrupt form Bagitenni. (*Tab. Peut.*) [E. H. B.]

VAGNIACAE, a town of the Cantii in Britannia Romana, between Noviomagus and Durobrivae. Camden (p. 226) identifies it with *Maidstone*, Horsley (p. 424), with more probability, with *Northfleet*. Others have sought it near *Longfield*, and at *Wrotham*. [T. H. D.]

VAGORITUM (Οὐαγόριτον). [Arvii.]

VAHALIS. [Batavi; Rhenus.]

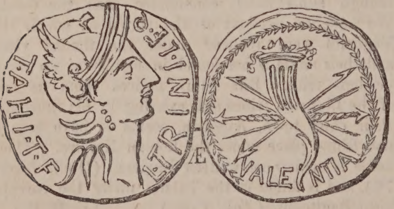
VALCUM, a place near the confines of Upper and Lower Pannonia, not far from Lake Peiso (*Itin. Ant.* p. 233), but its exact site is uncertain. [L. S.]

VALDASUS, a southern tributary of the Savus, flowing from the mountains of Illyricum, and joining the Savus not far from the town of Basante (Plin. iii. 28, where some read Valdanus or Vadasus); its modern name is *Bosna.* [L. S.]

VALE'NTIA (*Eth.* Valentinus: *Nuragus*), a town in the interior of Sardinia, SE. of Usellis. It seems to have been a considerable place, as the Valentini are one of the few names which Pliny thought it worth while to mention among the Sardinian towns. Ptolemy also notices the Valentini among the tribes or "populi" of the island, and there can be little doubt that the Valeria of the same author is only a false reading for Valentia. (Plin. iii. 12. s. 17; Ptol. iii. 3. §§ 6, 7.) Its remains are still visible at a village called *Nuragus*, near the town of *Isili*, about 12 miles from the ruins of Usellis. The adjoining district is still called *Parte Valenza.* (De la Marmora, *Voy. en Sardaigne*, vol. ii. p. 407.) [E.H.B.]

VALE'NTIA, the later name of a Roman province in the S. part of Britannia Barbara, or of the country lying N. of the Picts' wall, as far as *Graham's Dike*, including *Northumberland, Dumfries*, &c. This district was wrested from the Picts and Scots in the time of Valentinian, and formed by Theodosius into a Roman province, but it remained only a short time in the possession of the Romans. (Ammian. Marc. xxviii. 3; *Not. Imp.*) [T. H. D.]

VALE'NTIA (Οὐαλεντία, Ptol. ii. 6. § 62), a considerable town of the Edetani in Hispania Tarraconensis, situated on the river Turium, at a distance of 3 miles from its mouth, and on the road from Carthago Nova to Castulo. (Plin. iii. 3. s. 4; Vib. Seq. p. 18; *Itin. Ant.* p. 400.) Ptolemy (*l. c.*) erroneously attributes it to the Contestani. It became at a later period a Roman colony (Plin. *l. c.*), in which apparently the consul Junius Brutus settled the soldiers of Viriathus. (Liv. *Epit.* lv.) Pompey destroyed it. (*Epist. Pomp. ap. Sallust*, ed. Corte, p. 965; cf. Plut. *Pomp.* 18.) It must, however, have been restored soon afterwards, since Mela mentions it as being still an important place (ii. 6), and coins of it of a late period are preserved. (Cf. Florez, *Med.* ii. p. 610, iii. p. 125; Mionnet, i. p. 55, *Suppl.* i. p. 110; Sestini, p. 209; Eckhel, i. p. 60.) The town still bears the same name, but has few antiquities to show. [T. H. D.]



COIN OF VALENTIA IN SPAIN.

VALE'NTIA (Οὐαλεντία), in Gallia Narbonensis, a colonia in the territory of the Cavari, as Pliny says (iii. 4); but D'Anville proposes to alter the meaning of this passage of Pliny by placing a full stop between "Cavarum" and "Valentia." However, Valentia (*Valence*) was not in the country of the Cavari, but in the territory of the Segallauni, as Ptolemy (ii. 10. § 12) says, who calls it "colonia." *Valence* is a town on the east bank of the Rhone, a few miles below the junction of the *Isère.* In the middle ages it was the capital of the Valentinois, and in the fifteenth century it became the seat of a university. [G. L.]

VALENTIA, in Bruttium. [HIPPONIUM.]

VALEPONGA or VALEBONGA, a town of the Celtiberi in Hispania Tarraconensis, on the road from Laminium to Caesaraugusta. (*Itin. Ant.* p. 477.) Variously identified with *Val de Meca* and *Valsalobre.* [T. H. D.]

VALE'RIA, the name of the NE. part of Lower Pannonia, which was constituted as a separate province by the emperor Galerius, and named Valeria in honour of his wife. (Aurel. Vict. *de Caes.* 40; Amm. xvi. 10, xxviii. 3.) This province was bounded on the E. and N. by the Danubius, on the S. by the Savus, and on the W. by Lake Peiso. (Comp. PANNONIA, p. 531, and Muchar, *Norikum*, vol. i. p. 3.) [L. S.]

VALE'RIA (Οὐαλερία, Ptol. ii. 6. § 58), a town of the Celtiberi in Hispania Tarraconensis, on the Sucro. At a later period it became a Roman colony in the jurisdiction of Carthago Nova. (Plin. iii. 3. s. 4.) Now *Valera la Vieja*, with ruins. (Cf. Florez, *Esp. Sagr.* viii. p. 198, with v. p. 19, and vii. p. 59.) [T. H. D.]

VALERIANA (Βαλεριάνα, Procop. *de Aed.* iv. 6), a place in Moesia Inferior. (*Itin. Ant.* p. 220.) Probably near *Ostova.* [T. H. D.]

VALI (Οὔαλοι, Ptol. v. 9. § 21), a people of Asiatic Sarmatia, between Mount Ceraunus and the river Rha. (Plin. vi. 7. s. 7.) [T. H. D.]

VALINA (Οὐάλεινα or Βαλίνα), a place in Upper Pannonia, commonly identified with the modern *Valbach.* (Ptol. ii. 15. § 6.) [L. S.]

VALLA. [BALLA.]

VALLATA, a town of the Astures in Hispania Tarraconensis, between Asturica and Interamnium. (*Itin. Ant.* pp. 448, 453.) Variously identified with *Bañeza, Puente de Orvijo, S. Martin de Camino*, and *Villar de Majardin.* [T. H. D.]

VALLATUM, a town in Vindelicia, not far from the S. bank of the Danubius, on the road from Reginum to Augusta Vindelicorum; it was the station of the staff of the third legion and the second Valerian squadron of cavalry. (*It. Ant.* p. 250; *Not. Imp.*) It occupied, in all probability, the same site as the modern *Wahl*, on the little river *Ilm.* [L. S.]

VALLIS PENNINA, or POENINA, as the name is written in some inscriptions, is the long valley down which the Rhone flows into the *Lake of Geneva.* In the Notitia of the Gallic Provinces all the inhabitants of this valley are included in the name Vallenses, for we read "Civitas Vallensium, hoc est, Octodurum." [OCTODURUS.] But there were four peoples in the *Vallais*, as it seems, NANTUATES, VERAGRI, SEDUNI, and VIBERI. The name Vallis Pennina went out of use, and it was called Pagus Vallensis. The name Vallis is preserved in that of the canton *Wallis* or *Vallais*, which is the largest valley in Switzerland. [GALLIA TRANSALPINA, Vol. I. p. 950; RHODANUS.] [G. L.]

VALLUM ROMANUM. Under this title we propose to give a short account of the remarkable work constructed by the Romans across our island, from near the mouth of the *Tyne* on the E. to the *Solway Frith* on the W., and of which considerable remains still exist. The history of the formation of this line of fortification is involved in a good deal of obscurity, and very different opinions have been entertained respecting its authors; and neither the Latin writers nor the inscriptions hitherto found among the ruins of the wall and its subsidiary works are sufficient to settle the disputed points, though they suggest conjectures more or less probable.

The origin of the barrier may have been the forts and stationary camps which Agricola (A. D. 79) caused to be erected in Britain (Tac. *Agr.* 20); but the account which Tacitus gives of this measure is so vague that it is quite impossible to found any certain conclusion on his words. In A. D. 120, Hadrian visited Britain, where he determined on fixing the boundary of the Roman Empire considerably to the S. of the most N. conquests of Agricola. He chose this boundary well, as it coincides with a natural one. The *Tyne* flows almost due E., just S., and nearly parallel to the 55° N. lat., for more than two thirds of the breadth of the island. The valley of the *Tyne* is separated from that of the *Irthing*, a branch of the *Eden*, by the N. extremity of the great chain of hills sometimes called the Backbone of England; and the *Irthing*, with the *Eden*, completes the boundary to the *Solway Frith*. In order to strengthen this natural frontier, Hadrian, as we are informed by Spartianus, "drew a wall (*murus*) 80,000 paces in length, to divide the barbarians from the Romans;" which wall followed the same general direction as the line above indicated.

Eutropius (viii. 19) states that the Emperor Septimius Severus, who was in Britain during A. D. 208—211, constructed a rampart (*vallum*) from sea to sea, for the protection of the Roman provinces in the S. of the island.

Now, as will be seen from the following description, the lines of works designated by the general name, Roman Wall, consist of two main parts, a stone wall and an earthen rampart; and most writers on the subject have regarded these as two distinct, though connected, works, and belonging to two different periods; the earthwork has generally been ascribed to Hadrian, the stone wall to Severus. Such is the opinion of Horsley, whose judgment, as Mr. Bruce emphatically admits, is always deserving of the highest consideration. Mr. Bruce himself expresses an opinion, founded on repeated and careful examination of all the remains of the wall, "that the lines of the barrier are the scheme of one great military engineer. . . . . The wall of Hadrian was not a fence such as that by which we prevent the straying of cattle; it was a line of military operation, similar in its nature to the works which Wellington raised at *Torres Vedras*. A broad belt of country was firmly secured. Walls of stone and earth crossed it. Camps to the north and south of them broke the force of an enemy in both directions; or, in the event of their passing the outer line, enabled the Romans to close upon them both in front and rear. Look-out stations revealed to them the movements of their foes; beacons enabled them to communicate with neighbouring garrisons; and the roads, which they always maintained, assisted them in concentrating their forces upon the points where it might be done with the best effect. Such, I am persuaded, was the intention of the Roman wall, though some still maintain that the murus and vallum are independent structures, the productions of different periods" (pp. ix. x. *Pref.* 2nd ed.)

We confess that the reasoning here does not seem to us to be very conclusive. Grant that the system of defence has consistency and unity, yet it by no means follows that the whole was executed at one time. The earliest works were probably detached stationary camps; the next step would naturally be to connect them together by a wall, whether of earth or stone; and if experience should afterwards prove that this barrier was insufficient, it would be an obvious proceeding to strengthen it by a parallel fortification. The common opinion, therefore, that Agricola commenced the defensive line, Hadrian strengthened it, and Severus completed it, appears to be probable in itself, and is supported by the little that we find upon the subject in the classical writers. If we may assume that the words *murus* and *vallum* were used by Spartianus and Eutropius in their strict significations, it would seem that the stone wall was the work of Hadrian, the earthen rampart of Severus. That some portion of the barrier was executed under the direction of the latter, is rendered still more probable by the fact that the Britons called the wall *gual Sever*, *gal Sever*, or *mur Sever*, as Camden states. It has been designated by various names in later times; as the *Picts' Wall*, the *Thirl Wall*, the *Kepe Wall;* but is now generally called the *Roman Wall.*

The following description is taken almost entirely from Mr. Bruce's excellent work, mentioned at the end of this article.

The barrier consists of three parts: (i.) a stone wall or *murus*, strengthened by a ditch on its northern side; (ii.) an earthen wall or *vallum*, south of the stone wall; (iii.) stations, castles, watchtowers, and roads: these lie for the most part between the stone wall and the earthen rampart.

The whole of the works extend from one side of the island to the other, in a nearly straight line, and comparatively close to one another. The wall and rampart are generally within 60 or 70 yards of each other, though the distance of course varies according to the nature of the country. Sometimes they are so close as barely to admit of the passage of the military way between them; while in one or two instances they are upwards of half a mile apart. It is in the high grounds of the central region that they are most widely separated. Here the wall is carried over the highest ridges, while the rampart runs along the adjacent valley. Both works, however, are so arranged as to afford each other the greatest amount of support which the nature of the country allows.

The stone wall extends from *Wallsend* on the *Tyne* to *Bowness* on the *Solway*, a distance which Horsley estimates at 68 miles 3 furlongs, a measurement which almost exactly coincides with that of General Roy, who gives the length of the wall at 68½ miles. The vallum falls short of this length by about 3 miles at each end, terminating at *Newcastle* on the E. side, and at *Drumburgh* on the W.

For 19 miles out of Newcastle, the present high-road to *Carlisle* runs upon the foundations of the wall, which pursues a straight course wherever it is at all possible, and is never curved, but always bends at an angle.

In no part is the wall perfect, so that it is difficult to ascertain what its original height may have been. Bede, whose monastery of Jarrow was near its eastern extremity, and who is the earliest authority respecting its dimensions, states that in his time it was 8 feet thick and 12 high. Sir Christ. Ridley, writing in 1572, describes it as 3 yards broad, and in some places 7 yards high. Samson Erdeswick, a well-known antiquary, visited the wall in 1574, when he ascertained its height at the W. end to be 16 feet. Camden, who saw the wall in 1599, found a part of it on a hill, near *Carvoran*, to be 15 feet high and 9 broad. Allowing for a battlement, which would probably soon be destroyed, we may conclude that the average height was from 18 to 19 feet. The thickness varies from 6 to 9½ feet.

The wall was everywhere accompanied on its northern side by a broad and deep fosse, which may still be traced, with trifling interruptions, from sea to sea, even where the wall has quite disappeared. It traverses indifferently alluvial soil and rocks of sandstone, limestone, and basalt. Thus, on *Tapper Moor*, enormous blocks of whinstone lie just as they were lifted out of the fosse. East of *Heddon on the Wall*, the fosse is 34 feet wide at the top, 14 at the bottom, and about 9 deep. In some places it is 40 feet wide at the top, and in others 20 feet deep.

Hodgson, in his *History of Northumberland* (iii. p. 276), states a fact curious if true: "A little W. of *Portgate*, the earth taken out of the fosse lies spread abroad to the N. in lines, just as the workmen wheeled it out and left it. The tracks of their barrows, with a slight mound on each side, remain unaltered in form." It is scarcely credible, however, that slight elevations of earth, and superficial traces in it, should, for more than a thousand years, have successfully resisted the constant operation of the natural agencies which are sufficient to disintegrate the hardest rocks.

The VALLUM, or earth wall, is uniformly S. of the stone wall. It consists of three ramparts and a fosse. One rampart is close to the S. edge of the ditch. Of the other two, which are considerably larger, one is situated N., the other S. of the ditch, at the distance of about 24 feet from it. These larger ramparts are even now, in some places, 6 or 7 feet high. They are composed of earth, in which masses of stone are often imbedded, for the sake of which they are sometimes quarried. The fosse of the vallum was probably smaller than that of the murus.

No outlets through the S. lines of fortification have been discovered; so that the gateways of the stations appear to have originally been the only means of communication with the country.

At distances averaging nearly 4 miles, stationary camps were erected along the line. Some of these, though connected with the wall, were evidently built before it.

The stations are four-sided and nearly square, but somewhat rounded at the corners, and contain an area averaging from 3 to 6 acres, though some of them are considerably larger. A stone wall, about 5 feet thick, encloses them, and was probably in every instance strengthened by a fosse and one or more earthen ramparts. The stations usually stand upon ground with a southern inclination.

The great wall either falls in with the N. wall of the stations, or else usually comes up to the N. cheek of their E. and W. gateways. The vallum in like manner generally approaches close to the S. wall of the stations, or comes up to the S. side of the E. and W. portals. At least three of the stations, however, are quite detached from both lines of fortification, being to the S. of them. These may have been erected by Agricola.

Narrow streets intersecting one another at right angles traverse the interior of the stations; and abundant ruins outside the walls indicate that extensive suburbs were required for the accommodation of those connected with the soldiers stationed in the camps. The stations were evidently constructed with exclusive reference to defence; and hence no traces of tesselated pavements or other indications of luxury and refinement have been discovered in the mural region.

According to Horsley, there were 18 stations on the line of the wall, besides some in its immediate vicinity; but Hodgson reduces the number to 17, believing that in one instance Horsley mistook a mere temporary encampment for a station.

In ascertaining the number and names of the stations, our principal literary authority is the *Notitia Imperii*, supposed to have been compiled about the end of the reign of the emperor Theodosius the younger. The 69th section of this document contains a list of the prefects and tribunes under the Duke of Britain: the portion relating to our subject is headed, "*Item per lineam Valli*," and contains the names of 23 stations, evidently arranged in their order from E. to W. The heading, however, manifestly implies, not, as it seems sometimes to have been interpreted, that all the stations were actually *on* the line of the wall, but that they were *along* it, that is, parallel to, or at no great distance from it. It is clear, therefore, that as remains of stations exist both to the N. and to the S. of the wall, as well as actually on its line, nothing but the remains themselves can enable us to name the stations with certainty.

Now the first 12 stations mentioned in the Notitia have been accurately identified by means of inscriptions found in the ruins of the stations. Of these we subjoin a list, with the ancient and modern names, taken chiefly from the plan prefixed to Mr. Bruce's work:—

Segedunum - -	*Wallsend.*
Pons Aelii - -	*Newcastle.*
Condercum - -	*Benwell.*
Vindobala - -	*Rutchester.*
Hunnum - - -	*Halton Chesters.*
Cilurnum - - -	*Walwick Chesters.*
Procolitia - - -	*Carrawburgh.*
Borcovicus - -	*Housesteads.*
Vindolana - -	*Little Chesters*, or *Chesterholm.*
Aesica - - -	*Great Chesters.*
Magna (Magnae) -	*Carvoran.*
Amboglanna - -	*Birdoswald.*

All these are on the actual line of the wall, except Vindolana and Magna, which are a little to the S. of it.

West of Amboglanna no evidence has yet been discovered to identify any of the stations; and it is to be feared that many antiquities which might have enabled us to do so have been destroyed; for it appears that the country people, even quite recently, regarded stones bearing inscriptions as "unlucky," calling them "witch-stones," the evil influence of which was to be extirpated by pounding them to powder. Besides this, stone is scarce in that part of the country; and hence the materials of the wall and stations have been extensively employed in the construction of dikes and other erections in the neighbourhood.

It appears from the plan already referred to that there were stations at the places now called *Cambeck Fort*, *Stanwix*, *Burgh*, *Drumburgh*, and *Bowness;* the first a little to the S., all the rest on the line of the wall.

Of the remaining eleven stations mentioned in the Notitia, the plan identifies Alionis with *Whitley Castle*, some miles S. of the wall. Mr. Bruce places Bremetenracum a little W. of the village of *Brampton;* Petriana, he thinks, is probably the same as *Cambeck Fort.*

It is possible that something may yet be done to elucidate what is still obscure in connection with these most interesting monuments of Roman Britain; and the Duke of Northumberland had, in 1853, given directions to competent persons to make an accurate and complete survey of the whole line of the barrier, from sea to sea. Whether any results of this investigation have yet been published, we are not aware.

Of the identified stations the most extensive and important are Vindobala, Cilurnum, Procolitia, and Borcovicus. At the first, great numbers of coins and other antiquities have been found. The second has an area of 8 acres, and is crowded with ruins of stone buildings. A great part of the rampart of Procolitia is entire, and its northern face, which is formed of the main line of wall, is in excellent preservation. Borcovicus, however, surpasses all the other stations in magnitude and in the interest which attaches to its remains. It is 15 acres in extent, besides a large suburb on the S. Within it no less than 20 streets may be traced; and it seems to have contained a Doric temple, part of a Doric capital and fragments of the shafts of columns having been discovered in it, besides a great number of altars, inscriptions, and other antiquities.

The remaining portions of this great fortification may be briefly described.

The CASTELLA, or mile-castles as they are called, on account of being usually a Roman mile from one another, are buildings about 60 or 70 feet square. With two exceptions, they are placed against the S. face of the wall; the exceptions, at *Portgate* and near Aesica, seem to have projected equally N. and S. of the wall. The castella have usually only one entrance, of very substantial masonry, in the centre of the S. wall; but the most perfect specimen of them now existing has a N. as well as a S. gate.

Between each two castella there were four smaller buildings, called turrets or watch-towers, which were little more than stone sentry-boxes, about 3 feet thick, and from 8 to 10 feet square in the inside.

The line of the wall was completed by military roads, keeping up the communications with all its parts and with the southern districts of the island. As these were similar in their construction to other Roman roads, it is not necessary to say more respecting them in this place.

The following works contain detailed information of every kind connected with the Roman Wall:— Horsley's *Britannia Romana;* Warburton's *Vallum Romanum*, 4to. Lond. 1753; W. Hutton's *History of the Roman Wall*, 1801; Roy's *Military Antiquities of the Romans in Britain;* the 3rd vol. of Hodgson's *History of Northumberland;* and lastly, *The Roman Wall; an Historical and Topographical Description of the Barrier of the lower Isthmus, &c. Deduced from numerous personal Surveys.* By the Rev. J. C. Bruce, M. A., 2nd edit. Lond. 1853, 4to. This work contains full descriptions of all the antiquities hitherto discovered along the line of the wall, and great numbers of well executed engravings of the most interesting objects, besides maps and plans of the works. [J. R.]

VALVA (*Οὐάλουα*, Ptol. iv. 2. § 16), a mountain in Mauretania Caesariensis. [T. H. D.]

VAMA (*Οὔαμα*, Ptol. ii. 4. § 15), a town of the Celtici in Hispania Baetica. [T. H. D.]

VANCIANIS. [BATIANA.]

VANDABANDA (*Οὐανδαϐάνδα*, Ptol. vi. 12. § 4), a district of Sogdiana, between the Mons Caucasus (*Hindú-Kúsh*) and the Imaus (*Himáleh*). It is probably nearly the same as the present *Badakhshán* (Wilson, *Ariana*, p. 164). [V.]

VANDALI, VANDALII, VINDILI, or VANDULI (Οὐανδαλοί, Βανδῆλοι, Βανδίλοι), a powerful branch of the German nation, which, according to Procopius (*Bell. Goth.* i. 3), originally occupied the country about the Palus Maeotis, but afterwards inhabited an extensive tract of country on the south coast of the Baltic, between the rivers Vistula and Viadrus, where Pliny (iv. 28) mentions the Burgundiones as a tribe of the Vindili. At a somewhat later period we find them in the country north of Bohemia, about the *Riesengebirge*, which derived from them the name of Vandalici Montes (*Οὐανδαλικὰ ὄρη*; Dion Cass. lv. 1.) In the great Marcomannian war, they were allied with the Marcomanni, their southern neighbours, and in conjunction with them and the Quadi attacked Pannonia. (Jul. Capitol. *M. Aurel.* 17; Eutrop. viii. 13; Vopisc. *Prob.* 18; Dexippus, *Exc. de Leg.* p. 12.) In the reign of Constantine they again appear in a different country, having established themselves in Moravia, whence the emperor transplanted them into Pannonia (Jornand. *Get.* 22), and in the reign of Probus they also appear in Dacia. (Vopisc. *Prob.* 38.) In A. D. 406, when most of the Roman troops had been withdrawn from Gaul, the Vandals, in conjunction with other German tribes, crossed the Rhine and ravaged Gaul in all directions; and their devastations in that country and afterwards in Spain have made their name synonymous with that of savage destroyers of what is beautiful and venerable. Three years later they established themselves in Spain under their chief Godigisclus. Here again they plundered and ravaged, among many other places, Nova Carthago and Hispalis, together with the Balearian islands. At last, in A. D. 429, the whole nation, under king Genseric, crossed over into Africa, whither they had been invited by Bonifacius, who hoped to avail himself of their assistance against his calumniators. But when they were once in Africa, they refused to quit it. They not only defeated Bonifacius, but made themselves masters of the whole province of Africa. This involved them in war with the Empire, during which Sicily and the coasts of Italy were at times fearfully ravaged. On one occasion, A. D. 455, Genseric and his hordes took possession of Rome, which they plundered and sacked for fourteen days. And not only Rome, but other cities also, such as Capua and Nola, were visited in a similar way by these barbarians. Afterwards various attempts were made to subdue or expel them, but without success, and the kingdom of the Vandals maintained itself in Africa for a period of 105 years, that is, down to A. D. 534, when Belisarius, the general of the Eastern Empire, succeeded in destroying their power, and recovered Africa for the Empire. As to the nationality of the Vandals, most German writers claim them for their nation (Zeuss, *Die Deutschen*, p. 57; Wilhelm, *Germanien*, p. 87); but Dr. Latham (on *Tac. Epileg.* p. lxxxviii. foll.) and others prefer regarding them as a Slavonic people, though their arguments are chiefly of an etymological nature, which is not always a safe guide in historical inquiries. (Papencordt, *Gesch. der Vandal. Herrschaft in Africa*, Berlin, 1837; Hansen, *Wer veranlasste die Berufung der Vandalen nach Africa?* Dorpat, 1843; Friedländer, *Die Münzen der Vandalen*, Leipzig, 1849.) [L. S.]

VANDALICI MONTES. [VANDALI.]

VANDUARA, or VANDOGARA (*Οὐανδούαρα*, Ptol. ii. 3. § 9), a town of the Damnonii in Britannia Barbara. Now *Paisley*. (Cf. Camden, p. 1214.) [T. H. D.]

VANESIA, a place in Gallia Aquitanica, fixed by the Jerusalem Itin. between Elusa (*Eause*) and Auscius, the capital of the Ausci, xii. from Elusa and viii. from Auscius. The place is supposed by D'Anville to be the passage of the *Baise*, a branch of the *Garonne* which comes from the Pyrenees. [G. L.]

VANGIONES (Οὐαγγίονες). There were Vangiones in the army of Ariovistus when Caesar defeated him. (*B. G.* i. 51.) Caesar means to say that they were Germans, but he does not say whether they were settled in Gallia. Pliny and Tacitus (*Ann.* xii. 27, *Germ.* c. 28) also describe the Vangiones as Germans and settled on the left bank of the Rhine, where they are placed by Ptolemy (ii. 9. § 17); but Ptolemy makes a mistake in placing the Nemetes north of the Vangiones, and making the Vangiones the neighbours of the Tribocci, from whom in fact the Vangiones were separated by the Nemetes. In the war of Civilis (Tacit. *Hist.* iv. 70), Tutor strengthened the force of the Treviri by levies raised among the Vangiones, Caracates [Caracates], and Tribocci. The territory of the Vangiones seems to have been taken from that of the Mediomatrici. Their chief town was Borbetomagus (*Worms*). [Borbetomagus.] [G. L.]

VA'NNIA (Οὐαννία, Ptol. iii. 1. § 32), according to Ptolemy a town of the Bechuni in Carnia or *Carniola* (cf. Plin. iii. 19. s. 23). Variously identified with *Venzone* and *Cividato.* [T. H. D.]

VAPINCUM, in Gallia Narbonensis, is not mentioned by any authority earlier than the Antonine and Jerusalem Itins. In the Notitia of the Gallic Provinces it is styled "Civitas Vapincensium." The initial letter of the name has been changed to G, as in many other instances in the French language, and the modern name is *Gap*, which is the capital of the department of *Hautes-Alpes*, and on a small stream which flows into the *Durance.* [G. L.]

VARA, or VARAE, a town in Britannia Romana, between Conovium and Deva. (*Itin. Ant.* p. 482.) Variously identified with *St. Asaph*, *Rudland*, and *Bodvary.* [T. H. D.]

VARADA (Οὐάραδα, Ptol. ii. 6. § 57), a town of the Carpetani in Hispania Tarraconensis. [T. H. D.]

VARADETUM, in Gallia, is placed by the Table on a road from Divona (*Cahors*) to Segodunum (*Rodez*); and the distance from Divona is xv. D'Anville places Varadetum at *Varaie*, which is on the road between *Cahors* and *Rodez*; but the distances do not agree. Others fix the site at *Puijourdes.* [G. L.]

VARAE. [Vara.]

VARAGRI. [Veragri.]

VARAR (Οὐάραρ, Ptol. ii. 6. § 5), an estuary on the E. coast of Britannia Barbara, very probably the present *Frith of Cromarty.* [T. H. D.]

VARCIANI (Οὐαρκιανοί), a tribe in Upper Pannonia, which is mentioned by both Pliny (iii. 28) and Ptolemy (ii. 15. § 2), but of which nothing is known, except that it probably occupied the western portion of Slavonia. [L. S.]

VARCILENSES, the inhabitants of a town of the Carpetani in Hispania Tarraconensis. (*Inscr.* in Morales, *Ant.* pp. 17, 26, 28.) The modern *Varciles* still contains some ruins of the old town. [T. H. D.]

VARDAEI (Οὐαρδαῖοι, Ptol. ii. 17. § 8), an Illyrian tribe dwelling opposite to the island of Pharos (cf. Plin. iii. 23. s. 26). By Strabo they are called Ardiaei (Ἀρδιαῖοι, vii. p. 315). In the Epitome of Livy (lvi.) they are said to have been subdued by the consul Fulvius Flaccus. [T. H. D.]

VARDANES (Οὐαρδάνης, Ptol. v. 9 §§ 5 and 28), a river of Asiatic Sarmatia, represented as falling into the Euxine to the SW. of the Atticitus. Probably, however, it was only the southern arm of the latter, the present *Kuban.* (Cf. Ukert, iii. pt. ii. p. 202.) [Atticitus.] [T. H. D.]

VARDO, a tributary of the Rhone, which rises in the *Cévennes*, and is formed by two branches named respectively *Gardon d'Alais* and *Gardon d'Anduze*, from the names of these two towns. The Vardo flows in a deep valley, and passes under the great Roman aqueduct now named *Pont du Gard*, below which it enters the *Rhône* on the west bank, near a place named *Cons.* The name Vardo occurs in Sidonius Apollinaris; and in a Latin poem of three or four centuries' later date the name is Wardo, from which the modern name *Gardon* is formed, according to a common change of V into G. [Vapincum.] [G. L.]

VARDULI (Οὐαρδουλοί, Ptol. ii. 6. §§ 9, 66; Βάρδουλοι, Strab. iii. p. 162; where we also learn that at an earlier period they were called Βαρδυῆται), a people in Hispania Tarraconensis, who dwelt westward of the Vascones, as far as the N. coast (in the present *Guipuscoa* and *Alava*). (Mela, iii. 1; Plin. iii. 3. s. 4, iv. 20. s. 34.) [T. H. D.]

VARGIO'NES (Οὐαργίωνες), a German tribe, between the eastern bank of the Rhenus and Mons Abnoba, that is, perhaps between the *Ruhr* and the *Rauhe Alp.* (Ptol. ii. 11. § 9.) [L. S.]

VARIA. 1. (Οὐαρία: *Vicovaro*), a town of the Sabines, situated in the valley of the Anio, on the right bank of the river, about 8 miles above Tibur. The name is corruptly written in most editions of Strabo Valeria (Οὐαλερία), for which there is no doubt that we should read Varia (Οὐαρία, Strab. v. p. 237; Kramer, *ad loc.*). Strabo there calls it a Latin city, as well as Carseoli and Alba, both of which were certainly Aequian towns, and subsequently included in Latium. But Horace speaks of it as the town to which the peasantry from his Sabine farm and the neighbouring villages used to resort (Hor. *Ep.* i. 14. 3), in a manner that certainly seems to imply that it was the municipal centre of that district, and if so, it must have then been reckoned a Sabine town. It is not mentioned by Pliny, but according to his limitation was certainly included among the Sabines, and not in Latium. It was probably never a large place, though the remains of the ancient walls still extant prove that it must at one time have been a fortified town. But it early sank into a mere village; the old commentator on Horace calls it "Oppidum in Sabinis olim, nunc vicus" (Schol. Cruq. *ad l. c.*): and hence in the middle ages it came to be called Vicus Varia, whence its modern appellation of *Vicovaro.* It is still a considerable village of above 1000 inhabitants, standing on a hill to the left of the Via Valeria, and a short distance above the Anio, which flows in a deep valley beneath. The Tabula and the old commentary on Horace both place it 8 miles above Tibur, which is very nearly exact. (*Tab. Peut.* Comm. Cruq. *l. c.*)

2. Pliny mentions among the cities of Calabria a place called Varia, "cui cognomen Apulae" (iii. 11. s. 16); but the name is otherwise unknown, and it is probable that we should read "Uria;" the place meant being apparently the same that is called by other writers Hyria or Uria [Hyria]. [E. H. B.]

VA'RIA (Οὐαρία, Strab. iii. p. 162; Οὐάρεια, Ptol. ii. 6. § 55), a town of the Berones in Hispania Tarraconensis, situated on the Iberus, which here began to be navigable (Plin. ii. 3. s. 4), and where also the main road through Spain crossed the river, between Calagurra and Tritium. (*Itin. Ant.* p. 393, where, under the name of Verela, the same town is undoubtedly meant.) Usually identified with *Varea* (cf. Florez, *Cantabr.* p. 198), though some have sought it at *Logroño*, and others at *Murillo de Rio Leza.* [T. H. D.]

VARIA'NA (Βαριάνα), a town in Lower Moesia on the Danube, was the garrison of a portion of the fifth legion and of a squadron of horse. (*It. Ant.* p. 220; Procop. *de Aed.* iv. 6; *Notit. Imp.*, where it is called Variniana and Varina.) Its site is marked by the town of *Orcaja* or *Orcava.* [L. S.]

VARIANAE, a place in Pannonia, on the road running along the left bank of the Savus from Siscia to Sirmium. (*It. Ant.* pp. 260, 265.) Its exact site is only matter of conjecture. [L. S.]

VARI'NI, a German tribe mentioned by Pliny (iv. 28) as a branch of the Vindili or Vandali, while Tacitus (*Germ.* 40) speaks of them as belonging to the Suevi. But they must have occupied a district in the north of Germany, not far from the coast of the Baltic, and are probably the same as the Pharodini (Φαροδεινοί) of Ptolemy (ii. 11. § 13), in the country between the Chalusus and Suebus; it is highly probable, also, that the Varni (Οὐάρνοι) of Procopius (*B. Goth.* ii. 15, iii. 35, iv. 20, &c.) are the same people as the Varini. The Viruni (Οὐίρουνοι) of Ptolemy (ii. 11. § 17), who dwelt north of the Albis, seem to have been a branch of the Varini. (Comp. Cassiod. *Var.* iii. 3, where they are called Guarni; Wersebe, *Beschreib. der Gau zwischen Elbe, Saale, &c.* p. 70.) [L. S.]

VARISTI. [NARISCI.]

VARUS (Οὔαρος), a river which the ancient geographers make the boundary of Gallia and Italia, as it is now the boundary of France and Italy. (Mela, ii. 4; Ptol. ii. 10. § 1.) It is only the lower part of the *Var* which forms the boundary between Italy and France. The river gives its name to the French department of *Var*, the eastern limit of which is the lower course of the river *Var.* The larger part of the *Var* is in the Sardinian territory. It is only the mouth of the *Var* which Ptolemy names when he fixes the limit between Italy and Gallia Narbonensis. D'Anville remarks on the line of Lucan (i. 404) —

> "Finis et Hesperiae promoto limite Varus"—

that he alludes to the extension of the boundary of Italy westward from the summit of the Alpis Maritima, which is Italy's natural boundary. He adds that the dependencies of the province of the Alpes Maritimae comprehended Cemenelium (*Cimiez*) and its district, which are on the Italian side of the *Var* and east of Nicaea (*Nizza*). [CEMENELIUM]. But D'Anville may have mistaken Lucan's meaning, who seems to allude to the extension of the boundary of Italy from the Rubicon to the Varus, as Vibius Sequester says: "Varus nunc Galliam dividit, ante Rubicon" (ed. Oberl.). However, the critics are not agreed about this passage. (D'Anville, *Notice, &c.*; Ukert, *Gallien*, p. 81.) [G. L.]

VASADA (Οὐάσαδα), a town of Lycaonia, a little to the south-west of Laodiceia (Ptol. v. 4. § 10; Hierocl. p. 675; *Conc. Chalced.* p. 674, where it is miswritten Οὔασαδα; *Conc. Const.* iii. p. 675, where it bears the name of Ἀάσαδα). Its site is probably marked by the ruins near *Channur Chanah*, between *Ilgun* and *Ladik.* (Hamilton, *Researches*, ii. p. 190, in the *Journ. of the Roy. Geogr. Soc.* viii. p. 144; Kiepert, in Franz, *Fünf Inschriften*, p. 36.) [L. S.]

VASALAETUS (Οὐασάλαιτον or Οὐασάλετον ὄρος, Ptol. iv. 3. §§ 18, 26), a mountain at the S. boundary of the Regio Syrtica. [T. H. D.]

VASATAE. [COSSIO or COSSIUM.]

VASATES. It is probable that the name Vasarii in Ptolemy (ii. 7. § 15) should be Vasatii, as D'Anville says, and so it is printed in some Greek texts. But Ptolemy makes them border on the Gabali and places them farther north than *Bordeaux*, though he names their chief town Cossium. The Vocates are enumerated by Caesar (*B. G.* iii. 23, 27) among the Aquitanian peoples who submitted to P. Crassus in B. C. 56. [COSSIO or COSSIUM.] [G.L.]

VA'SCONES (Οὐάσκωνες, Strab. iii. pp. 155, 116; Οὐάσκονες, Ptol. ii. 8. §§ 10, 67), a people in the NE. part of Hispania Tarraconensis, between the Iberus and the Pyrenees, and stretching as far as the N. coast, in the present *Navarre* and *Guipuscoa.* Their name is preserved in the modern one of the *Basques;* although that people do not call themselves by that appellation, but *Euscaldunac*, their country *Euscaleria*, and their language *Euscara.* (Ford's *Handbook of Spain*, p. 557; cf. W. v. Humboldt, *Untersuch.* &c. p. 54.) They went into battle bareheaded. (Sil. Ital. iii. 358.) They passed among the Romans for skilful soothsayers. (Lamp. *Alex. Sev.* 27.) Their principal town was Pompelo (*Pamplona*). (Cf. Malte-brun, *Moeurs et Usages des anciens Habitans d'Espagne*, p. 309.) [T. H. D.]

VA'SCONUM SALTUS, the W. offshoot of the Pyrenees, running along the Mare Cantabricum, and named after the Vascones, in whose territory it was. (Plin. iv. 20. s. 34; Auson. *Ep.* 15.) It may be more precisely defined as that portion of the chain now called *Sierra de Orcamo*, *S. de Augana*, and *S. Sejos*, forming the E. part of the Cantabrian chain. [T. H. D.]

VASIO (Οὐασιών: *Eth.* Vasiensis), a town of the Vocontii in Gallia Narbonensis, and the only town which Ptolemy (ii. 10. § 17) assigns to them. Vasio is mentioned by Mela (ii. 5) as one of the richest towns of the Narbonensis; and Pliny (iii. 4) names Vasio and Lucus Augusti as the two chief towns of the Vocontii. The ethnic name Vasiensis appears in the Notitia of the Gallic Provinces (Civitas Vasiensium), and in inscriptions. The place is *Vaison* in the department of *Vaucluse*, on the *Ouvèze*, a branch of the Rhone. It is now a small, decayed place; but there are remains which show that it may have been what Mela describes it to have been. The ancient remains are spread over a considerable surface. There is a Roman bridge of a single arch over the *Ouvèze*, which still forms the only communication between the town and the faubourg. The bridge is built on two rocks at that part of the river where the mountains which shut in the bed of the river approach nearest. There are also the remains of a theatre; the semicircle of the cavea is clearly traced, and the line of the proscenium is indicated by some stones which rise above the earth. There are also the remains of a quay on the banks of the river which was destroyed by an inundation in 1616. The quay was pierced at considerable intervals by sewers which carried to the river the water and filth of the town: these sewers are large enough for a man to stand in upright. There are also traces of the aqueducts which brought to the town the waters of the great spring of *Groseau.*

(Breton, *Mém. de la Société Royale des Antiquaires de France*, tom. xvi., quoted by Richard et Hocquart, *Guide du Voyageur.*) [G. L.]

VATEDO, in Gallia, mentioned in the Table, is a place east of *Bordeaux*, supposed to be *Vaires* on the left bank of the *Dordogne*, a branch of the *Garonne.* [G. L.]

VATRENUS (*Santerno*), a river of Gallia Cispadana, one of the southern tributaries of the Padus. It had its sources in the Apennines, flowed under the walls of Forum Cornelii (*Imola*), and joined the southern branch of the Padus (the Spineticum Ostium) not far from its mouth, for which reason the port at the entrance of that arm of the river was called the Portus Vatreni. (Plin. iii. 16. s. 20.) The *Santerno* now flows into the *Po di Primaro* (the modern representative of the Spinetic branch), above 16 miles from its mouth: but the channels of both are in this part artificial. In this lower part of its course it must always have been more of a canal than a river, whence Martial uses its name as typical of a sluggish stream. (Martial, iii. 67. 2.) [E. H. B.]

UBERAE, a nation in India extra Gangem, mentioned by Pliny (vi. 19. s. 22). It possessed a large town of the same name. It is not possible to determine its exact position; but, from the names of other nations mentioned by Pliny in connection with the Uberae, it is probable that this people lived near the mouths of the *Brahmapútra.* [V.]

U'BII (Οὔβιοι), a German people who in Caesar's time lived on the east bank of the Rhine and opposite to the Treviri, for Caesar having made his bridge in the country of the Treviri passed over into the country of the Ubii. Owing to their proximity to the Rhine they were somewhat more civilised than the other Germans, being much visited by merchants and accustomed to Gallic manners (*B. G.* iv. 3, 18, vi. 29, 35). The Sigambri were the neighbours of the Ubii on the north. The Suevi were pressing the Ubii hard, when the Ubii applied to Caesar for help: they gave him hostages, and offered to supply him with a large number of boats to cross the river, from which we may infer that they were accustomed to navigate the Rhine. (*B. G.* iv. 16.) In the time of Augustus (Strab. iv. p. 194), the nation crossed the Rhine, and Agrippa assigned them lands on the west bank of the river, the policy of the Romans being to strengthen the Rhenish frontier against the rest of the Germans. (Tacit. *Germ.* c. 28, *Annal.* xii. 27; Sueton. *Aug.* c. 21.) In the new territory of the Ubii was Colonia Agrippina (*Cöln*), and hence the people had the name of Agrippinenses, which was one of the causes why the Germans east of the Rhine hated them. They were considered as traitors to their country, who had assumed a new name. (Tacit. *Hist.* iv. 28.) North of the Ubii on the west side of the Rhine were the Gugerni [Gugerni]; and south of them were the Treviri. [Colonia Agrippina; Ara Ubiorum.] [G. L.]

UBIO'RUM ARA. [Ara Ubiorum.]

UBISCI. [Bituriges Vivisci.]

U'CENA (Οὔκενα), a town of the tribe of the Trocmi in Galatia. (Ptol. v. 4. § 9.) [L. S.]

UCENI, a people of Gallia Narbonensis, who are mentioned in the trophy of the Alps quoted by Pliny (iii. 20), and placed between the Meduli and Caturiges. The site of these people is uncertain. D'Anville supposes that they were in that part of the mountain region of the Alps which contains the bourg *d'Oisans.* But other geographers place them in the district of *Oze*, or near *Huez*, both of which places are on the right bank of the river *Romanche*, which flows into the *Drac*, a branch of the *Isère.* (Ukert, *Gallien*, p. 317.) [G. L.]

UCETIA, in Gallia Narbonensis, north of *Nîmes.* This place is known only from the Roman remains which have been discovered there, and from the inscription VCETIAE on a stone found at *Nîmes.* The place is *Uzes*, north of the river *Gardon*, from which place the water was brought to *Nîmes* by the aqueduct over the *Gardon.* [Nemausus.] Ucetia appears in the Notitia of the Provinces of Gallia under the name of Castrum Uceciense. Ucetia was a bishopric as early as the middle of the fifth century. [G. L.]

UCHALICCENSES (Οὐχαλικκεῖς, Ptol. iv. 6. § 20), an Aethiopian tribe in the interior of Libya. [T. H. D.]

UCHEIMERIUM (Οὐχειμέριον, Procop. *B. Goth.* iv. 14), a mountain fortress in the Regio Lazica, in Colchis. [T. H. D.]

UCIA (Οὔκια, Ptol. ii. 4. § 13), a town of the Turdetani in Lusitania. [T. H. D.]

UCIENSE, a town in Hispania Baetica, on the road from Corduba to Castulo. (*Itin. Ant.* p. 403.) Variously identified with *Marmolejo*, *Andujar*, and *S. Julian.* [T. H. D.]

UCUBIS, a place in Hispania Baetica, in the neighbourhood of Corduba and the Flumen Salsum. (Hirt. *B. H.* 7.) According to Ukert (ii. pt. i. p. 361) between *Osuña* and *Antequera.* [T. H. D.]

UCULTUNIACUM. [Curgia.]

UDAE (Οὖδαι, Ptol. v. 9. § 23), a people of Asiatic Sarmatia on the Caspian sea. They are probably the people mentioned under the name of Udini by Pliny (vi. 12. s. 15). They appear to have derived their name from the river Udon. [T. H. D.]

UDON (Οὔδων, Ptol. v. 9. § 12), a river of Asiatic Sarmatia, which rises in the Caucasus and falls into the Caspian sea between the Rha and the Alonta. Most probably the modern *Kuma.* [J. R.]

UDUBA. [Turulis.]

UDURA (Οὔδουρα, Ptol. ii 6. § 72), a town of the Jaccetani in Hispania Tarraconensis, probably the modern *Cardona.* [T. H. D.]

VECTA or VECTIS (Οὐηκτίς, Ptol. ii. 3. § 33), an island on the S. coast of Britannia Romana, lying opposite to the Portus Magnus (*Portsmouth*). It was known to the Romans before their conquest of Britain, through the Massiliots, who had here a station for their tin trade. (Diod. v. 22, 38.) At that time the channel between the island and the mainland become almost dry at ebb tide, so that the Britons carried their tin in carts to the island. It was first conquered by Vespasian, in the reign of Claudius. (Suet. *Vesp.* 4.) Now the *Isle of Wight.* (Cf. *Itin. Ant.* p. 509; Eum. *Pan. Const.* 15; Mela, iii. 6; Plin. iv. 16. s. 30.) [T. H. D.]

VECTURIONES, a subdivision of the Picts in Britannia Barbara, according to Ammianus (xxvii. 8). [T. H. D.]

VEDIANTII (Οὐεδιάντιοι, Ptol. iii. 1. § 41), a Ligurian tribe, who inhabited the foot of the Maritime Alps near the mouth of the *Var.* Both Pliny (iii. 5. s. 7) and Ptolemy assign to them the town of Cemenelium or *Cimiez* near *Nice*: the latter also includes in their territory Sanitium; but this must certainly be a mistake, that town, which answers to the modern *Senez*, being far off to the NW. (D'Anville, *Géogr. des Gaules*, p. 682.) [E. H. B.]

VEDINUM (*Udine*), a city of Venetia, mentioned only by Pliny (iii. 19. s. 23) among the municipalities of that country. It was situated in the plain of the Carni, 11 miles W. of *Cividale* (Forum Julii), and 22 NNW. of Aquileia. In Pliny's time it was apparently an inconsiderable place, but rose into importance in the middle ages, and is now a flourishing and populous city, and the capital of the whole province of the *Friuli*. Many MSS. of Pliny write the name Nedinates, which has been adopted both by Harduin and Sillig, but it is probable that the old reading Vedinates is correct. [E. H. B.]

VEDRA (Οὐέδρα, Ptol. ii. 3. § 6), a river in the N. part of the E. coast of Britannia. The name would lead us to the conclusion that it is the *Wear* (Camden, p. 944), yet Horsley (p. 103) and others have taken it to be the *Tyne*. [T. H. D.]

VEGIA (Οὐεγία or Οὐετία), or VEGIUM (Plin. iii. 21. s. 25), a town of Liburnia, the present *Vezzo*. [T. H. D.]

VEGISTUM (Οὐέγιστον), or, as some read, Vetestum (Οὐέτεστον), a town of Galatia, in the territory of the Tolistobogi, between Mounts Didymus and Celaenus (Ptol. v. 4. § 7), is perhaps the same place as the Vetissum of the Peutinger Table. [L. S.]

VEII (Οὐήιοι, Strab. v. p. 226; Οὐιοί, Dionys. H. ii. 54: *Eth.* Veientes, Cic. *Div.* i. 44; Liv. i. 15, &c.: *Adj.* Veius (trisyl.), Propert. iv. 10. 31), an ancient and purely Tuscan city of Etruria. According to Festus (*ap. P. Diac. s. v.*) Veia was an Oscan word, and signified a waggon (plaustrum); but there is nothing to show that this was the etymology of the name of the town.

Among the earlier Italian topographers, a great diversity of opinion prevailed respecting the site of Veii. Nardini was the first writer who placed it at the present *Isola Farnese*, the correctness of which view is now universally admitted. The distance of that spot northwards from Rome agrees with the distance assigned by Dionysius of Halicarnassus (*l. c.*) to Veii, namely, "about 100 stadia," which is confirmed by the Tabula Peut., where it is set down at 12 miles. In Livy, indeed (v. 4), it is mentioned as being "within the 20th milestone;" but this is in a speech of App. Claudius, when the orator is using round numbers, and not solicitous about strict accuracy; whilst the two writers before cited are professedly giving the exact distance. Nor can the authority of Eutropius (i. 4), who places Veii at 18 miles from Rome, be admitted to invalidate the testimony of these authors, since Eutropius is notoriously incorrect in particulars of this description. There are other circumstances which tend to show that *Isola Farnese* is the site of ancient Veii. Thus the Tab. Peuting. further indicates that the city lay on the Via Cassia. Now following that road for a distance of about 12 miles from Rome, the locality not only exactly corresponds with the description of Dionysius, but also the remains of city walls and sepulchres, and traces of roads in various directions, have been found there. Moreover at the same spot were discovered, in the year 1810, stones bearing inscriptions which related exclusively to Veii and the Veientines.

We know little of the history of Veii but what concerns the wars it waged with the Romans. It is called by Eutropius (i. 20), "civitas antiquissima Italiae atque ditissima," and there can be no doubt that it was in a flourishing state at the time of the foundation of Rome. At that period the Etruscan, or Veientine, territory was separated from the Latin by the river Albula, afterwards called Tiberis; and consequently neither the Mons Vaticanus nor Janiculensis then belonged to the Romans. (Liv. i. 3.) To the SW. of Rome it extended along the right bank of the Tiber down to the sea, where it contained some Salinae, or salt-works, at the mouth of the river. (Dionys. ii. 55.) The district immediately opposite to Rome seems to have been called Septem Pagi (*Ib.*). On the N. of Rome the territory of Veii must at one time have extended as far as Mount Soracte, since the ager Capenatis belonged to it, Capena being a colony of Veii (Cato, *ap. Serv. Aen.* vii. 697); though in the history of the wars between Rome and Veii, Capena appears as an independent city. [CAPENA, Vol. I. p. 504.] On the NW. it may probably have stretched as far as the Mons Ciminus; but here, as well as more to the S., its limits are uncertain, and all we know is that in the latter direction it must have been bounded by the territory of Caere. (Cf. Müller, *Etrusker*, ii. 2. p. 1, &c.) The ager Veiens is stigmatised by Horace and others as producing an execrable sort of red wine (*Sat.* ii. 3. 143; cf. Pers. v. 147; Mart. i. 103. 9, ii. 53. 4, &c.). We learn from Dionysius (ii. 54) that the city was of about the same size as Athens, and therefore nearly as large as Rome within the walls of Servius. [ROMA, Vol. II. p. 756.]

The political constitution of Veii, like that of the other Etruscan cities, seems originally to have been republican, though probably aristocratically republican, with magistrates annually elected. It was perhaps their vicinity to ambitious and aspiring Rome, and the constant wars which they had to wage with that city, that induced the Veientines to adopt the form of an elective monarchy, in order to avoid the dissensions occasioned by the election of annual magistrates under their original constitution, and thus to be enabled, under a single leader, to act with more vigour abroad; but this step procured them the ill-will of the rest of the Etruscan confederacy (Liv. v. 1, cf. iv. 17). Monarchy, however, does not appear to have been permanent among them; and we only know the names of two or three of their kings, as Tolumnius (*ib.*), Propertius (Serv. *Aen.* vii. 697), and Morrius (*Ib.* viii. 285).

The first time that the Veientes appear in history is in the war which they waged with Romulus in order to avenge the capture of their colony, Fidenae. According to the narrative of Livy, this war was terminated by one decisive battle in which Romulus was victorious (i. 15); but Dionysius (ii. 54, seq.) speaks of two engagements, and represents the Romans as gaining the second by a stratagem. Both these writers, however, agree with regard to the results of the campaign. The loss of the Veientines was so terrible, both in the battle and in the subsequent flight, in which numbers of them were drowned in attempting to swim the Tiber, that they were constrained to sue for peace. The terms imposed upon them by Romulus show the decisive nature of his victory. They were compelled to surrender that part of their territory in the neighbourhood of Rome called Septem Pagi, probably from its containing seven villages; to give up the salt-works which they possessed at the mouth of the Tiber; and to provide 50 hostages as security for the due execution of the treaty. On these conditions they obtained a peace for 100 years, with the restoration of their prisoners; though such of the latter as preferred to remain at Rome were presented with the freedom of the city and lands on the left bank of the Tiber. The district of Septem Pagi thus acquired probably comprehended the Vatican and Janiculan hills, and became the seat of the 5th Roman tribe, the Romilia or Romulia. (Varr. *L. L.* v. 9. § 65, Müll.; Paul. *ap. Fest. s: v. Romulia Trib.*)

This peace seems to have lasted about 60 or 70 years, when war again broke out between the Veientines and Romans in the reign of Tullus Hostilius, and this time also on account of Fidenae, which appears to have become a Roman colony after its capture by Romulus. The cause of the war was the treacherous conduct of the Fidenates during the Roman struggle with Alba. When called to account, they refused to give any explanation of their conduct, and procured the assistance of the Veientines. Tullus crossed the Anio (*Teverone*) with a large army, and the battle which took place at a spot between that river and the town of Fidenae was the most obstinate and bloody which had yet been recorded in the Roman annals. Tullus, however, gained a signal victory over the Fidenates and their allies the Veientines. The battle is remarkable for the vows made by Tullus, of twelve Salian priests, and of temples to Pavor and Pallor. These were the second set of Salians, or those attached to the worship of Quirinus [cf. ROMA, p. 829]; and the appropriateness of the vow will be perceived when we consider that the Fidenates, in their answer to the Romans, had asserted that all their engagements towards Rome had expired on the death of that deified hero. (Liv. i. 27; Dionys. iii. 23, sqq.)

The war was renewed under Ancus Marcius by forays on both sides, which, however, seem to have been begun by the Veientines. Ancus overthrew them in two pitched battles, the last of which was decisive. The Veientines were obliged to surrender all the tract on the right bank of the Tiber called the Silva Maesia. The Roman dominion was now extended as far as the sea; and in order to secure these conquests, Ancus founded the colony of Ostia at the mouth of the Tiber. (Liv. i. 33; Dionys. iii. 41.)

The next time that we find the Veientines in collision with Rome, they had to contend with a leader of their own nation. L. Tarquinius, an emigrant from Tarquinii to Rome, had distinguished himself in the wars of Ancus Marcius against Veii, and was now in possession of the Roman sovereignty. The Veientines, however, on this occasion did not stand alone, but were assisted by the other Etruscan cities, who complained of insults and injuries received from Tarquin. The Veientines, as usual, were discomfited, and so thoroughly, that they did not dare to leave their city, but were the helpless spectators of the devastation committed on their lands by the Romans. The war was terminated by Tarquin's brilliant victory at Eretus, which enabled him to claim the sovereignty of all Etruria, leaving, however, the different cities in the enjoyment of their own rights and privileges. It was on this occasion that Tarquin is said to have introduced at Rome the institution of the twelve lictors and their fasces, emblems of the servitude of the twelve Etruscan cities, as well as the other Etruscan insignia of royalty. (Dionys. iii. 57; Flor. i. 5.) It should be observed that on this subject the accounts are very various; and some have even doubted the whole story of this Etruscan conquest, because Livy does not mention it. That historian, however, when he speaks of the resumption of the war under Servius Tullius, includes the other Etruscans with the Veientines, as parties to the truce which had expired ("bellum cum Veientibus (jam enim indutiae exierant) *aliisque Etruscis* sumptum," i. 42), although the Etruscans had not been concerned in the last Veientine war he had recorded. (Cf. Dionys. iv. 27.) This war under Servius Tullius was the last waged with the Veientines during the regal period of Rome.

When the second Tarquin was expelled from Rome, the Etruscans endeavoured to restore him. Veii and Tarquinii were the two most forward cities in the league formed for this purpose. The first battle, which took place near the Silvia Arsia, was bloody but indecisive, though the Romans claimed a dubious victory. But the Etruscans having obtained the assistance of Porsena, Lars of Clusium, the Romans were completely worsted, and, at the peace which ensued, were compelled to restore to the Veientines all the territory which had been wrested from them by Romulus and Ancus Marcius. This, however, Porsena shortly afterwards restored to the Romans, out of gratitude for the hospitality which they had displayed towards the remnant of the Etruscan army after the defeat of his son Aruns at Aricia. (Liv. ii. 6—15; Dionys. v. 14, sqq.; Plut. *Publ.* 19.)

The Veientines could ill brook being deprived of this territory; but, whilst the influence of Porsena and his family prevailed in the Etruscan League, they remained quiet. After his death the war again broke out, B. C. 483. For a year or two it was a kind of border warfare characterised by mutual depredations. But in B.C. 481, after a general congress of the Etruscans, a great number of volunteers joined the Veientines, and matters began to assume a more serious aspect. In the first encounters the Romans were unsuccessful, chiefly through a mutiny of the soldiers. They seem to have been disheartened by their ill success; their army was inferior in number to that of the Veientines, and they endeavoured to decline an engagement. But the insults of the enemy incensed the Roman soldiery to such a degree that they insisted on being led to battle. The contest was long and bloody. The Etruscans at one time were in possession of the Roman camp; but it was recovered by the valour of Titus Siccius. The Romans lost a vast number of officers, amongst whom were the consul Manlius, Q. Fabius, who had been twice consul, together with many tribunes and centurions. It was a drawn battle; yet the Romans claimed the victory, because during the night the Etruscans abandoned their camp, which was sacked by the Romans on the following day. But the surviving consul, M. Fabius Vibulanus, on his return to Rome, refused a triumph, and abdicated his office, the duties of which he was prevented from discharging by the severity of his wounds. (Dionys. ix. 5, sqq.; Liv. ii. 42—47.)

Shortly after this, the Veientines, finding that they were unable to cope with the Romans in the open field, adopted a most annoying system of warfare. When the Roman army appeared, they shut themselves up within their walls; but no sooner had the legions retired, than they came forth and scoured the country up to the very gates of Rome. The Fabian family, which had given so many consuls to Rome, and which had taken so prominent a part in the late war, now came forward and offered to relieve the commonwealth from this harassing annoyance. The whole family appeared before the senate, and by the mouth of their chief, Caeso Fabius, then consul for the third time, declared, that, as a continual rather than a large guard was required for the Veientine war, they were willing to undertake the duty and to maintain the majesty of the Roman name, without calling upon the state for either soldiers or money. The senate thankfully accepted the offer. On the following morning 306 Fabii met in the vestibule of the consul's house. As they passed through the city to the place of their destination, they stopped at the capitol and offered up vows to the gods for the success of their enterprise. Then they passed out of Rome by the right arch of the Porta Carmentalis, and proceeded straight to the river Cremera, where there was a spot that seemed adapted by nature as a fortress for their little garrison. It appears, however, that the Fabii were accompanied by their clients and adherents, and the whole band probably amounted to 3000 or 4000. (Dionys. ix. 15; P. Diac. *s. v. Scelerata Porta.*) The place which they chose as the station of their garrison was a precipitous hill which seemed to have been cut and isolated by art; and they further strengthened it with entrenchments and towers. The spot has been identified with great probability by Nardini, and subsequently by other topographers, with a precipitous hill about 6 miles from Rome, on the left of the Via Flaminia, where it is traversed by the Cremera (now the *Valcha*), and on the right bank of that stream. It is the height which commands the present *Osteria della Valchetta.* (Nibby, *Dintorni di Roma*, vol. iii. p. 399; Dennis, *Etruria*, vol. i. p. 43.)

The position here taken up by the Fabii not only enabled them to put a complete stop to the marauding expeditions of the Veientines, but even to commit depredations themselves on the territory of Veii. The Veientines having made many vain attempts to dislodge them, at length implored the succour of the Etruscans; but the Fabii on their side were supported by a consular army under Aemilius, and the Veientines and their allies were defeated. This success rendered the Fabii still more enterprising. After occupying their fortress two years with impunity they began to extend their excursions; and the Veientines on their side sought to draw them onwards, in which they at length succeeded. By a feigned flight, they enticed the Fabii into an ambuscade and slew them, 13th Feb. B. C. 476. (Ov. *Fast.* ii. 195, sqq.; Liv. ii. 48—50; Dionys. ix. 16—19; Florus, i. 12, &c.)

Elated with this success, the Veientines, united with the Etruscans, now marched towards Rome and pitched their camp on the Janiculan hill, at a distance of only 6 stadia from the city. Thence passing the Tiber, they penetrated as far as the ancient temple of Hope, which stood near the modern *Porta Maggiore.* Here an indecisive action took place, which was renewed at the Porta Collina with the same result; but two engagements of a more decisive character on the Janiculan hill obliged the allied army to retreat. In the following year the Veientines allied themselves with the Sabines, but were completely defeated under the walls of their own city by the consul Pub. Valerius. The war was brought to a termination in the following year, in the consulship of C. Manlius, who concluded with them a truce of 40 years, the Veientines engaging to pay a tribute in corn and money. (Liv. ii. 51—54; Dionys. ix. 23, sqq.)

But such terms were merely nominal, and in a few years hostilities were renewed. We hear of some forays made by the Veientines in B. C. 442 (Liv. iv. 1); but there was no regular war till seven years later, when the Veientines, who were at that time governed by Lars, or King, Tolumnius, excited the Roman colony Fidenae to rebel; and in order completely to compromise the Fidenates, Tolumnius ordered them to slay the Roman ambassadors who had been despatched to demand an explanation. Both sides flew to arms; one or two obstinate engagements ensued; but the allies who had been joined by the Falisci also, were overthrown in a decisive battle under the walls of Fidenae, in which Tolumnius was killed by the Roman military tribune, A. Cornelius Cossus. (Liv. iv. 17—19; cf. Propert. iv. 10. 22, sqq.)

Three years afterwards, Rome being afflicted with a severe pestilence, the Veientines and Fidenates were emboldened to march upon it, and encamped before the Porta Collina; but on the appearance of a Roman army under the dictator Aulus Servilius, they retreated. Servilius having pursued and routed them near Nomentum, marched to Fidenae, which he at length succeeded in taking by means of a cuniculus or mine. (Liv. iv. 22.)

Although the Veientines obtained a truce after this event, yet they soon violated it, and began to commit depredations in the Roman territory, B. C. 427; and even defeated a Roman army whose operations had been paralysed through the dissensions of the three military tribunes who commanded it. The Fidenates now rose and massacred all the Roman colonists, and again allied themselves with the Veientines, who had also enlisted a great number of Etruscan volunteers in their service. These events occasioned great alarm at Rome. Mamercus Aemilius was created dictator, and, marching against the enemy, encamped in the peninsula formed by the confluence of the Anio and the Tiber. Between this spot and Fidenae a desperate battle was fought: stratagems were employed on both sides; but at length the allies were completely defeated, and the Romans entered the gates of Fidenae along with the flying enemy. The city was sacked and destroyed and the inhabitants sold as slaves; but on the other hand the Romans granted the Veientines a truce of 20 years. (Liv. iv. 31—35.)

At the expiration of this truce, the Romans resolved to subdue Veii, as they had done Fidenae, and it was besieged by an army commanded by six military tribunes. At this news the national assembly of the Etruscans met at the fane of Voltumna, to consider what course they should pursue. The Veientines had again resorted to the regal form of government; but unfortunately the person whom they elected for their king, though rich and powerful, had incurred the hatred of the whole Etruscan nation by his oppressions and imperious manners, but especially by his having hindered the performance of certain sacred games. The Etruscans consequently declared that, unless he was deposed, they should afford the Veientines no assistance. But the latter were afraid to adopt this resolution, and thus they were abandoned to their fate. Nevertheless, they contrived to prolong the siege for a period of ten years, during which the Romans were several times discomfited. It is worthy of remark that it was during this siege that the Roman soldiers, being obliged to pass the winter out of Rome, first received a fixed regular stipend. The Capenates, the Falisci, and the Tarquinienses in vain endeavoured to relieve the beleaguered city.

The length of the siege had begun to weary the Romans, when, according to the legend, the means of its capture was suggested by an extraordinary portent. The waters of Lake Albanus swelled to such an extent that they threatened to inundate the surrounding country. The oracle of Delphi was consulted on the occasion, and the response involved not only the immediate subject of the application, but also the remoter one of the capture of Veii. According to the voice from the sacred tripod, that city would be taken when the waters of the lake were made to flow off without running directly into the sea; and the prophecy was confirmed by the revelation of a Veientine haruspex made during the interval of the embassy to Delphi. All that we can infer from this narrative is that the formation of the emissary for draining the Alban lake was contemporary with the siege of Veii [cf. Albanus Lacus, Vol. I. p. 29]: the rest must be referred to the propensity of the ancients to ascribe every great event to the intervention of the gods; for we have already seen that Fidenae was captured by means of a cuniculus, a fact which there does not appear to be any valid reason to doubt, and therefore the emissary of the lake cannot be regarded as having first suggested to the Romans the method of taking a city by mine.

The honour of executing this project was reserved for the dictator M. Furius Camillus. Fortune seemed to have entirely deserted the Veientines: for though the pleading of the Capenates and Falisci on their behalf had made some impression on the national assembly of the Etruscans, their attention was diverted in another direction by a sudden irruption of the Cisalpine Gauls. Meanwhile Camillus, having defeated some bodies of troops who endeavoured to relieve Veii, erected a line of forts around it, to cut off all communication with the surrounding country, and appointed some corps of miners to work continually at the cuniculus. When the mine was completed, he ordered a picked body of his most valiant soldiers to penetrate through it, whilst he himself diverted the attention of the inhabitants by feigned attacks in different quarters. So skilfully had the mine been directed that the troops who entered it emerged in the temple of Juno itself, in the highest part of the citadel. The soldiers who guarded the walls were thus taken in the rear; the gates were thrown open, and the city soon filled with Romans. A dreadful massacre ensued; the town was sacked, and those citizens who had escaped the sword were sold into slavery. The image of Juno, the tutelary deity of Veii, was carried to Rome and pompously installed on Mount Aventine, where a magnificent temple was erected to her, which lasted till the abolition of paganism. (Liv. v. 8, 12, 13, 15—22; Cic. *Div.* i. 44, ii. 32; Plut. *Cam.* 5, sq.; Flor. i. 12.)

Veii was captured in the year 396 B. C. Its territory was divided among the citizens of Rome at the rate of seven jugera per head. A great debate arose between the senate and the people whether Veii should be repopulated by Roman citizens, and thus made as it were a second capital; but at the persuasion of Camillus the project was abandoned. But though the city was deserted, its buildings were not destroyed, as is shown by several facts. Thus, after the battle of the Allia and the taking of Rome by the Gauls, the greater part of the Romans retired to Veii and fortified themselves there; and when the Gauls were expelled, the question was mooted whether Rome, which had been reduced to ashes, should be abandoned, and Veii converted into a new capital. But the eloquence of Camillus again decided the Romans for the negative, and the question was set at rest for ever. This took place in B. C. 389. Some refractory citizens, however, who disliked the trouble of rebuilding their own houses at Rome, took refuge in the empty ones of Veii, and set at nought a senatusconsultum ordering them to return; but they were at length compelled to come back by a decree of capital punishment against those who remained at Veii beyond a day prescribed. (Liv. v. 49, sqq., vi. 4.)

From this time Veii was completely deserted and went gradually to decay. Cicero (*ad Fam.* xvi. 9) speaks of the measuring of the Veientine territory for distribution; and it was probably divided by Caesar among his soldiers in B. C. 45. (Plut. *Caes.* 57.) Propertius also describes its walls as existing in his time; but the space within consisted of fields where the shepherd fed his flock, and which were then under the operation of the decempeda (iv. 10. 29). It is, however, rather difficult to reconcile this chronology, unless there were two distributions. Caesar also appears to have planted a colony at the ancient city, and thus arose the second, or Roman, Veii, which seems to have been considerable enough to sustain an assault during the wars of the triumvirs. The inhabitants were again dispersed, and the colony was not re-erected till towards the end of the reign of Augustus, when it assumed the name of municipium Augustum Veiens, as appears from inscriptions. (Cf. Auct. *de Coloniis.*) When Florus, who flourished in the reign of Hadrian, asserts (i. 12) that scarcely a vestige remained to mark the spot where Veii once stood, he either writes with great carelessness or is alluding to the ancient and Etruscan Veii. The existence of the municipium in the reigns of Augustus and Tiberius is attested by several monuments discovered in its ruins; and some inscriptions also found there show that it was in existence at least as late as the reign of Constantius Chlorus. The monuments alluded to consist partly of sculptures relating to those emperors and their families, and partly of inscriptions. Amongst the latter the most important is now preserved in the Capitoline Museum at Rome, recording the admission of Caius Julius Gelotes, a freedman of Augustus, to the office of an Augustalis, by the centumviri of Veii. It is dated in the consulship of Gaetulicus and Calvisius Sabinus, A. U. C. 779=B. C. 26, or the 13th year of the reign of Tiberius. It is published by Fabretti (*Inscr.* p. 170), but more correctly from the original by Nibby in his *Dintorni di Roma* (vol. iii. p. 409). The accents are worthy of note. Among the centumvirs whose names are subscribed to this decree are those of two of the Tarquitian family, namely, M. Tarquitius Saturninus and T. Tarquitius Rufus. This family, which produced a celebrated writer on Etruscan divination (Macrob. *Sat.* iii. 7), seems to have belonged to Veii and to have enjoyed considerable importance there, as two other inscriptions relating to it have been discovered. One of these records the restoration of a statue erected in honour of M. Tarquitius Saturninus by the 22nd Legion; the other is a tablet of Tarquitia Prisca dedicated to her husband M. Saenius Marcellus. (Nibby, *Ib.* p. 410, sq.) The family of Priscus is the most celebrated of the Gens Tarquitia. One of these was the accuser of Statilius Taurus in the reign of Claudius, and was himself condemned under the law of *repetundae* in the reign of Nero. (Tac. *Ann.* xii. 59, xiv. 44.) There are various coins of the Tarquitii. (Eckhel, *D. N. V.* p. 322.) After the era of Constantine we have no notices of Veii except in the Tab. Peutingeriana and the Geographer of Ravenna. It was probably destroyed by the Lombards. At the beginning of the 11th century a castle was erected on the precipitous and isolated hill on the S. side of Veii, which was called *la Isola*, and is now known by the name of the *Isola Farnese.*

Sir William Gell was the first who gave an exact plan of Veii in the *Memorie dell'Istituto* (Fasc. i.), and afterwards in his *Topography of Rome and its Vicinity.* He traced the vestiges of the ancient walls, which were composed of irregular quadrilateral masses of the local *tufa*, some of which were from 9 to 11 feet in length. Mr. Dennis, however, failed to discover any traces of them (*Etruria*, vol. i. p. 15), and describes the stone used in the fortifications of Veii, as being cut into smaller pieces than usual in other Etruscan cities. These remains, which are principally to be traced in the N. and E., as well as the streams and the outline of the cliffs, determine the extent of the city in a manner that cannot be mistaken. They give a circumference of about 7 miles, which agrees with the account of Dionysius, before referred to, when he compares the size of Veii with that of Athens. It has been debated whether the isolated rock, called the *Isola Farnese*, formed part of the city. Nibby (*Dintorni*, vol. iii. p. 424) and others are of opinion that it was the arx or citadel. On the other hand Sir William Gell and Mr. Dennis hold that this could not have been the case; and it must be confessed that the reasons advanced by the latter (vol. i. p. 42, note 5) appear decisive; namely, 1, the *Isola* is separated from the city by a deep glen, so that, had it been the citadel, Camillus by its capture would not have obtained immediate possession of the town, as we learn from Livy's narrative, before referred to, that he did: 2, the remains of Etruscan tombs on the *Isola* show that it must have been a cemetery, and consequently without the walls. The two authorities last cited identify the citadel with the hill now called the *Piazza d' Armi* at the SE. extremity of the town, in the angle formed by the junction of the stream called *Fosso de' due Fossi* with that called *Fosso di Formello.* These two streams traverse the southern and eastern boundaries of ancient Veii. The latter of these streams, or *Fosso di Formello*, is thought to be the ancient Cremera. The other rivulet rises at *La Torretta*, about 12 miles from Rome. Near Veii it forms a fine cataract, precipitating itself over a rock about 80 feet high. From this spot it runs in a deep channel among precipices, and separates the *Isola* from the rest of Veii. It then receives the *Rivo del Pino* or *della Storta*, whence its name of *Fosso de' due Fossi.* After joining the *Fosso di Formello*, or Cremera, the united stream is now called *La Valca*, and falls into the Tiber about 6 miles from Rome, near the Via Flaminia.

Topographers have discovered 9 gates, to which they have assigned imaginary names from local circumstances. It would be impossible to explain the exact sites of these gates without the assistance of a plan, and we shall therefore content ourselves with enumerating them in the order in which they occur, premising only that all writers do not call them alike. The westernmost gate, called the *Porto de' Sette Pagi*, from its being supposed to have led to the district called the Septem Pagi, is situated near the *Ponte dell' Isola.* Then proceeding round the S. side of the city, the next gate occurs near the *Fosso dell' Isola;* and, from its leading to the rock of *Isola*, which, as we have seen, was thought by some topographers to be the ancient citadel, has been called the *Porta dell' Arce.* The next gate on the E. is the *Porta Campana;* and after that, by the *Piazza d' Armi*, is the *Porta Fidenate.* Near this spot was discovered, in 1840, the curious staircase called *La Scaletta.* Only eight steps of uncemented masonry, seated high in the cliff, remain, the lower part having fallen with the cliff. After passing the *Piazza d' Armi*, in traversing the northern side of the city by the valley of the Cremera, the gates occur in the following order: the *Porta di Pietra Pertusa;* the *Porta delle Are Muzie;* the *Porta Capenate;* the *Porta del Colombario*, so named from the columbarium near it; and lastly the *Porta Sutrina*, not far from the *Ponte di Formello.*

The Municipium Veiens, which succeeded the ancient town, was undoubtedly smaller; for Roman sepulchres and columbaria, which must have been outside the Municipium, have been discovered within the walls of Etruscan Veii. It was perhaps not more than 2 miles in circumference. On the spot probably occupied by the Forum, were discovered the colossal heads of Augustus and Tiberius, and the colossal statue of the latter, crowned with oak and in a sitting posture, which are now in the Vatican, in the corridor of the *Museo Chiaramonte.* Several other fragments of statues have been found, as well as 24 marble columns, 12 of which now adorn the *Piazza Colonna* at Rome, and the rest are employed in the Chapel of the Sacrament in the new Basilica of St. Paul.

The remains of Etruscan Veii are portions of the walls, the bridge near the *Porta di Pietra Pertusa*, the bridge, or tunnel, called *Ponte Sodo*, and the tombs and sepulchral grottoes. Of the walls we have already spoken. The remains of the bridge consist of a piece of wall about 20 feet wide on the bank of the stream, which seems to have formed the pier from which the arch sprung, and some large blocks of hewn tufo which lie in the water. The piers of the bridge called *Ponte Formello* are also possibly Etruscan, but the arch is of Roman brickwork. The *Ponte Sodo* is a tunnel in the rock through which the stream flows. Nibby (*Dintorni*, vol. iii. p. 433), describes it as 70 feet long, 20 wide, and 15 high: but Mr. Dennis, who waded through it, says that it is 240 feet long, 12 to 15 wide and nearly 20 high (*Etruria*, vol. i. p. 14). It is in all probability an Etruscan excavation, or has at all events been enlarged by art. An ancient road ran over it; and from above it is scarcely visible. No trace remains of the cuniculus of Camillus. The vicinity of Veii abounds with tombs excavated in the rock, and sepulchral tumuli, some of which are Roman. Among the tombs is a very remarkable one, discovered in the winter of 1842, and still open to inspection. It consists of a long passage in the tumulus, or mound, called *Poggio Michele*, leading to a door in the middle of the mound, and guarded at each end by sculptured lions. This is the entrance to a low dark chamber, hewn out of the rock, the walls of which are covered with paintings of the most grotesque character, consisting of horses, men, sphinxes, dogs, leopards, &c. On either side a bench of rock, about 2½ feet high, projects from the wall, on each of which, when the tomb was first opened, a skeleton reposed; but these soon crumbled into dust. One of them, from the arms lying near, was the remains of a warrior; the other skeleton was probably that of his wife. On the floor were large jars containing human ashes, and also several small vases of the most archaic Etruscan pottery. Within was another smaller chamber also containing cinerary urns. A complete description of this remarkable sepulchre will be found in Mr. Dennis's *Etruria* (vol. i. ch. 2).

For the history and antiquities of Veii the following works may be consulted; Nibby, *Dintorni di Roma*, vol. iii., and *Viaggio Antiquario*, vol. i.; Canina, *L'antica Città di Veji descritta;* Abeken, *Mittelitalien;* Müller, *Etrusker;* Sir W. Gell, *Topography of Rome and its Vicinity;* Dennis, *Cities and Cemeteries of Etruria.* [T. H. D.]

VELATODURUM, in Gallia, is placed by the Antonine Itin. on the road from Vesontio (*Besançon*) to Epamanduodurum (*Mandeure*) xxii. from *Besançon* and xii. from *Mandeure.* But these two numbers exceed the distance between *Besançon* and *Mandeure.* The termination *durum* seems to show that Velatodurum was on a stream; and D'Anville conjectures that it is near *Clereval* on the *Doubs*, where there is a place named *Pont-pierre.* But this is merely a guess. [Epamanduodurum.] [G. L.]

VELAUNI, a people mentioned in the Trophy of the Alps (Plin. iii. 20), between the Nerusii and Suetri. If the geographical position of these people corresponds to their position in Pliny's list of tribes, we know in a general way where to place them. [Nerusii; Suetri.] [G. L.]

VELDIDENA, one of the most important towns of Rhaetia, on the southern bank of the river Oenus, and on the road leading from Tridentum to Augusta Vindelicorum. (*It. Ant.* pp. 258, 259, 275, 280.) According to coins which have been found on its site, it was made a Roman colony with the surname Augusta. Its site is now occupied by the convent of *Wilden* in the neighbourhood of *Inspruck*, on the little river *Sihl.* (See Roschmann, *Veldidena Urbs antiquissima Augusti Colonia*, Ulm, 1744, 4to.) [L. S.]

VELEIA (*Eth.* Veleias, ātis: Ru. near *Montepolo*), a town of Liguria, situated on the frontiers of Gallia Cisalpina, about 20 miles S. of Placentia (*Piacenza*), in the hills which form the lower slopes of the Apennines. The Veleiates are mentioned by Pliny among the Ligurian tribes; and in another passage he speaks of "oppidum Veleiatium," which was remarkable for the longevity of some of its inhabitants (vii. 49. s. 50). He there describes it as situated "circa Placentiam in collibus," but its precise site was unknown until its remains were discovered in 1760. From the mode in which these are buried, it seems certain that the town was overwhelmed by a vast landslip from the neighbouring mountain. Systematic excavations on the spot, which have been carried on since 1760, have brought to light several buildings of the ancient city, including the amphitheatre, a basilica, the forum, and several temples: and the great number of bronze ornaments and implements of a domestic kind, as well as statues, busts, &c., which have been discovered on the spot, have given celebrity to Veleia as the Pompeii of Northern Italy. Unfortunately the great weight of the superincumbent mass has crushed in the buildings, so that all the upper part of them is destroyed, and the larger statues have suffered severely from the same cause. The inscriptions found there attest that Veleia was a flourishing municipal town in the first centuries of the Roman Empire. One of these is of peculiar interest as containing a detailed account of the investment of a large sum of money by the emperor Trajan in the purchase of lands for the maintenance of a number of poor children of both sexes. This remarkable document contains the names of numerous farms and villages in the neighbourhood of Veleia, and shows that that town was the capital of an extensive territory (probably the same once held by the Ligurian tribe of the Veleiates) which was divided into a number of Pagi, or rural districts. The names both of these and of the various "fundi" or farms noticed are almost uniformly of Roman origin, — thus affording a remarkable proof how completely this district had been Romanised before the period in question. The Tabula Alimentaria Trajana, as it is commonly called, has been repeatedly published, and illustrated with a profusion of learning, especially by De Lama. (*Tavola Alimentaria Veleiate detta Trajana*, 4to. Parma, 1819.) A description of the ruins and antiquities has been published by Antolini (*Le Rovine di Veleja*, Milano, 1819). The coins found at Veleia are very numerous, but none of them later than the time of Probus: whence it is reasonably inferred that the catastrophe which buried the city occurred in the reign of that emperor. [E. H. B.]

VELIA (Οὐέλια, or Οὐέλεια, Ptol. ii. 6. § 65), a town of the Caristi in Hispania Tarraconensis, on the road from Pompelo to Asturica (*Itin. Ant.* p. 454, where it is called Beleia). (Cf. Plin. iii. 3. s. 4; Geogr. Rav. iv. 45.) Variously identified with *Viana*, *Bernedo*, and *Yruña.* [T. H. D.]

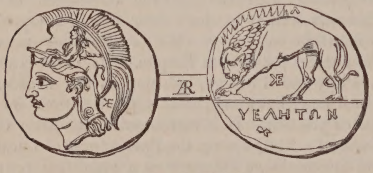
VELIA (Ὑέλη or Ἐλέα: *Eth.* Ὑελήτης or Ἐλεάτης, Veliensis: *Castell' a Mare della Brucca*), one of the principal of the Greek colonies in Southern Italy, situated on the shores of the Tyrrhenian sea, about midway between Posidonia and Pyxus. There is some uncertainty respecting the correct form of the name. Strabo tells us that it was originally called Hyele (Ὑέλη), but was in his day called Elea (Ἐλέα), and Diogenes Laertius also says that it was at first called Hyele and afterwards Elea. (Strab. vi. p. 252; Diog. Laert. ix. 5. § 28; Steph. B. *s. v.*) But it is certain from the evidence of its coins, which uniformly bear the legends ὙΕΛΗ and ὙΕΛΗΤΩΝ, that the name of Hyele continued in use among the people themselves as long as the city continued; while, on the other hand, the name of Ἐλέα is already found in Scylax (p. 4. § 12), and seems to have been certainly that in use among Attic writers from an early period, where the Eleatic school of philosophy rendered the name familiar. Strabo also tells us that some authors wrote the name Ele (Ἔλη), from a fountain of that name; and this form, compared with Ὑέλη and the Latin form Velia, seems to show clearly that the diversity of names arose from the Aeolic Digamma, which was probably originally prefixed to the name, and was retained in the native usage and in that of the Romans, while it was altogether dropped by the Attics. (Münter, *Velia*, p. 21.) It is not improbable that the name was derived from that of the neighbouring river, the Hales of Cicero (*Alento*), of which the name is written Ἐλέης by Strabo and Βελέα by Stephanus of Byzantium. (Cic. *ad Fam.* vii. 20; Strab. vi. p. 254.) Others, however, derived it from the marshes (ἕλη) at the mouth of the same river.

There is no trace of the existence of any town on the site of Velia before the establishment of the Greek colony there, and it is probable that this, like most of the Greek colonies in Southern Italy, was founded on a wholly new site. It was a colony from Phocaea in Ionia, and derived its origin from the voluntary expatriation of the inhabitants of that city in order to avoid falling under the Persian yoke, at the time of the conquest of Ionia by Harpagus, B. C. 544. The Phocaean emigrants proceeded in a body to Corsica, where they had already founded the colony of Alalia about 20 years before; and in the first instance established themselves in that island, but, having provoked the enmity of the Tyrrhenians and Carthaginians by their piracies, they sustained such severe loss in a naval action with the combined fleets of these two powers, that they found themselves compelled to abandon the colony. A part of the emigrants then repaired to Massilia (which was also a Phocaean colony), while the remainder, after a temporary halt at Rhegium, proceeded to found the new colony of Hyele or Velia on the coast of Lucania. This is the account given by Herodotus (i. 164—167), with which that cited by Strabo from Antiochus of Syracuse substantially agrees. (Strab. vi. p. 254.) Later writers have somewhat confused the narrative, and have represented the foundation of Massilia and Velia as contemporaneous (Hygin. *ap. A. Gell.* x. 16; Ammian. Marc. xv. 9. § 7); but there is no doubt that the account above given is the correct one. Scylax alone represents Velia as a colony of Thurii. (Scyl. p. 4. § 12.) If this be not altogether a mistake it must refer to the admission at a later period of a body of fresh colonists from that city; but of this we find no trace in any other author. The exact date of the foundation of Velia cannot be determined, as we do not know how long the Phocaeans remained in Corsica, but it may be placed approximately at about 540 B. C.

There is no doubt that the settlers at Velia, like those of the sister colony of Massilia, followed the example of their parent city, and devoted themselves assiduously to the cultivation of commerce; nor that the city itself quickly became a prosperous and flourishing place. The great abundance of the silver coins of Velia still in existence, and which are found throughout the S. of Italy, is in itself sufficient evidence of this fact; while the circumstance that it became the seat of a celebrated school of philosophy, the leaders of which continued through successive generations to reside at Velia, proves that it must have been a place of much intellectual refinement and cultivation. But of its history we may be said to know absolutely nothing. Strabo tells us that it was remarkable for its good government, an advantage for which it was partly indebted to Parmenides, who gave his fellow-citizens a code of laws which the magistrates from year to year took an oath to obey. (Strab. vi. p. 254; Diog. Laert. ix. 3. § 23.) But the obscure story concerning the death of Zeno, the disciple of Parmenides, who was put to death by a tyrant named Nearchus or Diomedon, would seem to show that it was not free from the same kind of violent interruptions by the rise of despotisms as were common to most of the Greek cities. (Diog. Laert. ix. 5; Cic. *Tusc.* ii. 22.) Strabo also tells us that the Eleans came off victorious in a contest with the Posidonians, but of the time and circumstances of this we are wholly ignorant; and he adds that they maintained their ground against the Lucanians also. (Strab. *l. c.*) If this is correct they would have been one of the few Greek cities which preserved their national existence against those barbarians, but their name is not found in the scanty historical notices that we possess of the wars between the Lucanians and the cities of Magna Graecia. But the statement of Strabo is in some degree confirmed by the fact that Velia was certainly admitted at an early period (though on what occasion we know not) to the alliance of Rome, and appears to have maintained very friendly relations with that city. It was from thence, in common with Neapolis, that the Romans habitually derived the priestesses of Ceres, whose worship was of Greek origin. (Cic. *pro Balb.* 24; Val. Max. i. 1. § 1.) Cicero speaks of Velia as a well-known instance of a "foederata civitas," and we find it mentioned in the Second Punic War as one of those which were bound by treaty to contribute their quota of ships to the Roman fleet. (Cic. *l. c.*; Liv. xxvi. 39.) It eventually received the Roman franchise, apparently in virtue of the Lex Julia, B. C. 90. (Cic. *l. c.*) Under the Roman government Velia continued to be a tolerably flourishing town, and seems to have been from an early period noted for its mild and salubrious climate. Thus we are told that P. Aemilius was ordered to go there by his physicians for the benefit of his health, and we find Horace making inquiries about it as a substitute for Baiae. (Plut. *Aemil.* 39; Hor. *Ep.* i. 15. 1.) Cicero's friend Trebatius had a villa there, and the great orator himself repeatedly touched there on his voyages along the coast of Italy. (Cic. *Verr.* ii. 40, v. 17, *ad Fam.* vii. 19, 20, *ad Att.* xvi. 6, 7.) It appears to have been at this period still a place of some trade, and Strabo tells us that the poverty of the soil compelled the inhabitants to turn their attention to maritime affairs and fisheries. (Strab. vi. p. 254.) It is probable that the same cause had in early times co-operated with the national disposition of the Phocaean settlers to direct their attention especially to maritime commerce. We hear nothing more of Velia under the Roman Empire. Its name is found in Pliny and Ptolemy, but not in the Itineraries, which may, however, probably proceed from its secluded position. It is mentioned in the Liber Coloniarum (p. 209) among the Praefecturae of Lucania; and its continued existence as a municipal town is proved by inscriptions. (Mommsen, *Inscrip. R. N.* 190, App. p. 2.) It became an episcopal see in the early ages of Christianity, and still retained that dignity as late as the time of Gregory the Great (A. D. 599). It is probable that the final decay of Velia, like that of Paestum, was owing to the ravages of the Saracens in the 8th and 9th centuries. The bishopric was united with that of *Capaccio*, which had succeeded to that of Paestum. (Münter, *Velia*, pp. 69—73.) During the middle ages there grew up on the spot a fortress which was called *Castell' a Mare della Brucca*, and which still serves to mark the site of the ancient city.

The ruins of Velia are situated on a low ridge of hill, which rises about a mile and a half from the mouth of the river *Alento* (the ancient Hales), and half a mile from the coast, which here forms a shallow but spacious bay, between the headland formed by the *Monte della Stella* and the rocky point of *Porticello* near *Ascea*. The mediaeval castle and village of *Castell' a Mare della Brucca* occupy the point of this hill nearest the sea. The outline of the ancient walls may be traced at intervals round the hill for their whole extent. Their circuit is not above two miles, and it is most likely that this was the old city or acropolis, and that in the days of its prosperity it had considerable suburbs, especially in the direction of its port. It is probable that this was an artificial basin, like that of Metapontum, and its site is in all probability marked by a marshy pool which still exists between the ruins of the ancient city and the mouth of the *Alento*. This river itself, however, was sufficient to afford a shelter and place of anchorage for shipping in ancient times (Cic. *ad Att.* xvi. 7), and is still resorted to for the same purpose by the light vessels of the country. No other ruins exist on the site of the ancient city except some masses of buildings, which, being in the reticulated style, are unquestionably of Roman date: portions of aqueducts, reservoirs for water, &c. are also visible. (The site and existing remains of Velia are described by Münter, *Velia in Lucanien*, 8vo. Altona, 1818, pp. 15—20, and by the Duc de Luynes, in the *Annali dell' Instituto*, 1829, pp. 381—386.)

It is certain that as a Greek colony Velia never rose to a par with the more opulent and flourishing cities of Magna Graecia. Its chief celebrity in ancient times was derived from its celebrated school of philosophy, which was universally known as the Eleatic school. Its founder Xenophanes was indeed a native of Colophon, but had established himself at Velia, and wrote a long poem, in which he celebrated the foundation of that city. (Diog. Laert. ix. 2. § 20.) His distinguished successors Parmenides and Zeno were both of them born at Velia, and the same thing is asserted by some writers of Leucippus, the founder of the atomic theory, though others represent him as a native of Abdera or Melos. Hence Diogenes Laertius terms Velia "an inconsiderable city, but capable of producing great men" (ix. 5. § 28). [E. H. B.]



COIN OF VELIA.

VELINUS (*Velino*), a considerable river of Central Italy, which has its sources in the lofty group of the Apennines between Nursia (*Norcia*) and Interocrea (*Antrodoco*). Its actual source is in the immediate neighbourhood of the ancient Falacrinum, the birthplace of Vespasian, where an old church still bears the name of *Sta Maria di Fonte Velino*. The upper part of its course is from N. to S.; but near *Antrodoco* it turns abruptly to the W., pursues that direction as far as *Rieti*, and thence flows about NNW. till it discharges its waters into the Nar (*Nera*) about 3 miles above *Terni* (Interamna). Just before reaching that river it forms the celebrated cascade now known as the *Falls of Terni* or *Cascata delle Marmore*. This waterfall is in its present form wholly artificial. It was first formed by M'. Curius Dentatus, who opened an artificial channel for the waters of the Velinus, and thus carried off a considerable part of the Lacus Velinus, which previously occupied a great part of the valley below Reate. There still remained, however, as there does to this day, a considerable lake, called the Lacus Velinus, and now known as the *Lago di Piè di Lugo*. It was on the banks of this lake that the villa of Axius, the friend of Cicero and Varro, was situated. (Cic. *ad Att.* iv. 15; Varro, *R.R.* ii. 1, 8.) Several smaller lakes still exist a little higher up the valley: hence we find Pliny speaking in the plural of the Velini Lacus (Plin. iii. 12. s. 17; Tac. *Ann.* i. 79; Vib. Seq. p. 24.) The character and conformation of the lower valley of the Velinus are fully described in the article Reate. Pliny has made a complete confusion in his description of the Nar and Velinus. [Nar.] The latter river receives near *Rieti* two considerable streams, the *Salto* and the *Turano*: the ancient name of the first is unknown to us, but the second is probably the Tolenus of Ovid. (*Fast.* vi. 565.) It flows from the mountain district once occupied by the Aequiculi, and which still retains the name of *Cicolano*. [Tolenus.] [E. H. B.]

VELITRAE (Οὐέλιτραι : *Eth.* Οὐελιτρανός, Veliternus : *Velletri*), a city of Latium situated on the southern slope of the Alban hills, looking over the Pomptine Marshes, and on the left of the Via Appia. There can be no doubt that it was included within the limits of Latium, as that name was usually understood, at least in later times: but there is great uncertainty as to whether it was originally a Latin or a Volscian city. On the one hand Dionysius includes the Veliterni in his list of the thirty cities of the Latin League, a document probably derived from good authority (Dionys. v. 61). On the other hand both Dionysius himself and Livy represent Velitrae as a Volscian city at the earliest period when it came into collision with Rome. Thus Dionysius, in relating the wars of Ancus Marcius with the Volscians, speaks of Velitrae as a city of that people which was besieged by the Roman king, but submitted, and was received to an alliance on favourable terms. (Id. iii. 41.) Again in B. C. 494, just about the period when its name figures in Dionysius as one of the Latin cities, it is mentioned both by that author and by Livy as a Volscian city, which was wrested from that people by the consul P. Virginius (Id. vi. 42; Liv. ii. 30). According to Livy a Roman colony was sent there the same year, which was again recruited with fresh colonists two years afterwards. (Liv. ii. 31, 34.) Dionysius, on the contrary, makes no mention of the first colony, and represents that sent in B. C. 492 as designed to supply the exhausted population of Velitrae, which had been reduced to a low state by a pestilence. (Dionys. vii. 13, 14.) It appears certain at all events that Velitrae received a Roman colony at this period; but it had apparently again fallen into decay, as it received a second body of colonists in B. C. 404. (Diod. xiv. 34.) Even this did not suffice to secure its allegiance to Rome: shortly after the Gaulish war, the Roman colonists of Velitrae joined with the Volscians in their hostilities, and after a short time broke out into open revolt. (Liv. vi. 13, 21.) They were indeed defeated in B. C. 381, together with the Praenestines and Volscians, who supported them, and their city was taken the next year (*ib.* 22, 29); but their history from this time is a continued succession of outbreaks and hostile enterprises against Rome, alternating with intervals of dubious peace. It seems clear that they had really assumed the position of an independent city, like those of the neighbouring Volscians, and though the Romans are said to have more than once taken this city, they did not again restore it to the position of a Roman colony. Thus notwithstanding its capture in B. C. 380, the citizens were again in arms in 370, and not only ravaged the territories of the Latins in alliance with Rome, but even laid siege to Tusculum. They were quickly defeated in the field, and Velitrae itself in its turn was besieged by a Roman army; but the siege was protracted for more than two years, and it is not quite clear whether the city was taken in the end. (Liv. vi. 36, 37, 38, 42.) In B. C. 358 they again broke out, and ravaged the Roman territories, but we hear nothing of their punishment (Liv. vii. 15): and in B. C. 340, on the outbreak of the great Latin War, they are represented as among the first to join in the defection. It is evident indeed that they were at this time still a powerful people: their troops bore an important part in two successive campaigns, but shared in the general defeat of the Latins on the banks of the Astura, B. C. 338. (Liv. viii. 3, 12, 13; *Fast. Capit.*) After the close of the war they were selected for the severest punishment, on the especial ground of their having been originally Roman citizens. Their walls were destroyed, and their local senators transported beyond the Tiber, under a severe penalty in case of their return. Their place was, however, supplied by a body of fresh colonists, so that the city continued to be not less populous than before. (Liv. viii. 14.)

From this time Velitrae sank into the condition of an ordinary municipal town, and we hear little of it in history. It is mentioned incidentally on occasion of some prodigies that occurred there (Liv. xxx. 38, xxxii. 1, 9), but with this exception its name is not again mentioned till the close of the Republic. We hear, however, that it was a flourishing municipal town, and it derived some celebrity at the commencement of the Empire from the circumstance of its having been the native place of the Octavian family, from which the emperor Augustus was descended. The Octavii indeed claimed to be descended from the ancient Roman family of the same name; but it is certain that both the grandfather and great-grandfather of Augustus were merely men of equestrian rank, who held municipal magistracies in their native town. (Suet. *Aug.* 1, 2; Dion Cass. xlv. 1.) According to the Liber Coloniarum, Velitrae had received a fresh body of colonists in the time of the Gracchi; but it continued to retain its municipal rank until the reign of Claudius, when it received a military colony, and from this time assumed the title of a Colonia, which we find it bearing in inscriptions (*Lib. Colon.* p. 238; Zumpt, *de Col.* p. 383; Orell. *Inscr.* 1740, 3652). No mention of the city occurs in history under the Roman Empire, but its name is found in the geographers, and inscriptions testify that it continued to exist as a flourishing town down to near the close of the Empire. (Strab. v. p. 237; Plin. iii. 5. s. 9; Sil. Ital. viii. 376; Nibby, *Dintorni*, vol. iii. p. 450.) It appears to have subsequently suffered severely from the ravages of the barbarians, but continued to subsist throughout the middle ages: and the modern city of *Velletri* still occupies the site of the ancient one, though it has no remains of antiquity. Its position is very similar to that of Lanuvium (*Civita Lavinia*), on a projecting rock or spur of hill, standing out from the more elevated group of the Alban hills, and rising like a headland above the plain of the Pomptine Marshes, which lie stretched out beneath it. The inscriptions which have been discovered there have been published by Cardinali (*Inscrizioni Antiche Veliterne*, 4to. Roma, 1823). From one of these we learn that the ancient city possessed an amphitheatre, which was repaired as late as the reign of Valentinian, but no traces of it are now visible. It had also temples of Apollo, Hercules and Mars, as well as of the Sabine divinity Sancus. (Liv. xxxii. 1.)

Pliny notices the territory of Velitrae as producing a wine of great excellence, inferior only to the Falernian (Plin. xiv. 6. s. 8). [E. H. B.]

VELLAVI or VELAUNI, a people of Gallia. In the passage of Caesar (*B. G.* vii. 75) some editions have Velauni, but it is certain that whatever is the true form of the name, these Velauni are the Vellaioi (Οὐελλαΐοι) of Strabo (p. 190). The Gabali and Velauni in Caesar's time were subject to the Arverni. In Ptolemy (ii. 7. § 20) the name is Velauni (Οὐέλαυνοι), but he puts them next to the Auscii, which is a great mistake. D'Anville says that the diocese of *Pui* represents their territory; but that this cannot be said of the small province of *Vellay*, which was annexed to *Languedoc* in the ante-revolutionary division of France. In the Notit. of the Provinces of Gallia, the capital of the Vellavi is Civitas Vellavorum [REVESSIO]. [G. L.]

VELLAUNI. [VELAUNI.]

VELLAUNODUNUM, in Gallia. In B. C. 52 Caesar, leaving two legions and all the baggage at Agedincum (*Sens*), marches on Genabum (*Orléans*). On the second day he reaches Vellaunodunum. (*B. G.* vii. 11.) In two days Caesar made a vallum round Vellaunodunum, and on the third day the place surrendered, and the people gave up their arms. There is no evidence about the site of Vellaunodunum, except that it was on the road from *Sens* to *Orléans*, and was reached in the second day's march from *Sens*, and that Caesar reached *Orléans* in two days from Vellaunodunum. Caesar was marching quick. D'Anville conjectures that Vellaunodunum may be *Beaune*, in the old province of *Gâtinois;* for *Beaune* is about 40 Roman miles from *Sens*, and the Roman army would march that distance in two days. *Beaune* is named Belna in the Pagus Vastinensis (*Gâtinois*, *Gastinois*, *Vastinois*; VAPINCUM), in the acts of a council held at *Soissons* in 862, and D'Anville thinks that Belna may be a corruption of Vellauna, which is the name of Vellaunodunum, if we cut off the termination *dunum*. (D'Anville, *Notice*, *&c.*) [G. L.]

VELLEIA [VELEIA].

VE'LLICA (Οὐέλλικα, Ptol. ii. 6. § 51), a town of the Cantabri in Hispania Tarraconensis. Ukert (ii. pt. i. p. 144) places it in the neighbourhood of *Villelba*, to the N. of *Aquilar de Campo*. [T.H.D.]

VELLOCASSES. [VELOCASSES.]

VELOCASSES, as Caesar (*B. G.* ii. 4) writes the name, Vellocasses in Pliny (iv. 18), and in Ptolemy Οὐενελιοκάσιοι (ii. 8. § 8). Caesar places them in the country of the Belgae, and consequently north of the *Seine*. The number of fighting men that they could muster in B. C. 57 was estimated at 10,000, unless Caesar means that they and the Veromandui together had this number. In the division of Gallia by Augustus, the Velocasses were included in Lugdunensis. Their chief town was Rotomagus (*Rouen*) on the north bank of the *Seine*. West of the Velocasses were the Caleti, whose country extended along the coast north of the *Seine*. That part of the country of the Velocasses which is between the rivers *Andelle* and *Oise*, became in modern times *Vexin Normand* and *Vexin Français*, the little river *Epte* forming the boundary between the two *Vexins*. [G. L.]

VELPI MONTES (τὰ Οὔελπα ὄρη, Ptol. iv. 4. § 8), a range of mountains on the W. borders of Cyrenaica, in which were the sources of the river Lathon. [T. H. D.]

VELTAE (Οὐέλται, Ptol. iii. 5. § 22), a people of European Sarmatia, dwelling on both banks of the river Rhubon, identical, according to Ukert (iii. pt. ii. p. 435), with the Sclavonian Veleti, or Lutizi, who dwelt on the *Oder*. [T. H. D.]

VEMA'NIA, a town of Vindelicia, on the road between Augusta Vindelicorum and Brigantium (*It. Ant.* pp. 237, 251, 259; *Tab. Peut.*), seems to have been a place of some importance, as it was the station of the prefect of the third legion, who had to guard the frontier from this town to Campodunum. (*Not. Imp.*) The place now occupying the site is called *Wangen*. [L. S.]

VENAFRUM (Οὐέναφρον: *Eth.* Venafranus: *Venafro*), an inland city of Campania, situated n the upper valley of the Vulturnus, and on the Via Latina, 16 miles from Casinum and 18 from Teanum. (*Itin. Ant.* p. 303.) It was the last city of Campania towards the N., its territory adjoining on the W., that of Casinum (*S. Germano*), which was included in Latium, in the more extended sense of that name, and that of Aesernia on the NE., which formed part of Samnium. It stood on a hill rising above the valley of the Vulturnus, at a short distance from the right bank of that river. (Strab. v. p. 238.) No mention is found in history of Venafrum before the Roman conquest of this part of Italy, and it is uncertain to what people it originally belonged; but it is probable that it had fallen into the hands of the Samnites before that people came into collision with Rome. Under the Roman government it appears as a flourishing municipal town: Cato, the most ancient author by whom it is mentioned, notices it as having manufactures of spades, tiles, and ropes (Cato, *R. R.* 135): at a later period it was more noted for its oil, which was celebrated as the best in Italy, and supplied the choicest tables of the great at Rome under the Empire. (Hor. *Carm.* ii. 6. 16, *Sat.* ii. 4. 69; Juv. v. 86; Martial, xiii. 98; Strab. v. pp. 238, 242; Varr. *R. R.* i. 2. § 6; Plin. xv. 2. s. 3.)

The only occasion on which Venafrum figures in history is during the Social War, B. C. 88, when it was betrayed into the hands of the Samnite leader Marius Egnatius, and two Roman cohorts that formed the garrison were put to the sword. (Appian, *B. C.* i. 41.) Cicero more than once alludes to the great fertility of its territory (Cic. *de Leg. Agr.* ii. 25, *pro Planc.* 9), which was one of those that the tribune Rullus proposed by his agrarian law to divide among the Roman citizens. This project proved abortive, but a colony was planted at Venafrum under Augustus, and the city continued henceforth to bear the title of a Colonia, which is found both in Pliny and in inscriptions. (Plin. iii. 5. s. 9; *Lib. Col.* p. 239; Zumpt, *de Colon.* p. 347; Mommsen, *Inscr. R. N.* 4643, 4703.) These last, which are very numerous, sufficiently attest the flourishing condition of Venafrum under the Roman Empire: it continued to subsist throughout the middle ages, and is still a town of about 4000 inhabitants. It retains the ancient site as well as name, but has few vestiges of antiquity, except the inscriptions above mentioned and some shapeless fragments of an edifice supposed to have been an amphitheatre. The inscriptions are published by Mommsen. (*Inscr. R. N.* pp. 243—249.) [E. H. B.]

VENANTODUNUM, apparently a town of the Catyeuchlani in Britannia Romana, perhaps *Huntingdon*. The name appears in the Not. Imp.; though Camden (p. 502) notes it as coined by Leland. [T. H. D.]

VENASA (Οὐήνασα), a rather important town in the district of Morimene in Cappadocia, possessing a celebrated temple of Zeus, to which no less than 3000 slaves belonged. The high priest enjoyed an annual income of fifteen talents, arising from the produce of the lands belonging to the temple. This sacerdotal dignity was held for life, and the priest was next in rank to the high priest of Comana. (Strab. xii. p. 537.) [L. S.]

VENDUM (Οὐένδον, Strab. iii. p. 207, vii. p. 314), a town of the Iapodes in Illyria, and on the borders of Pannonia. It is probably the modern *Windisch-Grätz*; but some have identified it with *Brindjel*. [T. H. D.]

VE'NEDAE (Οὐενέδαι, Ptol. iii. 5. § 19), or VENEDI (Tac. *Germ.* 46; Plin. iv. 13. s. 27), a considerable people of European Sarmatia, situated on the N. declivity of the mountains named after them, and along the Sinus Venedicus about the river Chronos, and as far as the E. bank of the Vistula. They were the northern neighbours of the Galindae and Gythones; but Tacitus was doubtful whether he should call them Germans or Sarmatians, though they more resembled the former than the latter in some of their customs, as the building of houses, the carrying of shields, and the habit of going on foot, whilst the Sarmatians travelled on horseback or in waggons. They sought a precarious livelihood by scouring the woods and mountains which lay between the Peucini and the Fenni. Whether they were the forefathers of the Wends is very problematical. (Cf. Schaffarik, *Slav. Altherth.* i. p. 75, seq., p. 151, seq. &c., *Ueber die Abkunft der Slaven*, p. 24.) [T. H. D.]

VENEDICI MONTES (τὰ Οὐενεδικὰ ὄρη, Ptol. iii. 5. § 15), certain mountains of European Sarmatia, bounding the territory of the Venedae on the S. They were probably the low chain of hills which separates *East Prussia* from *Poland*. [T. H. D.]

VENEDICUS SINUS (Οὐενεδικὸς κόλπος, Ptol. iii. 5. § 1), a bay of the Sarmatian ocean, or *Baltic*, named after the Venedae who dwelt upon it. It lay to the E. of the Vistula, and was in all probability the *Gulf of Riga*; a view which is strengthened by the name of *Vindau* belonging to a river and town in *Courland*. [T. H. D.]

VE'NELI. [UNELLI.]

VENELIOCASII. [VELOCASSES.]

VE'NERIS MONS. [APHRODISIUS MONS.]

VE'NERIS PORTUS. [PORTUS VENERIS.]

VE'NERIS PROM. [HISPANIA, Vol. I. p. 1084.]

VE'NETI (Οὐένετοι), a Celtic people, whose country Caesar names Venetia (*B. G.* iii. 9). The Veneti lived on the coast of the Atlantic (*B. G.* ii. 34), and were one of the Armoric or Maritime states of Celtica. On the south they bordered on the Namnetes or Nannetes, on the east they had the Redones, and on the north the Osismii, who occupied the most western part of *Bretagne*. Strabo (iv. p. 195) made a great mistake in supposing the Veneti to be Belgae. He also supposes them to be the progenitors of the Veneti on the coast of the Hadriatic, whom others supposed to be Paphlagonians; however, he gives all this only as conjecture. The chief town of the Veneti was Dariorigum, afterwards Veneti, now *Vannes* [DARIORIGUM.] The river *Vilaine* may have been the southern boundary of the Veneti.

Caesar (*B. G.* iii. 9) describes the coast of Venetia as cut up by aestuaries, which interrupted the communication by land along the shore. Most of the towns (*Ib.* 12) were situated at the extremity of tongues of land or peninsulas, so that when the tide was up the towns could not be reached on foot, nor could ships reach them during the ebb, for the water was then too shallow. This is the character of the coast of the French department of *Morbihan*, which corresponds pretty nearly to Caesar's Venetia. On this coast there are many bays and many "lingulae" as Caesar calls them (*Pointes*). The most remarkable peninsula is *Quiberon*, which runs out into the sea near 10 miles, and is insulated at high water. The Veneti commanded the sea in these parts, and as the necessities of navigation often drove vessels to their ports, they made them pay for the shelter. The Veneti had trade with Britain, with *Devonshire* and *Cornwall*, the parts of the island which were nearest to them. They were the most powerful maritime state on the Atlantic.

Their vessels were made nearly flat-bottomed, in order that they might the better take the ground when they were left dry by the ebb. The heads were very high, and the sterns strong built, to stand the violence of their seas. The material was oak. Instead of ropes they had chain cables, the use of which has been revived in the present century. Strabo (iv. p. 195) writes as if the ropes of the rigging were chains, which is very absurd, and is contradicted by Caesar, who says that the yards were fastened to the masts by ropes, which the Romans cut asunder in the sea-fight with the Veneti (iii. 14). Instead of sails they used skins and leather worked thin, either because they had no flax and did not know its use, or, as Caesar supposes it to be more likely, because flaxen sails were not suited for the tempests of that coast.

The Veneti rose against the Romans in the winter of B. C. 57, and induced many other neighbouring states to join them, even the Morini and Menapii. They also sent to Britain for help. Caesar, who was absent in Italy during the winter (B.C. 57—56), sent orders to build ships on the *Loire*, probably in the territory of the Andes, Turones and Carnutes, where his legions were quartered, and the ships were floated down to the Ocean. He got his rowers from the Provincia. In the meantime he came himself into Gallia. He protected his rear against attack by sending Labienus to the country of the Treviri, to keep the Belgae quiet and to stop the Germans from crossing the Rhine. He sent P. Crassus with twelve cohorts and a large body of cavalry into Aquitania to prevent the Celtae from receiving any aid from these parts; and he kept the Unelli [UNELLI], Curiosolites and Lexovii in check by sending Q. Titurius Sabinus into those parts with three legions. D. Brutus commanded Caesar's fleet and the Gallic ships furnished by the Pictones and Santones, and other states that had been reduced to obedience.

Caesar began the campaign by besieging the Venetian towns that were situated on the extremities of the tongues of land; but as the Veneti had abundance of ships, they removed themselves by water from one town to another, when they could no longer resist the besieger. They did this during a great part of the summer, and Caesar could not prevent it, for he had not yet got together all his ships. After taking several of their towns he waited for the remainder of his fleet. The Veneti with about 220 of their best equipped ships came out of port to meet the Romans. The Roman ships could not do the Gallic ships any damage by driving the heads of their vessels against them, for the Gallic ships were too high at the prow and too strong; nor could the Romans have attacked them by raising wooden frameworks on their decks, for the Gallic ships were too high. The only advantage that the Roman ships had was in the oars, which the Gallic ships had not. They could only trust to their sails. The Romans at last fixed sharp hooks at the end of long poles, and laying hold of the enemy's rigging with them, and then putting their own vessels in motion by the oars, they cut the ropes asunder, and the yards and sails falling down, the Venetian ships were useless. Everything now depended on courage, in which the Romans had the advantage; and the men were encouraged by the presence of Caesar and the army, which occupied all the hills and higher ground which commanded a view of the sea. The Roman ships got round the Venetian, two or three about each, for they had the advantage in number of vessels, and the men began to board the enemy. Some ships were taken and the rest tried to sail away, but a dead calm came on and they could not stir. A very few ships escaped to the land at nightfall. The battle lasted from the fourth hour in the morning to sunset. Thus was destroyed the first naval power that was formed on the coast of the Atlantic. The Veneti lost their ships, all their young men of fighting age, and most of their men of mature age and of rank. They surrendered unconditionally. Caesar put to death all the members of the Venetian state assembly, on the ground that they had violated the law of nations by imprisoning Q. Velanius and T. Silius, who had been sent into their country in the previous winter to get supplies for the Roman troops who were quartered along the *Loire* (*B. G.* iii. 7, 8). The rest of the people were sold by auction; all, we must suppose, that Caesar could lay hold of. Thus the territory of the Veneti was nearly depopulated, and an active commercial people was swept from the earth. The Veneti never appear again as a powerful state. When Vercingetorix was rousing all Gallia to come against Caesar at Alesia (B.C. 52), the contingent of all the Armoric states, seven or eight in number, was only 6000 men (*B. G.* vii. 75).

Dion Cassius (xxxix. 40—43) has four chapters on the history of this Venetian war, which, as usual with him, he puts in confusion, by misunderstanding Caesar and making his own silly additions. [G. L.]

VENETIA (Οὐενετία: *Eth.* Οὐένετος or Ἕνετος, Venetus), a province or region of Northern Italy, at the head of the Adriatic sea, extending from the foot of the Alps, where those mountains descend to the Adriatic, to the mouths of the Padus, and westward as far as the river Athesis (*Adige*), or the lake Benacus. But the boundaries of the district seem to have varied at different times, and there is some difficulty in determining them with accuracy. In early times, indeed, before the Roman conquest, we have no account of the exact line of demarcation between the Veneti and the Cenomani, who adjoined them on the W., though according to Livy, Verona was a city of the latter people (v. 35). After the Roman conquest, the whole of Venetia was at first included as a part of Cisalpine Gaul, and was not separated from it till the time of Augustus, who constituted his Tenth Region of Venetia and Istria, but including within its limits not only Verona, but Brixia and Cremona also (Plin. iii. 18. s. 22, 19. s. 23), both of which were certainly cities of the Cenomani, and seem to have continued to be commonly considered as belonging to Cisalpine Gaul. (Ptol. iii. 1. § 31.) Some authors, however, extended the appellation of Venetia still further to the W., so as to include not only Brixia and Cremona, but Bergomum also, and regarded the Addua as the boundary

(P. Diac. *Hist. Lang.* ii. 14). But in the later period of the Roman Empire the Athesis seems to have been generally recognised as the W. boundary of Venetia, though not so strictly as to exclude Verona, the greater part of which was situated on the right bank of the river. Towards the N. the boundary was equally indefinite: the valleys and southern slopes of the Alps were occupied by Rhaetian and Euganean tribes; and it is probable that the limit between these and the Veneti, on their S. frontier, was always vague and arbitrary, or at least determined merely by nationality, not by any geographical boundary, as is the case at the present day with the German and Italian races in the same region. Thus Tridentum, Feltria, and Belunum, were all of them properly Rhaetian towns (Plin. iii. 19. s. 23), though included in the Tenth Region of Augustus, and for that reason often considered as belonging to Venetia.

On the E. the limits of Venetia were more definite. The land of the Carni, who occupied the greater part of the modern *Frioul*, was generally considered as comprised within it, while the little river Formio (*Risano*), a few miles S. of Tergeste, separated it from Istria. (Plin. iii. 18. s. 22.) Several authors, however, regard Tergeste as an Istrian city [TERGESTE], and must therefore have placed the boundary either at the Timavus, or where the Alps come down so close to the sea, between that river and Tergeste, as to prevent the road being continued along the coast. There can be no doubt that this point forms the natural boundary of Venetia on the E., although the Formio continued under the Roman Empire to constitute its political limit.

The physical peculiarities of the region thus limited are very remarkable. The greater part of Venetia is, like the neighbouring tract of Cisalpine Gaul, a broad and level plain, extending, without interruption, to the very foot of the Alps, and furrowed by numerous streams, which descend from those mountains with great rapidity and violence. These streams, swollen by the melting of the Alpine snows, or by the torrents of rain which descend upon the mountains, as soon as they reach the plain spread themselves over the country, forming broad beds of sand and pebbles, or inundating the fertile tract on each side of their banks. Continually stagnating more and more, as they flow through an almost perfectly level tract, they form, before reaching the sea, considerable sheets of water; and the action of the tides (which is much more perceptible at the head of the Adriatic than in any other part of that sea or of the Mediterranean) combining to check the outflow of their waters, causes the formation of extensive salt-water lagunes, communicating with the sea only through narrow gaps or openings in the long line of sandy barriers that bounds them. Such lagunes, which occupy a great extent of ground S. of the present mouth of the *Po* [PADUS], are continued on from its N. bank to the neighbourhood of Altinum; and from thence, with some interruptions, to the mouth of the *Isonzo*, at the head or inmost bight of the Adriatic. So extensive were they in ancient times that there was an uninterrupted line of inland navigation by these lagunes, which were known as the Septem Maria, from Ravenna to Altinum, a distance of above 80 miles. (*Itin. Ant.* p. 126.) Great physical changes have naturally taken place in the course of ages in a country so constituted. On the one hand there is a constant tendency to the filling up of the lagunes with the silt and mud brought down by the rivers, which converts them first into marshes, and eventually into firm land. On the other hand the rivers, which have for ages been confined within artificial banks, keep pushing on their mouths into the sea, and thus creating backwaters which give rise to fresh lagunes. At the same time, the rivers thus confined, from time to time break through their artificial barriers and force new channels for themselves; or it is found necessary to carry them off by new and artificial outlets. Thus all the principal streams of Venetia, from the *Adige* to the *Piave*, are at the present day carried to the sea by artificial canals; and it is doubtful whether any of them have now the same outlet as in ancient times.

In the eastern portion of Venetia, from the *Piave* to the foot of the Alps near Aquileia, these physical characters are less marked. The coast is indeed bordered by a belt of marshes and lagunes, but of no great extent: and within this, the rivers that descend from the Alps have been for the most part left to wander unrestrained through the plain, and have in consequence formed for themselves broad beds of stone and shingle, sometimes of surprising extent, through which the streams in their ordinary condition roll their diminished waters, the trifling volume of which contrasts strangely with the breadth and extent of their deposits. Such is the character especially of the *Tagliamento*, the largest river of this part of Italy, as well as of the *Torre*, the *Natisone*, and other minor streams. The irregularity of their channels, resulting from this state of things, is sufficiently shown by the fact that the rivers Turrus and Natiso, which formerly flowed under the walls of Aquileia, have now changed their course, and join the *Isonzo* at a distance of more than 4 miles from that city. [AQUILEIA.]

Of the history of Venetia previous to the Roman conquest we know almost nothing. It was occupied at that time by two principal nations, the VENETI from whom it derived its name, in the W., and the CARNI in the E.; the former extending from the Athesis to the Plavis, or perhaps to the Tilavemptus, the latter from thence to the borders of Istria. But the origin and affinities of the Veneti themselves are extremely obscure. Ancient writers represent them as a very ancient people (Polyb. ii. 17), but at the same time are generally agreed that they were not the original inhabitants of the tract that they occupied. This was reported by tradition to have been held in the earliest ages by the Euganeans (Liv i. 1), a people whom we still find lingering in the valleys and underfalls of the Alps within the historical period, but of whose origin and affinities we know absolutely nothing. [EUGANEI.] In regard to the Veneti themselves it cannot fail to be remarked that we meet with three tribes or nations of this name in other parts of the world, besides those of Italy, viz. the Gaulish tribe of the Veneti on the coast of Armorica; the Venedi or Veneti of Tacitus, a Sarmatian or Slavonian tribe on the shores of the Baltic; and the Heneti or Eneti, who are mentioned as existing in Paphlagonia in the time of Homer. (*Iliad*, ii. 85.) The name of this last people does not subsequently appear in history, and we are therefore wholly at a loss as to their ethnical affinities, but it is not improbable that it was the resemblance or rather identity of their name with that of the Italian Veneti (according to the Greek form of the latter) that gave rise to the strange story of Antenor having migrated to Venetia after the siege of Troy, and there founded the city of Patavium. (Liv. i. 1; Virg. *Aen.* i. 242; Serv. *ad loc.*) This legend, so generally adopted by the Romans and later Greeks, seems to have been current as early as the time of Sophocles. (Strab. xiii. p. 608.) Some writers, however, omitted all mention of Antenor, and merely represented the tribe of the Heneti, after having lost their leader Pylaemenes in the Trojan War, as wandering through Thrace to the head of the Adriatic, where they ultimately established themselves. (Id. xii. p. 543; Scymn. Ch. 389.) Whether there be any foundation for this story or not, it is evident that it throws no light upon the national affinities of the Italian Veneti. The other two tribes of the same name would seem to lead our conjectures in two different directions. From the occurrence of a tribe of Veneti among the Transalpine Gauls, just as we find among that people a tribe of Cenomani and of Senones, corresponding to the two tribes of that name on the Italian side of the Alps, it would seem a very natural inference that the Veneti also were a Gaulish race, who had migrated from beyond the Alps. To this must be opposed the fact that, while a distinct historical tradition of the successive migrations of the Gaulish tribes in the N. of Italy has been preserved and transmitted to us (Liv. v. 34, 35), no trace is recorded of a similar migration of the Veneti; but, on the contrary, that people is uniformly distinguished from the Gauls: Livy expressly speaks of them as occupying the same tract which they did in his time not only before the first Gaulish migration, but before the plains of Northern Italy were occupied by the Etruscans (*Ib.* 33); and Polybius emphatically, though briefly, describes them as a different people from the Gauls their neighbours, and using a different language, though resembling them much in their manners and habits (ii. 17). Strabo also speaks of them as a distinct people from the Gauls, though he tells us that one account of their origin derived them from the Gaulish people of the same name that dwelt on the shores of the ocean. (Strab. iv. p. 195, v. p. 212.) But there is certainly no ground for rejecting the distinct statement of Polybius, and we may safely acquiesce in the conclusion that they were *not* of Celtic or Gaulish origin.

On the other hand the existence of a tribe or people on the southern shores of the Baltic, who were known to the Romans (through their German neighbours) as Venedi or Veneti, a name evidently identical with that of the *Wenden* or *Wends*, by which the Slavonian race in general is still known to the Germans, would lead us to regard the Italian Veneti also as probably a Slavonian tribe: and this seems on the whole the most plausible hypothesis. There is nothing improbable in the circumstance that the Slavonians may at an early period have extended their migrations as far as the head of the Adriatic, and left there a detached branch or offshoot of their main stock. The commercial intercourse of the Veneti with the shores of the Baltic, a traffic which we find already established at a very early period, may be the more readily explained if we suppose it to have been carried on by tribes of the same origin. Herodotus indeed represents the Veneti as an Illyrian tribe (i. 196, v. 9); but it seems probable that the name of Illyrians was applied in a vague sense to all the mountaineers that occupied the eastern coasts of the Adriatic, and some of these may in ancient times have been of Slavonian origin, though the true Illyrians (the ancestors of the present Albanians) were undoubtedly a distinct people.

Of the history of the Veneti as an independent people we know almost nothing; but what little we do learn indicates a marked difference between them and their neighbours the Gauls on one side, and the Liburnians and Illyrians on the other. They appear to have been a commercial, rather than a warlike, people: and from the very earliest dawn of history carried on a trade in amber, which was brought overland from the shores of the Baltic, and exchanged by them with Phoenician and Greek merchants. Hence arose the fables which ascribed the production of that substance to the land of the Veneti, and ultimately led to the identification of the Eridanus of Northern Europe with the Padus of Northern Italy. [ERIDANUS.] Herodotus mentions a peculiar custom as existing among the Veneti in his day, that they sold their daughters by auction to the highest bidder, as a mode of disposing of them in marriage (i. 196). We learn also that they habitually wore black garments, a taste which may be said to be retained by the Venetians down to the present day, but was connected by the poets and mythographers with the fables concerning the fall of Phaëton. (Scymn. Ch. 396.) Another circumstance for which they were distinguished was the excellence of their horses, and the care they bestowed on breeding and training them, a fact which was appealed to by many as a proof of their descent from Antenor and "the horsetraining Trojans." (Strab. v. pp. 212, 215.) It is clear that they were a people considerably more advanced in civilisation than either the Gauls or the Ligurians, and the account given by Livy (x. 2) of the landing of Cleonymus in the territory of Patavium (B.C. 302) proves that at that period Patavium at least was a powerful and well organised city. Livy indeed expressly contrasts the Veneti with the Illyrians, Liburnians, and Istrians, "gentes ferae et magna ex parte latrociniis maritimis infames." (*Ib.*) On this occasion we are told that the citizens of Patavium were kept in continual alarm on account of their Gaulish neighbours, with whom they seem to have been generally on unfriendly terms. Thus at a still earlier period we are informed by Polybius that the retreat of the Senonian Gauls, who had taken the city of Rome, was caused by an irruption of the Venetians into the Gaulish territory (ii. 18). It was doubtless this state of hostility that induced them, as soon as the Roman arms began to make themselves felt in Northern Italy, to conclude an alliance with Rome against the Gauls (B.C. 215), to which they appear to have subsequently adhered with unshaken fidelity. (Polyb. ii. 23, 24.) Hence while we afterwards find the Romans gradually carrying their arms beyond the Veneti, and engaged in frequent hostilities with the Carni and Istrians on the extreme verge of Italy, no trace is found of any collision with the Venetians. Nor have we any account of the steps by which the latter passed from the condition of independent allies to that of subjects of the Roman Republic. But it is probable that the process was a gradual one, and grew out of the mere necessity of the case, when the Romans had conquered Istria and the land of the Carni, in which last they had established, in B.C. 181, the powerful colony of Aquileia. It is certain that before the close of the Republic the Veneti had ceased to have any independent existence, and were comprised, like the Gaulish tribes, in the province of Gallia Cisalpina, which was placed under the authority of Caesar, B.C.

59. The period at which the Veneti acquired the Roman franchise is uncertain: we are only left to infer that they obtained it at the same time as the Transpadane Gauls, in B. C. 49. (Dion Cass. xli. 56.)

Under the Roman Empire, Venetia (as already mentioned) was included, together with Istria, in the Tenth Region of Augustus. The land of the Carni (Carnorum regio, Plin. iii. 18. s. 22) was at this time considered, for administrative purposes, as a part of Venetia; though it is still described as distinct by Ptolemy (iii. 1. §§ 25, 26); and there is no doubt that the two nations were originally separate. But as the population of both districts became thoroughly Romanised, all traces of this distinction were lost, and the names of Venetia and Istria alone remained in use. These two continued to form one province, aud we meet with mention, both in inscriptions and in the Notitia, of a "Corrector Venetiae et Histriae," down to the close of the Roman Empire. (*Notit. Dign.* ii. p. 65; Böcking, *ad loc.* p. 441; Orell. *Inscr.* 1050, 3191.) The capital of the united provinces was Aquileia, which rose under the Roman Empire to be one of the most flourishing cities of Italy. Its importance was derived, not from its wealth and commercial prosperity only, but from its situation at the very entrance of Italy, on the highroad which became the great means of communication between the Eastern and Western Empires. The same circumstance led to this part of Venetia becoming the scene of repeated contests for power between rival emperors. Thus it was before Aquileia that the Emperor Maximin perished in A.D. 238; it was on the banks of the river Alsa (*Avsa*) that the younger Constantine was defeated and slain, in A.D. 340; again, in 388, the contest between Maximus and Theodosius the Great was decided in the same neighbourhood; and in 425, that between the usurper Joannes and the generals of Theodosius II. [AQUILEIA.] Finally, in A. D. 489, it was on the river Sontius (*Isonzo*) that Odoacer was defeated by the Gothic king Theodoric. (*Hist. Miscell.* xvi. p. 561.)

It seems certain that Venetia had become under the Roman Empire a very opulent and flourishing province: besides Aquileia, Patavium and Verona were provincial cities of the first class; and many other towns such as Concordia, Altinum, Forum Julii, &c., whose names are little known in history, were nevertheless opulent and considerable municipal towns. But it suffered with peculiar severity from the inroads of the barbarians before the close of the Empire. The passage across the Julian Alps from the valley of the *Save* to the plains of Aquileia, which presents few natural difficulties, became the highway by which all the barbarian nations in succession descended into the plains of Italy; and hence it was Venetia that felt the first brunt of their fury. This was especially the case with the invasion of Attila in A. D. 452, who, having at length reduced Aquileia after a long siege, razed it to the ground; and then, advancing with fearful rapidity, devastated in like manner the cities of Concordia, Altinum, Patavium, Vicentia, Verona, Brixia, and Bergomum, not one of which was able to oppose any effectual resistance. (*Hist. Miscell.* xv. p. 549.) The expression of the chronicler that he levelled these cities with the ground is probably exaggerated; but there can be no doubt that they suffered a blow from which three of them at least, Concordia, Altinum, and Aquileia, never recovered. In the midst of this devastation many fugitives from the ruined cities took refuge in the extensive lagunes that bordered the coasts of Venetia, and established themselves on some small islands in the midst of the waters, which had previously been inhabited only by fishermen. It was thus that the refugees from Aquileia gave origin to the episcopal city of *Grado*, while those from Patavium settled on a spot then known as Rivus Altus, in the midst of the lagunes formed by the Meduacus, where the new colony gradually grew up into a wealthy city and a powerful republic, which retained the ancient name of the province in that of *Venezia* or *Venice*. "This emigration (observes Gibbon) is not attested by any contemporary evidence; but the fact is proved by the event, and the circumstances might be preserved by tradition." (*Decl. and Fall*, ch. 35, note 55.) A curious letter of Cassiodorus (*Var.* xii. 24), written in A. D. 523, describes the islands of Venetia as inhabited by a population whose sole occupation and resource was derived from their fisheries: and it is remarkable, that he already appears to confine the appellation of Venetia to these islands, an usage which had certainly become prevalent in the time of Paulus Diaconus, who says, in speaking of the ancient province, "Venetia enim non solum in paucis insulis, *quas nunc Venetias dicimus*, constat" (ii. 14). It is clear, therefore, that the transfer the name of the province to the island city, which has continued ever since, was established as early as the eighth century.

The original land of the Veneti, as already observed, was almost entirely a plain. The underfalls of the Alps, and the hills that skirt the foot of that range, were for the most part inhabited by tribes of mountaineers, who were of the same race with the Rhaetians and Euganeans, with whom, so far as we can discover, the Veneti themselves had nothing in common. But a portion of this district was comprised within the limits of the province of Venetia, as this came to be marked out under Augustus; so that the boundary line between Venetia and Rhaetia was carried apparently from the head of the Lake Benacus (*Lago di Garda*) across the valley of the Athesis (*Adige*) to the ridge which separates the valley of the Plavis from that of the Meduacus, so as to exclude the *Val Sugana*, while it included the whole valley of the *Piave* (Plavis), with the towns of Feltria and Belunum, both of which are expressly ascribed by Pliny to the Tenth Region. Thence the boundary seems to have followed the ridge which divides the waters that fall into the Adriatic from the valleys of the *Drave* and *Gail*, both of which streams flow eastward towards the Danube, and afterwards swept round in a semicircle, till it nearly touched the Adriatic near *Trieste* (Tergeste).

Within these limits, besides the underfalls of the Alps that are thrust forward towards the plain, there were comprised two distinct groups of hills, now known as the *Colli Euganei* and *Monti Berici*, both of them wholly isolated from the neighbouring ranges of the Alps, and, in a geological sense, unconnected with them, being both clearly of volcanic origin. The name of the Euganean hills, applied to the more southerly of the two groups, which approaches within a few miles of Patavium (*Padova*), is evidently a relic of the period when that people possessed the greater part of this country, and is doubtless derived from a very early time. The appellation is not noticed by any ancient geographer, but the name of Euganeus Collis is given by Lucan to the hill above the baths of Aponus, one of the group in question; and Martial gives the name of "Euganeae Orae" to the hills near the town of Ateste (*Este*), at the southern extremity of the same range. (Lucan. vii. 192; Martial. x. 93). There can, therefore, be no doubt that this beautiful range of hills was known in ancient times as the Euganei Colles.

The rivers of Venetia are numerous, but, for the reasons already mentioned, not always easy to identify. Much the largest and most important is the Athesis (*Adige*), which at one period formed the boundary of the province, and which, emerging from the Alps, near Verona, sweeps round in a great curve till it pours its waters into the Adriatic only a few miles N. of the mouths of the Padus. The next river of any magnitude is the Meduacus or *Brenta*, which flows under the walls of Patavium, and receives as a tributary the *Bacchiglione*, apparently the Meduacus Minor of Pliny. After this (proceeding eastwards) comes the Silis (*Sele*), a small stream flowing by the town of Altinum: next, the Plavis (*Piave*), a much more important river, which rises in the Alps above Belunum (*Belluno*), flows past that city and Feltria (*Feltre*), and enters the sea a few miles E. of Altinum: then the Liquentia (*Livenza*), and the Romatinus (*Lemene*), a small river flowing under the walls of Concordia. Next to this comes the Tilavemptus (*Tagliamento*), the most important of the rivers of the E. portion of Venetia, having its sources in the high ranges of the Alps above Julium Carnicum, whence it traverses the whole plain of the Carni, nearly in a direct line from N. to S. Beyond this come several minor streams, which it is not easy to identify with certainty: such are the Varanus and Anassus of Pliny, probably the *Stella* and the torrent of *Cormor*; and the Alsa, which still bears the name of *Ausa*. E. of these, again, come three considerable streams, the Turrus, Natiso, and Sontius, which still preserve their ancient names, as the *Torre*, *Natisone*, and *Isonzo*, but have undergone considerable changes in the lower part of their course, the Natiso having formerly flowed under the walls of Aquileia, about 4 miles W. of its present channel, while the *Isonzo*, which now unites with it, originally followed an independent channel to the sea, near *Monfalcone*. The *Isonzo* receives a considerable tributary from the E., the *Wippach* or *Vipao*, which descends from the elevated table-land of the *Karst*, and was known in ancient times as the Fluvius Frigidus. It was by the valley of this river that the great highroad from the banks of the Danube, after crossing the dreary highlands of *Carniola*, descended to Aquileia and the plains of Venetia. On the extreme confines of the province the little river Timavus must be mentioned, on account of its classical celebrity, though of no geographical importance; and the Formio (*Risano*), a few miles S. of Tergeste, which, from the time of Pliny, constituted the limit between Venetia and Istria. (Plin. iii. 18. s. 22.)

The cities and towns of Venetia may now be enumerated in geographical order. Farthest to the W., and situated on the Athesis, was the important city of Verona. Considerably to the E. of this was Vicentia, and beyond that again, Patavium. S. of Vicentia, at the southern extremity of the Euganean hills, was Ateste (*Este*). On the border of the lagunes, at their N. extremity, was Altinum, and 30 miles farther to the E., Concordia. Inland from these lay Opitergium and Tarvisium, both of them considerable towns; and on the slopes of the hills forming the lowest underfalls of the Alps, the smaller towns of Acelum (*Asolo*) and Ceneta (*Ceneda*), the name of which is found in Agathias and Paulus Diaconus (Agath. *Hist. Goth.* ii. 8; P. Diac. ii. 13), and was in all probability a Roman town, though not mentioned by any earlier writer. Still farther inland, in the valley of the Plavis, were Feltria and Belunum. E. of the Tilavemptus, and therefore included in the territory of the Carni, were Aquileia, near the sea-coast; Forum Julii, N. of the preceding; Vedinum (*Udine*), farther to the W.; and Julium Carnicum, in the upper valley of the Tilavemptus, and in the midst of the Alps. Tergeste, on the E. side of the bay to which it gave its name, was the last city of Venetia, and was indeed by many writers considered as belonging to Istria. [Tergeste].

Besides these, there were in the land of the Carni several smaller towns, the names of which are mentioned by Pliny (iii. 19. s. 23.), or are found for the first time in Paulus Diaconus and the Geographer of Ravenna, but were in all probability Roman towns, which had grown up under the Empire. Of these, Flamonia (Plin.) is probably *Flagogna*, in the valley of the *Tagliamento*; Osopum (P. Diac. iv. 38) is still called *Osopo*, and Glemona, *Gemona*, higher up in the same valley; and Artemia, *Artegna*, a few miles SE. of the preceding. Cormones (*ib.*) is still called *Cormons*, a small town between *Cividale* and *Gradisca*; and Pucinum (Plin., Ptol.) is *Duino*, near the sources of the Timavus.

The other obscure names mentioned by Pliny (*l. c.*), and of which he himself says, "quos scrupulose dicere non attineat," were apparently for the most part mountain tribes or communities, and cannot be determined with any approach to certainty.

Venetia was traversed by a great line of highroad, which proceeded from Aquileia to Verona, and thence to Mediolanum, and formed the great highway of communication from the latter city to the Danube and the provinces of the Eastern Empire. It passed through Concordia, Altinum, Patavium, Vicentia, and Verona. From Patavium a branch struck off through Ateste and Anneianum (probably *Legnago* on the *Adige*) to join the Aemilian Way at Mutina. A still more direct line of communication was established from Altinum to Ravenna by water, through the lagunes and artificial canals which communicated from one to another of these sheets of water. This line of route (if such it can be called) is briefly indicated by the Antonine Itinerary ("inde [a Ravenna] navigantur Septem Maria Altinum usque," p. 126); while the stations are given in detail by the Tabula; but from the fluctuations that the lagunes have undergone, few of them can be identified with any certainty. [E. H. B.]

VENETIA, in Gaul. [Veneti.]

VENETICAE INSULAE, in Gallia, mentioned by Pliny (iv. 19), are the numerous small islands along the coast of Venetia, or the modern department of *Morbihan*. The largest is *Belle-île*. The others are *Houat*, *Hedic*, *Groain*, and some others. Perhaps the peninsula of *Quiberon* may be included [Veneti; Vindilis]. [G. L.]

VENETUS LACUS. [Brigantinus Lacus.]

VENIA'TIA, a place in Gallaecia in Hispania Tarraconensis, on the road from Bracara to Asturica. (*Itin. Ant.* p. 423.) Variously identified with *Vinhaes*, *Varzana*, and *Requejo*. [T. H. D.]

VENICO'NES (Οὐενίκωνες, Ptol. ii. 3. § 14), a people on the E. coast of Britannia Barbara, S. of the estuary of the Tuaesis (*Murray Frith*), in *Forfarshire* and *Aberdeenshire*. [T. H. D.]

VENNENSES, a tribe of the Cantabri in Hispania Tarraconensis. (Plin. iii. 3. s. 4.) [T.H.D.]

VENNI'CNII (Οὐεννίκνιοι, Ptol. ii. 2. § 3), a people in the NW. part of Hibernia, between the promontories Boreum and Vennicnium. [T. H. D.]

VENNI'CNIUM PROM. (Οὐεννίκνιον ἄκρον, Ptol. ii. 2. § 2), the most northerly headland of Hibernia, usually identified with *Malin Head*; but Camden (p. 1411) takes it to have been *Rame's Head*. [T. H. D.]

VE'NNONES (Οὐέννονες or Οὐίννονες), a tribe of Rhaetia (Ptol. ii. 12. § 3), or according to Strabo (iv. pp. 204, 206), of Vindelicia. They are described as the wildest among the Rhaetian tribes, and are no doubt the same as the Vennonetes who, according to Pliny (iii. 24), were mentioned among the nations of the Alpine Trophy. They seem to have inhabited the district about the sources of the Athesis, which bore the name of Venonesgowe or Finesgowe as late as the eleventh century. (Von Hormayr, *Gesch. Tirols*, i. 1. p. 35.) [L. S.]

VENONAE, a town in Britannia Romana apparently belonging to the Coritavi, at which the road from London to the NW. part of Britain separated, one branch proceeding towards Deva, the other taking a NE. direction towards Lindum and Eboracum. There was also another branch to the SW. towards Venta Silurum, so that the two main roads which traversed the whole island must have crossed here. (*Itin. Ant.* pp. 470, 477, 479.) Variously identified with *Highcross*, *Claybrook*, and *Wigston Parva*. [T. H. D.]

VENOSTES, probably a branch of the Vennones, a Rhaetian tribe, were mentioned in the Alpine Trophy, of which the inscription is quoted by Pliny (iii. 24). In the middle ages their district bore the name of Venusta Vallis. (Zeuss, *Die Deutschen*, p. 237.) [L. S.]

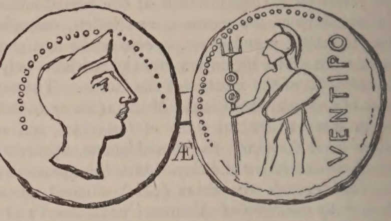
VENTA, the name of several towns in Britannia Romana. 1. Venta Belgarum (Οὔεντα, Ptol. ii. 3. § 28), in the SW. of Britain, on the road from Londinium to Calleva and Isca Dumnoniorum. (*Itin. Ant.* p. 478, &c.; Geogr. Rav. v. 31.) Now *Winchester*, where there are some Roman remains. (Camden, p. 138.)

2. Venta Silurum on the W. coast of Britannia Romana, on the road from Londinium to Isca Silurum, and near the estuary of the Sabrina. (*Itin. Ant.* p. 485.) Now *Caer Went* in *Monmouthshire*, where there are traces of the ancient walls, and where Roman antiquities are (or were) occasionally found. (Camden, p. 713.)

3. Venta Icenorum, a town of the Iceni, on the E. coast of Britannia Romana (Ptol. ii. 3. § 21), to which there was a road from London. (*Itin. Ant.* p. 479.) Most probably *Caistor*, on the river *Wensum*, a little S. of *Norwich*, which probably rose from the ruins of *Caistor*. Here are traces of Roman remains. (Camden, p. 460.) [T. H. D.]

VE'NTIA (Οὐεντία), in Gallia Narbonensis, a town of the Allobroges, mentioned only by Dion Cassius (xxxvii. 47) in his history of the war between the Allobroges and C. Pomptinus the governor of Gallia Provincia (B.C. 62). Manlius Lentinus, a legatus of Pomptinus, came upon this town, but was driven from it. The place appears to be near the Isara (*Isère*) from Dion's narrative, and D'Anville following De Valois supposes it to be *Vinai*, between *Moirenc* and *S. Marcellin*, at some distance from the bank of the *Isère*. As Ventia is unknown otherwise, it may be a blunder of Dion, and the place may be Vienna. [G. L.]

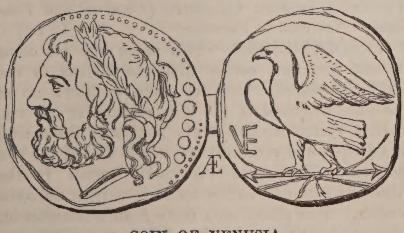
VENTISPONTE, a town in Hispania Baetica (Hirt. *B. Hisp.* 27), which appears from still extant inscriptions to have been not far from *Puente de Don Gonzalo*. (Ukert, ii. pt. i. p. 368.) It appears on coins under the name of Ventipo. (Florez, *Med.* ii. p. 617; Eckhel, i. p. 31; Mionnet, i. p. 27; Sestini, p. 92.) [T. H. D.]



COIN OF VENTISPONTE OR VENTIPO.

VENUSIA (Οὐενουσία: *Eth.* Venusinus: *Venosa*), a city of Apulia, situated on the Appian Way, about 10 miles S. of the river Aufidus. It nearly adjoined the frontiers of Lucania, so that, according to Horace, himself a native of the place, it was doubtful whether it belonged properly to Lucania or to Apulia, and the territory of the city, as assigned to the Roman colony, included a portion of that of both nations. (Hor. *Sat.* ii. 1. 34, 35.) This statement of Horace leaves it doubtful to what people Venusia originally belonged, though it is more probable that it was an Apulian city, and that it received only an accession of territory from Lucania. Later writers, indeed, distinctly assigned it to Apulia. (Plin. iii. 11. s. 16; Ptol. iii. 1. § 73; *Lib. Colon.* p. 210.) But no mention of it is found in history till the occasion of its capture by the Roman consul L. Postumius, in B. C. 262 (Dionys. *Exc. Vales.* p. 2335), when we are told that it was a populous and important town. A large part of the inhabitants was put to the sword, and, shortly afterwards, a Roman colony was established there by order of the senate. (Dionys. *l. c.*; Vell. i. 14; Hor. *l. c.*) The colonists are said to have been 20,000 in number, which must be either a mistake or an exaggeration; but there seems no doubt that the new colony became a populous and flourishing place, and was able to render important services to the Roman state during the Second Punic War. It was at Venusia that the consul Terentius Varro took refuge with 700 horse after the great defeat at Cannae (B. C. 216), and where he was gradually able to gather around him a force of about 4000 horse and foot. The Venusians vied with one another in showing them the utmost attention, and furnished them with clothing, arms, and other necessaries. (Liv. xxii. 49, 54; Polyb. iii. 116, 117.) Again, at a later period of the war, when so many of the Roman colonies proved unable to satisfy the repeated demands of the senate, the Venusians were among those who continued steadfast, and declared themselves ready to furnish the troops and supplies required of them. (Liv. xxvii. 10.) It was after this, through several successive campaigns, the head-quarters of the Roman commanders in Apulia. (*Ib.* 20, 41; Appian, *Annib.* 50.) But the colony suffered severely from all these exertions, and, in B. C. 200, after the close of the war, it was found necessary to recruit its exhausted strength with a fresh body of colonists. (Liv. xxxi. 49.) From this time Venusia seems to have always continued to be a flourishing town and one of the most considerable places in this part of Italy. It bore an important part in the Social War, having early joined in the outbreak, and became one of the principal strongholds of the allies in the south of Italy. (Appian, *B. C.* i. 39, 42.) In the second year of the war its territory was ravaged by the Roman praetor Cosconius, but we do not learn that the city itself fell into his hands. (*Ib.* 52.) At all events it did not suffer severely, as it is afterwards mentioned by Appian as one of the most flourishing cities of Italy (*Ib.* iv. 3); and Strabo also notices it as one of the few cities in this region which retained their consideration in his time (v. p. 250). It received a colony of veterans under the Triumvirate (Appian, *B. C.* iv. 3; Zumpt, *de Colon.* p. 332), and seems to have retained the rank of a Colonia under the Empire, as we find it bearing that designation both in Pliny and in inscriptions. (Plin. iii. 11. s. 16; Orell. *Inscr.* 867; Mommsen, *Inscr. R. N.* 735, 745.) Its position on the Appian Way doubtless contributed to its prosperity, and it is mentioned more than once by Cicero as a customary halting-place in proceeding from Rome to Brundusium. (Cic. *ad Att.* v. 5, xvi. 5.) It appears indeed that the great orator had himself a villa there, as one of his letters is dated "de Venusino" (*ad Fam.* xiv. 20). But the chief interest of Venusia is undoubtedly derived from its having been the birthplace of Horace, who was born there in the consulship of L. Manlius Torquatus and L. Aurelius Cotta, B. C. 65. (Hor. *Carm.* iii. 21. 1.) The works of the poet abound in allusions to the neighbourhood of his native city, the fountain of Bandusia, the forests of Mount Vultur, &c. But it does not appear that he ever resided there in the latter years of his life, having lost his paternal estate, which was confiscated in the civil wars. (Id. *Ep.* ii. 2.)

We hear nothing of Venusia under the Roman Empire, but it is certain from the Liber Coloniarum, which mentions it among the Civitates Apuliae, and from the Itineraries, that it continued to exist as a city, and apparently one of the most considerable in this part of Italy. (Ptol. iii. 1. § 73; *Lib. Colon.* pp. 210, 261; *Itin. Ant.* pp. 104, 113, 121; *Tab. Peut.*) This is further confirmed by inscriptions, in one of which it is called "splendida civitas Venusinorum." (Mommsen, *I. R. N.* 706.) It retained the same consideration throughout the middle ages, and is still an episcopal city with about 6000 inhabitants. Its antiquities have been illustrated with a profusion of erudition by Italian writers, but it has few ancient remains of much interest; though fragments of ancient edifices, mosaic pavements, &c. have been found on the site, as well as numerous inscriptions. These last have been collected and published by Mons. Lupoli, in his *Marmora Venusina* (added as an appendix to the *Iter Venusinum*, 4to. Neapoli, 1797), and more recently by Mommsen, in his *Inscriptiones Regni Neapolitani* (pp. 39—48). Concerning the antiquities of Venusia in general, see the work of Lupoli above quoted, and that of Cimaglia (*Antiquitates Venusinae*, 4to. Neapol. 1757.) [E. H. B.]



COIN OF VENUSIA.

VEPITENUM or VIPITENUM, a place in the district occupied by the Venostes in Rhaetia, between Veldidena and Tridentum. (*It. Ant.* pp. 275, 280; *Tab. Peut.*) Its modern representative is, in all probability, the town of *Sterzing* on the *Eisach*, at the foot of the *Brenner*. [L. S.]

VERAGRI (Οὐάραγροι). The Veragri are placed by Caesar (*B. G.* iii. 1, 6) in the *Valais* of Switzerland between the Nantuates and the Seduni, [NANTUATES; SEDUNI]. Their town was Octodurus (*Martigny*), whence the Veragri are called Octodurenses by Pliny [OCTODURUS]. Dion Cassius (xxxix. 5), using Caesar as he generally used him, says that the Veragri extended from the territory of the Allobroges and the Leman lake to the Alps; which is not true. Strabo (iv. p. 204) mentions the Varagri, as he calls them, between the Caturiges and the Nantuatae; and Pliny (iii. 20) between the Seduni and the Salassi: the Salassi are on the Italian side of the Alps in the *Val d'Aosta*. Livy (xxi. 38) places the Veragri among the Alps and on the road to the pass of the Pennine Alps, or the Great St. Bernard, which is correct. He says that the pass was occupied by half German tribes. [G. L.]

VERBANUS LACUS (ἡ Οὐερβανὸς λίμνη: *Lago Maggiore*), one of the principal lakes of Northern Italy, formed by the river Ticinus, where it first issues from the valleys of the Alps. (Plin. iii. 19. s. 24.) It is the largest of the three great lakes of Northern Italy, whence its modern name of *Lago Maggiore;* though Virgil appears to have considered the Larius as the largest, as he calls it, "Te, Lari maxime," and singularly enough does not mention the Verbanus at all. (*Georg.* ii. 159.) Strabo, by a strange mistake, describes the river Addua as flowing from the Lake Verbanus, and the Ticinus from the Larius (iv. p. 209): this may, perhaps, be an error of the copyists, but is more probably an accidental blunder of the author. He gives the length of the lake at 400 stadia, or 40 geog. miles, which is somewhat below the truth, the actual length being 46 geog. miles: its breadth does not exceed 4 or 5 miles, except in one part, where it expands to a width of from 8 to 10 miles. [E. H. B.]

VERBICAE or VERBICES (Οὐέρβικαι or Οὐέρβικες, Ptol. iv. 1. § 10), a people of Mauretania Tingitana. [T. H. D.]

VERBIGENUS PAGUS. [HELVETII, Vol. I. p. 1041.]

VERBINUM, in Gallia, is placed by the Itins. on a road from Bagacum (*Bavai*) to Durocortorum (*Reims*). Duronum is between Bagacum and Verbinum [DURONUM]. All the several distances between Bagacum and Durocortorum do not agree in the Antonine Itin. and the Table. The sum total of these distances in the Table is 53 M. P., and the Itin., though it makes the several distances amount to 63 M. P., still gives the sum total at 53 M. P. But these must be Gallic leagues, as D'Anville shows. He supposes Verbinum to be *Vervins*, which in fact is the same name as Verbinum. The table writes it Vironum. *Vervins* is in the department of *Aisne*, about 20 miles NE. of *Laon*. [G. L.]

VERCELLAE (Οὐερκέλλαι, Ptol. iii. 1. § 36;

Οὐερκέλλοι, Strab. v. p. 218; Βερκέλλαι, Plut. *Mar.* 25: *Vercelli*), the chief city of the Libici, in Gallia Cisalpina. It lay on the W. bank of the Sessites (*Sesia*); but perhaps the ancient town should be sought at *Borgo Vercelli*, about 2 miles from the modern city. In the time of Strabo it was an unfortified village (*l. c.*), but subsequently became a strong and not unimportant Roman municipium. (Tac. *Hist.* i. 70; cf. *De clar. Orator.* 8; also Orell. *Inscr.* 3044, 3945.) Here the highroad from Ticinum to Augusta Praetoria was crossed by a road running westwards from Mediolanum. (*Itin. Ant.* pp. 282, 344, 347, 350.) At the beginning of the 5th century it was rapidly falling to decay. (Hieron. *Epist.* 17.) There were some gold mines at a place called Ictimuli, or Vicus Ictimulorum, in the district of Vercellae (Strab. *l. c.*; Plin. xxxiii. 4. s. 21), which must have been of considerable importance, as the last cited authority mentions a law forbidding that more than 5000 men should be employed in them. The true position of these mines has, however, been the subject of some dispute. The question is fully discussed by Durandi in his treatise *Dell' antica Condizione del Vercellese.* The city was distinguished for its worship of Apollo, whence it is called Apollineae Vercellae by Martial (x. 12. 1); and there was in its vicinity a grove, and perhaps a temple sacred to that deity (Stat. *Silv.* i. 4. 59), which is probably to be sought at a small place called *Pollone*, at the foot of the Alps. (Cf. Cic. *Fam.* xi. 19; Plin. iii. 17. s. 21; Bellini, *Antichità di Vercelli.*) [T. H. D.]

VEREASUECA, a harbour belonging to the town of Argenomescum, in the territory of the Cantabri, in Hispania Tarraconensis. (Plin. iv. 20. s. 34.) Probably *Puerto de S. Martin.* (Cf. Florez, *Esp. Sagr.* xxiv. p. 44.) [T. H. D.]

VERELA. [VARIA.]

VERETUM (Οὐερητόν, Strab., Ptol.: *Eth.* Veretinus: *Sta Maria di Vereto*), a town of Calabria, in the district or territory of the Sallentines, and within a few miles of the Iapygian promontory. Strabo tells us that it was formerly called Baris, and describes it as if it were a seaport town; but both Pliny and Ptolemy rank it among the inland towns of the Sallentines; and there seems no doubt that its site is marked by the old church of *Sta Maria di Vereto*, the name of which is found on old maps, between the villages of *Salve* and *Roggiano*, about 6 miles from the *Capo di Leuca*, and 10 from *Ugento*, the correct distance given in the Tabula from Uxentum to Veretum. (Strab. vi. p. 281; Plin. iii. 11. s. 16; Ptol. iii. 1. § 76; *Tab. Peut.*; Galateo, *de Sit. Iapyg.* p. 99; Holsten. *ad Cluver.* p. 283; Romanelli, vol. ii. p. 35.) The "ager Veretinus" is mentioned also in the Liber Coloniarum (p. 262) among the "civitates Calabriae," and doubtless comprised the whole district as far as the Iapygian promontory. [E. H. B.]

VERGAE. [BRUTTII.]

VERGELLUS, a rivulet or torrent, which crossed the field of battle of Cannae. It is not indeed mentioned by either Livy or Polybius in their circumstantial accounts of the battle, but it is noticed by both Florus and Valerius Maximus in connection with a story that seems to have been current among the Romans, that its course was choked up by the dead bodies of the slain, to such an extent that the Carthaginian troops crossed over them as a bridge. (Flor. ii. 6. § 18; Val. Max. ix. 2, Ext. § 2.) The same incident is alluded to by other writers, but without mentioning the name of the stream. (Sil. Ital. viii. 668; Lucian, *Dial. Mort.* 12. § 2.) The stream meant is probably a rivulet which falls into the Aufidus on its right bank between Cannae and Canusium, and is wholly dry in summer. [E. H. B.]

VERGENTUM, a place in Hispania Baetica, with the surname of Julii Genius. (Plin. iii. 1. s. 3.) Now *Gelves* or *Gines.* [T. H. D.]

VERGI'LIA (Οὐεργιλία, Ptol. ii. 6. § 61: *Eth.* Vergilienses, Plin. iii. 3. s. 4), a town of the Bastetani, in Hispania Tarraconensis. It has been identified by some writers with *Murcia.* (D'Anville, *Geogr. Anc.* i. p. 31; Mentelle, *Esp. Anc.* p. 186.) [T. H. D.]

VERGIUM, a fortress in Hispania Tarraconensis (Liv. xxxiv. 21). Reichard, but perhaps without adequate grounds, identifies it with the present *Berga.* [T. H. D.]

VERGOANUM. [LERINA.]

VERGUNNI, the name of an Alpine people mentioned in the Trophy of the Alps (Plin. iii. 20). They are supposed to be represented by the name *Vergons* or *Vergon*, between *Senez* [SANITIUM] and *Glandèves*, and about half-way between these two places. [G. L.]

VERISA (Βήρισα), a town in the interior of Pontus, on the road from Sebastopolis to Sebastia. (*It. Ant.* pp. 205, 214; Basil. Magn. *Epist. ult.*) Its site is yet uncertain, some identifying it with *Cora*, others with *Baulus.* [L. S.]

VERLU'CIO, a place in Britannia Romana, on the road from Isca Silurum to Calleva (*Itin. Ant.* p. 486), and apparently in the territory of the Dobuni. It has been variously identified with the village of *Leckham* on the *Avon*, with *Westbury*, *Spy Park*, and *Whetham.* [T. H. D.]

VERNEA, a fort in Rhaetia, on a steep height above the banks of the river Athesis, not far from Tridentum, where its site is still marked by the *Dos di Trent.* (Cassiod. *Var.* iii. 48; Paul. Diac. iii. 31, where it is called Ferruge; Pallhausen, *Beschreib. der Röm. Heerstrasse von Verona nach Augsburg*, p. 28.) [L. S.]

VERNODUBRUM, a river of Gallia Narbonensis mentioned by Pliny (iii. 4) after the Tecum, which is the Tichis [TICHIS] of Mela. Pliny does not mention the Telis or Tetis (*Tet*), and it has been conjectured that he gives the name of Vernodubrum to the Telis. But there is a river *Gly* or *Agly*, north of the *Tet* and not far from it, which flows into the Mediterranean past *Rivesaltes*, and a branch of the *Gly* is still named *Verdouble* or *Verdoubre*, which is certainly the Vernodubrum. (D'Anville, *Notice, &c.*) [G. L.]

VERNOSOL, in Aquitania, is placed in the Antonine Itin. on a road from Beneharnum [BENEHARNUM] to Tolosa (*Toulouse*). This circuitous road ran through Lugdunum Convenarum and Calagorris. Vernosol is between Calagorris (*Cazères*) and *Toulouse.* Vernosol is *Vernose.* [G. L.]

VERODUNENSES. This name does not occur in any document earlier than the Notitia of the Gallic Provinces, which was probably drawn up at the commencement of the fifth century of our era. Civitas Verodunensium in the Notitia is the capital of a people, and is named last in the first of the two Belgicae. The name Virodunum occurs in the Antonine Itin. and so the name is written on some medals. It is placed on a route from Durocortorum (*Reims*) to Divodurum (*Metz*). In the middle age writings it is Viredunum, Viridunum, and Virdunum, which last abbreviated form comes nearest to *Verdun*, which is the capital of the Verodunenses. *Verdun* is west of *Metz*, in the department of *Meuse*, and on the *Meuse* or *Maas*. There was a place named Fines [Fines, No. 13] between Virodunum and Divodurum, which probably marked the limit between the Verodunenses and the Mediomatrici. [G. L.]

VERODUNUM. [Verodunenses.]

VEROLA'MIUM and VERULA'MIUM (Οὐρολάνιον, Ptol. ii. 3. § 21), the capital of the Catyeuchlani in Britannia Romana, on the road from Londinium to Lindum and Eboracum. (*Itin. Ant.* pp. 471, 476, 479.) It was probably the residence of Cassivellaunus, which was taken by Caesar (*B. Gall.* v. 21), and subsequently became a considerable Roman municipium, (Tac. *Ann.* xiv. 33.) It is *Old Verulam*, near *St. Alban's*, in *Hertfordshire*, which latter town rose from its ruins; and its celebrated abbey church is said to be built in great part of Roman bricks. (Camden, p. 350, seq.) [T. H. D.]

VEROMANDUI (Οὐεροµάνδυες, Ptol. iii. 9. § 11), a Belgic people, who in B.C. 57 were supposed to be able to raise 10,000 fighting men (Caesar, *B. G.* ii. 4); unless Caesar's text means that they and the Velocasses together mustered this number [Velocasses]. They joined the Nervii and the Atrebates in the attack on Caesar's army on the Sabis (*Sambre*). The Veromandui attacked the eleventh and eighth legions, which were in Caesar's centre, and they were driven back to the river. They are not mentioned again in the Commentaries.

The Veromandui had the Ambiani and the Atrebates on the west, and the Suessiones on the south. On the north they were neighbours of the Nervii. Their chief town was afterwards Augusta Veromanduorum, *St. Quentin*, on the *Somme*, in the department of *Aisne*, and in the old division of France named *Vermandois*. The name Civitas Veromanduorum occurs in the Notitia of the Gallic Provinces. [Augusta Veromanduorum.] [G.L.]

VEROMETUM, a town of the Coritani in Britannia Romana, between Ratae and Margidunum. (*Itin. Ant.* pp. 477, 479, where it is also called Vernometum.) Camden (p. 575) places it at *Burrough Hill*, near *Willoughby on the Wold*, in the S. part of *Nottinghamshire*. [T. H. D.]

VERONA (Οὐήρωνα, Ptol. iii. 1. § 31 ; Θυήρων, Strab. iv. p. 206, v. p. 213; Βερώνη, Procop. *B.G.* ii. 29, iii. 3, &c.; and Βερώνα, *Ib.* iv. 33 : *Eth.* Veronensis : *Verona*), an important town in Gallia Transpadana, seated on the river Athesis ("Verona Athesi circumflua," Sil. It. viii. 595), and chiefly on its W. bank. There is some difficulty in determining whether Verona was a city of the Euganei or of the Cenomani, from the little knowledge which we possess of the respective boundaries of those peoples, and from the confusion which prevails upon the subject in ancient authors. By Ptolemy (*l. c.*), who does not mention the Euganei, it is ascribed to the Cenomani; and Catullus (lxvii. 34), in a passage, however, which has been banished by some editors as not genuine, Brixia, which undoubtedly belonged to the Cenomani, is styled the mother city of Verona. Pliny, on the other hand (iii. 19. s. 23), gives Verona partly to the Rhaeti and partly to the Euganei, and Strabo (*l. c.*) attributes it to the former. Some have sought a solution of this difficulty by assuming that the city belonged originally to the Euganei, but was subsequently occupied by the Cenomani, referring to Livy, v. 35. (Cf. Justin, xx. 5.) We know little or nothing of the early history of Verona. Under the Roman dominion it became a colony with the surname of Augusta, and one of the finest and most flourishing cities in that part of Italy (Tac. *H.* iii. 8; *Itin. Ant.* p. 128 ; Strab. v. p. 213; Grut. *Inscr.* p. 166. 2.) The surrounding country was exceedingly fruitful, producing good wine, excellent apples, and abundance of spelt (alica, Plin. xviii. 11. s. 29, xiv. 1. s. 3, xv. 14. s. 14; Cassiod. *Var.* xii. 4). The Rhaetian wine also is praised by Virgil. (*G.* ii. 94; cf. Strab. iv. 206; Suet. *Oct.* 77.) The situation of Verona rendered it a great thoroughfare and the centre of several highroads (*Itin. Ant.* pp. 128, 174, 275, 282; *Itin. Hier.* p. 558.)

Verona was celebrated in history for the battle fought by Marius in the Campi Raudii, in its neighbourhood, againt the Cimbri. (Vell. Pat. ii. 12; Florus, iii. 3.) From an inscription still extant on one of its gates, now called the *Porta de' Borsari*, the walls of Verona appear to have been newly erected in the reign of the emperor Gallienus, A. D. 265. It was besieged by Constantine on his march from Gaul to Rome, and, though obstinately defended by Ruricius Pompeianus, obliged to surrender at discretion. (*Paneg. Vet.* ix. 9, sqq.) It was likewise the scene of the victory of Theodoric over Odoacer. (Jornand. *Get.* 57.) Theodoric made it one of his residences, and often held his court there: a representation of his palace is still extant upon a seal. (Gibbon, *Decl. and Fall*, vol. v. p. 22, ed. Smith.) It was at Verona that the splendid wedding took place between king Autharis and Theudelinda. (Procop. *B. G.* iii. 5 ; Paul. Diac. iii. 29.) But, more than by all these events, Verona is illustrious as having been the birthplace of Catullus (Ovid. *Amor.* iii. 15. 7; Mart. x. 103; Plin. xxxvi. 6. s. 7); though it is exceedingly doubtful whether the remains of a villa on the *Lago di Garda*, commonly called the villa of Catullus, could really have belonged to him. The honour sometimes claimed for Verona of having given birth to the architect Vitruvius Pollio arises from a mistaken interpretation of the inscription on the arch of the Gavii, formerly existing at Verona, but pulled down in the year 1805. The inscription related to the great architect's less celebrated namesake, Vitruvius Cerdo. (*Descriz. di Verona*, pt. i. p. 86.) Some are of opinion that the elder Pliny also was born at Verona, but it is more probable that he was a native of Comum. In the life of him ascribed to the pen of Suetonius, he is styled Novocomensis ; and when he calls himself in his Preface the *conterraneus* of Catullus, that epithet by no means necessarily implies that he was the fellow-citizen of the poet, but rather that he was merely his fellow-countryman, or from the same province.

The amphitheatre at Verona is a very striking monument of antiquity. Although not nearly so large as the Colosseum, it is in a much better state of preservation, owing to the pains which have always been taken to keep it in repair. It is also of a more costly material than the Roman amphitheatre; for whilst the latter is built of *travertino*, that at Verona is of marble, from some quarries in the neighbourhood. The substructions are of Roman brickwork. The date of its erection cannot be ascertained, but it must undoubtedly have been posterior to the time of Augustus. A great part of the external arcade was thrown down by an earthquake in the year 1184. Its form is elliptical, the larger diameter being 513 feet externally and 248 internally; the smaller one, 410 feet externally and 147 feet internally. The banks or rows of seats are at present 45 in number, but, from the repairs and alterations which the building has undergone, it is not certain whether this was the original number. It is estimated that it would afford seats for about 22,000 persons.

There are also a few remains of a Roman theatre, on the left bank of the *Adige*, at the foot of the hill immediately under the castle of *S. Pietro* It appears from two decrees of king Berengarius, dated in 895 and 913, that the theatre was then regarded as of the highest antiquity, and had in great part gone to ruin; on which account its destruction was allowed. (*Descriz. di Verona*, pt. ii. p. 108, sqq.)

We have already alluded to the ancient gate called the *Porta de' Borsari.* It is evidently older than the walls of Gallienus, the elevation of which in the space of 8 months is recorded upon it; since a previous inscription has been erased in order to make room for the new one. It is a double gate, of a very florid style of architecture, concerning the merits of which architects have held widely different opinions. The walls of Gallienus, to judge of them from the vestiges which still remain, were of a construction sufficiently solid, notwithstanding the shortness of the time in which they were erected. The other remains of antiquity at Verona, as the *Porta de' Leoni*, the baths, &c., do not require any particular description in this place.

The chief works on Verona and its antiquities are the splendid ones of Count Scip. Maffei, entitled *Verona Illustrata*, and *Museum Veronense.* Onuphrius Panvinius also described its remains (*Antiq. Veron.* lib. viii. Pat. 1668). Some account of them will likewise be found in the *Descrizione di Verona e della sua Provincia*, by Giovambatista da Pertico, 8vo. Verona, 1820. [T. H. D.]

VERONES. [Berones.]

VERRUCINI, a Gallic people near the Alps in the Provincia. Pliny (iii. 4) says: "Regio Camatullicorum, dein Suelteri, supraque Verrucini." [Camatullici; Suelteri.] There is nothing to guide us in fixing the position of the Verrucini, except their position with respect to these two other tribes, and the fact that there is a place named *Vérignon*, between *Draguignan* and *Riez. Draguignan* is in the department of *Var*, and *Riez* is on the site of Reii [Reii Apollinares]. [G.L.]

VERRUGO or VERRUCA (Ἔῤῥουκα, Diod.: *Colle Ferro?*), a town or fortress in the territory of the Volsci, which is repeatedly mentioned during the wars of the Romans with that people. The name first occurs in B. C. 445, when we are told that the place had been recently occupied and fortified by the Romans, evidently as a post of offence against the Volscians; a proceeding which that people resented so much that it became the occasion of a fresh war. (Liv. iv. 1.) We do not know at what period it fell again into the hands of the Volscians, but in B. C. 409 it was recovered and again garrisoned by the Romans. (*Ib.* 55, 56; Diod. xiv. 11.) It, however, fell once more into the hands of the Volscians in B. C. 407 (Liv. iv. 58), and apparently continued in their possession till B. C. 394, when it was again occupied with a garrison by the military tribune C. Aemilius, but lost soon after in consequence of the defeat of his colleague Sp. Postumius. (Liv. v. 28; Diod. xiv. 98.) From this time it wholly disappears from history. It is very doubtful whether it ever was a town, the manner in which it is mentioned by Livy, in connection with the Arx Carventana, seeming to prove that it was a mere fort or stronghold, garrisoned and fortified, on account of its natural strength and advantageous position. Its site cannot be determined with any certainty, but from the name itself there can be no doubt that it was situated on a projecting knoll or peak; hence its site has been sought by Nibby (followed by Abeken) at *Colle Ferro*, near *Segni; Colle Sacco*, in the same neighbourhood, has as plausible a claim. (Nibby, *Dintorni*, vol. iii. p. 473; Gell, *Top. of Rome*, p. 458; Abeken, *Mittel-Italien*, p. 75.) [E. H. B.]

VERTACOMICORI, a pagus of the Vocontii in Gallia Provincia, to whom Pliny (iii. 17) attributes the foundation of Novaria in Gallia Cisalpina [Novaria]. The name seems to be preserved in *Vercors*, a district in the old country of the Vocontii, in the northern part of the diocese of *Die* [Dea Vocontiorum]. In some middle age documents the name appears in the abbreviated form Vercorium, which is the next step to *Vercors* (D'Anville, *Notice, &c.*). [G. L.]

VERTERAE, a town of the Brigantes in Britannia Romana. (*Itin. Ant.* pp. 467, 476.) Variously identified with *Brough* in *Westmoreland* and *Bowes.* [T. H. D.]

VERTINAE (Οὐερτῖναι: *Verzino*), a small town of Bruttium, mentioned only by Strabo (vi. p. 254), who places it in the interior of that country. Its name is still retained by the village of *Verzino*, about 7 miles NW. of *Strongoli*, the ancient Petelia. [E. H. B.]

VERUBIUM (Οὐερουϐίουμ, Ptol. ii. 3. § 5), a promontory on the N. coast of Britannia Barbara, most probably *Noss Head.* [T. H. D.]

VERVES (Θὐερουεῖς, Ptol. iv. 1. § 10), a people of Mauretania Tingitana. [T. H. D.]

VERULAE (*Eth.* Verulanus: *Veroli*), a city of the Hernici, but included in Latium in the more extensive sense of that name, situated in the Apennines N. of the valley of the *Sacco*, between Alatrium and the valley of the Liris. It was apparently one of the chief cities of the Hernici, and was certainly a member of the Hernican League: but its name is not mentioned separately in history till the final war of that people with Rome, in B. C. 306. On that occasion the citizens of Verulae, together with those of Alatrium and Ferentinum, took part against the Anagnians, and refused to join in the hostilities against Rome. For this reason they were rewarded after the termination of the war by being left in possession of their own laws and magistrates, which they preferred to receiving the Roman "civitas." (Liv. ix. 42, 43.) The period at which they ultimately became Roman citizens is uncertain. Florus vaguely asserts that a triumph had been celebrated over the people of Verulae (Flor. i. 11. § 6), but this is probably a mere rhetorical flourish: there is no occasion known in history to which it can be referred. Under the Roman dominion Verulae became a quiet and somewhat obscure country town. According to the Liber Coloniarum it received a body of colonists in the time of the Gracchi, and again under the reign of Nerva. But it is probable that it always retained its municipal rank. It is mentioned by Pliny among the municipal towns of the Fifth Region (Plin. iii. 5. s. 9), but is not again noticed in history. Its secluded position probably rendered it a place of small importance. The ancient site is still occupied by the modern town of *Veroli*, which retains also some portions of the ancient walls in the polygonal or Cyclopean style. (Westphal, *Röm. Kamp.* p. 87; Abeken, *Mittel-Italien*, p. 147.) [E. H. B.]

VERULAMIUM. [VEROLAMIUM.]

VERURIUM (Οὐερούριον, Ptol. ii. 5. § 7), a town in the N. part of Lusitania, perhaps *S. Vincent de Beira.* [T. H. D.]

VESASPE (Οὐεσάσπη, Ptol. vi. 2. § 12), a town in Media Atropatene, perhaps the same as the present *Casbin.* [V.]

VESCELIA, a town of the Oretani in Hispania Tarraconensis (Liv. xxxv. 22), perhaps *Vilches.* (Ukert, ii. pt. i. p. 413.) [T. H. D.]

VESCELLIUM or VERCELLIUM, a town of the Hirpini, of uncertain site. Its name is mentioned by Livy (xxiii. 37) as having been recovered by the praetor M. Valerius, after it had revolted to the Carthaginians. The reading in Livy is very uncertain, but Pliny also mentions the Vescellani among the municipal communities of the Hirpini. (Plin. iii. 11. s. 16.) [E. H. B.]

VESCI FAVENTIA (Οὔεσκις, Ptol. ii. 4. § 11), a town in Hispania Baetica, between Singili and Astigi. (Plin. iii. 1. s. 3.) [T. H. D.]

VESCIA (*Eth.* Vescinus), a city of Latium, in the most extended sense of that name, but originally a city of the Ausones, situated in a plain to the S. of the Liris (*Garigliano*). Livy in one passage tells us distinctly that the Ausones had three cities, Ausona, Minturnae, and Vescia, all of which were betrayed into the hands of the Romans by a party within their walls, and the inhabitants put to the sword in B. C. 314. (Liv. ix. 25.) The name of Vescia is mentioned also about 25 years before as affording shelter to the remains of the Latin army defeated by the consuls Manlius and Decius in B. C. 340. (Id. viii. 11.) But after the capture of the city in 314, no mention of it again occurs, and it is probable that it never recovered from that calamity. Minturnae indeed is the only one of these three cities which again appears in history; but the "ager Vescinus" is repeatedly mentioned (Liv. x. 20, 21, 31), and would seem to have extended from the banks of the Liris as far as the extreme point of the ridge of Mount Massicus. The Roman colony of Sinuessa, which was situated just where that ridge abuts upon the sea, is expressly said to have been planted "in saltu Vescino." (Liv. x. 21.) But all trace of the city seems to have been lost. Pliny does not even notice the name among the *extinct* cities of Latium and Campania, and we are wholly without a clue to its precise situation. [E. H. B.]

VESCITANIA, a district in Spain mentioned only by Pliny (iii. 3. s. 4). [OSCA.] [T. H. D.]

VESDIANTII. [VEDIANTII.]

VESERIS, a river of Campania, the name of which is known only in connection with the great battle fought with the Latins by T. Manlius Torquatus and P. Decius Mus, B. C. 340. That battle is described by Livy as having been fought "haud procul radicibus Vesuvii montis, qua via ad Veserim ferebat" (viii. 8), an expression which would leave us in doubt whether Veseris was the name of a town or of a river. In another passage he refers to the same battle as having been fought "ad Veserim" (x. 28); and Cicero also twice notices it as "pugna ad Veserim" or "apud Veserim." (Cic. *de Fin.* i. 7, *de Off.* iii. 31.) Valerius Maximus uses the latter phrase (vi. 4. § 1). The only author whose expressions are free from ambiguity is Aurelius Victor, who distinctly speaks of that celebrated battle as having been fought "apud Veserim fluvium" (*de Vir. Ill.* 28), and adds that the Romans had pitched their camp on its banks ("positis apud Veserim fluvium castris," *Ib.* 26). The authority of Victor is not indeed worth much on points of detail, but there is no reason to reject it in this instance, as it is certainly not at variance with the phrases of Livy and Cicero. The Veseris was probably a small stream, and is not mentioned on any other occasion, or by any geographer, so that it is wholly impossible now to identify it. [E. H. B.]

VESIO'NICA, a town of Umbria mentioned only by Pliny, who names the Vesionicates among the municipal communities of that country. (Plin. iii. 14. s. 19.) It is supposed to be represented by *Civitella di Benezzone*, in the upper valley of the Tiber, 7 miles SE. of *Perugia.* (Cluver. *Ital.* p. 627.) [E. H. B.]

VESO'NTIO (Οὐισόντιον, Ptol. ii. 9. § 21: *Besançon*), in Gallia, the chief city of the Sequani. The name occurs in Dion Cassius (xxxviii. 34, lxiii. 24), where Reimarus has written Βεσοντίωνα for the MSS. reading Οὐεσοντίωνα, without any reason. In Ausonius (*Gratiarum Act.*) the form Visontio occurs, and he speaks of a "municipalis schola" in the place. The orthography of the word varied, as we might expect; and other forms occur in Ammianus. D'Anville says that the name is Vesant on a milestone which bears the name of Trajan, and was found at *Mandeure* [EPAMANDUODURUM, in which article the name is incorrectly printed Vesont].

When Caesar (B. C. 58) was marching through the country of the Sequani towards the German king Ariovistus, he heard that the German was intending to occupy Vesontio, but Caesar got there before him (*B. G.* i. 38.) He describes the town as nearly surrounded by the *Doubs* [DUBIS], and he says that the part which was not surrounded by the river was only 600 Roman feet wide. This neck of land was filled by an eminence, the base of which on each side was washed by the river. There was a wall along this neck of land, which made it a strong fortress, and the wall connected the heights with the town. Caesar's description is exact except as to the width of the neck of land, which D'Anville says is about 1500 Roman feet; and accordingly either Caesar was mistaken, or there is an error in his text in the numerals, which is always a possible thing. Vesontio when Caesar took it was well supplied with everything for war, and its position made it a strong place. Caesar set out from Vesontio to fight the German king, whom he defeated in the plain between the *Vosges* and the Rhine. The battle-field was only 5 miles from the Rhine (*B. G.* i. 53, in which passage the true reading is "milia pasuum... circiter quinque," not "quinquaginta.") In the winter of B. C. 58—57 Caesar quartered his men among the Sequani, and we may assume that Vesontio was one of the places where he fixed his troops.

Vesontio has been several times sacked and destroyed by Alemanni, by Huns, and others. It is a town built on the ruins of former towns. The ground has been raised above 20 feet, and where it has been dug into, Roman remains, medals, and other antiquities have been discovered.

The modern town of *Besançon* consists of two parts. The upper town, once called *La Ville*, is built on the peninsula, and the citadel stands on the steep rock which Caesar describes as occupying the neck of land, where the river does not flow. The lower town is on the other side of the river opposite to the peninsula, with which it is connected by a stone bridge, the foundations of which are Roman.

There is a Roman triumphal arch with a single passage. The date of its construction does not appear. This arch which was nearly hidden by rubbish and buildings has been partially uncovered and restored within the present century. It is decorated with sculptures. There are some remains of the aqueduct which supplied Vesontio with water from a distant source. It was constructed of a soft stone. It terminated in the town in a vast reservoir of an oval form, which was covered by a roof supported by columns. The water was distributed from the reservoir all through the town: and in many parts of *Besançon* there have been found traces of the conduits which conveyed the water to the private houses. (*Penny Cyclopaedia*, art. *Besançon;* Richard et Hocquart, *Guide du Voyageur.*) [G. L.]

VESPA'SIAE. [Nursia.]

VESPERIES, a town of the Varduli in Hispania Tarraconensis. (Plin. iii. 20. s. 34.) It is identified with the present *Bermeo*. (Cf. Mentelle, *Esp. Mod.* p. 37.) [T. H. D.]

VESTINI (Οὐηστῖνοι), a people of Central Italy, who occupied a mountainous tract extending from the coast of the Adriatic to the lofty mountains near the sources of the Aternus. Here they met the Sabines, whose territory bounded them on the W.; thence they were bounded by the high mountain range which forms the southern barrier of the valley of the Aternus, and separated them from the Aequi and Marsi; while towards the S. and E. the river Aternus itself, from the point where it takes the sudden bend towards the NE., became the limit of their territory, and their frontier towards the Peligni and Marrucini. Along the coast of the Adriatic they held only the narrow space between the mouth of the Aternus and that of the Matrinus, a distance of about 6 miles; the latter river apparently formed the northern limit of their territory from its mouth to its source, and thence to the high ridge of the Central Apennines their exact frontier cannot be traced. But it is almost immediately after passing the point where the Vestini adjoined the Praetutii on the one hand and the Sabines on the other, that the chain of the Apennines rises abruptly into the lofty group or mass, of which the *Monte Corno* (commonly called the *Gran Sasso d' Italia*) is the highest summit. This mountain is the most elevated in the whole range of the Apennines, attaining to a height of 9500 feet; and those immediately adjoining it are but little inferior, forming a rugged and irregular mass of mountains, which is continued without interruption by a range of inferior but still very considerable elevation, in a SE. direction. This range is almost continuous with the equally lofty ridge of the *Monte Morrone*, the two being separated only by the deep and narrow gorge below *Popoli*, through which the Aternus finds its way to the sea. Hence the territory of the Vestini is naturally divided into two distinct regions, the one consisting of the upper valley of the Aternus, W. of the lofty mountain range above described, the other of the tract on the E. of the same mountains, sloping gradually thence to the sea. This last district is very hilly and rugged, but has the advantage of a far milder climate than that of the basin of the Aternus, which is a bleak and cold upland region, having much analogy with the valley of the Peligni (of which it may be considered in some degree as a continuation), but from its considerable elevation above the sea (2380 feet in its upper part) suffering still more severely from cold in winter. The Vestini, however, did not occupy the whole of the valley of the Aternus; Amiternum, near the sources of that river, which was one of the oldest abodes of the Sabines, having continued, even in the days of Pliny, to belong to that people, and though Ptolemy assigns it to the Vestini, it is probable that in this, as in many similar cases, he was guided by geographical views rather than the real ethnical distribution of the tribes. (Strab. v. p. 228; Plin. iii. 12. s. 17; Ptol. iii. 1. § 59.) But the precise line of demarcation between the Vestini and the Sabines, cannot now be determined.

No author has left to us any distinct statement concerning the origin and affinities of the Vestini, but there seems to be no reason to doubt that they were, in common with the other tribes by which they were surrounded, a Sabine race. It would indeed have been almost impossible for that people to have extended themselves to the S., and sent forth their numerous colonies, the Peligni, the Samnites, &c., had not the valley of the Aternus been already occupied by a kindred and friendly race. The close connection which we find subsisting between the four tribes of the Vestini, Marrucini, Peligni, and Marsi, may be also taken as a strong presumption of their common origin, and there seem good reasons for supposing them all to have been derived from a Sabine stock. The first mention of the Vestini in history occurs in B. C. 324, when they concluded an alliance with the Samnites against Rome. It was feared that their example would be speedily followed by the Marrucini, Peligni, and Marsi, but this was not the case, and the Vestini, unsupported by their allies, were unable to resist the Roman arms: they were defeated and dispersed by the consul D. Junius Brutus, and took refuge in their fortified towns, of which Cutina and Cingilia were successively taken by assault. (Liv. viii. 29.) From this time we hear nothing more of the Vestini till B. C. 301, when they concluded a treaty with the Romans, which appears to have been an alliance on favourable terms (Id. x. 3); and from this time the Vestini became the faithful allies of the rising republic. In the enumeration of the forces of the Italian allies in B. C. 225, Polybius mentions the Vestini, together with the Marsi, Marrucini, and Frentani (the Peligni being omitted), and estimates their joint contingent at 20,000 foot and 4000 horse soldiers (ii. 24); but we have no means of judging of the proportion furnished by each nation.

No other mention is found in history of the Vestini, with the exception of casual notices of their troops serving as auxiliaries in the Roman armies (Ennius, *Ann. Fr.* viii. 6; Liv. xliv. 40), until the outbreak of the Social War, in B. C. 90. On this occasion they followed the example of the Marsi and Peligni, as well as of their more immediate neighbours the Picentines, and were among the first to declare themselves in insurrection against Rome. Liv. Epit. lxxii.; Oros. v. 18; Appian, *B. C.* i. 39.) There can be no doubt that throughout that contest they furnished their contingent to the armies of the Marsi; but their name is not specially mentioned till towards the close of the war, when we learn that they were defeated and reduced to submission, apparently somewhat sooner than the other confederates. (Liv. Epit. lxxv, lxxvi; Appian, *B. C.* i. 52; Oros. v. 18.) There is no doubt that they at this time received the Roman franchise, and henceforth became merged in the ordinary condition of Roman citizens. Hence we hear nothing more of them in history, though it is evident that they retained their existence as a separate tribe, which is recognised by all the geographers, as well as by inscriptions. (Strab. v. p. 241; Plin. iii. 12. s. 17; Ptol. iii. 1. § 59; Orell. *Inscr.* 4036.) From the last source we learn that they were enrolled in the Quirinian tribe. Their territory was included in the Fourth Region of Augustus (Plin. *l. c.*), but in the later division of Italy it was separated into two, the maritime district being united with Picenum, while the inland portion or valley of the Aternus was included (together with the Sabines and Peligni) in the province of Valeria. (*Lib. Colon.* pp. 227, 228; Bingham's *Eccles. Antiq.* ix. ch. 5, sect. 3.) We learn from Juvenal that they continued to retain their primitive simplicity and rustic habits of life even under the Roman Empire. (Juv. xiv. 181.) Silius Italicus speaks of them as a race, hardy and warlike, and habituated to the chase: their rugged mountains were doubtless still the refuge of many wild animals. (Sil. Ital. viii. 513.) The more inland parts of their territory abounded in excellent upland pastures, which produced a kind of cheese that was highly esteemed at Rome. (Plin. xi. 42. s. 97; Martial, xiii. 31.)

The most important physical feature of the territory of the Vestini is the *Monte Corno* or *Gran Sasso d' Italia*, which, as already observed, is the highest summit of the Apennines. This was identified by Cluver, who has been followed by most later writers, with the Cunarus Mons of Servius (*ad Aen.* x. 185). But Silius Italicus (viii. 517) places the MONS FISCELLUS, a name much better known, among the Vestini; and though this is opposed to the statement of Pliny that that mountain contains the sources of the Nar, there seems much reason to believe that Pliny has here confounded the Nar with its tributary the Velinus [NAR], which really rises in a group closely connected with the *Gran Sasso*, and that it was therefore that remarkable mountain range which was known to the ancients as the Mons Fiscellus.

The following towns are noticed by ancient writers as belonging to the Vestini. PINNA, now called *Civita di Penne*, appears to have been the chief of those which were situated on the eastern slope of the mountains. Lower down, and only a few miles from the sea, was ANGULUS, now *Civita S. Angelo*. ATERNUM, at the mouth of the river of the same name, now *Pescara*, was the seaport of the Vestini, and, being the only one along this line of coast for some distance, served also as that of the Marrucini. In the valley of the Aternus were: PELTUINUM (*Ansedonia*), about 14 miles S. of *Aquila;* AVEIA, the remains of which are still visible at *Fossa*, about 6 miles S. of *Aquila;* and PITINUM, still called *Torre di Pitino*, about 2 miles E. of the same city, which must have immediately adjoined the territory of Amiternum. FURCONIUM, the ruins of which are still visible at *Civita di Bagno*, a little to the S. of *Aquila*, though an important place in the early part of the middle ages, is not mentioned by any writer before Paulus Diaconus (*Hist. Lang.* ii. 20), and was certainly not a municipal town in the time of the Romans. PRIFERNUM (mentioned only in the Tab. Peut.) is of very uncertain site, but is supposed to have been near *Assergio*. *Aquila*, the present capital of this district, is a wholly modern city, having been founded by the emperor Frederic II. in the 13th century, when its population was gathered together from the surrounding towns of Amiternum, Aveia, Furconium, &c., the complete desolation of which apparently dates from this period. AUFINA, which according to Pliny (iii. 12. s. 17) was in his time united for municipal purposes with Peltuinum, still retains the name of *Ofena*. CUTINA and CINGILIA, two towns of the Vestini mentioned by Livy (viii. 29), are wholly unknown, and the sites assigned to them by Romanelli, at *Civita Aquana* and *Civita Retenga* respectively, are merely conjectural.

The topography of the Vestini is specially illustrated in the work of Giovenazzi (*Della Città d' Aveja nei Vestini*, 4to. Roma, 1773), as well as by Romanelli (vol. iii. pp. 241—284). [E. H. B.]

VESUBIA'NI, a people mentioned in the inscription of the arch of Susa. The resemblance of name has led geographers to place the Vesubiani in a valley through which runs a torrent called Vesubia, which falls into the *Var*. The Esubiani, who are mentioned in the inscription of the Trophy of the Alps (Pliny, iii. 20) seem to be the same as the Vesubiani, for the only difference is a V. But D'Anville places the Esubiani on the *Ubaye* and the *Ubayette*, which two streams unite above *Barcelonette* in the department of *Basses-Alpes*. [G. L.]

VESULUS MONS (*Monte Viso*), one of the most lofty summits of the Alps, which, from its prominent position near the plains of Italy, and its great superiority in height over any of the neighbouring peaks, is one of the most conspicuous mountains of the whole Alpine range as viewed from the Italian side. Hence it is one of the very few individual summits of the Alps of which the ancient name can be identified with certainty. It is mentioned by both Pliny and Mela as containing the sources of the Padus; and the former adds that it was the highest summit of the Alps, which is a mistake, but not an unnatural one, considering its really great elevation (12,580 feet) and its comparatively isolated position. (Plin. iii. 16. s. 20; Mela, ii. 4. § 4.) Virgil also mentions the forests of "the pine-clad Vesulus" as affording shelter to numerous wild boars of the largest size. (Virg. *Aen.* x. 708; Serv. *ad loc.*) [E. H. B.]

VESUNNA (Οὐέσουνα), according to Ptolemy (ii. 7. § 12) the capital of the Petrocorii, a people of Aquitania. In inscriptions the name is written Vesunna. The place occurs in the Itins., and its position is *Périgueux*, in the old province of *Périgord*, which name as well as *Périgueux* is a memorial of the name of the people, Petrocorii. But it is said that the remains of the old town are still called *La Vésone*. *Périgueux* is on the *Ille*, a branch of the *Dordogne*, and it is the capital of the department of *Dordogne*.

There is no Roman city in France of which we know so little that contains so many remains as *Périgueux*. Foundations of ancient buildings, mosaics, statues, and ruins of edifices show its former magnitude. The *tour de Vésone*, a round building constructed of small stones and of rough materials, is supposed to have been the cella of a temple, or a tomb, as some conjecture. It is about 200 feet in circumference. There were seven bridges at Vesunna, four of which have been repaired or rebuilt. There are some remains of an amphitheatre of large dimensions. Several aqueducts supplied the town with water. There are also remains of a Roman citadel. On a hill which commands Vesunna, and is separated from it by the river *Ille*, there are the remains of a Roman camp, which is called *Camp de César*, though Caesar never was there; but some of his successors may have been. There are several other Roman camps about *Périgueux*. Several Roman roads have been traced leading to *Périgueux*. Vesunna seems to have been an important position in Aquitania during the imperial government of Rome. There is a French work on the antiquities of *Vésone* by M. Wlgrin de Tailleffer, 2 vols. 4to. 1821, Périgueux. [G. L.]

VESUVIUS MONS (*Οὐεσούϊος*, or *Οὐεσούϐιος*: *Monte Vesuvio*), sometimes also called by Latin writers Vesevus, and Vesvius or Vesbius (*Βέσϐιος*, Dion Cass.), a celebrated volcanic mountain of Campania, situated on the shore of the gulf called the Crater or *Bay of Naples*, from which it rises directly in an isolated conical mass, separated on all sides from the ranges of the Apennines by a broad tract of intervening plain. It rises to the height of 4020 feet, and its base is nearly 30 miles in circumference.

Though now celebrated for the frequency as well as violence of its eruptions, Vesuvius had in ancient times been so long in a quiescent state that all tradition of its having ever been an active volcano was lost, and until after the Christian era it was noted chiefly for the great fertility of the tract that extended around its base and up its sloping sides (Virg. *Georg.* ii. 227; Strab. v. p. 247), a fertility which was in great measure owing to the deposits of fine volcanic sand and ashes that had been thrown out from the mountain. There were not indeed wanting appearances that proved to the accurate observer the volcanic origin and nature of Vesuvius: hence Diodorus speaks of it as "bearing many signs of its having been a burning mountain in times long past" (Diod. iv. 21); but though he considers it as having on this account given name to the Phlegraean plains, he does not allude to any historical or traditional evidence of its former activity. Strabo in like manner describes it as "surrounded by fields of the greatest fertility, with the exception of the summit, which was for the most part level, and wholly barren, covered with ashes, and containing clefts and hollows, formed among rocks of a burnt aspect, as if they had been eaten away by fire; so that a person would be led to the conclusion that the spot had formerly been in a state of conflagration, and had craters from which fire had burst forth, but that these had been extinguished for want of fuel" (v. p. 247). He adds that the great fertility of the neighbourhood was very probably owing to this cause, as that of Catana was produced by Mount Aetna. In consequence of this fertility, as well as of the beauty of the adjoining bay, the line of coast at the foot of Vesuvius was occupied by several flourishing towns, and by numbers of villas belonging to wealthy Roman nobles.

The name of Vesuvius is twice mentioned in history before the Christian era. In B. C. 340 it was at the foot of this mountain that was fought the great battle between the Romans and the Latins, in which P. Decius devoted himself to death for his country. (Liv. viii. 8.) The precise scene of the action is indeed uncertain, though it was probably in the plain on the N. side. Livy describes it as "haud procul radicibus Vesuvii montis, qua via ad Veserim ferebat;" but the situation of the Veseris is wholly uncertain. [Veseris.] Again, at a later period (B. C. 73) we are told that Spartacus, with the fugitive slaves and gladiators under his command, took refuge on Mount Vesuvius as a stronghold, and by a sudden sally from it defeated the Roman general Claudius Pulcher, who had been sent against him. (Flor. iii. 20. § 4; Plut. *Crass.* 9; Appian, *B. C.* i. 116; Vell. Pat. ii. 30; Oros. v. 24; Frontin. *Strat.* i. 5. § 21.)

But it was the fearful eruption of the 24th of August, A. D. 79, that first gave to Vesuvius the celebrity that it has ever since enjoyed. That great catastrophe is described in detail in a well-known letter of the younger Pliny to the historian Tacitus; and more briefly, but with the addition of some fabulous circumstances, by Dion Cassius. (Plin. *Ep.* vi. 16, 20; Dion Cass. lxvi. 21—23; Vict. *Epit.* 10.) It is remarkable that in recording this, the earliest eruption of the mountain, Pliny particularly notices the form assumed by the cloud of ashes that, rising from the crater in a regular column to a considerable height, afterwards spread out laterally so as to form a head like that of a stone-pine: an appearance which has been observed in many subsequent eruptions. The other phenomena described are very much the same as are common to all similar eruptions: but the mass of ashes, sand, and pumice thrown out was so vast as not only to bury the cities of Herculaneum and Pompeii at the foot of the volcano under an accumulation many feet in depth, but to overwhelm the more distant town of Stabiae, where the elder Pliny perished by suffocation, and to overspread the whole bay with a cloud of ashes such as to cause a darkness more profound than that of night even at Misenum, 15 miles distant from the foot of the mountain. (Plin. *l. c.*) On the other hand the outflow of lava was inconsiderable, and if any streams of that kind broke out at this time they probably did not descend to the inhabited regions: at least we hear nothing of them, and the popular notion that Herculaneum was overwhelmed by a current of *lava* is certainly a mistake. [Herculaneum.] So great and unexpected a calamity naturally excited the greatest sensation, and both the poets and the prose writers of Rome for more than a century after the event abound with allusions to it. Tacitus speaks of the *Bay of Naples* as "pulcerrimus sinus, ante quam Vesuvius mons ardescens faciem loci verteret." (*Ann.* iv. 67.) Martial, after descanting on the beauty of the scene when the mountain and its neighbourhood were covered with the green shade of vines, adds:—

> "Cuncta jacent flammis et tristi mersa favilla"
> (iv. 44);

and Statius describes Vesuvius as

> "Aemula Trinacriis volvens incendia flammis."
> (*Silv.* iv. 4. 80.)

(See also Val. Flacc. iii. 208, iv. 507; Sil. Ital. xvii. 594; Flor. i. 16. § 5.)

A long interval again elapsed before any similar outbreak. It is probable indeed that the mountain continued for some time at least after this first eruption to give signs of activity by sending forth smoke and sulphurous vapours from its crater, to which Statius probably alludes when he speaks of its summit still threatening destruction ("necdum lethale minari cessat apex," *Silv.* iv. 4. 85). But the next recorded eruption, and probably the next of any magnitude, occurred in A. D. 203, and is noticed by Dion Cassius (lxxvi. 2). This is probably the one alluded to by Galen (*de Meth.* v. 12), and it seems certain from the description given by Dion Cassius of the state of the mountain when he wrote (under Alexander Severus) that it was then in a state of occasional, but irregular, activity, much resembling that which exists at the present day. (Dion Cass. lxvi. 21.) The only other eruption that we find mentioned under the Roman Empire occurred in A. D. 472 under the reign of Anthemius. (Marcellin. *Chron.* ad ann.) A fourth, which took place in the reign of Theodoric king of the Goths (A. D. 512), is noticed by both Cassiodorus and Procopius, who describe in considerable detail the phenomena of the mountain. It appears certain that these later eruptions were accompanied by the discharge of streams of lava, which caused great mischief to the surrounding country. (Cassiod. *Ep.* iv. 50; Procop. *B. G.* ii. 4, iv. 35.)

It would be foreign to our subject to trace the history of the mountain through the middle ages, but it may be mentioned that its eruptions seem to have been far more rare and separated by longer intervals than they have been for more than two centuries past; and in some instances at least these intervals were periods of perfect quiescence, during which the mountain was rapidly losing its peculiar aspect. Even as late as 1611, after an interval of little more than a century, the sides of the mountain were covered with forests, and the crater itself was overgrown with shrubs and rich herbage. (Daubeny *on Volcanoes*, p. 225.)

At the present day Vesuvius consists of two distinct portions: the central cone, which is now the most elevated part of the mountain; and a ridge which encircles this on three sides at some distance, and is separated from it by a level valley or hollow called the *Atrio del Cavallo.* This outer ridge, of which the highest point, near its N. extremity, is called *Monte Somma*, was probably at one time continuous on all sides of the circle, but is now broken down on the S. and W. faces: hence the appearance of Vesuvius as viewed from Naples or from the W. is that of a mountain having two peaks separated by a deep depression. This character is wholly at variance with the description given by Strabo, who tells us that the summit was *nearly level*, but with clefts and fissures in it, from which fire appeared to have formerly issued (v. p. 247). Hence it is probable that the mountain was then a single truncated cone, and that the vast crater-like hollow of which the *Atrio del Cavallo* forms part, was first created by the great eruption of A. D. 79, which blew into the air the whole mass of the then existing summit of the mountain, leaving the present ridge of *Monte Somma* standing, enclosing a vast crater, within which the present cone has gradually formed. (Daubeny *on Volcanoes*, p. 215; Lyell's *Principles of Geology*, p. 365, 8th edit.) It has indeed been frequently assumed from the accounts of the operations of Spartacus already mentioned (Flor. iii. 20; Plut. *Crass.* 9) that the mountain had even then a crater, within which that leader and his band were enclosed by the Roman general: but it is very doubtful whether the passages in question bear out this interpretation, which seems at variance with the account given by Strabo, whose description has every appearance of being derived from personal observation.

(Concerning the history of the different eruptions of Vesuvius see Della Torre, *Storia del Vesuvio*, 4to., Napoli, 1755; and the geological work of Dr. Daubeny, ch. xii.) [E. H. B.]

VETERA. [CASTRA VETERA.]

VETTONA (*Eth.* Vettonensis: *Bettona*), a municipal town of Umbria, situated about 5 miles E. of the Tiber, between Perusia and Mevania. It is mentioned by Pliny among the municipalities of Umbria, and its name is found also in an inscription among the "xv Populi Umbriae;" while another mentions it in connection with Perusia, from which it was only about 10 miles distant, as measured on the map, though the Tabula calls it 14 miles from that city and 20 from Tuder. (Plin. iii. 14. s. 19; Orell. *Inscr.* 95, 98: *Tab. Peut.*) Vettona continued in the middle ages to be a city of considerable importance, but it was destroyed by the Perugians in 1352. The ancient site is, however, still marked by the village of *Bettona*, about a mile from the left bank of the Tinia. [E. H. B.]

VETTONES (Οὐέττωνες, Strab. iii. p. 152; Οὐέττονες, Ptol. ii. 5. § 9), one of the principal peoples of Lusitania. (Caes. *B. C.* i. 38; Plin. iv. 21. s. 38; Grut. *Inscr.* p. 383. 7.) Strabo alone (*l. c.*) assigns them to Hither Iberia, or the Provincia Tarraconensis. We find their country called Vettonia by Prudentius (*Hymn. in Eulal.* v. 186) and in an inscription. (Orelli, no. 3664.) It was watered by the Tagus, and separated by the Durius from Asturia on the N. On the W., where their boundary corresponded very nearly with that of modern *Portugal*, they adjoined the proper Lusitani. On the E. they neighboured on the Carpetani in Hispania Tarraconensis, and their boundary would be described by a line drawn from the modern *Simancas* in a SW. direction over *Puente del Arzobispo* to *Truxillo.* On the S. they were bounded by the province of Baetica, so that their country comprehended a part of *Estremadura* and *Leon.* Their principal towns were Salmantica (*Salamanca*), Cœcilionicum (*Baños?*), Capara (*las Ventas de Capara*), Sentice (in the neighbourhood of *Los Santos*), Cottaeobriga (*Almeida*), Augustobriga (*Ciudad Rodrigo?*), &c. In their country grew the herba Vettonica (Plin. xxv. 7. s. 46), still known under the name of *betony;* an account of which is given in the treatise *De Herba Betonica*, ascribed to Antonius Musa. [T. H. D.]

VETULO'NIA or VETULO'NIUM (Οὐετουλώνιον, Ptol. iii. 1. § 49: *Eth.* Vetulonienses), one of the twelve principal cities of the Etruscan confederation (Dionys. iii. 51; Plin. iii. 5. s. 8). Yet we hear nothing of its political history; and all we know respecting it is, that it was reputed to be the town in which the Etruscan insignia of magistracy, afterwards adopted by the Romans, such as the lictors, fasces, sella curulis, toga praetexta, &c., as well as the trumpet, were first used. (Sil. It. viii. 483, sqq.; cf. Dionys. iii. 61; Strab. v. p. 220; Macr. *S.* i. 6; Flor. i. 5; &c.)

The destruction of Vetulonia, and the silence of history respecting it, have caused even its site to be a matter of doubt. Thus it has been sought at or near *Viterbo* (Annio, *Antiqq. Var. Volum.*), at *Massa Marittima*, the ancient Massa Veternensis (Amm. Marc. xiv. 11. § 25), or in a dense wood 5 miles to the W. of that town (Ximenes, *ap. Inghirami, Ricerche di Vetulonia*, p. 62; cf. Targioni-Tozzetti, *Viaggi in Toscana*, iv. p. 116); on the site of *Vulci* (Luc. Buonaparte, *Ann. Inst.* 1829, p. 188, sqq.; and Valeriani, *Mus. Chius.* i. p. 68); on the hill of *Castiglione Bernardi*, near *Monte Rotondo* (Inghirami, *Ricerche di Vetulonia*, Ambrosch), and at *Orbetello* (Ermolao Barbaro, *ap. Dempster*, *Etrur.*

Reg. ii. 56). But till very recently the opinion most commonly adopted was that of Leandro Alberti, an antiquary of the 16th century, who placed it on *Monte Calvi* (*Descriz. d' Italia*, p. 27), in a wood called *Selva di Vetleta;* and who has been followed by Cluverius (*Ital. Ant.* ii. 2. p. 472), by Müller (*Etrusker*, i. p. 211), &c. It is now, however, generally admitted that Vetulonia is to be identified with the remains of a city, discovered in 1842 by Sig. Pasquinelli, an Italian engineer, at *Magliano*, a village between the *Osa* and the *Albegna*, and 8 or 10 miles to the N. of *Orbetello*. To Mr. Dennis (*Cities and Sepulchres of Etruria*, vol. ii. ch. 48), however, is to be assigned the credit of first identifying these remains as those of the lost Etruscan city. Their site agrees with what we learn respecting that of Vetulonia. Pliny and Ptolemy (*ll. cc.*) agree in placing the latter among the inland colonies of Etruria; yet Pliny (ii. 103. s. 106) also describes it as being not far from the sea, and as having hot springs, the Aquae Vetuloniae, in its neighbourhood. Now, all the necessary conditions are fulfilled by the remains alluded to. The circuit of the walls, about 4½ miles, shows it to have been an important city; its situation with regard to the sea agrees with the account of Pliny; and near *Telamonaccio*, at a distance of only 200 or 300 yards from the coast, and in the vicinity of the newly found city, warm springs still exist. For other reasons which led Mr. Dennis to the opinion which he formed, the reader is referred to his work before cited, and to his paper in the *Classical Museum*, vol. ii. p. 229, seq. For coins of Vetulonia, see Eckhel, vol. i. pt. i. p. 94. [T. H. D.]

VETU'RII. [Genua.]

VEXALLA AEST. (Οὐεξάλλα εἴσχυσις, Ptol. ii. 3. § 3), a bay on the W. coast of Britannia Romana, near the mouth of the river Sabrina, now *Bridgewater Bay*. [T. H. D.]

UFENS (*Ufente*), a river of Latium, rising at the foot of the Volscian mountains, and flowing through the Pontine Marshes, whence its course is slow and stagnant, and it is described by both Virgil and Silius Italicus, as a sluggish and muddy stream. (Virg. *Aen.* vii. 801; Sil. Ital. viii. 382.) Claudian also calls it "tardatus suis erroribus Ufens." (*Prob. et Ol. Cons.* 257.) It joins the Amasenus (still called *Amaseno*) during its course through the marshes to the sea at *Terracina*, but the present channels of both rivers are artificial, and it is uncertain whether they united their streams in ancient times or not. The name is corrupted by Strabo into Aufidus (Αὔφιδος, v. p. 233), but he correctly describes it as one of the chief agents in the formation of the Pontine Marshes. The ancient form of the name was Oufens, whence the Roman tribe Oufentina derived its name, being composed originally of citizens settled in the territory and neighbourhood of Privernum (Fest. *s. v. Oufentina*, p. 194). [E. H. B.]

UFFUGUM [Bruttii].

UGERNUM (Οὔγερνον), a town of Gallia Narbonensis, on the road from Nemausus through Ugernum and Tarascon to Aquae Sextiae (*Aix*). Strabo (iv. p. 178) has described this road. The genitive VGERNI occurs in an inscription found at *Nîmes*. Ugernum is represented by *Beaucaire*. The Table marks the distance from Nemausus (*Nîmes*) to Ugernum xv., which is near the truth. In the last century the Roman road between Nemausus and Ugernum was discovered with several milestones on it in their original position, and numbered, as it seems, from Nemausus the ancient capital of the district. These milestones gave the opportunity of ascertaining the length of the Roman mile. The name of *Beaucaire* is a corruption of the middle-age name of Bellum-quadrum. If any trace of the name Ugernum exists, it is in the name of *Gernegue*, the lower part of *Tarascon*, which is on the opposite side of the river, for *Beaucaire* and *Tarascon* stand face to face. But in order to admit this, we must suppose that *Gernegue* represents an island Gernica, which, according to a middle-age document, was between *Beaucaire* and *Tarascon*, and that by some change in the river the island has become part of the mainland on the east side of the river; and it is said that this fact about the island is certain. (D'Anville, *Notice, &c.*; *Penny Cyclopaedia*, art. *Beaucaire.*) [G. L.]

UGIA (Οὔγια, Ptol. ii. 4. § 12), a town of the Turdetani in Hispania Baetica, on the road from Cades to Corduba. (*Itin. Ant.* p. 410.) It is probably the town called Urgia by Pliny (iii. 1. s. 3), with the surnames of Castrum Julium or Caesaris Salutariensis, and possessing the Jus Latii. Now *Las Cabezas*, where there are some antiquities. (Cf. Ukert, ii. pt. i. p. 356.) [T. H. D.]

VIA AEMILIA (ἡ Αἰμιλία ὁδός), one of the most celebrated and important of the Roman highways, and the first that was constructed by them in Northern Italy. The period of its first construction is clearly marked by Livy, who tells us that M. Aemilius Lepidus, the consul of B. C. 187, after having effectually subdued the Ligurians, carried a highroad from Placentia to Ariminum, that it might there join the Flaminian Way ("Viam ab Placentia, ut Flaminiae committeret, Ariminum perduxit," Liv. xxxix. 2). Strabo indeed gives a different view of the case, and speaks of the Aemilian Way as constructed in the first instance only from Ariminum to Bononia, and thence sweeping round the marshes, and skirting the roots of the Alps to Aquileia (v. p. 217). But there is every reason to suppose that this last branch of the road was not constructed till long afterwards; and there is no doubt of the correctness of Livy's statement that the original Via Aemilia, and the only one that was generally recognised as such, was the line of road from Ariminum to Placentia. It was this celebrated highway—which is still in use at the present day, and, being carried the whole way through a level plain, preserves almost a straight line during a course of 180 miles—that became the means of carrying Roman civilisation into the heart of Cisalpine Gaul; and so great was its influence upon the population that it traversed, that the whole district between the Apennines and the Padus, constituting the Eighth Region of Augustus, and commonly called by geographers Gallia Cispadana, came to be known as Aemilia, and was eventually constituted into a province under that name. The period at which this took place is uncertain, but the appellation was doubtless in popular use long before it became an official designation; and as early as the first century we find Martial employing the expressions, "Aemiliae de regione viae," and even "tota in Aemilia" (Martial. iii. 4. 2, vi. 85. 6). As indeed all the principal towns of the district (with the single exception of Ravenna) were situated *on* the Via Aemilia, the use of this designation seems extremely natural.

We have no account of the period at which the Via Aemilia was continued from Placentia to Mediolanum, though there is little doubt that it would take place soon after the complete subjugation of the Transpadane Gauls. Nor do we know with any certainty whether the name of Via Aemilia was ever applied in common usage to this portion of the road, or to the branches that led from Mediolanum to the foot of the Alps, as well as from that city by Verona to Patavium. But as Strabo distinctly applies the name to the branch that led by Patavium to Aquileia, we may here most conveniently include all the principal highroads of the N. of Italy under one view in the present article.

1. The main or trunk line of the Via Aemilia from Ariminum to Placentia. The stations on this road are thus given in the Antonine Itinerary, where they are repeated more than once (pp. 99, 126, 287); and, from the direct line of the road, the distances are subject to no doubt:—

From Ariminum (*Rimini*) to

Caesena (*Cesena*)	xx. M. P.
Faventia (*Faenza*)	xxiv.
Forum Cornelii (*Imola*)	x.
Bononia (*Bologna*)	xxiv.
Mutina (*Modena*)	xxv.
Regium (*Reggio*)	xvii.
Parma (*Parma*)	xviii.
Fidentiola (*Borgo S. Donino*)	xv.
Placentia (*Piacenza*)	xxiv.

The same line is given more in detail in the Jerusalem Itinerary (p. 615, &c.), with which the Tabula substantially agrees; but the distances are more correctly given in the latter.

The stations enumerated are:—

Competu (*I. H.*) Ad Confluentes (*Tab.*)	xii. M. P.
Caesena (*Cesena*)	viii.
Forum Populii (*Forlimpopoli*)	vii.
Forum Livii (*Forli*)	vii.
Faventia (*Faenza*)	x.
Forum Cornelii (*Imola*)	x.
Claterna (*Quaderna*)	xiv.
Bononia (*Bologna*)	x.
Forum Gallorum	xvii.
Mutina (*Modena*)	viii.
Regium (*Reggio*)	xvii.
Tannetum (*Taneto*)	xi.
Parma (*Parma*)	vii.
Fidentia (*Borgo S. Donino*)	xv.
Florentia (*Firenzuola*)	x.
Placentia (*Piacenza*)	xv.

The general agreement in the distances above given (which are those of the Tabula) with those of the Antonine Itinerary, though the division is different, sufficiently shows the accuracy of the two. The distances in the Jerusalem Itinerary are, for this line of route, generally less accurate. Some obscure Mutationes mentioned in the one document, and not in the other, have been omitted in the above list.

2. Continuation of the Via Aemilia from Placentia to Mediolanum. This line is summarily given in the Antonine Itinerary thus:—

From Placentia to Laus Pompeia (*Lodi Vecchio*)	xxiv. M. P.
Thence to Mediolanum (*Milan*)	xvi.

The same distances are thus divided in the Jerusalem Itinerary:—

Ad Rotas	xi. M. P.
Tres Tabernae	v.
Laus	viii.
Ad Nonum	vii.
Mediolanum	vii. (ix. ?)

The intermediate stations are unknown, and are expressly called mere Mutationes, or places for changing horses.

3. From Mediolanum to Augusta Praetoria, at the foot of the Alps, the distances, as given in the Antonine Itinerary, are:—

From Mediolanum to

Novaria (*Novara*)	xxxiii. M. P.
Vercellae (*Vercelli*)	xvi.
Eporedia (*Ivrea*)	xxxiii.
Vitricium (*Verrez*)	xxi.
Augusta Praetoria (*Aosta*)	xxv.

The same authority gives a circuitous line of route from Mediolanum to Vercellae (where it rejoins the preceding) by

Ticinum (*Pavia*)	xxii. M. P.
Laumellum (*Lomello*)	xxii.
Vercellae (*Vercelli*)	xxvi.

4. From Mediolanum to Aquileia. The stations given in the Itineraries are as follows:—

Med. to Argentia	x. M. P.
Pons Aureoli (*Pontirolo*)	x.
Bergamum (*Bergamo*)	xiii.
Brixia (*Brescia*)	xxxviii. (xxxii.)
Sirmio (*Sermione*)	xxii.
Verona (*Verona*)	xxii.
Vicentia (*Vicenza*)	xxxiii.
Patavium (*Padova*)	xxvii. (xxii.)
Altinum (*Altino*)	xxxiii.
Concordia (*Concordia*)	xxxi.
Aquileia (*Aquileia*)	xxxi.

(In the above line of route the minor stations (Mutationes) given in the Jerusalem Itinerary are omitted. For an examination of them, and a careful comparison of all the Roman roads through Cisalpine Gaul, see Walckenaer, *Géographie des Gaules*, vol. iii. pp. 2—13.)

5. From Bononia to Aquileia. This is the road of which Strabo expressly speaks as a continuation of the Via Aemilia (v. p. 217), but it is probable that he did not mean to say that it branched off directly from Bononia; at least the only line given in the Itineraries turns off from the main line of the Via Aemilia at Mutina, and thence proceeds to

Vicus Serninus (?)	xxiii. M. P.
Vicus Varianus (*Bariano*, on the N. bank of the *Po*)	xx.
Anneianum (*Legnago?*)	xvii.
Ateste (*Este*)	xx.
Patavium (*Padova*)	xxv.

whence it followed the same line to Aquileia as that given above. Another line of road, which though more circuitous was probably more frequented, led from Mutina by Colicaria (an uncertain station) to Hostilia (*Ostiglia*), where it crossed the Padus, and thence direct to Verona (xxx. M. P.). (*Itin. Ant.* p. 282.)

6. From Placentia to Dertona, where it communicated with the road constructed by Aemilius Scaurus across the Apennines to Vada Sabata. (Strab. v. p. 217.) The stations on this short line were:—

From Placentia to

Comillomagus	xxv. M. P.
Iria (*Voghera*)	xvi.
Dertona (*Tortona*)	x.

The first station, Comillomagus, or Camiliomagus, as the name is written in the Tabula, is unknown, but must have been situated a short distance to the W. of *Broni*.

7. Lastly, a branch of the Via Aemilia led from Placentia to Ticinum (*Pavia*), whence it was carried westwards to Augusta Taurinorum (*Turin*) and

the foot of the Cottian Alps. This was therefore one of the great highroads leading to Gaul. But the stations on it, as given in the Tabula, are very confused, and can only partially be restored by the assistance of the Antonine Itinerary, which nowhere gives this road in its entirety. At Ticinum it was joined by another road leading from Mediolanum to that city. The stations, as given in the Jerusalem Itinerary (p. 556), are as follows:—

Ticinum	
Durii (*Dorno*) - - - -	xii. M. P.
Laumellum (*Lomello*) - -	ix.
Ad Cottias (*Cozzo*) - - -	xii.
Ad Medias - - - - - -	xiii.
Rigomagus (*Trino Vecchio*) -	x.
Ceste (?) - - - - - -	viii.
Quadratae (near *Londaglio*) -	xi.
Ad Decimum - - - - -	xii.
Taurini (*Turin*) - - - -	x.
Ad Fines (*Avigliano*) - -	xvi.
Ad Duodecimum - - - -	xii.
Segusio (*Susa*) - - - -	xii.

The rest of the route over the Cottian Alps is given in the article ALPES. [E. H. B.]

VIA AEMILIA SCAURI, is the name given, for the sake of distinction, to a road which was constructed by Aemilius Scaurus long after the more celebrated Via Aemilia above described. Strabo, the only author who distinctly mentions the two, says that Aemilius Scaurus, after having drained the marshes on the S. side of the Padus, constructed the Aemilian Way through Pisae and Luna as far as Sabata, and thence through Dertona. (Strab. v. p. 217.) Whether "the other Aemilian Way," as Strabo calls it, had been already continued from Placentia to Dertona, or this also was first effected by Scaurus, we know not; but it is clear that the two were thus brought into connection. The construction of this great work must be assigned to the censorship of M. Aemilius Scaurus, in B. C. 109, as we learn from Aurelius Victor (*Vir. Ill.* 72), who, however, probably confounds it with the more celebrated Via Aemilia from Placentia to Ariminum. But a comparison of the two authors leaves no doubt as to the road really meant. The name seems to have gradually fallen into disuse, probably on account of the ambiguity arising between the two Viae of the same name; and we find both the coast-road from Pisae to Vada Sabata, and that across the mountains from the latter place by Aquae Statiellae to Dertona, included by the Itineraries as a part of the Via Aurelia, of which the former at least was in fact a mere continuation. Hence it will be convenient to discuss the stations and distances along these lines, under the general head of VIA AURELIA. [E. H. B.]

VIA AMERINA, is the name given in an inscription of the time of Hadrian (Orell. *Inscr.* 3306) to a line of road, which must obviously be that leading direct from Rome to Ameria. This, as we learn from the Tabula, branched off from the Via Cassia at Baccanae (*Baccano*), and proceeded through Nepete and Falerii to Ameria. The stations and distances as there given are:—

Rome to Baccanae - - - - -	xxi. M. P.
Nepete (*Nepi*) - - -	ix.
Falerii (*Sta Maria di Falleri*) - - - -	v.
Castellum Amerinum -	xii.
Ameria (*Amelia*) - -	ix.

The sum of these distances (56 miles) agrees precisely with the statement of Cicero, who, in the oration *Pro Sexto Roscio Amerino* (c. 7. § 18), observes that it was 56 miles from Ameria to Rome.

According to the Tabula a prolongation of the same road led from Ameria to Tuder, and thence by a circuitous route through Vettona and Perusia to Clusium, where it rejoined the Via Cassia. The first station to Ameria is omitted: thence to

Tuder (*Todi*), was - - -	vi. M. P.
Vettona (*Bettona*) - - - -	xx.
Perusia (*Perugia*) - - -	xiv.

The distance from that city to Clusium is again omitted. [E. H. B.]

VIA APPIA (ἡ Ἀππία ὁδός), the greatest and most celebrated of all the Roman highways in Italy, which led from Rome direct to Brundusium, and thus became the principal line of communication with Greece, Macedonia and the East. Hence it became, in the flourishing times of the Roman Empire, the most frequented and important of the Roman roads, and is called by Statius "regina viarum." (*Silv.* ii. 2. 12.) Martial also calls it "Appia . . . Ausoniae maxima fama viae" (ix. 102). The former author terms it "annosa Appia," in reference to its great antiquity (*Ib.* iv. 3. 163.) It was indeed the earliest of all the Roman highways, of the construction of which we have any definite account, and very probably the first of all that was regularly made as a great public work; the Via Salaria, Tiburtina, &c., having doubtless long been in use as mere natural roads, before they were converted into solidly constructed Viae. There must in like manner have always been some kind of road communicating from Rome with Alba and Aricia; but it is evident, from the perfectly straight line followed by the Via Appia from a point very little without the gates of Rome to Aricia, that this must have been a new work, laid out and executed at once. The original construction of the Via Appia was undoubtedly due to the censor Appius Claudius Caecus, who commenced it in B. C. 312, and completed it as far as Capua before the close of his censorship. (Liv. ix. 29; Diod. xx. 36; Frontin. *de Aquaed.* 5; Orell. *Inscr.* 539.) From Capua it was undoubtedly carried on to Beneventum, and again at a subsequent period to Brundusium; but the date of these continuations is unknown. It is evident that the last at least could not have taken place till after the complete subjugation of the south of Italy in B. C. 266, and probably not till after the establishment of the Roman colony at Brundusium, B. C. 244. Hence it is certainly a mistake when Aurelius Victor speaks of Appius Claudius Caecus as having carried the Appian Way to Brundusium. (Vict. *Vir. Ill.* 34.) The continuation and completion of this great work has been assigned to various members of the Claudian family; but this is entirely without authority.

Strabo distinctly speaks of the Appian Way as extending, in his time, from Rome to Brundusium; and his description of its course and condition is important. After stating that almost all travellers from Greece and the East used to land at Brundusium, he adds: "From thence there are two ways to Rome, the one adapted only for mules, through the country of the Peucetians, Daunians, and Samnites, to Beneventum, on which are the cities of Egnatia, Caelia, Canusium, and Herdonia; the other through Tarentum, deviating a little to the left, and going round about a day's journey, which is called the Appian, and is better adapted for carriages. On this are situated Uria (between Brundusium and Tarentum) and Venusia, on the confines of the Samnites and Lucanians. Both these roads, starting from Brundusium, meet at Beneventum. Thence to Rome the road is called the Appian, passing through Caudium, Calatia, Capua, and Casilinum, to Sinuessa. The whole distance from Rome to Brundusium is 360 miles. There is yet a third road, from Rhegium, through the Bruttians and Lucanians, and the lands of the Samnites to Campania, where it joins the Appian; this passes through the Apennine mountains, and is three or four days' journey longer than that from Brundusium." (Strab. v. p. 283.) It is not improbable that the first of these branches, which Strabo distinctly distinguishes from the true Appian Way, is the Via Numicia or Minucia (the reading is uncertain), mentioned by Horace as the *alternative* way by which it was customary to proceed to Brundusium. (Hor. *Ep.* i. 18. 20.) But Strabo gives us no information as to how it proceeded from Herdonia, in the plains of Apulia, through the mountains to Beneventum. It is, however, probable that it followed nearly the same line as the high road afterwards constructed by Trajan, through Aecae and Equus Tuticus. This is indeed one of the principal natural passes through this part of the Apennines, and is still followed, with little deviation, by the modern highroad from Naples to *Brindisi* and *Taranto.* But it is worthy of remark, that Horace and his companions in their journey to Brundusium, of which he has left us the poetical itinerary (*Sat.* i. 5), appear not to have followed this course, but to have taken a somewhat more direct route through Trivicum, and a small town not named (" oppidulum quod versu dicere non est"), to Canusium. This route, which does not agree with either of those mentioned by Strabo, or with those given in the Itineraries, was probably disused after that constructed by Trajan, through Equus Tuticus and Aecae, had become the frequented line. It was to that emperor that the Appian Way was indebted for many improvements. He restored, if he was not the first to construct, the highroad through the Pontine Marshes from Forum Appii to Tarracina (Dion Cass. lxviii. 15; Hoare, *Class. Tour*, vol. i. p. 28); and he at the same time constructed, at his own expense, a new line of highroad from Beneventum to Brundusium (Gruter, *Inscr.* p. 151. 2), which is undoubtedly the Via Trajana celebrated by coins. (Eckhel, vol. iv. p. 421.) It is probable (as already pointed out) that he did no more than render practicable for carriages a line of route previously existing, but accessible only to mules; and that the Via Trajana coincided nearly with the road described by Strabo. But from the time that this road was laid open to general traffic, the proper Via Appia through Venusia to Tarentum, which traversed a wild and thinly-peopled country, seems to have fallen much into disuse. It is, however, still given in the Antonine Itinerary (p. 120) though not as the main line of the Appian Way. The latter appellation seems indeed to have been somewhat vaguely used under the Empire, and the same Itinerary bestows the name on the line, already indicated by Strabo (*l. c.*), that proceeded S. through Lucania and Bruttium to Rhegium, on the Sicilian Strait, a route which never went near Beneventum or Brundusium at all.

The Appian Way long survived the fall of the Western Empire. That portion of it which passed through the Pontine Marshes, which was always the most liable to suffer from neglect, was restored by Theodoric (Gruter, *Inscr.* p. 152. 8); and Procopius, who travelled over it 40 years later, speaks with admiration of the solidity and perfection of its construction. " The Appian Way (says he) extends from Rome to Capua, a journey of five days for an active traveller. Its width is such as to admit of the passage of two waggons in contrary directions. The road itself is worthy of the highest admiration, for the stone of which it is composed, a kind of mill-stone, and by nature very hard, was brought by Appius from some distant region, since none such is found in this part of the country. He then, after having smoothed and levelled the stones, and cut them into angular forms, fitted them closely together, without inserting either bronze or any other substance. But they are so accurately fitted and joined together, as to present the appearance of one compact mass naturally united, and not composed of many parts. And notwithstanding the long period of time that has elapsed, during which they have been worn by the continual passage of so many carriages and beasts of burden, they have neither been at all displaced from their original position, nor have any of them been worn down, or even lost their polish." (Procop. *B. G.* i. 14.) The above description conveys an accurate impression of the appearance which the Appian Way must have presented in its most perfect state. The extraordinary care and accuracy with which the blocks that composed the pavement of the Roman roads were fitted together, when first laid down, is well seen in the so-called Via Triumphalis, which led to the Temple of Jupiter, on Mons Albanus. [ALBANUS MONS.] But it is evident from many other examples, that they became much worn down with time; and the pavement seen by Procopius had doubtless been frequently restored. He is also mistaken in supposing that the hard basaltic lava (silex) with which it was paved, had to be brought from a distance: it is found in the immediate neighbourhood, and, in fact, the Appian Way itself, from the *Capo di Bove* to the foot of the Alban Hills, runs along a bank or ridge composed of this lava. Procopius also falls into the common mistake of supposing that the road was originally constructed by Appius Claudius such as he beheld it. But during the long interval it had been the object of perpetual care and restoration; and it is very doubtful how far any of the great works along its line, which excited the admiration of the Romans in later ages, were due to its original author. Caius Gracchus in particular had bestowed great pains upon the improvement of the Roman roads; and there is much reason to believe that it was in his time that they first assumed the finished appearance which they ever afterwards bore. (Plut. *C. Gracch.* 7.) Caesar also, when a young man, was appointed " Curator Viae Appiae," which had become a regular office, and laid out large sums of money upon its improvement. (Plut. *Caes.* 5.) The care bestowed on it by successive emperors, and especially by Trajan, is attested by numerous inscriptions.

It is very doubtful, indeed, whether the original Via Appia, as constructed by the censor Appius, was carried through the Pontine Marshes at all. No mention is found of his draining those marshes, without which such a work would have been impossible; and it is much more probable that the road was originally carried along the hills by Cora, Norba, and Setia, by the same line which was again in use in the last century, before the Pontine Marshes had been drained for the last time by Pius VI. This conjecture is confirmed by the circumstance that Lucilius, in describing his journey from Rome to Capua, complains of the extremely hilly character of the road in approaching Setia. (Lucil. *Fragm.* iii. 6, ed. Gerlach.) Even in the time of Horace, as we learn from his well-known description of the journey to Brundusium, it was customary for travellers to continue their route from Forum Appii by water, embarking at that point on the canal through the Pontine Marshes (Hor. *Sat.* i. 5. 11, &c.). But the very existence of this canal renders it probable that there was at that time a road by the side of it, as we know was the case in Strabo's time, notwithstanding which he tells us that the canal was much used by travellers, who made the voyage in the night, and thus gained time. (Strab. v. p. 233.)

It will be convenient to divide the description of the Appian Way, as it existed under the Roman Empire, and is given in the Itineraries, into several portions. The first of these from Rome to Capua was the main trunk line, upon which all its branches and extensions depended. This will require to be described in more detail, as the most celebrated and frequented of all the Roman highways.

1. From Rome to Capua.

The stations given in the Antonine Itinerary are:—

From Rome to Aricia (*Lariccia*)	xvi. M.P.
Tres Tabernae	xvii.
Appii Forum	x.
Tarracina (*Terracina*)	xviii.
Fundi (*Fondi*)	xvi. (xiii.)
Formiae (*Mola di Gaëta*)	xiii.
Minturnae (near *Tragletto*)	ix.
Sinuessa (*Mondragone*)	ix.
Capua (*Sta Maria*)	xvi. (xxvi.)

The above stations are for the most part well known, and admit of no doubt. Those in the neighbourhood of the Pontine Marshes have indeed given rise to much confusion, but are in fact to be easily determined. Indeed, the line of the road being almost perfectly straight from Rome to Tarracina renders the investigation of the distances a matter of little difficulty.

The Jerusalem Itinerary (p. 611) subdivides the same distance as follows:

Rome to Ad Nonum (mutatio)	ix. M.P.
Aricia (civitas)	vii.
Sponsae or Ad Sponsas (mutatio)	xix.
Appii Forum (do.)	vii. (xii.?)
Ad Medias (do.)	ix.
Tarracina (civitas)	x.
Fundi (do.)	xiii.
Formiae (do.)	xii.
Minturnae (do.)	ix.
Sinuessa (do.)	ix.
Pons Campanus (mutatio)	ix.
Ad Octavum (do.)	ix.
Capua (civitas)	viii.

The intermediate stations were (as they are expressly called in the Itinerary itself) mere Mutationes, or posthouses, where relays of horses were kept. The determination of their position is therefore of no interest, except in connection with the distances given, which vary materially from those of the other Itinerary, though the total distance from Rome to Capua (125 miles) is the same in both.

The Appian Way issued from the Porta Capena, in the Servian walls of Rome, about half a mile outside of which it separated from the Via Latina, so that the two roads passed through different gates in the walls of Aurelian. That by which the Via Appia finally quitted Rome was known as the Porta Appia; it is now called the *Porta S. Sebastiano.* The first milestone on the road stood about 120 yards outside this gate; the distances always continuing to be measured from the old Porta Capena. The buildings and tombs which bordered the Via Appia in that portion of it which lay between the two gates, are described in the article Roma, p. 821. It was apparently in this part of its course, just outside the original city, that it was spanned by three triumphal arches, erected in honour of Drusus (the father of the emperor Claudius), Trajan, and L. Verus. One only of these still remains, just within the *Porta S. Sebastiano*, which, from its plain and unadorned style of architecture, is probably that of Drusus. Outside the Porta Appia the road descends to a small stream or brook, now called *Acquataccia*, which it crosses by a bridge less than half a mile from the gate: this trifling stream is identified, on good grounds, with the river Almo, celebrated for the peculiar sacred rites with which it was connected [Almo]. A short distance beyond this the road makes a considerable bend, and ascends a bank or ridge before it reaches the second milestone. From that point it is carried in a straight line direct to the remains of Bovillae at the foot of the Alban Hills, running the whole way along a slightly elevated bank or ridge, formed in all probability by a very ancient current of lava from the Alban Mount. This long, straight line of road, stretching across the *Campagna*, and bordered throughout by the remains of tombs and ruins of other buildings, is, even at the present day, one of the most striking features in the neighbourhood of Rome, and, when the edifices which bordered it were still perfect, must have constituted a magnificent approach to the Imperial City. The whole line has been recently cleared and carefully examined. It is described in detail by the Car. Canina (in the *Annali dell' Instituto di Corrispondenza Archeologica* for 1852 and 1853; and more briefly by Desjardins, *Essai sur la Topographie du Latium*, 4to. Paris, 1854, pp. 92—130. We can here mention only some of the most interesting of the numerous monuments that have been thus brought to light, as well as those previously known and celebrated.

On the right of the road, shortly after crossing the *Almo*, are the remains of a vast sepulchre, which now serve to support the tavern or *Osteria dell'Acquataccio;* this is clearly identified by the inscriptions discovered there in 1773, as the monument of Abascantius, a freedman of Domitian, and of his wife Priscilla, of which Statius has left us in one of his poems a detailed description (Stat. *Silv.* v. 1). On the left of the road, almost exactly 3 miles from Rome, is the most celebrated of all the monuments of this kind, the massive sepulchre of Caecilia Metella, the daughter of Q. Metellus Creticus, and wife of Crassus the triumvir. Converted into a fortress in the middle ages, this tower-like monument is still in remarkable preservation, and, from its commanding position, is a conspicuous object from all points of the surrounding country. It is popularly known as the *Capo di Bove*, from the bucranium which appears as an ornament in the frieze. (A view of this remarkable monument is given in the article Roma, p. 822.) Before reaching the *Capo di Bove*, the road passes some extensive remains of buildings on the left, which appear to have formed part of an imperial villa constructed by the emperor Maxentius, attached to which are the remains of a circus, also the work of the same emperor, and which, from their remarkably perfect condition, have thrown much light on the general plan of these edifices. [Roma, p. 844.]

Proceeding onwards from the tomb of Caecilia Metella, the road is bordered throughout by numerous sepulchres, the most remarkable of which is the tomb of Servilius Quartus, on the left, about 3¾ miles from Rome. The remarkable preservation of the ancient road in this part of its course, shows the accuracy of the description above cited from Procopius; but it is remarkable that this, the greatest and most frequented highway of the Roman empire, was only just wide enough to admit of the passage of two carriages abreast, being only 15 feet broad between the raised *crepidines* which bordered it. After passing a number of obscure tombs on both sides of the way, there occurs, just beyond the fifth mile from Rome, a remarkable enclosure, of quadrangular form, surrounded by a low wall of Alban stone. This has frequently been supposed to be the Campus Sacer Horatiorum, alluded to by Martial (iii. 47) as existing on the Appian Way, and which preserved the memory of the celebrated combat between the Horatii and Curiatii. This was believed to have been fought just about 5 miles from Rome (Liv. i. 23), which would accord well with the position of the enclosure in question; but it is maintained by modern antiquaries that this, which was certainly of a sacred character, more probably served the purposes of an Ustrinum, or place where the bodies of the dead were burned, previously to their being deposited in the numerous sepulchres that lined both sides of the Appian Way. These still form a continuous cemetery for above two miles farther. The most massive of them all, which must, when entire, have greatly exceeded even that of Caecilia Metella in magnitude, and from its circular form is known as the *Casal Rotondo*, occurs near the 6th mile from Rome, on the left of the Via Appia. From a fragment of an inscription found here, it is probable that this is the tomb of Messala Corvinus, the friend of Augustus and patron of Tibullus, and is the very monument, the massive solidity of which is more than once referred to by Martial ("Messalae saxa," viii. 3. 5; "marmora Messalae," x. 2. 9). Somewhat nearer Rome, on the same side of the road, are extensive ruins of a different description, which are ascertained to be those of a villa of the Quintilii, two brothers celebrated for their wealth, who were put to death by Commodus (Dion Cass. lxxii. 5), after which the villa in question probably became an imperial residence.

Some remains of a small temple, just 8 miles from Rome, have been supposed to be those of a temple of Hercules, consecrated or restored by Domitian at that distance from the city (Martial, iii. 47. 4, ix. 65. 4, 102. 12); but though the site of the temple in question is clearly indicated, it appears that the existing remains belong to an edifice of earlier date. Exactly 9 miles from Rome are the ruins of a villa of imperial date, within which is a large circular monument of brick, supposed with good reason to be the tomb of Gallienus, in which the emperor Flavius Severus also was buried. (Vict. *Epit.* lx.) Close to this spot must have been the station Ad Nonum mentioned in the Jerusalem Itinerary (*l. c.*). The road is still bordered on both sides by tombs; but none of these are of any special interest. At the *Osteria delle Fratocchie* (between 11 and 12 miles from Rome) the ancient Via is joined by the modern road to *Albano*: it here commences the ascent of the Alban Hills, which continues (though at first very gradually) for above 3 miles. A little farther on are the remains of Bovillae; the principal ruins of which lie a short distance to the right of the road. [Bovillae.] The Tabula marks that place as a station on the Via Appia, but erroneously places it 10 miles from Rome, while the real distance is 12 miles. Thence the road (still retaining its straight line) ascended the hill to [*]*Albano*, nearly on the site of the Albanum of Domitian, which, as we learn from Martial, was just 14 miles from Rome. (Martial, ix. 65. 4, 102. 12.) The remains of the imperial villa border the road on the left for some distance before reaching the modern town. Two miles farther was Aricia, which is correctly placed by both the Itineraries 16 miles from Rome. The station was probably below the town, outside of the walls, as the Via Appia here deviates from the straight line which it has pursued so long, and descends into the hollow below the city by a steep slope known as the Clivus Aricinus. A little farther on it is carried over the lowest part of the valley by a causeway or substruction of massive masonry, one of the most remarkable works of the kind now extant. [Aricia.]

The remainder of the road will not require to be described in such detail. From Aricia it was continued, with a slight deviation from the direct line, avoiding the hills of *Genzano* and those which bound the *Lake of Nami*, on the left, and leaving Lanuvium at some distance on the right, till it descended again into the plain beyond the Alban Hills and reached the station of Tres Tabernae. An intermediate station, Sub Lanuvio, indicated only in the Tabula, must have been situated where a branch road struck off to the city of Lanuvium. The position of Tres Tabernae has been much disputed, but without any good reason. That of Forum Appii, the next stage, is clearly established [Forum Appii], and the 43rd milestone of the ancient road still exists on the spot; thus showing that the distances given in the Antonine Itinerary are perfectly correct. This being established, it is clear that Tres Tabernae is to be placed at a spot 10 miles nearer Rome, and about 3 miles beyond the modern *Cisterna*, where there are still ruins of ancient buildings, near a mediaeval tower called the *Torre d'Annibale*. The ancient pavement is still visible in many places between Aricia and Tres Tabernae, and no doubt can exist as to the course of the road. This was indeed carried in a perfectly straight line from the point where it descended into the plain, through the Pontine Marshes to within a few miles of *Terracina*. The position of the station Ad Sponsas, mentioned in the Jerusalem Itinerary, cannot be determined, as the distances there given are incorrect. We should perhaps read xii. for vii. as the distance from Forum Appii, in which case it must be placed 2 miles nearer Rome than Tres Tabernae. Between the latter station and Forum Appii was Tripontium, at which commenced the canal navigation called Decennovium from its being 19 miles in length. The site of this is clearly marked by a tower still called *Torre di Tre Ponti*, and the 19 miles measured thence along the canal would terminate at a point 3 miles from *Terracina*, where travellers quitted the canal for that city. An inscription records the paving of this part of the road by Trajan. The solitary posthouse of *Mesa* is evidently the station Ad Medias of the Jerusalem Itinerary. A short distance from *Terracina* the Via Appia at length deviated from the direction it had so long pursued, and turning to the left ascended the steep hill on which the ancient city stood [TARRACINA], while the modern road is carried round the foot of this hill, close to the sea. The distance of Tarracina from Rome is correctly given at 61 miles in the Antonine Itinerary.

---

[*] It was probably this long ascent that was known as the Clivus Virbii, mentioned by Persius (vi. 55).

From *Terracina* the line of the ancient road may still be traced distinctly all the way to *Fondi*, and is flanked by ruins of villas, dilapidated tombs, &c., through a great part of its course. It first ascended the hill above the city as far as the convent of *San Francesco*, and afterwards descended into the valley beneath, joining the modern highroad from Rome to Naples about 3 miles from *Terracina*, just before crossing the frontier of the Papal States. The narrow pass at the foot of the mountains, which the road here follows, between the rocks and the marshy lake of *Fondi*, is the celebrated defile of LAUTULAE, or Ad Lautulas, which more than once bears a conspicuous part in Roman history. [LAUTULAE.] The distance from Tarracina to Fundi is overstated in the Antonine Itinerary: the true distance does not exceed 13 miles, as correctly given in the Jerusalem Itinerary. From Fundi to Formiae (*Mola di Gaëta*), a distance of 13 miles, the road passed through a rugged and mountainous country, crossing a complete mountain pass: the substructions of the ancient way are in many places still visible, as well as portions of the pavement, and numerous ruins of buildings, for the most part of little interest. The bridges also are in several instances the ancient ones, or at least rest upon ancient substructions. The ruins of Formiae and of the numerous villas with which it was adorned line the shores at *Mola di Gaëta*, and bound the road for a space of more than 2 miles: other ruins, principally sepulchral, are scattered along its line almost all the way thence to MINTURNAE. The ruins of this latter city stand on the right bank of the Liris (*Garigliano*), a short distance from its mouth, and about a mile and a half below the village of *Traghetto*. The line of the ancient road from *Mola* thither is clearly traced and susceptible of no doubt: the distance is correctly given as 9 miles. Here the Via Appia crossed the Liris, and was continued nearly in a straight line through a level and marshy district along the sea-coast to Sinuessa, the ruins of which are found near the village of *Mondragone*. The distance of 9 miles between the two (given in both Itineraries) is somewhat less than the truth. It was at Sinuessa that the Appian Way finally quitted the coast of the Tyrrhenian sea (Strab. v. p. 233), and struck inland towards Capua, passing by the stations of Pons Campanus and Ad Octavum. But this part of its course has not been very distinctly traced, and there is some difficulty as to the distances given. The three subdivisions of the Jerusalem Itinerary would give 26 miles for the total distance from Sinuessa to Capua; and the coincidence of this sum with the statement of the Antonine Itinerary, as given by Wesseling, is a strong argument in favour of the reading xxvi. M. P. instead of xvi. adopted by Pinder. The latter number is certainly too small, for the *direct* distance between the two points is not less than 21 miles, and the road must have deviated from the straight ine on account of the occurrence of the marshes of he Savo, as well as of the river Vulturnus. It is probable, therefore, that it made a considerable bend, and that the distance was thus prolonged: but the question cannot be settled until this part of the road has been more accurately traced than has hitherto been done. The distances given in the Tabula are too inaccurate to be of any use; but it appears probable from that document that the Pons Campanus was a bridge over the little river Savo, and not, as might have been suspected, over the Vulturnus, which the Appian Way did not cross till it arrived at Casilinum, 3 miles from Capua. It was here that it united with the Via Latina. (Strab. v. p. 237; *Tab. Peut.*)

The total distance from Rome to Capua (if we adopt 26 miles as that from Sinuessa) was therefore 131 miles. This portion of the Via Appia as far as Minturnae has been traced with much care by Westphal (*Römische Kampagne*, pp. 22—70), as well as by Chaupy (*Maison d'Horace*, vol. iii. pp. 365—461) and Sir R. Hoare (*Classical Tour*, vol. i. pp. 81—148); but all these accounts are deficient in regard to the portion between Minturnae and Capua.

Several minor branches or cross lines parted from the Via Appia during this first portion of its course. Of these it may suffice to mention: 1. The VIA ARDEATINA, which quitted the Via Appia at a short distance beyond the Almo, just after passing the *Osteria dell' Acquataccio:* it proceeded in a nearly straight line to Ardea, 23 miles from Rome. [ARDEA.] 2. The VIA ANTIATINA, which branched off from the Appian Way just before reaching Bovillae, and proceeded direct to Antium, 38 miles from Rome. It probably followed nearly the same line as the modern road, but its precise course has not been traced. 3. The VIA SETINA quitted the Appian Way, shortly after passing Trepontium, and proceeded in a direct line to Setia (*Sezze*): considerable portions of the ancient pavement still remain. 4. A branch road, the name of which is unknown, diverged from the Via Appia at Minturnae, and proceeded to Teanum (18 miles distant) on the Via Latina, whence it was continued through Allifae and Telesia to Beneventum. [VIA LATINA.] 5. The VIA DOMITIANA, constructed by the emperor of that name, of which Statius has left us a pompous description. (*Silv.* iv. 3.) It was a continuation of the coast-road from Sinuessa, being carried across the Vulturnus close to its mouth by a bridge which must really have been a work of great difficulty; thence it followed closely the line of coast as far as Cumae, whence it struck across to Puteoli. The road communicating between that city and Neapolis was previously in existence. The distances on this road, as given in the Antonine Itinerary (p. 122), are:—

From Sinuessa to Liternum - xxiv. M. P. (this must be a mistake for xiv.)
thence to Cumae - vi.
Puteoli - iii.
Neapolis - x.

There was also a direct road from Capua to Neapolis (*Tab. Peut.*), passing through Atella, which was midway between the two cities.

2. From Capua to Beneventum.

This portion of the road may be very briefly disposed of. From Capua it was continued along in the plain as far as Calatia, the site of which is fixed at *Le Galazze*, near *Maddaloni;* it then entered the Apennines, and, passing through the valley of *Arienzo*, commonly supposed to be the celebrated valley of the Caudine Forks, reached Caudium, which must have been situated about 4 miles beyond *Arpaja*, on the road to Beneventum. The distances given along this line are:—

From Capua to Calatia	vi. M. P.
Ad Novas	vi.
Caudium	ix.
Beneventum	xi.

(*Itin. Ant.* p. 111; *Itin. Hier.* p. 610; *Tab. Peut.*) It was at Beneventum, as above shown, that the two main branches of the Appian Way separated: the one proceeding by Venusia and Tarentum to Brundusium; the other by Equus Tuticus and Canusium to Barium, and thence along the coast of the Adriatic. We proceed to give these two branches separately.

3. From Beneventum to Brundusium, through Venusia and Tarentum.

The line of this road is given in the Antonine Itinerary (p. 120) as well as in the Tabula; but in this last it appears in so broken and confused a form that it would be unintelligible without the aid of the other authority. But that this line was the original Via Appia is proved not only by the distinct testimony of Strabo, and by incidental notices which show that it was the frequented and customary route in the time of Cicero (Cic. *ad Att.* v. 5, 7), but still more clearly by an inscription of the time of Hadrian, in which the road from Beneventum to Aeculanum is distinctly called the Via Appia. The greater part of the line from Beneventum to Venusia, and thence to Tarentum, was carried through a wild and mountainous country; and it is highly probable that it was in great measure abandoned after the more convenient line of the Via Trajana was opened. It appears that Hadrian restored the portion from Beneventum to Aeculanum, but it is doubtful whether he did so farther on. Nevertheless the general course of the road can be traced, though many of the stations cannot be fixed with certainty. The latter are thus given in the Antonine Itinerary:—

From Beneventum to

Aeculanum	xv. M. P.
Sub Romulea	xxi.
Pons Aufidi	xxii.
Venusia (*Venosa*)	xviii.
Silvium (*Garagnone*)	xx.
Blera (*Gravina*)	xiii.
Sub Lupatia	xiv.
Canales	xiii.
Tarentum (*Taranto*)	xx.

Aeculanum, or Eclanum as the name is written in the Itineraries, is fixed beyond a doubt at *Le Grotte*, near *Mirabella*, just 15 miles from Beneventum, where a town grew up on its ruins in the middle ages with the name of Quintodecimum. [AECULANUM.] The site of Romulea is much less certain, but may perhaps be placed at *Bisaccia*, and the station Sub Romulea in the valley below it. The Pons Aufidi is the *Ponte Sta Venere*, on the road from *Lacedogna* to *Venosa*, which is unquestionably an ancient bridge, and the distance from Venusia agrees with that in the Itinerary, which is confirmed also in this instance by the Tabula. The latter authority gives as an intermediate station between Sub Romulea and the Pons Aufidi, Aquilonia, which is probably *Lacedogna;* but the distances given are certainly incorrect. In this wild and mountainous country it is obviously impossible at present to determine these with any accuracy. From Venusia again the Via Appia appears to have passed, in as direct a line as the nature of the country will allow, to Tarentum; the first station, Silvium, may probably be placed at *Garagnone*, and the second, Plera, or Blera, at or near *Gravina;* but both determinations are very uncertain. Those of Sub Lupatia and Canales are still more vague, and, until the course of the ancient road shall have been traced upon the spot by some traveller, it is idle to multiply conjectures.

From Tarentum to Brundusium the Antonine Itinerary gives 44 M. P., which is nearly correct; but the intermediate stations mentioned in the Tabula, Mesochoron, Urbius, and Scamnum, cannot be identified. Urbius may perhaps be a corruption of Urium or Hyrium, the modern *Oria*, which is nearly midway between the two cities.

Besides the main line of the Via Appia, as above described, the Itineraries mention several branches, one of which appears to have struck off from Venusia to Potentia, and thence to have joined the highroad to Rhegium, while another descended from Venusia to Heraclea on the gulf of Tarentum, and thence followed the E. coast of the Bruttian peninsula. These lines are briefly noticed in the articles LUCANIA and BRUTTII, but they are very confused and uncertain.

4. From Beneventum by Canusium and Barium to Brundusium.

It was this line of road, first constructed by Trajan, and which was originally distinguished as the VIA TRAJANA, that became after the time of that emperor the frequented and ordinary route to Brundusium, and thus came to be commonly considered as the Via Appia, of which it had in fact taken the place. Its line is in consequence given in all the Itineraries, and can be traced with little difficulty. It passed at first through a rugged and mountainous country, as far as Aecae in Apulia, from which place it was carried through the plains of Apulia to Barium, and afterwards along the sea-coast to Brundusium: a line offering no natural difficulties, and which had the advantage of passing through a number of considerable towns. Even before the construction of the Via Trajana it was not uncommon (as we learn from the journey of Horace) for travellers to deviate from the Appian Way, and gain the plains of Apulia as speedily as possible.

The first part of this road from Beneventum to Aecae may be traced by the assistance of ancient milestones, bridges, &c. (Mommsen, *Topogr. degli Irpini*, in the *Bullet. dell' Inst. Arch.* for 1848, pp. 6, 7.) It proceeded by the villages of *Paduli*, *Buonalbergo*, and *Casalbore*, to a place called *S. Eleuterio*, about 2 miles S. of *Castelfranco*, which was undoubtedly the site of Equus Tuticus, a much disputed point with Italian topographers. [EQUUS TUTICUS.] This is correctly placed by the Antonine Itinerary 21 miles from Beneventum; the Jerusalem Itinerary, which makes it 22 miles, divides the distance at a station called Forum Novum, which must have been situated at or very near *Buonalbergo*. From Equus Tuticus, the road followed a NE. direction to Aecae (the site of which is clearly known as that of the modern *Troja*), and thence turned in a direction nearly due E. to Herdonia (*Ordona*). The object of this great bend was probably to open a communication with Luceria and the other towns of Northern Apulia, as well as perhaps to avoid the defile of the *Cervaro*, above *Bovino*, through which the modern road passes. At Aecae the Via Trajana descended into the great plain of Apulia, across which it was carried in a nearly straight line to Barium (*Bari*). The remainder of its course presents no difficulties, and the stations are, for the most part, well-known towns. The whole line is thus given in the Antonine Itinerary (pp. 112, 116):—

From Beneventum to

Equus Tuticus (*S. Eleuterio*)	xxi. M. P.
Aecae (*Troja*)	xviii.*
Herdonia (*Ordona*)	xviii.
Canusium (*Canosa*)	xxvi.
Rubi (*Ruvo*)	xxiii.
Butuntum (*Bitonto*)	xi.
Barium (*Bari*)	xi.
Turres (?)	xxi.
Egnatia (*Torre di Gnazia*)	xvi.
Speluncae (?)	xx.
Brundusium (*Brindisi*)	xviii.

The two stations of Turres between Barium and Egnatia, and Speluncae between Egnatia and Brundusium, cannot be identified; it is evident from the names themselves that they were not towns, but merely small places on the coast so called. The Jerusalem Itinerary has two stations, Turres Aurelianae, and Turres Juliae, between Egnatia and Barium, but, from the distances given, neither of these can be identified with the Turres of the Antonine Itinerary. The other intermediate stations mentioned by the same authority are unimportant Mutationes, which can be identified only by a careful survey on the spot.

The Tabula gives (though in a very confused manner) an intermediate line of route, which appears to have been the same as that indicated by Strabo (v. p. 283), which quitted the coast at Egnatia, and proceeded through Caelia to Brundusium. The stations given are:—

Canusium to Rudiae	xii. M.P.
Rubi	xiv.
Butuntum	ix.
Caelia (*Ceglie*)	ix.
Ehetium (Azetium?)	—
Norve (?)	ix.
Ad Veneris (?)	viii.
Egnatia	viii.

It is certain that the Via Trajana was continued, probably by Trajan himself, from Brundusium to Hydruntum (*Otranto*), and was thence carried all round the Calabrian peninsula to Tarentum. The road from Brundusium to Hydruntum passed through Lupiae (*Lecce*), in the interior of the peninsula, which is correctly placed 25 miles from each of the above cities. (*Itin. Ant.* p. 118.) The stations on the other line, which is given only in the Tabula, are as follow:—

	M. P.
Hydruntum to Castrum Minervae (*Castro*)	viii.
Veretum (*Sta Maria di Vereto*)	xii.
Uxentum (*Ugento*)	x.
Baletium (Aletium)	x.
Neretum (*Nardò*)	x.
Manduria (*Manduria*)	xxix.
Tarentum (*Taranto*)	xx.

The above distances appear to be correct.

Lastly, a branch struck off from the Via Trajana at Barium which proceeded direct to Tarentum. It is probable that this came to be adopted as the most convenient mode of reaching the latter city when the original Via Appia had fallen into disuse. The distance is correctly given as 60 miles. (*Itin. Ant.* p. 119.)

Besides the above, which may be considered as all in some degree branches of the Via Trajana, there was another line, probably constructed at a late period, which struck across from Equus Tuticus to Venusia, so as to form a cross communication between the Via Trajana and the old Via Appia. This is set down in the Antonine Itinerary (p. 103) as part of a long line proceeding from the N. of Italy to the S.; but the intermediate stations between Equus Tuticus and Venusia cannot be determined.

5. From Capua by Nuceria to Rhegium.

This line of road is indicated by Strabo in the passage above cited (v. p. 283) as existing in his time, but he certainly did not include it under the name of the Via Appia. It seems, however, to have subsequently come to be regarded as such, as the Antonine Itinerary puts it under the heading, “Ab Urbe Appia via recto itinere ad Columnam” (*Itin. Ant.* p. 106.)*, and inasmuch as it was a continuation of the original Appian Way, it was, strictly speaking, as much entitled to bear the name as the Via Trajana. Strabo does not tell us whether it was passable in his day for carriages or not, and we have no account in any ancient author of its construction. But we learn the period at which it was first opened from a remarkable inscription discovered at *La Polla*, in the valley of *Diano*, which commemorates the construction of the road from Rhegium to Capua, and adds the distances of the principal towns along its course: unfortunately the first line, containing the name of the magistrate by whom it was opened, is wanting; and the name of M. Aquilius Gallus, inserted by Gruter and others, is a mere conjecture. There is little doubt that the true restoration is the name of P. Popilius Laenas, who was praetor in B.C. 134, and who, after clearing the mountains of Lucania and Bruttium of the fugitive slaves who had taken refuge in them, appears to have first constructed this highroad through that rugged and mountainous country. (Mommsen, *Inscr. R. N.* 6276; Ritschl. *Mon. Epigr.* pp. 11, 12.) There is, therefore, no foundation whatever for the name of VIA AQUILIA, which has been given by some modern writers (Romanelli, Cramer, &c.) to this line of road: it was probably at first called VIA POPILIA, after its author, who, as was usual in similar cases, founded at the same time a town which bore the name of Forum Popilii, and occupied the site of *La Polla* [FORUM POPILII]; but no mention of this name is found in any ancient author, and it seems to have been unknown to Strabo. The distances given in the inscription above mentioned (which are of the greatest value, from their undoubted authenticity), are:—

	M. P.
From Capua to Nuceria	xxxiii.
[Forum Popilii]	li.
Muranum	lxxiv.
Consentia	xlix.
Valentia	lvii.
Ad Statuam	li.
Rhegium	vi.

The point designated as “Ad Fretum ad Statuam” is evidently the same as the Columna of the Itineraries, which marked the spot from which it was usual to cross the Sicilian straits. The total distance from Capua to Rhegium, according to the above description, is 321 miles. The Antonine Itinerary makes it 337 miles. It is difficult to judge how far this discrepancy is owing to errors in the distances as given in our MSS., or to alterations in the line of road; for though it is evident that the road given in the Itinerary followed *generally* the same line as that originally constructed by Popilius, it is probable that many alterations had taken place in particular parts; and in the wild and mountainous tracts through which the greater part of it was carried, such alterations must frequently have been rendered necessary. The determination of the particular distances is, for the same reason, almost impossible, without being able to trace the precise course of the ancient road, which has not yet been accomplished. The stations and distances, as given in the Antonine Itinerary, are as follow:—

---

* This distance must be above the truth: the direct distance is not more than 8 miles.

* The words “Appia via” may, however, refer only to the first part of this route, which certainly followed the true Appian Way as far as Capua.

	M. P.
From Capua to Nola - - - - -	xxi. (xix.)*
Nuceria (*Nocera*) -	xvi.* (xiv.)
Ad Tanarum - -	xxv.
Ad Calorem - - -	xxiv.
In Marcelliana - -	xxv.
Caesariana - - -	xxi.
Nerulum (*La Rotonda*)	xxiii.
Sub Murano (near *Murano*) - - -	xiv.
Caprasiae (*Tarsia*) -	xxi.
Consentia (*Cosenza*)	xxviii.
Ad Sabatum fluvium	xviii.
Ad Turres - - -	xviii.
Vibona (*Monte Leone*)	xxi.
Nicotera (*Nicotera*) -	xviii.
Ad Mallias - - -	xxiv.
Ad Columnam - -	xiv.

The stations between Nuceria and Nerulum cannot be determined. Indeed the only points that can be looked upon as certain, in the whole line from Nuceria to Rhegium, are Sub Murano, at the foot of the hill on which stands the town of *Murano*, Consentia (*Cosenza*), Vibo Valentia (*Monte Leone*), and Nicotera, which retains its ancient name. Nerulum and Caprasiae may be fixed with tolerable certainty by reference to these known stations, and the distances in this part of the route appear to be correct. The others must remain uncertain, until the course of the road has been accurately traced.

At Nerulum the above line of road was joined by one which struck across from Venusia through Potentia (*Potenza*) to that place. It was a continuation of the cross-road already noticed from Equus Tuticus to Venusia; this line, which is given in the Antonine Itinerary (p. 104), was called, as we learn from the inscriptions on milestones still extant, the Via Herculia, and was therefore in all probability the work of the Emperor Maximianus. (Mommsen, *I. R. N.* p. 348.) The stations mentioned in the Itinerary (*l. c.*) are:—

From Venusia to Opinum - - -	xv.	M. P.
Ad fluv. Bradanum	xxix.	
From Venusia to Potentia (*Potenza*)	xxiv.	
Acidii (?) - - -	xxiv.	
Grumentum (*Saponara*) - - -	xxviii.	
Semuncla (?) - -	xxvii.	
Nerulum - - -	xvi.	

None of the above stations can be identified, except Potentia and Grumentum, and the distances are in some cases certainly erroneous. The same line of route is given in the Tabula, but in a very confused and corrupt manner. The stations there set down are wholly different from those in the Itinerary, but equally uncertain. Anxia (*Anzi*), between Potentia and Grumentum, is the only one that can be identified.

The principal work on the Via Appia is that of Pratilli (*Della Via Appia*, fol. Napoli, 1745); but, unfortunately, little dependence can be placed upon it. Parts of the route have been carefully and accurately examined by Westphal, Chaupy, and other writers already cited, but many portions still remain to be explored; and accurate measurements are generally wanting. Nor does there exist any map of the kingdom of Naples on which dependence can be placed in this respect. [E. H. B.]

VIA AQUILIA. [Via Appia, No. 5.]

VIA ARDEATINA. [Ardea.]

VIA AURELIA, one of the principal highways of Italy, which led from Rome to Pisae in Etruria, and thence along the coast of Liguria to the Maritime Alps. It was throughout almost its whole extent a maritime road, proceeding, in the first instance, from Rome to Alsium on the Tyrrhenian sea, whence it followed the coast-line of Etruria, with only a few trifling deviations, the whole way to Pisae. The period of its construction is quite uncertain. Its name sufficiently indicates that it was the work of some magistrate of the name of Aurelius; but which of the many illustrious men who bore this name in the latter ages of the Republic was the author of it, we are entirely uninformed. We know with certainty that it was in use as a well-known and frequented highway in the time of Cicero, who mentions it as one of the three roads by which he might proceed to Cisalpine Gaul ("ab infero mari Aurelia," *Phil.* xii. 9). It may also be probably inferred that it was in existence as far as Pisae, when the road was carried from that city to Vada Sabata and Dertona, the construction of which is ascribed by Strabo to Aemilius Scaurus, in B. C. 109 (Strab. v. p. 217). [Via Aemilia Scauri.] This continuation of the Aurelian Way seems to have been commonly included under the same general name as the original road; though, according to Strabo, it was properly called the Aemilian Way, like its more celebrated namesake in Cisalpine Gaul. It was apparently not till the reign of Augustus that the line of road was carried along the foot of the Maritime Alps, from Vada Sabata to Cemenelium, and thence into Gaul. It is certain, at least, that the ancient road, of which the traces are still visible, was the work of that emperor; and we know also that the Ligurian tribes who inhabited the Maritime Alps were not completely reduced to subjection till that period. [Liguria.] The Itineraries, however, give the name of Via Aurelia to the whole line of road from Rome to Arelate in Gaul; and though little value can be attached to their authority on this point, it is not improbable that the name was frequently used in this more extended sense; just as that of the Via Appia was applied to the whole line from Rome to Brundusium, though originally carried only as far as Capua.

---

* Both these distances are overstated, and should probably be corrected as suggested by the numbers in parentheses. The same distances are given in the Tab. Peut. thus:—

Capua to Suessula - - -	ix. M. P.
Nola - - - - - - - -	ix.
Ad Teglanum - - - - - - -	v.
Nuceria - - - - - - -	ix.

The stations from Rome, as far as Luna in Etruria, are thus given in the Antonine Itinerary (p. 290, &c.):

Lorium (near *Castel Guido*)	xii. M.P.
Ad Turres (*Monteroni*))	x.
Pyrgi (*Sta Severa*)	xii.
Castrum Novum (*T. di Chiaruccia*)	viii.
Centum Cellae (*Civita Vecchia*)	v.
Martha (Ad Martam fl.)	x.
Forum Aurelii (*Montalto?*)	xxiv.
Cosa (*Ansedonia*)	xxv.
Ad lacum Aprilem (Prilem)	xxii.
Salebro (?)	xii.
Manliana (?)	ix.
Populonium (Ru. of *Populonia*)	xii.
Vada Volaterrana (*Vada*)	xxv.
Ad Herculem (near *Livorno*)	xviii.
Pisae (*Pisa*)	xii.
Papiriana (*Viareggio ?*)	xi.
Luna (*Luni*)	xxiv.

The stations thence along the coast of Liguria as far as the river Varus have been mentioned in the article LIGURIA; and the distances along this part of the line, in both the Antonine Itinerary and the Tabula, are so confused and corrupt that it is useless to attempt their correction. Even of that part of the Via Aurelia above given, along the coast of Etruria, several of the stations are very uncertain, and some of the distances are probably corrupt. From Rome to Centum Cellae, indeed, the road has been carefully examined and the distances verified (Westphal, *Röm. Kamp.* pp. 162—169); but this has not been done farther on: and as the road traversed the *Maremma*, which was certainly in the latter ages of the Roman Empire, as at the present day, a thinly-peopled and unhealthy district, several of the stations were probably even then obscure and unimportant places. The Tabula, as usual, gives a greater number of such stations, several of which may be identified as the points where the road crossed rivers and streams whose names are known. But the route is given very confusedly, and the distances are often incorrect, while in some cases they are omitted altogether.

From Rome to	M.P.
Lorium (*Castel Guido*)	xii.
Baebiana (?)	—
Alsium (*Palo*)	vi.
Pyrgi (*Sta Severa*)	x.
Punicum (*Sta Marinella*)	—
Castrum Novum (*Torredi Chiaruccia*)	ix.
Centum Cellae (*Civita Vecchia*)	iv.
(Ad) Minionem fl. (*River Mignone*)	—
Graviscae	—
Tabellaria (?)	v.
Ad Martam fl.	ii.
Forum Aurelii (*Montalto?*)	iii.
(Ad) Arminiam fl. (*River Fiora*)	iv.
Ad Novas, or Ad Nonas	iii.
Sub Cosam	ii.
Cosa (*Ansedonia*)	ii.
(Ad) Albiniam fl. (*R. Albegna*)	ix.
Telamonem (*Porto Talamone*)	iv.
Hastam	viii.
(Ad) Umbronem fl. (*R. Ombrone*)	viiii.(?)
Salebro (?)	xii.
Manliana (?)	ix.
Populonium (Ru. of *Populonia*)	xii.
Vada Volaterrana (*Vada*)	xx.(?)
Ad Fines	viii.(?)
(Ad) Piscinas	xiii.(?)
Turrita (*Triturrita*)	xvi.(?)
Pisae (*Pisa*)	ix. (?)

The distances between Populonium and Pisae, as well as those between Centum Cellae and Cosa, are in many cases unintelligible; and it is often impossible to say to which of the stages they are meant to refer.

The Via Aurelia (in the more extended sense of the term, as used in the Itineraries) communicated with Cisalpine Gaul and the Via Aemilia by two different routes; the one, which according to Strabo was constructed by Aemilius Scaurus at the same time that he continued the Via Aurelia to Vada Sabata, led from that place across the Apennines to Aquae Statiellae, and thence to Dertona, to which place the Via Aemilia had probably already been prolonged. (Strab. v. p. 217.) The other, which was known as the Via Postumia, and was therefore probably constructed at a different period, led from Dertona across the mountains direct to Genua. Both these lines are given in the Antonine Itinerary and in the Tabula; though in the former they are confused and mixed up with the direct line of the coast-road. [LIGURIA.]

1. From Genua to Dertona the stations were:—

Libarnum (Ru. between *Arquata* and *Serravalle*)	xxxvi. M.P.
Dertona (*Tortona*)	xxxv.

The continuation of this route thence to Placentia will be found under VIA AEMILIA.

2. From Dertona to Vada Sabata:—

D. to Aquae Statiellae (*Acqui*)	xxvii. M.P.
Crixia (?)	xx. (xxii. *Tab.*)
Canalicum (?)	x. (xx. *Tab.*)
Vada Sabata (*Vado*)	xii.

(For the correction of these distances and more detailed examination of the routes in question, see Walckenaer, *Géographie des Gaules*, vol. iii. p. 22.) [E. H. B.]

VIA CANDA'VIA. [VIA EGNATIA.]

VIA CASSIA, was the name given to one of the principal highroads of Italy which led from Rome through the heart of Etruria to Arrietum, and thence by Florentia to Luca. The period of its construction, as well as the origin of its name, is unknown. We learn only from a passage of Cicero that it was a well-known and frequented highway in his time, as that orator mentions it as one of the three roads by which he could proceed to Cisalpine Gaul. (Cic. *Phil.* xii. 9.) In the same passage, after speaking of the Flaminian Way as passing along the Upper Sea, and the Aurelian along the Lower, he adds: "Etruriam discriminat Cassia." Hence it is clear that it was the principal road through the centre of that province, and is evidently the same given in the Antonine Itinerary (p. 285), though it is there erroneously called the Via Clodia. But indeed the occurrence of the Forum Cassii upon this line is in itself a sufficient proof that it was the Cassian and not the Clodian Way. The stations there set down, with their distances, are as follow:—

	M.P.
From Rome to Baccanae (*Baccano*)	xxi.
Sutrium (*Sutri*)	xii.
Forum Cassii (near *Vetralla*)	xi.
Volsinii (*Bolsena*)	xxviii.
Clusium (*Chiusi*)	xxx.
Ad Statuas	xii.
Arretium (*Arezzo*)	xxv.
Ad Fines	xxv.
Florentia (*Firenze*)	xxv.
Pistoria (*Pistoja*)	xxv.
Luca (*Lucca*)	xxv.

The Via Cassia branched off from the Via Flaminia just after crossing the Tiber by the Milvian Bridge, 3 miles from Rome. It then ascended the table-land, and proceeded over a dreary and monotonous plain to Baccanae (*Baccano*), situated in the basin or crater of an extinct volcano. Two intermediate small stations are given in the Tabula: Ad Sextum, which, as its name imports, was situated 6 miles from Rome, and therefore 3 from the Pons Milvius; and Veii, 6 miles farther: but it is probable that the ancient Via Cassia, like the modern highroad, passed *by*, but not *through*, the ancient city; so that the station indicated was probably that where the road turned off to Veii, near the *Isola Farnese.* The Via Clodia separated from the Cassia about 3 miles beyond the station Ad Sextum, and struck off through Careiae (*Galera*) and Sabate (*Bracciano*) to Forum Clodii. The Tabula again gives an intermediate station, between Sutrium and Forum Cassii, called Vicus Matrini, the ruins of which are still visible 7 miles beyond *Sutri;* and that of the Aquae Passeris, now called the *Bagni di Serpa*, 12 miles beyond Forum Cassii. The stations given in that document can thus be identified as far as Clusium. They are:—

Ad Sextum	vi. M.P.
Veii (near *Isola Farnese*)	vi.
Baccanae (*Baccano*)	ix.
Sutrium (*Sutri*)	xii.
Vicus Matrini	(omitted, but should be vii.)
Forum Cassii (*Vetralla*)	iv.
Aquae Passeris (*Bagni di Serpa*)	xi.
Volsinii (*Bolsena*)	ix.
Ad Palliam Fluvium (*R. Paglia*)	—
Clusium (*Chiusi*)	ix.

But from Clusium to Florentia the names of the stations are wholly unknown, and cannot be identified, with the exception of Arretium; and the entire route is given in so confused a manner that it is impossible to make anything of it.

Livy tells us that C. Flaminius, the colleague of M. Aemilius Lepidus in B.C. 187, after having effectually reduced the Ligurian tribes that had infested the territory of Bononia, constructed a road from Bononia to Arretium (Liv. xxxix. 2). But it is remarkable that we never hear anything more of this line of road, which would seem to have fallen into disuse; though this pass across the Apennines, which is still traversed by the modern highroad from *Florence* to *Bologna*, is one of the easiest of all. Cicero indeed might be thought to allude to this route when he speaks of proceeding into Cisalpine Gaul by the Via Cassia (*l. c.*); but the absence of any allusion to its existence during the military operations at that period, or on any other occasion, seems to prove conclusively that it had not continued in use as a military highway.

(For a careful examination and description of the portion of the Via Cassia near Rome, see Westphal, *Röm. Kamp.* pp. 147—153; Nibby, *Vie degli Antichi*, pp. 75—82.) [E. H. B.]

VIA CIMINIA, a name known only from an inscription of the time of Hadrian (Orell. *Inscr.* 3306), was probably a short cut constructed across the range of the Ciminian hills, leaving the Via Cassia to the left, and following nearly the same line as the modern road over the same hills. (Holsten. *Not. ad Cluv.* p. 67.) [Ciminus Mons.] [E. H. B.]

VIA CLODIA, was the name of a highroad that branched off from the Via Cassia, to the left, about 10 miles from Rome, near the inn of *La Storta*, where remains of the ancient pavement, indicating its direction, may still be seen. The name of the Via Clodia is known to us only from the Itineraries, and from inscriptions of imperial date (Orell. *Inscr.* 822, 3143); but from the form of the name there can be no doubt that it dates from the republican period, though we have no account when or by whom this line of road was constructed. The Itineraries indeed seem to have regarded the Via Clodia as the main line, of which the Via Cassia was only a branch, or rather altogether confounded the two; but it is evident from the passage of Cicero above quoted, that the Via Cassia was, properly speaking, the main line, and the Clodia merely a branch of it. At the same time, the occurrence of a Forum Clodii on the one branch, as well as a Forum Cassii on the other, leave no doubt which were the true lines designated by these names. The course of the Via Clodia as far as Sabate (*Bracciano*) admits of no doubt, though the distances given in the Tabula are corrupt and uncertain; but the position of Forum Clodii is uncertain, and the continuation of the line is very obscure. It appears indeed to have held a course nearly parallel with that of the Via Cassia, through Blera, Tuscania, and Saturnia; but from the latter place the Tabula represents it as proceeding to Succosa (Sub Cosa), which would be an abrupt turn at right angles, and could never have been the direction of the principal line of road. It is probable that this was either carried up the valley of the *Ombrone* to *Siena* (Sena Julia), or proceeded across the marshy plains of that river to join the Via Aurelia. But this is mere conjecture. The stations, as given in the Tabula (the only one of the Itineraries in which the true Via Clodia is found), are as follow:—

From Rome to Ad Sextum	vi. M.P.
Careiae (*Galera*)	ix.
Ad Novas	viii.
Sabate (*Bracciano*)	—
Forum Clodii	—
Blera (*Bieda*)	xvi. (?)
Marta (Ad Martam fl.)	ix.
Tuscania (*Toscanella*)	—
Maternum (*Farnese?*)	xii.
Saturnia (*Saturnia*)	xviii.

The Antonine Itinerary, without giving the route in detail, says simply—

A Roma Foro Clodii, M.P. xxxii.

If this distance be correct, Forum Clodii must be placed either at or a little beyond *Oriuolo*, which is 6 miles beyond Sabate (*Bracciano*). The distance of *Oriuolo* from Rome by the line of the Via Clodia (as measured on Gell's map), somewhat exceeds 31 miles. But the distance from Blera must, in that case, be greatly overstated; the actual distance from *Oriuolo* to *Bieda* being scarcely more than 10 miles. (Westphal, *Röm. Kampagne*, pp. 154—158; Dennis's *Etruria*, vol. i. p. 273: but the distances there cited, in the note from the Tabula, are incorrect.) [E. H. B.]

VIA DOMITIANA. [Via Appia, No. 1.]

VIA EGNA'TIA (ἡ Ἐγνατία ὁδός, Strab. vii. p. 322, seq.), a Roman military road, which connected Illyria, Macedonia, and Thrace. We are almost totally in the dark with regard to the origin of this road. The assumption that it was constructed by a certain person named Egnatius, who was likewise the founder of the town Egnatia, or Gnatia, between Barium and Brundusium, on the coast of Apulia, is a mere conjecture, which cannot be supported by any authority. We may, however, make some approximation towards ascertaining the date of its construction, or, at all events, that of a portion of it. Strabo, in the passage cited at the head of this article, says that Polybius estimated the length of the via, between the coast of the Adriatic and the city of Thessalonica, at 267 Roman miles; whence it appears that this portion of it at least was extant in the time of Polybius. Consequently, as that historian flourished in the first half of the 2nd century B. C., we may infer with tolerable certainty that the road must have been commenced shortly after the reduction of Macedonia by the Romans in B. C. 168. Whether the eastern portion of the road, namely, that between Thessalonica and Cypsela, a town 10 miles beyond the left, or E., bank of the Hebrus, was also completed in the time of Polybius, is a point which cannot be so satisfactorily ascertained. For although Strabo, in the same passage, after mentioning the length of the road, from its commencement to its termination at Cypsela, proceeds to say that, if we follow Polybius, we must add 178 stadia to make up the number of Roman miles, because that writer computed 8 stadia and 2 plethra, or 8⅓ stadia, to the Roman mile, instead of the usual computation of exactly 8; yet Strabo may then be speaking only of the historian's general practice, without any reference to this particular road. And, on the whole, it may perhaps be the more probable conclusion that the eastern portion of the road was not constructed till some time after the Romans had been in possession of Macedonia.

According to the same geographer, who is the chief authority with regard to this via, its whole length was 535 Roman miles, or 4280 stadia; and although the first portion of it had two branches, namely, one from Epidamnus or Dyrrachium and another from Apollonia, yet, from whichever of those towns the traveller might start, the length of the road was the same. Into the accuracy of this statement we shall inquire further on. Strabo also mentions that the first part of the road was called in Candavium (ἐπὶ Κανδαουΐας), and this name frequently occurs in the Roman writers. Thus Cicero (*ad Att.* iii. 7) speaks of travelling "per Candaviam," and Caesar (*B. C.* iii. 79) mentions it as the direct route into Macedonia. It does not, however, very clearly appear to how much of the road this name was applicable. Tafel, who has written a work on the Via Egnatia, is of opinion that the appellation of Candavia may be considered to extend from the commencement of the via, including the two branches from Dyrrachium and Apollonia, to the town of Lychnidus. (*De Via mil. Rom. Egnatia, Proleg.* p. xcix. Tubing. 1842.) But this limitation is entirely arbitrary, and unsupported by any authority; and it would perhaps be a juster inference from the words of Strabo to assume that the name "Candavia" was applicable to the road as far as Thessalonica, as Col. Leake appears to have done. (*Northern Greece*, vol. iii. p. 311.) The point to be determined is, what does Strabo mean by "the first part?" The road in its whole extent he says is called "Via Egnatia," and the first part "in Candaviam" (Ἡ *μὲν οὖν πᾶσα* Ἐγνατία *καλεῖται*. Η *δὲ πρώτη ἐπὶ* Κανδαουΐας *λέγεται, κ. τ. λ.*); and from what follows it is evident that he contemplated the division of the parts at Thessalonica, since he gives the separate measurement as far as that town, which is just half the whole length of the road.

We will consider the road as far as Thessalonica, or the Via Candavia, first, and then proceed to the remainder of the Egnatian Way. Strabo (*l. c.* and p. 326) lays down the general direction of the road as follows: After passing Mount Candavia, it ran to the towns of Lychnidus and Pylon; which last, as its name implies, was the border town between Illyria and Macedonia. Hence it proceeded by Barnus to Heracleia, and on through the territory of the Lyncestae and Eordaei through Edessa and Pella to Thessalonica. The whole extent of this line, as we have already seen, was 267 Roman miles; and this computation will be found to agree pretty accurately with the distance between Dyrrachium and Thessalonica as laid down in the Antonine Itinerary. According to that work, as edited by Parthey and Pinder (Berlin, 1848), who have paid great attention to the numbers, the stations and distances between those two places, starting from Dyrrachium, were as follow (p. 151):—

Clodiana - - - -	33 miles.
Scampa - - - -	20 „
Tres Tabernae - - -	28 „
Lignidus (Lychnidus) - -	27 „
Nicias - - - -	32 „
Heraclea - - - -	11 „
Cellae - - - -	34 „
Edessa - - - -	28 „
Pella - - - -	28 „
Thessalonica - - -	28 „
	269 „

The difference of 2 miles probably arises from some variation in the MSS. of the Itinerary. It should be observed, however, that, according to Wesseling's edition (p. 318, seq.), the distance is 11 miles more, or 280 miles, owing to variations in the text. According to the Tab. Peut. the whole distance was 279 miles, or 10 more than that given in the Itinerary; but there are great discrepancies in the distances between the places.

The last-named work gives 307 miles as the sum of the distances between Apollonia and Thessalonica; or 38 miles more than the route between Dyrrachium and the latter town. Both these routes united, according to the Itinerary, at Clodiana; and the distance from Apollonia to Clodiana was 49 miles, while that from Dyrrachium to the same place was only 33. This accounts for 16 miles of the difference, and the remainder, therefore, must be sought in that part of the road which lay between Clodiana and Thessalonica. Here the stations are the same as those given in the route from Dyrrachium, with the exception of the portion between Lychnidus and Heracleia; where, instead of the single station of Nicias, we have two, viz., Scirtiana, 27 miles from Lychnidus, and Castra, 15 miles from Scirtiana. And as the distance between Castra and Heracleia is stated at 12 miles, it follows that it was 11 miles farther from Lychnidus to Heracleia by this route than by that through Nicias. This, added to the 16 miles extra length to Clodiana, accounts for 27 miles of the difference; but there still remain 11 miles to make up the discrepancy of 38; and, as the stations are the same, this difference arises in all probability from variations in the MSS.

According to the Itin. Hierosol. (p. 285, seq., Berlin ed.), which names all the places where the horses were changed, as well as the chief towns, the total distance between Apollonia and Thessalonica was 300 miles; which differs very slightly from that of the Itinerary, though there are several variations in the route.

Now, if we apply what has been said to the remark of Strabo, that the distance from Thessalonica was the same whether the traveller started from Epidamnus (Dyrrachium) or from Apollonia, it is difficult to perceive how such could have been the case if the junction of the two branches existed in his time also at Clodiana; since, as we have already seen, it was 16 miles farther to that place from Apollonia than from Dyrrachium according to the Itin. Ant.; and the Itin. Hierosol. makes it 24 miles farther. Indeed the maps would seem to show that if the two branches were of equal length their junction must have taken place to the E. of Lake Lychnitis; the branch from Dyrrachium passing to the N. of that lake, and that from Apollonia to the S. But, although Burmeister, in his review of Tafel's work (in Zimmerman's *Zeitschrift für die Alterthumswissenschaft*, 1840, p. 1148), adopted such an hypothesis, and placed the junction at Heracleia, it does not appear that the assumption can be supported by any authority.

Clodiana, where the two branches of the Via Egnatia, or Candavia, united, was seated on the river Genusus (the *Tjerma* or *Skumbi*). From this point the valley of the river naturally indicated the course of the road to the E. (Leake, *Northern Greece*, vol. iii. p. 312.)

We will now proceed to consider the second, or eastern, portion of the Egnatian Way, viz., that between Thessalonica and Cypsela.

The whole length of this route, according to Strabo, was 268 Roman miles; and the distances set down in the Itin. Ant. amount very nearly to that sum, or to 265, as follows. (Pind. and Parth. p. 157; Wess. p. 330, seq.)

Apollonia - - - -	36 miles.
Amphipolis - - -	32 "
Philippi - - - -	32 "
Acontisma - - -	21 "
Otopisus (Topirus) - -	18 "
Stabulum Diomedis - -	22 "
Maximianopolis - - -	18 "
Brizice or Brendice -	20 "
Trajanopolis - -	37 "
Cypsela - - - -	29 "
	265 "

Another route given in the same Itinerary (Wess. p. 320, seq.) does not greatly vary from the above, but is not carried on to Cypsela. This adds the following stations:—Melissurgis, between Thessalonica and Apollonia, Neapolis, between Philippi and Acontisma, Cosintas, which according to Tafel (pars ii. p. 21) is meant for the river Cossinites, between Topirus and Maximianopolis, and Milolitum and Tempyra, between Brendice and Trajanopolis. The Itin. Hierosol. makes the distance only 250 miles.

Many remains of the Egnatian Way are said to be still traceable, especially in the neighbourhood of Thessalonica. (Beaujour, *Voy. militaire dans l'Empire Othoman*, vol. i. p. 205.) [T. H. D.]

VIA FLAMINIA (ἡ Φλαμινία ὁδός), one of the most ancient and important of the highroads of Italy, which led from Rome direct to Ariminum, and may be considered as the *Great North Road* of the Romans, being the principal and most frequented line of communication with the whole of the north of Italy. It was also one of the first of the great highways of which we know with certainty the period of construction, having been made by C. Flaminius during his censorship (B. C. 220), with the express purpose of opening a free communication with the Gaulish territory, which he had himself reduced to subjection a few years before. (Liv. *Epit.* xx.) It is therefore certainly a mistake, when Strabo ascribes it to C. Flaminius (the son of the preceding), who was consul together with M. Aemilius Lepidus, the author of the Aemilian Way, in B. C. 187, and himself constructed a road from Bononia to Arretium. (Liv. xxxix. 2; Strab. v. p. 217.) It is certain that the Flaminian Way was in existence long before, and its military importance was already felt and known in the Second Punic War, when the consul Sempronius proceeded by it to Ariminum, to watch the movements and oppose the advance of Hannibal. (Liv. xxii. 11.) Throughout the period of the Republic, as well as under the Empire, it was one of the best known and most frequented of the highways of Italy. Cicero, in one of the Philippics, says there were three ways which led from Rome to Cisalpine Gaul: the Flaminian by the Upper Sea (the Adriatic), the Aurelian by the Lower, and the Cassian through the midst of Etruria (*Phil.* xii. 9). During the contest between the generals of Vespasian and Vitellius (A. D. 69) the military importance of the Flaminian Way was fully brought out, and it was felt that its possession would be almost decisive of the victory. (Tac. *Hist.* i. 86, iii. 52, &c.) Tacitus alludes to the extent to which this great highway was at this period frequented, and the consequent bustle and crowding of the towns on its course (*Ib.* ii. 64). Most of these, indeed, seem to have grown up into flourishing and populous places, mainly in consequence of the traffic along the line of road.

So important a highway was naturally the object of much attention, and great pains were taken not only to maintain, but to restore and improve it. Thus, in B.C. 27, when Augustus assigned the care of the other highways to different persons of consular dignity, he reserved for himself that of the Via Flaminia, and completely restored it throughout its whole length from Rome to Ariminum, a service which was acknowledged by the erection of two triumphal arches in his honour, one at Rome, the other at Ariminum, the latter of which is still standing. [ARIMINUM.] Again, at a later period, Vespasian added materially to the convenience of the road by constructing a tunnel through the rock at a place called Intercisa, now known as *Il Furlo*, a work which still subsists in its integrity. [INTERCISA.] This remarkable passage is particularly noticed by the poet Claudian, who has left us a general description of the Flaminian Way, by which the emperor Honorius proceeded, in A. D. 404, from Ravenna to Rome. (Claudian, *de VI. Cons. Hon.* 494—522.) Indeed, it is evident that in the latter ages of the Empire, when the emperors for the most part took up their residence at Mediolanum or Ravenna, the Flaminian Way, which constituted the direct line of communication between those cities and Rome, must have become of still greater importance than before.

One proof of the important influence exercised by this great line of highway, is afforded by the circumstance that, like the Aemilian Way, it gave name to one of the provinces of Italy in the later division of that country under the Empire; though, by a strange confusion or perverseness, the name of Flaminia was given, not to the part of Umbria which was actually traversed by the Via Flaminia, but to the eastern portion of Gallia Cispadana, which should naturally have been included in Aemilia. [ITALIA, p. 93.]

There is no doubt, from the description of Claudian above cited, compared with the narrative in Tacitus of the movements of the Vitellian and Vespasian armies in A. D. 69, that the main line of the Via Flaminia continued the same throughout the Roman Empire, but we find it given in the Itineraries with some deviations. The principal of these was between Narnia and Forum Flaminii, where the original road ran direct from Narnia to Mevania, while a branch or loop made a circuit by Interamna and Spoletium, which appears to have come to be as much frequented as the main line, so that in both the Antonine and Jerusalem Itineraries this branch is given, instead of the direct line. Another route given in the Antonine Itinerary (p. 311) follows the line of the old Flaminian Way as far as Nuceria, but thence turns abruptly to the right across the main ridge of the Apennines, and descends the valley of the Potentia to Ancona. Though given in the Itinerary under the name of the Via Flaminia, it may well be doubted whether this route was ever properly so called. Before enumerating the stations and distances along this celebrated line of road, as recorded in the different Itineraries, it will be well to give a brief general description of its course, especially of that part of it nearest to Rome.

The Via Flaminia issued from the gate of the same name, the Porta Flaminia, which was situated nearly on the same site as the modern *Porta del Popolo*, but a little farther from the Tiber, and was carried thence in a direct line to the Pons Milvius (*Ponte Molle*), where it crossed the Tiber. This celebrated bridge, which so often figures in Roman history, was reckoned to be 3 miles from Rome, though only 2 from the Porta Flaminia, the distances being as usual computed from the ancient gate, the Porta Ratumena. After crossing the Tiber, the Flaminian Way turned to the right, keeping pretty close to the river, while the Via Cassia, which diverged from it at this point, ascended the table-land and proceeded nearly due N. The line of the Via Flaminia is here distinctly marked by the remains of several ancient sepulchres, with which its course was studded on both sides, like the Via Appia and Latina, for some miles from the gates of Rome. The number of such sepulchres on the line of the Via Flaminia is particularly noticed by Juvenal (i. 171). One of these, which was discovered in the 17th century at a place called *Grotta Rossa*, obtained much celebrity from being supposed to be that of the family of Ovid, though in reality it belonged to a family of the name of Nasonius, which could have no connection with the poet, whose cognomen only was Naso.

Six miles from the Milvian Bridge (at a place now called *Prima Porta*) was the station of Saxa Rubra, or Ad Rubras as it is called in the Itineraries, which, from its proximity to Rome, and its position on the great northern highway, is repeatedly mentioned in history. [SAXA RUBRA.] It was here that the VIA TIBERINA parted from the Flaminia, and, turning off to the right, followed closely the valley of the river, while the main line of the more important highway ascended the table-land, and held nearly a straight course to the station of Rostrata Villa, which is placed by the Antonine Itinerary 24 miles from Rome. The exact site of this cannot be identified, but it must have been a little short of *Rignano*. It is not mentioned in the Tabula or Jerusalem Itinerary, both of which, on the contrary, give another station, Ad Vicesimum, which, as its name imports, was situated 20 miles from Rome, and, therefore, 11 from Ad Rubras. It must therefore have been situated a little beyond the *Monte di Guardia*, but was evidently a mere Mutatio, or station for changing horses, and no ruins mark the site. But the course of the Via Flaminia can be traced with certainty across this table-land to the foot of Soracte, by portions of the ancient pavement still existing, and ruined tombs by the roadside. The next station set down in the Jerusalem Itinerary and the Tabula is Aqua Viva, 12 miles beyond Ad Vicesimum, and this is identified beyond a doubt with the *Osteria dell' Acqua Viva*, which is just at the required distance (32 miles) from Rome. Thence the ancient road proceeded direct to the Tiber, leaving *Civita Castellana* (the ancient Fescennium) on the left, and crossed the Tiber a little above *Borghetto*, where the remains of the ancient bridge are still visible, and still known as the *Pile di Augusto*. Thence it proceeded in a straight line to Ocriculum, the ruins of which are situated below the modern town of *Otricoli*. Ocriculum was 12 M. P. from Aqua Viva, or 44 from Rome, according to the detailed distances of the Jerusalem Itinerary, which are exactly correct. The Antonine Itinerary makes the distance in one place 45, in another 47 miles. (*Itin. Ant.* pp. 125, 311; *Itin. Hier.* p. 613. For a detailed examination of this first portion of the Via Flaminia, see Westphal, *Römische Kampagne*, pp. 133—145; Nibby, *Vie degli Antichi*, pp. 57—74.)

The remainder of the route must be more briefly described. From Ocriculum it led direct to Narnia (12 miles), where it crossed the Nar by the famous bridge, the ruins of which are still the admiration of travellers, and, quitting altogether the valley of the Nar, crossed the hills nearly in a straight line due N. to Mevania (*Bevagna*), passing by a station Ad Martis (16 M. P.), and thence to Mevania (16 M. P.): whence it proceeded to Forum Flaminii, at the foot of the Apennines. But the distances here have not been examined in detail, and most of the Itineraries (as already mentioned) give the circuitous or loop line (nearly coinciding with the modern road) by Interamna and Spoletium to Forum Flaminii. The stations on this road were, according to the Itin. Ant.:—

Interamna (*Terni*) - - -	viii. M. P.
Spoletium (*Spoleto*) - - -	xviii.
Forum Flaminii - - - -	xviii.

but the Jerusalem Itinerary, which gives them in greater detail, makes the total distance somewhat greater. The stations as there set down are :—

Interamna (*Terni*) - - -	viii. M. P.
Tres Tabernae - - - -	iii.
Fanum Fugitivi - - -	x.
Spoletium (*Spoleto*) - - -	vii.
Sacraria (*Le Vene*, at the sources of the Clitumnus) - - -	viii.
Treba (*Trevi*) - - - -	iiii.
Fulginium (*Foligno*) - -	v.
Forum Flaminii - - -	iii.

The position of Forum Flaminii is well ascertained at a place called *S. Giovanni in Forifiamma*, where its ruins are still visible. This is, however, little more than 2 miles from *Foligno*, but is correctly placed by the Itineraries 12 miles from Nuceria (*Nocera*). There can be no doubt that the foundation of the town of Forum Flaminii was contemporary with the construction of the highroad itself: it was judiciously placed just at the entrance of the Apennines, where the passage of those mountains may be considered to have commenced. Thence the highway followed nearly the same line as the modern road from *Foligno* to *Fano*, skirting the main ridge of the Apennines, and the principal stations can be identified without difficulty. It passed by Helvillum (*Sigillo*), crossed the central ridge of the Apennines at *La Schieggia* (probably Ad Ensem of the Tabula), and descended into the valley of the *Cantiano*, a tributary of the Metaurus, passing by Cales or Calles (*Cagli*), Intercisa (the *Passo del Furlo*), and emerging into the valley of the Metaurus at Forum Sempronii (*Fossombrone*), whence it descended the course of that river to Fanum Fortunae (*Fano*) on the Adriatic, and thence along the coast to Ariminum (*Rimini*), where it joined the Via Aemilia.

We may now recapitulate the distances as given, first, in the Antonine Itinerary (p. 125):—

From Rome to

Rostrata Villa	xxiv. M. P.
Ocriculum (*Otricoli*)	xxi.
Narnia (*Narni*)	xii.
Ad Martis (near *Massa*)	xvi.
Mevania (*Bevagna*)	xvi.
Nuceria (*Nocera*)	xviii.
Helvillum (*Sigillo*)	xiv.
Calles (*Cagli*)	xxiii.
Forum Sempronii (*Fossombrone*)	xviii.
Fanum Fortunae (*Fano*)	xvi.
Pisaurum (*Pesaro*)	viii.
Ariminum (*Rimini*)	xxiv.

These distances are all approximately correct. The stations are given more in detail in the Jerusalem Itinerary (p. 613), as follow:—

From Rome to

Ad Rubras (*Prima Porta*)	ix. M. P.
Ad Vicesimum	xi.
Aqua Viva (*Osteria dell' Acqua Viva*)	xii.
Ocriculum (*Otricoli*)	xii.
Narnia (*Narni*)	xii.
Interamna (*Terni*)	viii.
Tres Tabernae	iii.
Fanum Fugitivi (*Monte Somma*)	x.
Spoletium (*Spoleto*)	vii.
Sacraria (*Le Vene*)	viii.
Trebia (*Trevi*)	iv.
Fulginium (*Foligno*)	v.
Forum Flaminii (*S. Gio. in Forifiamma*)	iii.
Nuceria (*Nocera*)	xii.
Ptaniae, probably Tadinum (*Gualdo*)	viii.
Herbellonium (?)	vii.
Ad Ensem (*La Schieggia*)	x.
Ad Calem (*Cagli*)	xiv.
Intercisa (*Il Furlo*)	ix.
Forum Sempronii (*Fossombrone*)	ix.
Ad Octavum	ix.
Fanum Fortunae (*Fano*)	viii.
Pisaurum (*Pesaro*)	viii.
Ariminum (*Rimini*)	xxiv.

The whole distance from Rome to Ariminum according to this Itinerary is therefore 222 miles, while the Antonine (following the more direct line) makes it 210 miles. The Tabula adds nothing to our knowledge of this route; and the distances are much less correct than in the other two Itineraries.

The branch of the Flaminian Way which struck off from the main line at Nuceria and crossed the Apennines direct to Ancona, is thus given in the Antonine Itinerary (p. 311):—

From Nuceria to

Dubii (?)	viii. M. P.
Prolaqueum (*Pioraco*)	viii.
Septempeda (*S. Severino*)	xv.
Treia (Ru. near *Treia*)	ix.
Auximum (*Osimo*)	xviii.
Ancona	xii.

Thence a road was carried along the coast by Sena Gallica to Fanum Fortunae, where it rejoined the main line of the Via Flaminia. The stations were:—

Ad Aesim fl. (*R. Esino*)	viii. M. P.
Sena Gallica (*Sinigaglia*)	xii.
Ad Pirum (?)	viii.
Fanum Fortunae (*Fano*)	viii.

All the above distances appear to be at least approximately correct. (For a full and careful examination of the line of the Via Flaminia, and the distances of the stations upon it, see D'Anville, *Analyse Géographique de l'Italie*, pp. 147—162.) [E. H. B.]

VIA LABICANA (ἡ Λαβικανὴ ὁδός) was one of the highroads that issued from the Porta Esquilina at Rome. It was evidently originally nothing more than a road that led to the ancient city of Labicum (16 miles from Rome), but was subsequently continued in the same direction, and, after sweeping round the E. foot of the Alban hills, it joined the Via Latina at the station Ad Pictas, in the plain between them and the Volscian mountains. (Strab. v. p. 237.) This route was in many respects more convenient than the proper Via Latina, as it avoided the ascent and descent of the Alban hills: and hence it appears to have become, in the later ages of the Empire, the more frequented road of the two; so that the Antonine Itinerary gives the Via Labicana as the regular highroad from Rome to Beneventum, and afterwards gives the Via Latina as falling into it. (*Itin. Ant.* pp. 304, 306.) But this is decidedly opposed to the testimony of Strabo (*l. c.*), and the usage of the Augustan age, which is generally followed by modern writers. Hence the Via Labicana will be here given only as far as the point where it joins the Latina.

The stations set down in the Antonine Itinerary are merely—

From Rome to Ad Quintanas	xv. M. P.
Ad Pictas	x.

The Tabula subdivides the latter stage into two; viz., Ad Statuas, iii. M. P., and thence to Ad Pictas, vii.; thus confirming the distance in the Itinerary. The station Ad Quintanas was undoubtedly situated at the foot of the hill on which stands the village of *La Colonna*, occupying the site of the ancient Labicum. The line of the ancient road from Rome thither followed nearly the same course, though with fewer windings, as the modern road to *Palestrina* and *Valmontone*. It is described in the article Labicum. [E. H. B.]

VIA LATINA (ἡ Λατινὴ ὁδός) was one of the principal of the numerous highroads that issued from the gates of Rome, and probably one of the most ancient of them. Hence we have no account of the time of its construction, and it was doubtless long in use as a means of communication before it was paved and converted into a regular highroad. Some road or other must always have existed between Rome and Tusculum; while again beyond the Alban hills the valley of the *Sacco* (Trerus) is one of the natural lines of communication that must have been in use from the earliest times. But it is not probable that the line of the Via Latina was completed as a regular road till after the complete reduction of both the Latins and Volscians under the Roman authority. It is true that Livy speaks of the Via Latina as if it already existed in the time of Coriolanus (ii. 39), but he in fact uses the name only as a geographical description, both in this passage and again in the history B. C. 296, when he speaks of Interamna as a colony "quae via Latina est" (x. 36). Neither passage affords any proof that the *road* was then in existence; though there is no doubt that there was already a way or line of communication. The course of the Via Latina is, indeed, more natural for such a line of way than that of the more celebrated Via Appia, and must have offered less difficulties before the construction of an artificial road. Nor did it present any such formidable passes in a military point of view as that of Lautulae on the Appian Way, for which reason it was the route chosen both by Pyrrhus when he advanced towards Rome in B. C. 280, and by Hannibal in B. C. 211. (Liv. xxvi. 8, 9.) On the latter occasion the Carthaginian general seems certainly to have followed the true Via Latina across Mount Algidus and by Tusculum (Liv. *l. c.*); Pyrrhus, on the contrary, turned aside from it as he approached Praeneste, which was the farthest point that he reached in his advance towards Rome.

Whatever may have been the date of the construction of the Via Latina, it is certain that long before the close of the Republic it was one of the best known and most frequented highways in Italy. Strabo speaks of it as one of the most important of the many roads that issued from the gates of Rome (v. p. 237), and takes it as one of the leading and most familiar lines of demarcation in describing the cities of Latium. (*Ib.*) It was, however, in one respect very inferior to its neighbour the Via Appia, that it was not capable of any considerable extension, but terminated at Casilinum, where it joined the Via Appia. (Strab. *l. c.*) There was, indeed, a branch road that was continued from Teanum by Allifae and Telesia to Beneventum; but though this is given in the Itineraries in connection with the Via Latina (*Itin. Ant.* pp. 122, 304), it certainly was not generally considered as forming a part of that road, and was merely a cross line from it to the Appian. On the other hand, the main line of the Via Latina, which descended the valley of the *Sacco*, received on its way the two subordinate lines of road called the VIA LABICANA and VIA PRAENESTINA, which issued from Rome by a different gate, but both ultimately joined the Via Latina, and became merged in it. (Strab. *l. c.*) Such at least is Strabo's statement, and doubtless was the ordinary view of the case in his time. But it would seem as if at a later period the Via Labicana came to be the more frequented road of the two, so that the Antonine Itinerary represents the Via Latina as joining the Labicana, instead of the converse. (*Itin. Ant.* p. 306.)

The stations, as given in the Itinerary just cited, are as follow:—

Ad Decimum	x.	M. P.
Roboraria	iii. (vi.)	
Ad Pictas	xvii.	
Compitum Anagninum	xv.	
Ferentinum (*Ferentino*)	viii.	
Frusino (*Frosinone*)	vii.	
Fregellanum (*Ceprano*)	xiv.	M.P.
Fabrateria (*S. Giovanni in Carico*)	iii.	
Aquinum (*Aquino*)	viii.	
Casinum (*S. Germano*)	vii.	
Teanum (*Teano*)	xxvii.	
Cales (*Calvi*)	vi.	
Casilinum (*Capoua*)	vii.	
Capua (*Sta Maria*)	iii.	

(The four last stages are supplied from the Tabula. The Antonine Itinerary gives only the branch of the road that led, as above noticed, to Beneventum.)

It will be observed that, in its course, as above set down, from Rome to Ferentinum, the Via Latina did not pass through any town of importance, the stations given being mere Mutationes, or places for changing horses. But, on account of the importance of this line of road, it will be necessary to describe it somewhat more in detail.

The Via Latina issued from the Porta Capena together with the Via Appia. It was not till about half-way between that gate and the later Porta Appia (*Porta di S. Sebastiano*), that the two separated, and the Via Latina pursued its own course through the gate in the walls of Aurelian that derived from it the name of Porta Latina. From this gate (now long closed) to a point 2 miles from the Porta Latina, where it crosses the modern road from Rome to *Albano*, the line of the ancient road may be readily traced by portions of the pavement, and ruins of sepulchres, with which the Latin Way, as well as the Flaminian and Appian (Juv. *Sat.* i. 171), was bordered. From that point the road may be seen proceeding in a perfectly straight line, which is marked from distance to distance by tombs and other ruins, to the foot of the Tusculan hills. The only one of these ruins which deserves any notice is that commonly called the temple of Fortuna Muliebris, which is in reality a sepulchre of imperial times. About 9 miles from the Porta Capena is a farm or hamlet called *Morrena*, near which are the extensive remains of a Roman villa, supposed to be that of Lucullus; and about a mile farther must be placed the station Ad Decimum, the 10 miles being undoubtedly reckoned from the Porta Capena. Almost immediately from this point began the ascent of the Tusculan hills: the road still preserved nearly its former direction, leaving *Grotta Ferrata* on the right, and the citadel of Tusculum on the left; it then passed, as it is described by Strabo (v. p. 237), between Tusculum and the Alban Mount, following the line of a deep valley or depression between them, till it reached the foot of Mount Algidus, and, passing through a kind of notch in the ridge of that mountain, at a place now called *La Cava*, descended to the station Ad Pictas in the plain below. The course of the ancient road may be distinctly traced by remains of the pavement still visible at intervals; the second station, Roboraria (if the distance of six miles given in some MSS. be correct), must have stood near the ruins of a mediaeval castle called *Molara*. Thence to Ad Pictas the distance is stated at 17 miles, which is certainly greatly above the truth. It was at this station that the Via Labicana joined the Latina; and from this circumstance, compared with the distances given thence to Ferentinum, we may place the site of Ad Pictas somewhere near the *Osteria di Mezza Selva*, about 10 miles beyond Roboraria. Strabo calls it 210 stadia 26¼ miles) from Rome, but it is not clear whether he measured the distance by the Via Latina or the Labicana (v. p. 237). The actual distance of Ferentinum (concerning which there is no doubt) from Rome is 49 miles; and the Compitum Anagninum is correctly placed 8 miles nearer the city, which would exactly agree with the point on the present highroad where the branch to Anagnia still turns off. Both the Itinerary and the Tabula place Ad Pictas 15 miles from the Compitum Anagninum, and this distance would fix it 10 miles from Roboraria, or 26 from Rome, thus agreeing closely with the statement of Strabo. We may, therefore, feel sure that the position above assigned to Ad Pictas, a point of importance, as that where the two roads joined, is at least approximately correct.

The next stations admit of no doubt, and the distances are correct. It was at the Compitum Anagninum, 15 miles beyond Ad Pictas, that the Via Praenestina joined the Latina, which was carried thence down the valley of the *Sacco*, nearly in the line of the present highroad, by Ferentinum and Frusino, both of which still retain their ancient names, to Fregellanum (*Ceprano*) on the Liris, whence it turned S. to Fabrateria Nova (the ruins of which are still visible at *S. Giovanni in Carico*), on the right bank of the Liris. Here it crossed that river by a bridge, of which the ruins are still extant, whence the course of the ancient road may be traced without difficulty through Aquinum, Casinum, Teanum, and Cales to Casilinum on the Vulturnus, where it fell into the Via Appia. Portions of the ancient pavement, sepulchres, and other ruins mark the line of the ancient way throughout the latter part of its course. At a station given in the Tabula under the name of Ad Flexum (9 miles from Casinum) a branch road turned off to Venafrum, whence it ascended the valley of the Vulturnus to Aesernia, and thence into the heart of Samnium. The Antonine Itinerary represents the Via Latina as following this cross-road, and making a bend round by Venafrum, but there can be no doubt that the regular highroad proceeded direct to Teanum. The remains of the ancient road may be distinctly traced, proceeding from Teanum nearly due N. through *Cajanello* and *Tora* to *S. Pietro in Fine*, which was probably the site of the station Ad Flexum. This would be 18 miles from Teanum. The Tabula gives the distance as viii., for which there is no doubt we should read xviii.

The branch of the Via Latina, already alluded to, which was carried to Beneventum, quitted the main road at Teanum, crossed the Vulturnus to Allifae, and thence was carried up the valley of the Calor by Telesia to Beneventum. The distances are thus given in the Antonine Itinerary (p. 304):—

Teanum to Allifae (*Alife*) - -	xvii. M.P.
Telesia (*Telese*) - -	xxv.
Beneventum - -	xvii.

(The first part of the Via Latina from Rome to the valley of the Liris is examined and discussed in detail by Westphal, *Röm. Kamp.* pp. 78—97; and Nibby, *Vie degli Antichi*, pp. 110—119.) [E.H.B.]

VIA LAURENTINA. [LAURENTUM.]

VIA NOMENTANA. [NOMENTUM.]

VIA OSTIENSIS, was, as its name imports, the road leading from Rome to Ostia, which must naturally have been an extremely frequented route when the city was at the height of its prosperity. It followed in its general direction the left bank of the Tiber, but cutting off the more considerable bends and windings of the river. It issued from the Porta Ostiensis, now called the *Porta S. Paolo*, from the celebrated basilica of St. Paul, about 1½ mile outside the gate, and situated on the line of the ancient road. Three miles from Rome it passed through a village, or suburb, known as the Vicus Alexandri (Ammian. xvii. 4. § 14): it was at this point that the Via Laurentina struck off direct to Laurentum, 16 miles distant from Rome [LAURENTUM]; while the Via Ostiensis, turning a little to the right, pursued thenceforth nearly a straight course all the way to Ostia. On this line, 11 miles from Rome, is the *Osteria di Mala Fede*, where a road branches off to *Porcigliano*, which undoubtedly follows the same line as that mentioned by the younger Pliny, by which his Laurentine villa could be approached as conveniently as by the Via Laurentina. (Plin. *Ep.* ii. 17.) Five miles farther the highroad reached Ostia, which was 16 miles from Rome. (*Itin. Ant.* p. 301.) [OSTIA]. [E. H. B.]

VIA POPILIA. [VIA APPIA, No. 5.]

VIA PORTUENSIS, was the road that led from Rome to the Portus Trajani, or the new port of the city constructed under the Empire on the right bank of the Tiber. [OSTIA.] The name could not, of course, have come into use until after the construction of this great artificial port to replace the natural harbour of Ostia, and is only found in the enumeration of the Viae in the Curiosum Urbis and Notitia (pp. 28, 29, ed. Preller). But the line of the road itself may still be traced without difficulty. It issued from the Porta Portuensis, in the walls of Aurelian, and followed, with little deviation, the right bank of the Tiber, only cutting off the minor windings of that river. The Antonine Itinerary places the city of Portus 19 miles from Rome (p. 300); but this is certainly a mistake, the real distance being just about the same as that of Ostia, or 16 miles. (Nibby, *Dintorni*, vol. iii. p. 624.) From Portus a road was carried along the coast by Fregenae (9 miles) to Alsium (9 miles), where it joined the VIA AURELIA. (*Itin. Ant.* p. 300.) [E. H. B.]

VIA POSTUMIA, was, as we learn from an inscription (Orell. *Inscr.* 3121), the proper name of the road that crossed the Apennines direct from Dertona to Genua. But it appears to have fallen into disuse; at least we do not find it mentioned by any ancient writer, and the road itself is included by the Itineraries under the general name of the Via Aurelia. It has therefore been considered more convenient to describe it in that article. [E. H. B.]

VIA PRAENESTINA (*ἡ Πραινεστινὴ ὁδός*, Strab.), was the name of one of the highroads that issued from the Porta Esquilina at Rome, and led (as its name implies) direct to Praeneste. The period of its construction is unknown; but it is evident that there must have been from a very early period a highway, or line of communication from Rome to Praeneste, long before there was a regular paved road, such as the Via Praenestina ultimately became. The first part of it indeed, as far as the city of Gabii, 13 miles from Rome, was originally known as the VIA GABINA, a name which is used by Livy in the history of the early ages of the Republic (Liv. ii. 11), but would seem to have afterwards fallen into disuse, so that both Strabo and the Itineraries give the name of Via Praenestina to the whole line. (Strab. v. p. 238; *Itin. Ant.* p. 302.) In the latter period of the Republic, indeed, Gabii had fallen very much into decay, while Praeneste was still an important and flourishing town, which will sufficiently account for the one appellation having become merged in the other. A continuation of the same road, which was also included under the name of the Via Praenestina, was carried from the foot of the hill at Praeneste, through the subjacent plain, till it fell into the Via Latina, just below Anagnia.

The stations on it mentioned in the Antonine Itinerary (p. 302) are:—

From Rome to Gabii - - - -	xii. M. P.
Praeneste - - -	xi.
Sub Anagnia - -	xxiv.

The Tabula gives the same distances as far as Praeneste, which are very nearly correct. Strabo reckons it 100 stadia (12½ miles) from Rome to Gabii, and the same distance thence to Praeneste. The continuation from Praeneste to Sub Anagnia is given only in the Antonine Itinerary, but the distance is overstated; it does not really exceed 18 miles.

The Via Praenestina issued from the Porta Esquilina at Rome, together with the Via Labicana (Strab. v. p. 237): it passed through the Porta Praenestina in the later circuit of the walls, now called *Porta Maggiore;* and separated from the Via Labicana immediately afterwards, striking off in a nearly direct line towards Gabii. About 3 miles from Rome it passed the imperial villa of the Gordians, the magnificence of which is extolled by Julius Capitolinus (*Gordian.* 32), and is still in some degree attested by the imposing and picturesque ruins at a spot called *Torre dei Schiavi.* (Nibby, *Dintorni*, vol. iii. pp. 707—710.) Nine miles from Rome the road is carried over the valley of a small stream by a viaduct of the most massive construction, still known as the *Ponte di Nona:* and 3 miles farther it passes the still existing ruins of the city of Gabii. Thence to Praeneste the line of the road was not so direct: this part of the *Campagna* being intersected by deep gullies and ravines, which necessitated some deviations from the straight line. The road is however clearly marked, and in many places retains its ancient pavement of basaltic lava. It is carried nearly straight as far as a point about 5 miles beyond Gabii, where it passes through a deep cutting in the tufo rock, which has given to the spot the name of *Cavamonte*: shortly afterwards it turns abruptly to the right, leaving the village of *Gallicano* (the probable site of PEDUM) on the left, and thence follows the line of a long narrow ridge between two ravines, till it approaches the city of Praeneste. The highroad doubtless passed only through the lower part of that city. Portions of the ancient pavement may be seen shortly after quitting the southern gate (*Porta del Sole*), and show that the old road followed the same direction as the modern one, which leads through *Cavi* and *Paliano*, to an inn on the highroad below *Anagni*, apparently on the very same site as the station Sub Anagnia (or Compitum Anagninum, as it is called in another route) of the Itinerary.

(Westphal, *Röm. Kamp.* pp. 97—107; Nibby, *Dintorni di Roma*, pp. 625—630.) [E. H. B.]

VIA SALARIA (ἡ Σαλαρία ὁδός, Strab.), one of the most ancient and well-known of the highroads of Italy, which led from Rome up the valley of the Tiber, and through the land of the Sabines to Reate, and thence across the Apennines into Picenum, and to the shores of the Adriatic. We have no account of the period of its construction as a regular road, but there can be little doubt that it was a frequented route of communication long before it was laid down as a regular highway: and the tradition that its name was derived from its being used by the Sabines to carry into their own country the salt that they obtained from the Roman salt-works at the mouth of the Tiber, in itself seems to point to an early age. (Fest. *s. v. Salaria.*) It was indeed, with the exception of the Via Latina, the only one of the great Roman highways, the name of which was not derived from that of its first constructor. But it cannot be inferred from the expressions of Livy that the battle of the Allia was fought "ad undecimum lapidem," and that the Gauls on a subsequent occasion encamped "ad tertium lapidem via Salaria trans pontem Anienis" (Liv. v. 37, vii. 9), that the regular road was then in existence, though there is no doubt that there was a much frequented line of communication with the land of the Sabines. We learn from the latter passage that a bridge had been already constructed over the Anio; and it is probable that the Via Salaria was constructed in the first instance only as far as Reate, and was not carried across the mountains till long afterwards. Even in the time of Strabo there is no evidence that it reached to the Adriatic: that author speaks of it merely as extending through the land of the Sabines, but as not of great extent (οὐ πολλὴ οὖσα, Strab. v. p. 228), which renders it improbable that it had then been carried to the Upper Sea. But the Itineraries give the name of Salaria to the whole line of road from Rome to Castrum Truentinum on the Adriatic, and thence to Adria.

The Salarian Way issued from the Porta Collina of the ancient city together with the Via Nomentana (Strab. *l. c.*; Fest. *s. v. Salaria*); but they diverged immediately afterwards, so that the one quitted the outer circuit of the city (as bounded by the walls of Aurelian) through the Porta Salaria, the other through the Porta Nomentana. Between 2 and 3 miles from Rome the Via Salaria crossed the Anio by a bridge, called the Pons Salarius, which was the scene of the memorable combat of Manlius Torquatus with the Gaul. (Liv. vii. 9.) The present bridge is ancient, though not strictly of Roman date, having been constructed by Narses, to replace the more ancient one which was destroyed by Totila. On a hill to the left of the road, just before it descends to the river, is the site of the ancient city of ANTEMNAE, and a hill to the right of the road immediately after crossing the river is worthy of notice, as the spot where the Gauls encamped in B. C. 361 (Liv. *l. c.*), and where Hannibal pitched his camp when he rode up to reconnoitre the walls of Rome. (Id. xxvi. 10.) Between 5 and 6 miles from Rome, after passing the *Villa Spada*, the road passes close to *Castel Giubileo*, a fortress of the middle ages, which serves to mark the site of the ancient FIDENAE. From this point the road is carried through the low grounds near the Tiber, skirting the foot of the Crustumian hills, which border it on the right. Several small streams descend from these hills, and, after crossing the road, discharge themselves into the Tiber; and there can be no doubt that one of these is the far-famed Allia, though which of them is entitled to claim that celebrated appellation is still a very disputed point. [ALLIA.] The road continued to follow the valley of the Tiber till, after passing *Monte Rotondo*, it turned inland to Eretum, the site of which is probably to be fixed at *Grotta Marozza*, and is marked in the Itineraries as 18 miles from Rome. Here the Via Nomentana again fell into the Salaria. (Strab. v. p. 228.) Hence to Reate the latter road traversed a hilly country, but of no great interest, following nearly the same line as the modern road from Rome to *Rieti*. The intermediate station of Ad Novas or Vicus Novus, as it is called in the Antonine Itinerary is still marked by ruins near the *Osteria Nuova*, 32 miles from Rome, and 16 from *Rieti*. Here an old church still bore at a late period the name of *Vico Nuovo*.

The stations on the original Via Salaria, from Rome to Reate, are correctly given, and can clearly be identified.

From Rome to

Eretum (*Grotta Marozza*)	xviii. M. P.
Vicus Novus (*Ost. Nuova*)	xiv.
Reate (*Rieti*)	xvi.

From Reate the Via Salaria (or the continuation of it as given in the Itineraries) proceeded nearly due E. by Cutiliae, which is identified by its celebrated lake, or rather mineral springs, to Interocrea (*Antrodoco*), situated at the junction of two natural passes or lines of communication through the central Apennines. The one of these leads from Interocrea to Amiternum, in the upper valley of the Aternus, and was followed by a cross-road given in the Tabula, but of which both the stations and the distances are extremely confused: the other, which is the main valley of the Velinus, and bears nearly due N., was ascended by the Via Salaria as far as Falacrinum, 16 miles from Interocrea, and near the sources of the Velinus. Thence that road crossed the ridge of the Apennines and descended into the valley of the *Tronto* (Truentus), which river it followed to its mouth at Castrum Truentinum, passing on the way by the strongly situated city of Asculum (*Ascoli*). The distances on this line of route are thus correctly given in the Antonine Itinerary (p. 307):

From Reate to

Cutiliae (near *Paterno*)	viii. M. P.
Interocrea (*Antrodoco*)	vi.
Falacrinum (near *Civita Reale*)	xvi.
Vicus Badies	ix.
Ad Centesimum*	x.
Asculum (*Ascoli*)	xii.
Castrum Truentinum	xx.

From this last point two roads branched off, the one turning N., and proceeding along the coast of the Adriatic to Ancona; the other proceeding S. along the same coast to Castrum Novum (near *Giulia Nuova*), and thence to Adria (*Atri*). The latter branch is given in the Itinerary as a part of the Via Salaria; but it is clear that neither of them properly belonged to that highway, both being in fact only portions of the long line of road which followed the coast of the Adriatic continuously from Ancona to Brundusium, and which is given in the Antonine Itinerary in connection with the Via Flaminia (*Itin. Ant.* pp. 313—316). (The course of the Via Salaria is examined, and the distances discussed in detail by D'Anville, *Analyse Géographique de l'Italie* pp. 163—169.) [E. H. B.]

VIA SUBLACENSIS. [VIA VALERIA.]

VIA TIBERINA, a name found in inscriptions, and noticed by the Notitia and Curiosum among the roads that issued from the gates of Rome, was in all probability the road that quitted the Via Flaminia at Saxa Rubra, and followed the right bank of the Tiber until it rejoined the Via Flaminia, between *Acqua Viva* and *Borghetto*. The existence of such a road is known from remains of it still visible; and it is the only one to which the name of Via Tiberina can well be applied. (Westphal, *Röm. Kamp.* pp. 134, 138.) [E. H. B.]

VIA TIBURTINA. [VIA VALERIA.]

VIA TRAJANA. [VIA APPIA, No. 4.]

VIA VALERIA (ἡ Οὐαλερία ὁδός, Strab.), one of the most celebrated and important of the Roman highways, which led from Rome, or, more strictly speaking, from Tibur, to the lake Fucinus and the land of the Marsi, and thence was subsequently continued to the Adriatic, at the mouth of the Aternus. The period of its construction is uncertain. It has indeed been frequently supposed to have derived its name from, and to have been the work of, M. Valerius Maximus, who was censor with C. Junius Bubulcus in B. C. 307; but the expression of Livy, that the two constructed roads "per agros," would certainly seem to refer to cross-roads in the neighbourhood of Rome; and it is very improbable that the construction of so celebrated a highway as the Via Valeria should not have been more distinctly stated. (Liv. ix. 43.) The Via Valeria, indeed, was properly only a continuation of the Via Tiburtina, which led from Rome to Tibur; and though the Itineraries include the whole line of route under the name of the Via Valeria, it appears that the distinction was still kept up in the time of Strabo, who distinctly speaks of the Valerian Way as *beginning from* Tibur, and leading to the Marsi, and to Corfinium, the metropolis of the Peligni (Strab. v. p. 238). The expressions of the geographer would naturally lead us to conclude that the Via Valeria was in his time carried as a regular highway as far as Corfinium; but we learn from an inscription, that this was not the case, and that the regularly constructed road stopped short at Cerfennia, at the foot of the Mons Imeus or *Forca di Caruso*, a steep and difficult pass, over which the highway was not carried till the reign of Claudius, who at the same time continued it to the mouth of the Aternus. (Orell. *Inscr.* 711.) It appears that the portion thus added at first bore the name of the Via Claudia Valeria (*Inscr. l. c.*); but the distinction was soon lost sight of, and the whole line of route from Rome to the Adriatic was commonly known as the Via Valeria. (*Itin. Ant.* p. 308.) It will be convenient here to adopt the same usage, and consider the whole course of the road under one head.

The Via Tiburtina, as the road from Rome to Tibur was properly called, must undoubtedly have been of very ancient origin. There must indeed have existed from the earliest ages of Rome a frequented highway or communication between the two cities; but we are wholly ignorant as to the time when a regularly made road, with its solid pavement and all the other accessories of a Roman via, was constructed from the one city to the other. The road as it existed in the time of the Roman Empire may be distinctly traced by portions still remaining of the pavement, or by sepulchres and fragments of ancient buildings, so that no doubt can exist as to its precise course. It quitted the original city by the Porta Esquilina, passed through the Porta Tiburtina (now *Porta S. Lorenzo*) in the walls of Aurelian, and then proceeded nearly in a straight line to the Anio, which it crossed by a bridge about 4 miles from Rome. This bridge, now called the *Ponte Mammolo*, is in its present state the work of Narses, having been restored at the same time as those on the Via Salaria and Nomentana, after their destruction by Totila, A. D. 549. From this bridge the ancient road followed very nearly the same line as the modern one as far as the *Lago di Tartaro*, a small lake or pool of sulphureous waters, similar in character to the more considerable pool called the *Solfatara* or Aquae Albulae, about 2 miles farther on, and a mile to the left of the highroad. Leaving this on the left, the Via Tiburtina proceeded almost perfectly straight to the *Ponte Lucano*, at the foot of the hill of *Tivoli*, where it recrossed the Anio. There can be no doubt that this bridge retains its ancient name of Pons Lucanus, though this is not mentioned by any ancient author; but the origin of the name is evident from the massive sepulchre of the Plautian family (a structure not unlike the celebrated tomb of Caecilia Metella on the Appian Way), which stands close to the bridge, and which was constructed by M. Plautius Lucanus, who was censor together with Tiberius in the reign of Augustus. From the inscription on an ancient milestone it appears that this part of the road was constructed by him at the same time; and it is probable that the original Via Tiburtina was carried from the *Lago di Tartaro* in a different direction, bearing away more to the left, so as to leave the Aquae Albulae on the right; while the road constructed by Plautius, like the modern highroad, passed between that lake and Tibur. The 14th milestone was found near the spot where the road crosses the artificial channel that carries off the waters of the lake. From the *Ponte Lucano* the ancient road ascended the hill of Tibur by a very steep and straight ascent, passing through or under a portion of the vaulted snbstructions of the so-called villa of Maecenas. [TIBUR.]

---

* It is clear from the name that this station was distant 100 miles from Rome, while the distances above given would make up only 97 miles: but it is uncertain at what precise point the deficiency occurs. The Tabula gives 9 miles from Reate to Cutiliae, and 7 thence to Interocrea: if these distances be adopted the result is 99 miles, leaving a discrepancy of only one mile. In either case the approximation is sufficient to show the general correctness of the Itineraries.

The Itineraries all agree in stating the distance of Tibur from Rome at 20 miles; but it in reality little exceeds 18 by the direct road, which crossed the *Ponte Lucano*, as above described. The Tabula gives the Aquae Albulae as an intermediate station, but places it 16 M. P. from Rome, though the true distance is only 14.

From Tibur the Via Valeria ascended the valley of the Anio, passing by the town of Varia (*Vicovaro*), 8 miles from Tibur, to a point marked by an inn, now called *Osteria Ferrata*, 5 miles beyond *Vicovaro* and 13 from *Tivoli*. This point, where the Anio makes a sudden bend, is evidently the site of the station Ad Lamnas of the Tabula, whence a side road struck off to the right, ascending the upper valley of the Anio to Sublaqueum (*Subiaco*), whence the road derived the name of VIA SUBLACENSIS, by which it is mentioned by Frontinus (*de Aquaeduct.* 15). The road is given in the Tabula, but in so confused a manner that it is impossible to make it out. Sublaqueum was in reality 48 miles from Rome by this route, or 28 from Tibur.

The Via Valeria, on the other hand, turned to the left at the *Osteria Ferrata*, and crossed the hills to Carseoli, the ruins of which are still visible at some distance nearer Rome than the modern village of *Carsoli*. Thence it ascended a steep mountain-pass, where portions of the ancient road, with its pavement and substructions, are still visible, and descended again into the basin of the Lake Fucinus. After passing by, rather than through, Alba Fucensis, it was carried along the N. shore of the lake to Cerfennia, the site of which is clearly identified at a spot just below the village of *Coll' Armeno*. [CERFENNIA.] Here, as already mentioned, the original Via Valeria terminated; but the continuation of it, as constructed by Claudius, and given in the Itineraries, ascended the steep mountain-pass of the MONS IMEUS, and thence descended into the valley of the Aternus, on the banks of which, near its confluence with the *Gizio*, stood the city of Corfinium. Three miles from that city was a bridge over the Aternus (near the site of the present town of *Popoli*), which constituted an important military position. [ATERNUS.] Below this point the river flows through a narrow pass or defile, through which the Via Valeria also was carried. The station Interpromium, marked in the Itineraries as 12 miles from Corfinium, must be placed at the *Osteria di S. Valentino*, below the village of the same name. Thence the road descended the valley of the Aternus to its mouth, which is correctly placed by the Itineraries 21 miles from Interpromium, and 9 beyond Teate (*Chieti*).

The distances given in the Antonine Itinerary from Rome to this point are as follow:—

Rome to Tibur (*Tivoli*) - -	XX. M. P.
Carseoli (Ru. near *Carsoli*)	xxii.
Alba Fucentia (*Alba*) -	xxv. (xxii.)
Cerfennia (*Sta Felicita*)	xxiii. (xiii.)
Corfinium (*S. Pelino*) -	xvi. (xvii.)
Interpromium (*Ost. di S. Valentino*) - -	xi. (xii.)
Teate (*Chieti*) - -	xvii. (xii.)

The distances stated in parentheses are the corrections suggested by D'Anville, who examined the whole of this line of route with much care, and are confirmed by the discovery of ancient milestones, which leave no doubt as to the actual distances. The general correctness of the result thus obtained is confirmed by a statement of Pliny (iii. 5. s. 6), in which he estimates the breadth of Italy in its central part, as measured from the mouths of the Tiber to that of the Aternus at 136 miles. Here the mention of the Aternus leaves little doubt that the measurement was taken along the Via Valeria. Now the corrected distances above given amount to 118 miles from Rome to Teate, or 125 miles to the mouth of the Aternus; and if to this be added 16 miles from Rome to Ostia, the result is 141 miles, agreeing, within 5 miles, with the statement of Pliny.

(For a full examination of this whole line of route, see D'Anville, *Analyse Géogr. de l'Italie*, pp. 170—182, and Kramer, *Der Fuciner See*, pp. 59—62. The Via Tiburtina and the first part of the Valeria are also described and examined by Westphal, *Röm. Kamp.* pp. 108—121, and Nibby, *Vie degli Antichi*, pp. 96—104)

The proper termination of the Via Valeria, as continued by Claudius, was undoubtedly at the mouth of the Aternus. But the Antonine Itinerary continues it on to Hadria, which it places at 14 M.P. from Teate; but this distance is much below the truth: we should perhaps read 24 M.P. The probability is, that at the mouth of the Aternus it fell into the line of road previously existing along the coast of the Adriatic, and which, without belonging properly to any of the three highways that proceeded from Rome to that sea, served to connect the Valerian, Salarian, and Flaminian Ways. For this reason it may be useful to set down here the stations and distances along this line of coast, from the mouth of the Aternus to Ancona. They are thus given in the Antonine Itinerary (p. 313):—

From the Ostia Aterni (*Pescara*) to

Hadria (*Atri*)	xvi. M. P.
Castrum Novum (near *Giulia Nuova*)	xv.
Castrum Truentium (at the mouth of the *Tronto*)	xii.
Castellum Firmanum (*Porto di Fermo*)	xxiv.
Potentia (*Potenza*)	xxii.
Numana (*Humana*)	x.
Ancona	viii.

Here the coast-road joined one branch of the Via Flaminia; and the distances from Ancona to Ariminum will be found in the article on that road. [VIA FLAMINIA.]

The Via Valeria, like the Aemilia and Flaminia, gave name to one of the later divisions or provinces of Italy under the Roman Empire, which was called Valeria. It comprised the land of the Marsi, Peligni, and Vestini, through which the road really passed, as well as the land of the Sabines, which was traversed by the Via Salaria. [ITALIA, p. 93.] [E. H. B.]

VIADUS (Οὐίαδος), a river of Germany, west of the Vistula, mentioned by both Ptolemy (ii. 11. § 2) and Marcianus (p. 53) as flowing into the Mare Suevicum or Baltic. Neither of these authors mentions either its source or its course, but it is generally assumed to be the *Oder*. Ptolemy in another passage (ii. 11. § 15) mentions, according to the common reading, a river Ἰαδούα, which some regard as a tributary of the Viadus, and others as a name of the upper Viadus; but Wilberg, the latest editor of Ptolemy, treating Ἰαδούα as a corrupt reading, has altered it to Οὐίαδος. [L. S.]

VIANA (Οὐίανα), a place in Rhaetia, on the road from Vemania to Augusta Vindelicorum (Ptol. ii. 12. § 4); it is marked in the Peutinger Table as Viaca, and its site is now occupied by a place called *Wageck*. [L. S.]

VIATIA. [BEATIA.]

VIBI FORUM. [FORUM VIBII.]

VIBINUM, or VIBONIUM (Ἰϐώνιον: *Bovino*), a town of Apulia, in the interior of that country, 7 miles S. of Aecae (*Troja*) and 15 from Luceria. Its correct name is given by Pliny, who enumerates the Vibinates among the municipal communities of Apulia, and by inscriptions which are still extant at *Bovino*, an episcopal town situated on one of the lower slopes of the Apennines, on the right of the river *Cervaro* (Cerbalus). (Plin. iii. 11. s. 16; Holsten, *Not. ad Cluver.* p. 272.) There is no doubt that it is the place of which the name is corruptly written in Ptolemy, Vibarnum (Οὐίϐαρνον, iii. 1. § 72), and which is called by Polybius Vibonium (Ἰϐώνιον, for which we should probably read Οὐιϐώνιον, Schweigh. *ad loc.*). The latter author distinctly places it among the Daunian Apulians, and mentions that Hannibal established his camp there, and thence laid waste the territory of Arpi and other neighbouring cities. (Polyb. iii. 88.) [E. H. B.]

VIBIONES (Οὐιϐίωνες or Ἰϐίωνες, Ptol. iii. 5. § 23), a people of European Sarmatia, on the N. side of Mount Bodinus, probably on the river *Iwa* or *Jeviza* in *Volhynia*. [T. H. D.]

VIBO, VIBO VALENTIA. [HIPPONIUM.]

VIBONENSIS SINUS, another name of the Hipponiates Sinus. [HIPPONIUM.]

VICENTIA or VICETIA (Οὐίκετία: *Eth.* Vicentinus: *Vicenza*), a city of Venetia in the N. of Italy, situated between Patavium and Verona, and distant 22 miles from the former and 33 from the latter city (*Itin. Ant.* p. 128; *Itin. Hier.* p. 559). No mention is found of Vicentia before the Roman conquest of this part of Italy, and the earliest record of its existence is an inscription of the republican period which informs us that the limits between its territory and that of the Atestini were fixed and determined by the proconsul Sex. Atilius Saranus in B. C. 136. (Orell. *Inscr.* 3110.) It is also incidentally mentioned as one of the municipal towns in the N. of Italy, in B. C. 43. (Cic. *ad Fam.* xi. 19.) Strabo notices it as one of the minor towns of Venetia, and Tacitus tells us that it was taken by Antonius, the general of Vespasian, on his advance from Patavium to Verona, in a manner that sufficiently proves it not to have been a town of any great importance. (Tac. *Hist.* iii. 8; Strab. v. p. 214.) But it always continued to be a municipal town, and the younger Pliny mentions a cause in which the Vicentini were engaged before the Roman Senate in defence of their municipal rights. (Plin. *Ep.* v. 4, 14.) We learn also from Suetonius that it was the birthplace of the grammarian Remmius Palaemon. (Suet. *Gramm.* 23.) It is noticed also by both Pliny and Ptolemy, as well as in the Itineraries, and evidently continued till near the close of the Roman Empire, to be a municipal town of some consideration, though very inferior to its opulent neighbours, Verona and Patavium. (Plin. iii. 19. s. 23; Ptol. iii. 1. § 30; Orell. *Inscr.* 3219). It suffered severely in common with most of the cities of Venetia from the invasion of Attila (A.D. 452), by whom it was laid waste with fire and sword (*Hist. Miscell.* xv. p. 549), but it recovered from this catastrophe, and appears again under the Lombards as a considerable city of Venetia (P. Diac. ii. 14, v. 39). During the middle ages it became for some time an independent republic, and is still a populous city with about 30,000 inhabitants, but has no remains of antiquity.

The name is written in inscriptions Vicetia, which has been restored by recent editors as the true reading both in Pliny and in Tacitus, but it is certain that before the close of the Roman Empire the name Vicentia (which has been retained in the modern *Vicenza*) was already in use. [E. H. B.]

VICIANUM, a place in Moesia (*Tab. Peut.*), probably the Βέρζανα of Procopius (*de Aed.* iv. 4. p. 281), and the present *Nova Berda*. [T. H. D.]

VICTO'RIA (Οὐικτωρία, Ptol. ii. 3. § 9), the most eastern place belonging to the Damnonii in Britannia Barbara. Camden (p. 1190) thinks that it is Bede's *Caer Guidi*, and that it stood on *Inchkeith Island*, in the *Frith of Forth;* but Horsley is of opinion that it is *Abernethy*, near *Perth*. [T. H. D.]

VICTO'RIAE MONS, a mountain in Hispania Citerior, near the Iberus. (Liv. xxiv. 41.) [T. H. D.]

VICTO'RIAE PORTUS, a haven belonging to Juliobriga, a town of the Cantabri in Hispania Tarraconensis. (Plin. iv. 20. s. 34.) Now *Santonna*. (Cf. Florez, *Esp. Sagr.* xxiv. p. 9.) [T. H. D.]

VICTUMVIAE. [TICINUS].

VICUS ALEXANDRI. [VIA OSTIENSIS.]

VICUS AMBIATINUS. [AMBIATINUS.]

VICUS AQUA'RIUS, a place in the territory of the Vaccaei in Hispania Tarraconensis. (*Itin. Ant.*

p. 439.) Variously identified with *Villafafila* and *Villasecco*. [T. H. D.]

VICUS AQUENSIS. [Aquae Convenarum.]

VICUS CAECI'LIUS, a place in Lusitania belonging to the Vettones, on the road from Augusta Emerita to Caesaraugusta. (*Itin. Ant.* p. 434.) Variously identified with *Naralconcejo* and *S. Esteran.* [T. H. D.]

VICUS CUMINA'RIUS, a place of the Carpetani in Hispania Tarraconensis, somewhat S. of the Tagus, and E. of Toletum. Probably the modern *St. Cruz de la Zarza*, which is still renowned for its cumin. (Morales, *Antig.* p. 77; Florez, *Esp. Sagr.* v. p. 22.) Others have identified it with *Ocaña* and *Bayona.* [T. H. D.]

VICUS DOLUCENSIS, in Gallia. The name occurs only on an inscription found at *Halinghen*, near *Boulogne*, the ancient Gesoriacum [Gesoriacum]. Vicus Dolucensis may be the old name of *Halinghen.* (Ukert, *Gallien.*) [G. L.]

VICUS HE'LENAE, in Gallia, mentioned by Sidonius Apollinaris (*Major. Carm.* 5. 216), in the country of the Atrebates; but geographers disagree about the site. Some place it at *Hedin* or *Hesdin*, on the *Canche*, but that river is in the country of the Morini. Others fix it at a place called *Lens*, and others in other places. (Ukert, *Gallien.*) [G. L.]

VICUS ICTIMULORUM. [Ictimuli.]

VICUS JULII or ATURES, in Aquitania. The name Civitas Aturensium occurs in the Notitia of the Gallic Provinces. The name Atures also occurs in Sidonius Apollinaris (ii. ep. 1). In the passage of Tibullus, cited under Aturus [Vol. I. p. 336] "Atur" is said to be a correction of Scaliger, the MSS. having Atax: —

> "Quem tremeret forti milite victus Atur;"

but the great critic is probably right.

At the council of *Agde* (Agatha), A. D. 506, there is a subscription by a bishop "de civitate Vico Juli," and the same name occurs in Gregory of Tours. D'Anville affirms that Atures and Vicus Julii are the same place, relying on a Notice, where we read "Civitas Adtorensium Vico Juli." The name of the river Atur was also given to a people Atures, who have given their name to the town of *Aire*, which is on the *Adour.* (D'Anville, *Notice, &c.*) [G. L.]

VICUS JULIUS, in Gallia, is mentioned only in the Notitia of the Empire as a post under the orders of the general residing at Mogontiacum (*Mainz*). It is placed between Tabernae (*Rhein-Zabern*) and Nemetes (*Speier*). D'Anville supposes Vicus Julius to be *Germersheim*, at the place where the *Queich* enters the Rhine. [G. L.]

VICUS MATRINI. [Via Cassia.]

VICUS NOVUS. [Via Salaria.]

VICUS SPACORUM. [Spacorum Vicus.]

VICUS VARIANUS. [Via Aemilia, No. 5.]

VIDRUS (Οὐίδρος), a small coast river in the west of Germany, between the Rhenus and the Amisia (Ptol. ii. 11. § 1; Marcian. p. 51), is probably the same as the *Wecht.* [L. S.]

VIDUA (Οὐιδούα, Ptol. ii. 2. § 2), a river on the N. coast of Hibernia; according to Camden (p. 1411), the *Crodagh.* Others identify it with the *Culmore.* [T. H. D.]

VIDUBIA or VIDUBIO, in Gallia, appears in the Table on a road from Andematunum (*Langres*) to Cabillio, which is Cabillonum (*Châlon-sur-Saône*). The road passes through File or Tile [Tile] to Vidubia. The distance in the Table between Tile and *Châlon*, 39 leagues, is correct; and it is 19 from Tile to Vidubia. D'Anville fixes Vidubia at *St. Bernard*, on the little river *Vouge*, a branch of the *Saône.* (D'Anville, *Notice, &c.*) [G. L.]

VIDUCASSES, a Celtic people in Gallia Lugdunensis. Pliny (iv. 18) mentions them before the Bodiocasses, who are supposed to be the Baiocasses [Baiocasses]. Ptolemy (ii. 8. § 5) writes the name Οὐιδουκαίσιοι or Οὐιδουκάσσιοι, for we must assume them to be the Viducasses, though he places the Viducassii next to the Osismii, and the Veneti between the Viducassii and the Lexovii. But the Viducasses are between the Baiocasses and the Lexovii. The boundary between the Viducasses and the Baiocasses is indicated by a name *Fins* (Fines), which often occurs in French geography.

There is a place named *Vieux* SW. of *Caen*, in the department of *Calvados*, some distance from the left bank of the river *Orne.* This place is mentioned in the titles or muniments of the neighbouring abbey of *Fontenai*, on the other side of the *Orne*, under the name of Videocae or Veocae, of which *Vieux* is a manifest corruption, as D'Anville shows, like Tricasses, Trecae, *Troies*, and Durocasses, Drocae, *Dreux.* There is or was a stone preserved in the *château of Torigni*, in the arrondissement of *Saint Lô*, in the department of *Manche*, which contains the inscription ORDO CIVITATIS VIDVCAS. This marble, which was found at *Vieux* in 1580, is said to be the pedestal of a statue placed in the third century of our aera in honour of T. Sennius Solemnis. In the excavations made at *Vieux* in 1705 were found remains of public baths, of an aqueduct, a gymnasium, fragments of columns, of statues, and a great number of medals of the imperial period, besides other remains. Inscriptions, of the date A. D 238, found on the spot show that this city had temples and altars erected to Diana, to Mars, and to Mercury. (*Nouveaux Essais sur la Ville de Caen*, par M. L'Abbé Delarue, 2 vols. Caen, 1842, cited by Richard et Hocquart, *Guide du Voyageur.*)

The name of this old town is unknown, but the remains show that it was a Roman city, probably built on a Celtic site; and several Roman roads branch off from it. Some geographers suppose it to be the Araegenus or Araegenue of the Table, which D'Anville would fix at *Bayeux.* But the site of Araegenus is doubtful. [Augustodurus.] [G. L.]

VIENNA (Οὐϊένα, Οὐϊέννα: *Eth.* Viennensis: *Vienne*), a city of the Allobroges (Ptol. ii. 10. § 11) in Gallia Narbonensis, on the east bank of the *Rhône;* and the only town which Ptolemy assigns to the Allobroges. Stephanus (*s. v.* Βίεννος) gives this form of the word and an Ethnic name Βιέννιος, and he suggests also Βιεννήσιος and Βιενναῖος from a form Βιέννη. He has preserved a tradition about Vienna being a Cretan colony from Biennus in Crete; and accordingly, if this were true, its origin is Hellenic. Dion Cassius (xlvi. 50) has a story about some people being expelled from Vienna by the Allobroges, but he does not say who they were. [Lugdunum.]

The position of Vienna is easily fixed by the name and by its being on the Roman road along the east side of the *Rhône.* There is a difficulty, however, as D'Anville observes, in the Antonine Itinerary, which makes Vienna xxiii. from Lugdunum, and adds the remark that by the shorter cut it is xvi. The number xvi. occurs also in the

Table. It is remarked, too, that Seneca (*De Morte Claudii*, c. 6) says that Claudius was born at Lugdunum (*Lyon*), "ad sextum decimum lapidem a Vienna." The real distance from Vienna to the *Rhône* at *Lyon* is about 17 M. P.; but D'Anville suggests that the territory of Lugdunum may have had a narrow strip on the south side of the *Rhône*. There can be no road of 23 M. P. from Lugdunum to Vienna, unless it be one on the west bank of the *Rhône*. Strabo (iv. pp. 184, 186) makes the distance between Lugdunum and Vienna 200 stadia or 20 M. P., which is too much.

Vienna is first mentioned by Caesar (*B. G.* vii. 9), and only once mentioned. He had crossed the *Cévennes* into the *Auvergne* in the depth of winter, and he went again over the mountains to Vienna to meet a newly-levied cavalry force, which some time before he had sent on thither. Under the Empire Vienna was a great city, and there was rivalry and enmity between it and Lugdunum. (Tacit. *Hist.* i. 65.) Mela speaks of it as a flourishing place; and under the Empire it was a Colonia (Plin. iii. 4; Tacit. *Hist.* i. 66), before the time of Claudius, who speaks of it in his Oratio (*super Civitate Gallis danda*); "Ornatissima ecce Colonia valentissimaque Viennensium, quam longo jam tempore senatores huic curiae confert." (J. Lipsius, *Excurs. ad Tacit. Ann.* lib. xi.) This passage shows that Vienna had already supplied members to the Roman senate, and it must have been a Romana Colonia. Martial (vii. 88) calls it "pulcra":—

> "Fertur habere meos, si vera est fama, libellos,
> Inter delicias pulcra Vienna suas."

So Pliny says that his works were in the booksellers' shops at Lugdunum. [Lugdunum.] These facts present a curious contrast between the book trade in a French provincial town under the Empire and at the present day, when a man would not find much. Vienna was also noted for the wine (Martial, xiii. 107) that grew in the neighbourhood; and some of the best wines of the *Rhône* are still made about *Vienne*. This town afterwards gave name to the subdivision of Narbonensis named Viennensis.

The modern town of *Vienne* is in the department of *Isère*, on the little river *Gère*, which flows through *Vienne* to the *Rhône*. The modern town is in the narrow valley of the *Gère*, and extends to the banks of the *Rhône*. The Roman town was placed on two terraces in the form of amphitheatres. There still exist the foundations of the massive Roman walls above 19,000 feet in circuit which enclosed Vienna. These walls, even in the weakest parts, were about 20 feet thick; and it appears that there were round towers at intervals. There are at *Vienne* the remains of some arcades, which are supposed to have formed the entrance to the Thermae. They are commonly called triumphal arches, but there is no reason for this appellation. One of the arcades bears the name of the emperor Gratian. There is a temple which M. Schneider has conjectured to have been dedicated to Augustus and Livia, if his deciphering of the inscription may be trusted. This is one of the best preserved Roman monuments of its kind in France after the *Maison Carrée* of *Nîmes* [Nemausus]. It is now a Museum, and contains some valuable ancient remains and inscriptions. This building is of the Corinthian order, with six columns in front and eight on each side; the columns are above 3 feet in diameter, and 35 feet high, including the base of the capitals.

There is a singular monument near *Vienne*, sometimes called Pontius Pilate's tomb, there being a tradition that Pilate was banished to Vienna. But even if Pilate was sent to Vienna, that fact will not prove that this is his monument. It is a pyramid supported on a quadrangular construction, on the sides of which there are four arcades with semicircular arches at the top; and there are columns at each of the angles of the construction. Each side of the square of this basement is about 21 feet long, and the height to the top of the entablature of the basement is nearly 22 feet. The pyramid with its smaller base rests on the central part of the quadrangular construction; it is about 30 feet high, and the whole is consequently about 52 feet high. The edifice is not finished. It has on the whole a very fine appearance. There is a drawing of it in the *Penny Cyclopaedia* (art. *Vienne*), made on the spot in 1838 by W. B. Clarke, architect.

The remains of the amphitheatre have been found only by excavation. It was a building of great magnitude, the long diameter being above 500 feet and the smaller above 400 feet, which dimensions are about the same as those of the amphitheatre of Verona. It has been used as a quarry to build the modern town out of. Three aqueducts supplied Vienna with water during the Roman period. These aqueducts run one above another on the side of the hill which borders the left bank of the *Gère*, and they are nearly parallel to one another, but at different elevations. The highest was intended to supply the amphitheatre when a naumachia was exhibited. There are also remains of a fourth aqueduct large enough for four persons to walk in upright and abreast. These aqueducts were almost entirely constructed under ground, with a fall of about one in a thousand, and for the most part lined inside with a red cement as high up as the spring of the arches.

The Roman road, sometimes called the Via Domitia, ran from Arelate (*Arles*) along the E. side of the river to Lugdunum (*Lyon*). Where it enters *Vienne*, it is now more than 3 feet below the surface of the ground, and this depth increases as it goes farther into the town. It is constructed of large blocks of stone. Another road went from Vienna to the Alpis Graia (*Little St. Bernard*) through Bergintrum; and it is an interesting fact to find that several villages on this road retain names given to them in respect of the distance from *Vienne*: thus *Septême* is 7 miles, *Oytier* 8 miles, and *Diémoz* 10 Roman miles from *Vienne*. Another road led from *Vienne* through Cularo (*Grenoble*) to the Alpis Cottia (*Mont St. Genèvre*). (See Richard et Hocquart, *Guide du Voyageur*, for references to modern works on the antiquities of *Vienne*, and particularly M. Mermet's work, 8vo. Vienne, 1829, which contains the answers to a series of questions proposed by the Académie des Inscriptions et Belles Lettres; also the references in Ukert, *Gallien*, p. 453.) [G. L.]

VIGESIMUM, AD. 1. A station in Gallia Narbonensis, the distance of which from a given point determined its name, as we see in the case of other names of places derived from numerals. [Duodecimum, Ad; Vienna.] The place is xx. M. P. from Narbo (*Narbonne*) on the road to Spain, and may be at or near a place called *La Palme*.

2. There is another Ad Vigesimum which occurs in the Itin. of *Bordeaux* to Jerusalem, on the road from *Toulouse*. These numerals show that such cities

had the privilege of reckoning their roads from the capital to the limit of their territories, where a Fines often occurs. [Fines.] (D'Anville, *Notice, &c.*) [G. L.]

VILLA FAUSTINI, a place of the Iceni in Britannia Romana, on the road from Londinium to the northern boundary wall. (*Itin. Ant.* p. 474.) Camden (p. 438) identifies it with *St. Edmund's Bury;* but others have placed it near *Thetford*, at *Wulpit*, and at *Tornham Parva.* [T. H. D.]

VIMINA'CIUM (Οὐιμινάκιον, Ptol. iii. 9. § 3), an important town of Moesia Superior, lying somewhat E. of the mouth of the Margus, and connected with Constantinople by a highroad which passed through Naissus. (*Itin. Ant.* p. 133; *Itin. Hierosol.* p. 564.) It was the head-quarters of the Legio vii. Claudia. (*Ib.*; cf. Eutrop. ix. 13; Procop. *de Aed.* iv. 6. p. 287; Theophyl. i. 5, viii. 12, &c.) By the later Greeks the name is written Βιμινάκιον. Variously identified with *Ram* or *Rama*, and *Kostolacz.* (Cf. Marsili, *Danub.* ii. p. 10; Mannert, vii. p. 78.) [T. H. D.]

VIMINA'CIUM (Οὐιμινάκιον, Ptol. ii. 6. § 50), a town of the Vaccaei in Hispania Tarraconensis, to the E. of Pallancia. (*Itin. Ant.* pp. 449, 453.) Identified with *Valderaduci* or *Beceril.* [T. H. D.]

VINCEIA, a town of Moesia Superior, between Mons Aureus and Margum, and 6 miles from the former. (*Itin. Ant.* p. 132) In the *Itin. Hierosol.* (p. 564) it is called Vingeius or Vingeium. Lapie identifies it with *Semendria.* [T. H. D.]

VINCUM. [Bingium.]

VINDA (Οὐινδία, Ptol. v. 4. § 7), a place in Galatia, between Pessinus and Ancyra, near the modern *Ilidja.* (*It. Ant.* pp. 201, 202.) [L. S.]

VINDALUM, or VINDALIUM (Οὐίνδαλον), in Gallia Narbonensis, a place where Domitius Ahenobarbus defeated the Allobroges, B. C. 121. [Gallia Transalpina, Vol. I. p. 954.] Strabo (iv. p. 185) says that Vindalum is at the confluence of the Sulgas [Sulgas] and the *Rhône.* Florus (iii. 2) names this river Vindalicus or Vindelicus. The Sulgas is the *Sorgue.* D'Anville, relying, as he often does, on a mere resemblance of name, would place Vindalium at *Vedene*, which is about a mile from the junction of the *Sorgue* and the *Rhône.* Others would place Vindalium at *Port de la Traille*, the place where the *Sorgue* joins the *Rhône.* [G. L.]

VINDANA PORTUS (Οὐίνδανα λιμήν), a bay on the north-west coast of Gallia (Ptol. ii. 8. § 1), and placed by Ptolemy between the mouth of the Herius [Herius] and the Promontorium Gobaeum. D'Anville supposes the Vindana to be the bay of *Morbihan*, at the bottom of which was the capital of the Veneti, now *Vannes.* Other geographers have made other guesses: the bay of *Douarnez*, the mouth of the *Blavet*, and others still. [G. L.]

VINDELEIA (Οὐενδέλεια, Ptol. ii. 6. § 53), a town of the Autrigones in Hispania Tarraconensis, between Virovesca and Deobriga. (*Itin. Ant.* p. 454.) Probably *Pancorbo.* [T. H. D.]

VINDELI'CIA (Οὐινδελκία or Βινδελκία), the most western of the four Danubian provinces of the Roman empire. In the time of Augustus, it formed a distinct province by itself, but towards the end of the first century after Christ it was united with Rhaetia. At a still later period the two countries were again separated, and Rhaetia Proper appears under the name Rhaetia Prima, and Vindelicia under that of Rhaetia Secunda. We have here to speak only of the latter or Vindelicia, as it appears in the time of Augustus, when it was bounded on the north by Germania Magna, that is, by the Danube and the Vallum Hadriani or Limes, on the west by the territory of the Helvetii, on the south by Rhaetia, and on the east by Noricum, from which it was separated by the river Oenus (*Inn*). The line of demarcation between Vindelicia and Rhaetia is not mentioned anywhere, but was in all probability formed by the ridge of the Rhaetian Alps. Vindelicia accordingly embraced the north-eastern parts of *Switzerland*, the south-eastern part of *Baden*, the southern part of *Würtemberg* and *Bavaria*, and the northern part of *Tirol.* (Ptol. ii. 12. § 1, 13. § 1, viii. 7. § 1; Sext. Ruf. 8; Agathem. ii. 4.) The country is for the most part flat, and only its southern parts are traversed by offshoots of the Rhaetian Alps. As to the products of Vindelicia in ancient times, we have scarcely any information, though we are told by Dion Cassius (liv. 22) that its inhabitants carried on agriculture, and by other authors that the country was very fertile. (Solin. 21; Isid. *Orig.* i. 4.) The chief rivers of Vindelicia are: the Danube, the upper part of which flowed through the country, and farther down formed its boundary. All the others are Alpine rivers and tributaries of the Danube, such as the Ilargus, Guntia, Licus, Virdo, Isarus, and the Oenus, which separated Vindelicia from Noricum. The Lacus Brigantinus in the south-west also belonged to Vindelicia.

The inhabitants of Vindelicia, the Vindelici, were a kindred race of the Rhaeti, and in the time of Augustus certainly Celts, not Germans, as some have supposed. Their name contains the Celtic root *Vind*, which also occurs in several other Celtic names, such as Vindobona, Vindomagus, Vindonissa, and others. (Zeuss, *Die Deutschen*, p. 228, foll.; Diefenbach, *Celtica*, ii. 1. p. 134, foll.) Others, without assuming that the Vindelicians were Germans, believe that their name is connected with the German *Wenden*, and that it was used as a general designation for nations or tribes that were not Germans, whence the modern *Wend* and also the name of the Vandali or Vindili. (Comp. Horat. *Carm.* iv. 4. 18; Strab. iv. pp. 193, 207, vii. pp. 293, 313; Tac. *Ann.* ii. 17, *Hist.* iii. 5; Suet. *Aug.* 21; Vell. Pat. ii. 39; Plin. iii. 24.) After their subjugation by Tiberius, many of them were transplanted into other countries. (Strab. vii. p. 207; Dion Cass. liv. 22.) The principal tribes into which, according to Strabo, Pliny, and Ptolemy, the Vindelici were divided, were: the Brigantii, Runicatae, Leuni, Consuantae, Benlauni, Breuni, and Licatii. Their more important towns were: Augusta Vindelicorum, their capital, Reginum, Arbor Felix, Brigantium, Vemania, Campodunum, Abodiacum, Abusina, Quintiana Castra, Batava Castra, Vallatum, Isinisca, Pons Oeni, and a few others, which are treated of in separate articles. (Comp. Rayser, *Der Oberdonaukreis Bayerns unter den Römern*, Augsburg, 1830; J. Becker, *Drusus und die Vindelicier*, in Schneidewin's *Philologus*, v. p. 119, foll.) [L. S.]

VINDENAE, a place in Upper Moesia, on the road from Naissus to Scodra. (*Tab. Peut.*) [T. H. D.]

VI'NDERIS (Οὐινδέριος ποταμοῦ ἐκϐολαί, Ptol. ii. 2. § 8), a little river on the E. coast of Hibernia, perhaps that which falls into *Strangford Bay*; but Camden (p. 1403) places it more to the N. near *Carrickfergus.* [T. H. D.]

VINDILI. [Vandali.]

VINDILIS INSULA, on the Atlantic coast of

Gallia, is mentioned in the Maritime Itin. after Uxantis and Sina or Sena. Middle age documents prove that the island of *Belle-île* was once named *Guedel*, and this is the name Vindilis, the interchange of Gu or G and W or V being common. [Vapincum.] Though this is the only evidence, it is sufficient, for the names agree, and *Belle-île* is not likely to have been omitted in the Itin., when smaller islands along the coast are mentioned. [G. L.]

VINDINUM. [Suindinum.]

VINDIUS MONS (Οὔινδιον ὄρος, Ptol. vii. 1. § 28), a chain of mountains in *Hindostán*, extending NE. and SW. nearly, along the N. bank of the Namadus (now *Nerbudda*), in lat. 21°, long. 117° 30′. They are now known by the name of the *Vindhya Ms.*, and form the principal watershed of the *Nerbudda* and *Tapti*, which flow into the Indian Ocean, a little to the N. of *Bombay*, and of the *Soane* and *Andomati*, which are great tributaries of the Ganges. [V.]

VI′NDIUS or VINNIUS (Οὐίνδιον ὄρος, Ptol. ii. 6. § 21), a mountain in Hispania Tarraconensis, which ran in a W. direction from the Saltus Vasconum and formed the boundary between the Cantabri and the Astures. It formed, therefore, the W. portion of the Cantabrian chain. The Iberus had its source in it. [T. H. D.]

VINDOBALA, a station on the wall of Hadrian in Britain, which was garrisoned by the Cohors I. Frixagorum. Camden (p. 1090) identifies it with *Walls-End;* whilst Horsley (p. 105) and others take it to be *Rutchester.* (*Not. Imp.*; Geo. Rav. v. 31.) [Vallum Romanum.] [T. H. D.]

VINDOBO′NA or VENDOBONA (Οὐινδόβουνα: *Vienna*), a town on the Danube in Upper Pannonia, was originally a Celtic place, but afterwards became a Roman municipium, as we learn from inscriptions. (Gruter, *Inscript.* p. 4.) This town, which according to Ptolemy (ii. 15. § 3) for some time bore the name of Juliobona (Ἰουλιόβονα), was situated at the foot of Mons Cetius, on the road running along the right bank of the river, and in the course of time became one of the most important military stations on the Danube; for after the decay of Carnuntum it was not only the station of the principal part of the Danubian fleet, but also of the Legio x. Gemina. (*It. Ant.* pp. 233, 248, 261, 266; *Tab. Peut.*; Aurel. Vict. *de Caes.* 16; Agathem. ii. 4; Jornand. *Get.* 50, where it is called Vindomina.) Vindobona suffered severely during the invasion of the Huns under Attila, yet continued to be a flourishing place, especially under the dominion of the Longobards. (Jornand. *l. c.*) It is well known that the emperor M. Aurelius died at Vindobona. (Aurel. Vict. *de Caes.* 16, *Epit.* 18; comp. Fischer, *Brevis Notitia Urbis Vindobonae*, Vindobonae, 1767; Von Hormayr, *Geschichte Wiens*, i. p. 43, foll.; Muchar, *Norikum*, vol. i. p. 166, foll.) [L. S.]

VINDOGLA′DIA, a place in Britannia Romana, probably in the territory of the Belgae on the road from Venta Belgarum to Isca Dumnoniorum. (*Itin. Ant.* pp. 483, 486.) The Geogr. Rav. (v. 31) calls it Bindogladia. Some place it at *Pentridge*, near *Old Sarum*, where are remains of Roman fortifications. Camden, however (p. 61), identifies it with *Winburn*, and Horsley (p. 472) with *Cranburn.* [T. H. D.]

VINDOLANA, a station on Hadrian's boundary wall in Britain, where the Cohors IV. Gallorum lay in garrison. (*Not. Imp.*) By the Geo. Rav. (v. 31) it is called Vindolanda. Camden (p. 1087) identifies it with *Old Winchester*, Horsley (p. 89, &c.) with *Little Chesters.* [Vallum Romanum.] [T.H.D.]

VINDOMAGUS (Οὐινδόμαγος), in Gallia Narbonensis, one of the two cities which Ptolemy (ii. 10. § 10) assigns to the Volcae Arecomici. There is nothing to determine the position of Vindomagus, except the fact that there is a town *Vigan*, where some remains have been found. *Le Vigan* is NW. of *Nismes*, and on the southern border of the *Cévennes.* [G. L.]

VINDOMIS or VINDOMUM, a place belonging probably to the Belgae in Britannia Romana on the road from Venta Belgarum to Calleva. (*Itin. Ant.* pp. 483, 486.) Horsley (p. 459) identifies it with *Farnham;* others have sought it at *E. Sherborne*, and at *Whitchurch.* [T. H. D.]

VINDOMORA, a town of the Brigantes in the N. part of Britannia Romana. (*Itin. Ant.* p. 464.) It is commonly identified with *Ebchester* at the NW. boundary of Durham (Horsley, p. 398), where there are remains of a fort, and where Roman antiquities have been discovered. (Cf. Camden, p. 1086; *Philos. Trans.* No. 278.) [T. H. D.]

VINDONISSA, in Gallia, is mentioned by Tacitus (*Hist.* iv. 61, 70). It was the station of the twenty-first legion, A. D. 71, which entered Rhaetia from Vindonissa. The place is *Windisch*, in the Swiss canton of *Aargau*, near the junction of the *Aar*, *Reuss*, and *Limmath.* Vindonissa was once a large place, and many Roman remains and coins have been found there. In the *Bärlisgrube* there are traces of an amphitheatre, and on the road from *Brauneckberg* to *Königsfelden* the remains of an aqueduct The name of the XXI. Legion has been discovered in inscriptions found at *Windisch.* Near *Windisch* is the former convent and monastery of *Königsfelden*, where some of the members of the Habsburg family are buried. Several Roman roads help to fix the position of Vindonissa. The Table places it at the distance of xxii. from Augusta Rauracorum (*Augst*) [Augusta Rauracorum]; and another road went from Vindonissa past Vitodurum [Vitodurum] to Arbor Felix in Rhaetia. Vindonissa is named Vindo in a Panegyric of Constantine by Eumenius, and Castrum Vindonissense in Maxima Sequanorum in the Notitia of the Gallic Provinces. When Christianity was established in these parts, Vindonissa was the see of the first bishopric, which was afterwards removed to *Constanz.* In the third and fourth centuries Vandals and Alemanni damaged the town. The Huns afterwards ravaged Vindonissa, and Childebert king of the Franks destroyed it in the sixth century. (D'Anville, *Notice, &c.*; Ernesti, *Note on Tacit. Hist.* iv. 70; Neigebaur, *Neuestes Gemälde der Schweiz.*) [G. L.]

VINIOLAE, a place of the Oretani in Hispania Tarraconensis, between Acatucci and Mentesa Bastia. (*Itin. Ant.* p. 402.) Variously identified with *Hinojares* and as a place on the river *Borosa.* [T. H. D.]

VINNIUS. [Vindius.]

VINO′VIA (in Ptol. Οὐιννοουΐον, ii. 3. § 16), a town of the Brigantes in the N. of Britannia Romana. (*Itin. Ant.* p. 465.) Now *Binchester* near *Bishop Auckland*, with remains of Roman walls and other antiquities. (Camden, p. 945.) In the *Not. Imp.* and by the Geogr. Rav. (v. 31) it is called Vinonia. [T. H. D.]

VI′NTIUM (Οὐίντιον: *Vence*), in Gallia Narbonensis, the chief town of the Nerusii. [Nerusii.] Inscriptions have been found at *Vence* with the words CIVIT. VINT.; and in the Notitia of the Gallic Provinces it is placed in the Alpes Maritimae under the name of Civitas Vintiensium or

Venciensium. *Vence* is in the department of *Var*, near the river *Var*. (D'Anville, *Notice, &c.*) [G. L.]

VI′NZELA (Οὐίνζελα), a town of Galatia, in the territory of the Tectosages. (Ptol. v. 4. § 8.) A second town of the same name is mentioned by Ptolemy (v. 5. § 8) in the south-east of Pisidia. [L. S.]

VIOLVASCENSIS PAGUS. [Martialis.]

VIPITENUM, a town in Rhaetia belonging to the Venostes, situated between Veldidena and Tridentum. (*Itin. Ant.* pp. 275, 280.) Some place it in the *Ober-Wipthal;* others identify it with *Sterzing* on the *Eisach*, at the foot of the *Brenner*. [T. H. D.]

VIPOSCIANA, a place in Mauretania Tingitana, on the road from Tocolosida to Tingis. (*Itin. Ant.* p. 23.) Mannert (x. pt. ii. p. 487) supposes that it is the place called Prisciana by Mela (iii. 10. sub fin.), and Πτισκίανα or Πισκιάνα by Ptolemy (iv. 1. § 14). The same author identifies it with *Mergo*, whilst Lapie takes it to be *Soe-el-Arba*, and Graberg di Hemsö, *Dar-el-Hhamara*. [T. H. D.]

VIRACELLUM (Βιράκελλον, Ptol.), a town of Etruria, mentioned only by Ptolemy (iii. 1. § 47), who places it among the inland towns in the NW. corner of that country. It is supposed by Cluverius to be represented by *Verrucola* or *Verrucchia* in the mountains between the *Serchio* and the *Magra* (Cluver. *Ital.* p. 75), but the identification is very doubtful. [E. H. B.]

VIRDO (the *Wertach*), a small river in the territory of the Licatii in Vindelicia, a tributary of the Licus, which it joins a little below Augusta Vindelicorum. (Paul. Diac. *Langob.* ii. 13; Venant. Fort. *Vita S. Mart.* iv, 646, where it is less correctly called Vindo or Vinda). [L. S.]

VIRGULAE. [Bergule, Vol. I. p. 393, a.]

VIRIBALLUM. [Corsica, Vol. I. p. 691, a.]

VIRITIUM (Οὐιρίτιον), a place in northern Germany, mentioned only by Ptolemy (ii. 11. § 27), was probably in the territory of the Sidini, on the site of the modern town of *Wrietzen* on the *Oder*. (Wilhelm, *Germanien*, p. 275.) [L. S.]

VIROCO′NIUM (Οὐιροκόνιον, Ptol. ii. 3. § 19), a town of the Cornavii in Britannia Romana, on the road from Deva to Londinium, with a by-road from Maridunum. (*Itin. Ant.* pp. 482, 484.) It is the town called Urioconium in another route of the Itinerary (p. 469). Now *Wroxeter*, with ruins and antiquities. (Camden, p. 652.) [T. H. D.]

VIRODUNUM. [Verodunenses.]

VIROMAGUS. [Bromagus.]

VIROSIDUM (*Not. Imp.*), a fort or castle at the N. boundary of Britannia Romana and in the territory of the Brigantes, the station of the Cohors VI. Nerviorum. Camden (p. 1022) places it near *Warwik Cumberland;* whilst others seek it on the S. coast of *Solway Frith*, and at *Preston*. [T. H. D.]

VIROVESCA (Οὐιρούεσκα, Ptol. ii. 6. § 53), a town of the Autrigones in Hispania Tarraconensis, on the road from Pompelo to Asturica (*Itin. Ant.* pp. 394, 450, 454; Plin. ii. 3. s. 4). It is the modern *Briviesca*. (Cf. Florez, *Esp. Sagr.* xxiv. p. 10, xxvii. p. 13.) Coins in Sestini (p. 211). [T.H.D.]

VIROVIACUM, in Gallia, in the Table, Virovinum, is placed on a route from Castellum (*Cassel*) to Turnacum (*Tournay*). The Antonine Itinerary fixes it xvi. from each place. The distances in the Table do not agree; but the site is certain. It is *Werwic* or *Verwick*, a large village on the *Lys*, 3 leagues from *Lille* in the French department of *Nord*. In 1514 a medal of C. Julius Caesar was dug up at *Werwic*, and some time afterwards other medals of the time of the Antonini. There is a tradition also of the remains of an ancient edifice having been seen here, and a fragment of a statue (Bast, *Recueil d'Antiquités Romaines et Gauloises trouvées dans la Flandre proprement dite*, Gand, 1804.) [G. L.]

VIRUEDRUM (Οὐιρουεδροὺμ ἄκρον, Ptol. ii. 3. § 5), a promontory on the N. coast of Britannia Barbara, and the most N. point of the island. It is apparently the present *Dungsby Head*. (Camden, p. 1280.) [T. H. D.]

VIRUNI. [Varini.]

VIRU′NUM (Οὐίρουνον). 1. One of the most important towns in the interior of Noricum, south of Noreia, and on the road from Aquileia to Lauriacum. (Plin. iii. 27; Ptol. ii. 14. § 3; Steph. Byz. *s. v.* Βέρουνος; Suid. *s. v.* Βηρούνιον; *It. Ant.* p. 276; *Tab. Peut.*, where it is called Varunum.) But notwithstanding its importance, which is attested by its widely scattered remains about the village of *Mariasaal* near *Klagenfurt*, no details about it are known, except, from inscriptions, the fact that it was a Roman colony, with the surname of Claudia. (Gruter, *Inscript.* p. 569; Orelli, *Inscript.* no. 1317, 5074; comp. Muchar, *Norikum*, vol. i. p. 271.)

2. A town in the country of the Sidini in Germania, of unknown site, and mentioned only by Ptolemy (ii. 11. § 27). [L. S.]

VIRUS (Οὐίρου ἐκϐολαί, Ptol. ii. 6. § 3), a river in the N. part of the W. coast of Hispania Tarraconensis. Variously identified with the *Landrove* and the *Allones*. [T. H. D.]

VISBU′RGII (Οὐισϐούργιοι), a tribe in the south-east of Germany, about the sources of the Vistula, and placed by Ptolemy (ii. 11. § 21) near the Quadi, in the district to which Tacitus (*Germ.* 43) assigns the Gothini. [L. S.]

VISO′NTIUM (Οὐισόντιον, Ptol. ii. 6. § 54), a town of the Pelendones in Hispania Tarraconensis, perhaps *Vinneza* or *Binoesca*. [T. H. D.]

VISPI (Οὐισποί), a tribe in the south-west of Germany, is mentioned only by Ptolemy (ii. 11. § 10); nothing certain can be said as to the precise district they inhabited. [L. S.]

VI′STULA, VISTILLUS (Οὐιστούλα, Οὐιστούλας: *Vistula* or *Weichsel*), one of the great rivers of Germany, separating, according to Ptolemy (viii. 10. § 2; comp. ii. 11. § 4, iii. 5. § 5), Germany from Sarmatia, while Pomp. Mela (iii. 4), who calls the river Visula, describes it as forming the boundary between Scythia and Sarmatia. It cannot be expected that either Greeks or Romans should have possessed much information about this distant river. Ptolemy says that it had its origin in the Hercynia Silva, and discharged itself into the Sarmatian ocean (the *Baltic*), and Marcianus (p. 53) ascribes to it a course of from 1850 to 2000 stadia in length. This is all the information to be gathered from the ancient authors. (Comp. Plin. iv. 27. s. 28; Solin. 20; Geogr. Rav. iv. 4; Amm. Marc. xxii. 8, where it is called Bisula; Jornand. *Get.* 3.) Jornandes in two passages (*Get.* 5 and 17) speaks of a river Viscla, which some geographers regard as identical with the modern *Wisloka*, a tributary of the Vistula, but it is probably no other than the Vistula itself, whose modern German name *Weichsel* seems to be formed from Viscla. [L. S.]

VISURGIS (Οὐίσουργις, Βίσουργις, Οὐίσουργος, or Οὐισσούργιος: *Weser*), one of the principal rivers in north-western Germany, which was tolerably well known to the Romans, since during their wars in Germany they often advanced as far as its banks, and at one time even crossed it; but they seem to have been unacquainted with its southern course, and with its real origin; for it is formed by the confluence of the *Werra* and the *Fulda*, while Ptolemy (ii. 11. § 1) imagined that it had its sources in Mons Melibocus. Marcianus (p. 51) states that its length amounted to from 1600 to 1780 stadia. The Visurgis flowed into the German Ocean in the country of the Chauci. (Comp. Pomp. Mela, iii. 4; Plin. iv. 27; Tac. *Ann.* i. 70, ii. 9; Vell. Pat. ii. 105; Sidon. Apoll. *Carm.* xxiii. 243; Strab. vii. p. 291; Dion Cass. xliv. 33, lv. 1, 2, 8, lvi. 18.) [L. S.]

VITE'LLIA (Βιτελλία, Steph. B.: *Eth.* Βιτελλῖνος, Vitelliensis), an ancient town of Latium, which was, however, apparently situated in the territory of the Aequi, or at least on their immediate frontiers, so that it is hard to determine whether it was properly a Latin or an Aequian town. But the circumstance that its name is not found in the list of the cities of the Latin League given by Dionysius (v. 61) is strongly in favour of the latter supposition. Its name is first mentioned by Livy (ii. 39) in the account of the celebrated campaign of Coriolanus, whom he represents as taking Vitellia at the same time as Corbio, Labicum, and Pedum: but in the more detailed narratives of the same campaign by Dionysius and Plutarch, no notice is found of Vitellia. The name is again mentioned by Livy in B.C. 393, when the city fell into the hands of the Aequi, who surprised it by a night attack (Liv. v. 29.) He there calls it "Coloniam Romanam," and says it had been settled by them in the territory of the Aequi; but we have no previous account of this circumstance; nor is there any statement of its recovery by the Romans. A tradition preserved to us by Suetonius recorded that the Roman colony was at one time entrusted to the sole charge of the family of the Vitellii for its defence (Suet. *Vitell.* 1); but there can be little doubt that this is a mere family legend. All trace of Vitellia, as well as Tolerium and other towns in the same neighbourhood, disappears after the Gaulish invasion, and the only subsequent mention of the name occurs in the list given by Pliny (iii. 5. s. 9) of the cities of Latium which were in his time utterly extinct. The site is wholly uncertain, though it seems probable that it may be placed in the same part of Latium as Tolerium, Bola, Labicum, and other towns on the frontiers of the Aequian territory. It has been placed by Gell at *Valmontone*, a place which in all probability occupies an ancient site, and this would do very well for Vitellia, but that it is equally suitable for Tolerium, which must be placed somewhere in the same neighbourhood, and is accordingly fixed by Nibby at *Valmontone* [TOLERIUM.] The latter writer would transfer Vitellia to *Civitella* (called also *Civitella d' Olevano*), situated in the mountains between *Olevano* and *Subiaco*; but this seems decidedly too far distant from the other cities with which Vitellia is connected. It would be much more plausible to place Vitellia at *Valmontone* and Tolerium at *Lugnano*, about 3 miles NW. of it, but that *Lugnano* again would suit very well for the site of Bola, which we are at a loss to fix elsewhere [BOLA]. The fact is that the determination of the position of these cities, which disappeared in such early times, and of which no record is preserved by inscriptions or other ancient monuments, must remain in great measure conjectural. (Gell. *Top. of Rome*, p. 436; Nibby, *Dintorni*, vol. i. p. 467, vol. iii. p. 370.) [E. H. B.]

VITIA (Οὐιτία, Strab. xi. pp. 508, 514, 531: *Eth.* Οὐίτιοι), a small district in Media Atropatene, noticed by Strabo in his account of that province. It appears to have been in the northern part near the tribes of the Dribyces and Amardi. [V.]

VITIS [UTIS].

VITODURUM or VITUDURUM, in Gallia, is mentioned in an inscription, in which it is said that the emperors Diocletian and Maximianus "murum Vitodurensem a solo instauraverunt." The Antonine Itin. places it between Vindonissa (*Windisch*) and Fines (*Pfin*) [FINES, No. 15.] At *Winterthur* in the Swiss canton of *Zürich* there is in the town library a collection of Roman coins and cut stones, most of which have been found in the neighbourhood of the town and in the adjacent village of *Oberwinterthur*, which is the site of Vitodurum. (D'Anville, *Notice, &c.*) [G. L.]

VITRICIUM (*Verrez*), a town or village of the Salassi, on the high road leading from Eporedia (*Ivrea*), to Augusta Praetoria (*Aosta*). It is known only from the Itineraries, which place it 25 miles from Augusta, and 21 from Eporedia (*Itin. Ant.* pp. 345, 347, 351), but is undoubtedly identical with *Verrez*, a large village in the *Val d'Aosta*, at the entrance of the *Val Challant*. [E. H. B.]

VIVANTAVARIUM (Οὐϐαντανάριον, Ptol. iii. 5. § 30), a place in European Sarmatia, between the rivers Axiaces and Tyras. [T. H. D.]

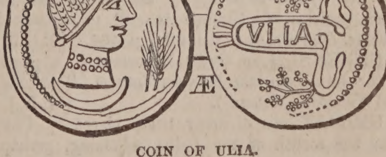
VIVISCI, VIBISCI. [BITURIGES VIVISCI.]

VIVISCUS, in Gallia. In the Antonine Itin. the name is Bibiscus. The place is *Vevay*, or near it, in the Swiss canton of *Waadt* or *Vaud*. See the article PENNELOCUS. [G. L.]

ULCAEI LACUS (Οὐλκαῖα ἕλη), a succession of lakes and swamps in Pannonia, between the mouths of the Dravus and Savus. (Dion Cass. lv. 32.) They seem to be the same as the Palus Hiulca mentioned by Aurelius Victor (*Epit.* 41) as being near Cibalae in Pannonia. (Comp. Zosim. ii. 18.) Those lakes now bear the name of *Laxincze*. [L. S.]

ULCI'SIA CASTRA, a fort in Pannonia, on the road running along the right bank of the Danubius from Aquincum to Bregetio (*It. Ant.* p. 269), is now called *Szent Endre*. [L. S.]

ULIA (Οὐλία, Strab. iii. p. 141), a town in Hispania Baetica, on a hill, on the road from Gades to Corduba. (*Itin. Ant.* p. 412.) It was a Roman municipium, with the surname of Fidentia, and belonged to the jurisdiction of Corduba (Plin. iii. 3. s. 4; Hirt. *B. H.* 3, 4, *B. Alex.* 61; Dion Cass. xliii. 31.) From inscriptions it appears to be the present *Monte Mayor*, where there are ruins. (Cf. Morales, *Ant.* p. 5; Florez, *Esp. Sagr.* x. p. 150, xii. p. 5; coins in Florez, *Med.* ii. p. 620, iii. p. 130; Mionnet, i. p. 27, *Suppl.* i. p. 47.) [T. H. D.]



COIN OF ULIA.

ULIARUS INSULA (*Eth.* Olarionensis, Sidonius Apollinaris), is placed by Pliny in the Aquitanicus Sinus (iv. 19). It is the *Ile d'Oléron*, which belongs to the department of *Charente Inférieure*, and is separated from the mainland by a narrow strait. [G. L.]

ULIZIBERA (Οὐλιζίϐηρα, or Οὐλιζίϐιῤῥα, Ptol. iv. 3. § 37), the Ulusubritanum of Pliny (v. 4. s. 4), a town of Byzacium in Africa Proper, S. of Hadrumetum. [T. H. D.]

ULLA (called by Ptolemy Οὐΐα, ii. 6. § 2), a river on the W. coast of Hispania Tarraconensis, which enters the sea between the Minius and the promontory of Nerium. (Mela, iii. 1.) It is still called *Ulla*. [T. H. D.]

ULMANETES. [Silvanectes.]

ULMI or ULMUS, a place frequently mentioned in the Itineraries as situated in the interior of Lower Pannonia on the road leading from Siccia to Cibalae and Sirmium (*It. Ant.* pp. 131, 232, 261, 267; *It. Hieros.* p. 563; *Tab. Peut.*); but its exact site is uncertain. [L. S.]

ULMUS, a place in Upper Moesia, between Naissus and Remesiana. (*Itin. Hieros.* p. 566.) According to Lapie near *Pauvlitz.* [T. H. D.]

ULPIA'NUM. 1. (Οὐλπιανόν, Ptol. iii. 9. § 6), called also Ulpiana (Οὐλπιανά, Hierocl. p. 656), a town of Upper Moesia on the southern declivity of Mt. Scomius. It was enlarged and adorned by Justinian, whence it obtained the name of Justiniana Secunda. (Procop. *de Aed.* iv. 1, *Goth.* iv. 25.) It is commonly identified with the present *Giustendil;* but Leake (*Northern Greece*, iii. p. 475) takes that town to represent the ancient Pantalia or Pautalia in Thrace.

2. A place in Dacia, apparently in the neighbourhood of *Klausenburg*. (Ptol. iii. 8. § 7.) [T. H. D.]

ULTERIOR PORTUS. [Itius Portus.]

ULUBRAE (*Eth.* Ulubrensis), a small town of Latium on the borders of the Pontine Marshes. It is not mentioned in history previous to the establishment of the Roman dominion, but is noticed repeatedly by Latin writers of the best period, though always as a poor and decayed town, a condition which appears to have resulted from its marshy and unhealthy position. Hence Cicero jestingly terms its citizens little frogs (*ranunculi, Ep. ad Fam.* vii. 18), and both Horace and Juvenal select it as an almost proverbial example of a deserted and melancholy place. (Hor. *Ep.* i. 11. 30; Juv. x. 101.) Still it appears from the expressions of the latter, that it still retained the rank of a municipal town, and had its own local magistrates; and in accordance with this, we find the Ulubrenses enumerated by Pliny among the municipal towns of the First Region. (Plin. iii. 5. s. 9.) The same thing is attested by inscriptions (Orell. *Inscr.* 121—123), and the discovery of these at the place now called *Cisterna*, about eight miles from *Velletri*, and 35 from Rome, immediately at the entrance of the Pontine Marshes, leaves no doubt that Ulubrae was situated somewhere in that neighbourhood. But the village of Cisterna (called in the middle ages Cisterna Neronis), does not appear to occupy an ancient site, and the exact position of Ulubrae is still undetermined. (Nibby, *Dintorni di Roma*, vol. i. p. 463.) [E.H.B.]

UMBENNUM, in Gallia Narbonensis, is placed in the Jerusalem Itin. between Batiana [Batiana] and Valentia (*Valence*). [G. L.]

UMBRAE, one of many tribes placed by Pliny near the mouth of the Indus, adjoining, perhaps within, the larger district of Pattalene (vi. 20. s. 23). [V.]

UMBRANICI, a people of Gallia Narbonensis, who had the Jus Latii. (Plin. iii. 4.) There is no further notice of these people who had this political privilege, except the occurrence of the name Umbranica or Umbranicia in the Table. [G. L.]

UMBRIA (ἡ Ὀμϐρική: *Eth.* Umber, Umbri, Ὀμϐρικός), was one of the principal divisions of Central Italy, situated to the E. of Etruria, and extending from the valley of the Tiber to the shores of the Adriatic. The name was, however, at different periods applied within very different limits. Umbria, properly so called, may be considered as extending only from the Tiber, which formed its W. limit through the greater part of its course, and separated Umbria from Etruria, to the great central range of the Apennines from the sources of the Tiber in the N. to the *Monti della Sibilla* in the S. But on the other side of this range, sloping down to the Adriatic, was an extensive and fertile district extending from the frontiers of Picenum to the neighbourhood of Ariminum, which had probably been at one time also occupied by the Umbrians, but, before it appears in Roman history, had been conquered by the Gaulish tribe of the Senones. Hence, after the expulsion of these invaders, it became known to the Romans as "Gallicus ager," and is always so termed by historians in reference to the earlier period of Roman history. (Liv. xxiii. 14, xxxix. 44; Cic. *Brut.* 14, &c.) On the division of Italy into regions by Augustus, this district was again united with Umbria, both being included in the Sixth Region. (Plin. iii. 14. s. 19.) But even Pliny, in describing this union, distinguishes the "ager Gallicus" from Umbria Proper ("Jungitur his sexta regio *Umbriam complexa agrumque Gallicum* circa Ariminum," *Ib.*): it is evident therefore that the name of Umbria did not at that time in common usage include the territory on the shores of the Adriatic. In like manner Ptolemy designates the coast from Ancona to Ariminum (termed by Pliny the "Gallica ora") as "the land of the Senones" (Ptol. iii. 1. § 22), a term which had certainly become inappropriate long before his time. It was according to Pliny (*l. c.*) this portion of the Gaulish territory which was properly designated as Gallia Togata, a name afterwards extended and applied to the whole of Cisalpine Gaul. (Hirt. *B. G.* viii. 24; Cic. *Phil.* viii. 9, &c.) It was not, therefore, till a late period that the name of Umbria came into general use as including the whole of the Sixth Region of Augustus, or the land from the Tiber to the Adriatic.

Umbria, in this more extended sense of the name, was bounded on the W. by the Tiber, from a point near its source to a little below Ocriculum, which was the most southern city included within the province. Thence the E. frontier ascended the valley of the Nar, which separated Umbria from the land of the Sabines, almost to the sources of that river in the great central chain of the Apennines. Thence it followed a line nearly parallel with the main ridge of those mountains, but somewhat farther to the E. (as Camerinum, Matilica, and other towns situated on the E. slopes of the Apennines were included in Umbria), as far as the sources of the Aesis (*Esino*), and then descended that river to its mouth. We know that on the coast the Aesis was the recognised boundary between Umbria and Picenum on the S., as the little river Rubicon was between Umbria and Gallia Cisalpina on the N.

From the mouth of the latter stream the frontier must have followed an irregular line extending to the central range of the Apennines, so as to include the upper valleys of the Sapis and Bedesis; thence it rejoined the line already traced from the sources of the Tiber.

All ancient authors agree in representing the Umbrians as the most ancient people of Italy (Plin. iii. 14. s. 19; Flor. i. 17; Dionys. i. 19), and the traditions generally received described them as originally spread over a much more extensive region than that which ultimately retained their name, and occupying the whole tract from sea to sea, including the territories subsequently wrested from them by the Etruscans. That people, indeed, was represented as gaining possession of its new settlements step by step, and as having taken not less than 300 towns from the Umbrians. (Plin. *l. c.*) This number is doubtless fabulous, but there seems to be good reason for regarding the fact of the conquest as historical. Herodotus, in relating the Lydian tradition concerning the emigration of the Tyrrhenians, represents the land as occupied, at the time of their arrival, by the Umbrians. (Herod. i. 94.) The traditions reported by Dionysius concerning the settlements of the Pelasgians in Italy, all point to the same result, and represent the Umbrians as extending at one period to the neighbourhood of Spina on the Adriatic, and to the mouths of the Padus. (Dionys. i. 16—20.) In accordance with this we learn incidentally from Pliny that Butrium, a town not far from Ravenna, was of Umbrian origin. (Plin. iii. 15. s. 20.) The name of the river Umbro (*Ombrone*), on the coast of Etruria, was also in all probability a relic of their dominion in that part of Italy. On the whole we may fairly assume as a historical fact, the existence of the Umbrians at a very early period as a great and powerful nation in the northern half of Central Italy, whose dominion extended from sea to sea, and comprised the fertile districts on both sides of the Apennines, as well as the mountains themselves. According to Zenodotus of Troezen (*ap.* Dionys. ii. 49), the powerful race of the Sabines itself was only a branch or offshoot of the Umbrians; and this statement is to a great extent confirmed by the result of recent philological researches. [Sabini.]

If the Umbrians are thus to be regarded as one of the most ancient of the races established in Italy, the question as to their ethnological affinities becomes of peculiar interest and importance. Unfortunately it is one which we can answer but very imperfectly. The ancient authorities upon this point are of little value. Most writers, indeed, content themselves with stating that they were the most ancient people of Italy, and apparently consider them as Aborigines. This was distinctly stated by Zenodotus of Troezen, who had written a special history of the Umbrian people (Dionys. ii. 49); and the same idea was probably conveyed by the fanciful Greek etymology that they were called Ombricans or Ombrians, because they had survived the deluge caused by floods of rain (ὄμϐροι; Plin. iii. 14. s. 19). Some writers, however, of whom the earliest seems to have been one Bocchus, frequently quoted by Solinus, represented the Umbrians as of Gaulish origin (Solin. 2. § 11; Serv. *ad Aen.* xii. 753; Isidor. *Orig.* ix. 2); and the same view has been maintained by several modern writers, as the result of philological inquiries. Researches of this latter kind have indeed of late years thrown much light upon the affinities of the Umbrian language, of which we possess an important monument in the celebrated tables of Iguvium. [Iguvium.] They have clearly established, on the one hand its distinctness from the language of the neighbouring Etruscans, on the other its close affinity with the Oscan, as spoken by the Sabellian tribes, and with the old Latin, so that the three may fairly be considered as only dialects of one and the same family of languages. [Italia, p. 86.] The same researches tend to prove that the Umbrian is the most ancient of these cognate dialects, thus confirming the assertions of ancient writers concerning the great antiquity of the nation. But, while they prove beyond a doubt that the Umbrian, as well as the nearly related Oscan and Latin, was a branch of the great Indo-Teutonic family, they show also that the three formed to a great extent a distinct branch of that family or an independent group of languages, which cannot with propriety be assigned to the Celtic group, any more than to the Teutonic or Slavonic.

The history of the Umbrians is very imperfectly known to us. The traditions of their power and greatness all point to a very early period; and it is certain that after the occupation of Etruria as well as of the plains of the Padus by the Etruscans, the Umbrians shrunk up into a comparatively obscure mountain people. Their own descendants the Sabines also occupied the fertile districts about Reate and the valley of the Velinus, which, according to the traditions reported by Dionysius, had originally been held by the Umbrians, but had been wrested from them by the Pelasgians (Dionys. ii. 49.) At a much later period, but still before the name of the Umbrians appears in Roman history, they had been expelled by the Senonian Gauls from the region on the shores of the Adriatic. Livy indeed represents them as having previously held also a part of the territory which was subsequently occupied by the Boians, and from which they were driven by the invasion of that people (Liv. v. 35).

It was not till the Romans had carried their arms beyond the immediate neighbourhood of the city, and penetrated beyond the barrier of the Ciminian forest, that they came into contact with the Umbrians. Their first relations were of a friendly nature. The consul Fabius having sent secret envoys through the land of the neighbouring Etruscans into Umbria, received from the tribe of the Camertes promises of support and assistance if he should reach their country. (Liv. ix. 36.) But the Umbrian people seem to have been divided into different tribes, which owned no common government and took different lines of policy. Some of these tribes made common cause with the Etruscans and shared in their defeat by Fabius. (*Ib.* 37.) This disaster was followed by two other defeats, which were sustained by the Umbrians alone, and the second of these, in which their combined forces were overthrown by the consul Fabius near Mevania (B. C. 308), appears to have been a decisive blow. It was followed, we are told, by the submission of all the Umbrian tribes, of whom the people of Ocriculum were received into the Roman alliance on peculiarly favourable terms. (Liv. ix. 39, 41.)

From this time we hear no more of hostilities with the Umbrians, with the exception of an expedition against a mere marauding tribe of mountaineers (Liv. x. 1), till B. C. 296, when the Samnite leader Gellius Egnatius succeeded in organising a general confederacy against Rome, in which the Umbrians and Senonian Gauls took part, as well as the Etruscans and Samnites. (Liv. x. 21.) Their combined forces were, however, overthrown in the great battle of Sentinum (*Ib.* 26, 27; Polyb. ii. 19); and this is the last time that the Umbrians, as a people, appear in arms against the Roman power. We are indeed told in the epitome of Livy that the Umbrians were again defeated, and reduced to submission at the same time as the Sallentines, in B. C. 266 (Liv. *Epit.* xv.); but there seems no doubt that this refers only to the outlying tribe or people of the Sarsinates (on the N. of the Apennines, and adjoining the Boian Gauls), as the Fasti, in recording the events of the year, mention both consuls as triumphing only "de Sarsinatibus" (*Fast. Capit.*) We have no account of the terms on which the Umbrians were received into submission, or of the manner in which they passed, like their neighbours the Etruscans, into the condition of dependent allies of Rome: it is certain only that the different tribes and cities were, according to the usual Roman policy, admitted on very different terms. Ocriculum, as already mentioned, enjoyed special privileges; and the same was the case with the Camertes, who, even in the days of Cicero, retained a peculiarly favoured position, and had a treaty which secured them a nominal independence and equality. (Liv. xxviii. 45; Cic. *pro Balb.* 20.) The fertile district of the "Gallicus ager" was in great part occupied by Roman colonies, of which Sena Gallica was founded as early as B. C. 289, Ariminum in B. C. 268, and Pisaurum in B. C. 183. But besides these, a considerable part of that territory was divided among Roman citizens, by a law of the tribune, C. Flaminius, in B. C. 232. (Cic. *Brut.* 14.) The other Umbrians continued in the position of dependent allies of Rome, and appear to have remained uniformly faithful to the powerful republic. Thus, in B. C. 282, we are told that they were solicited by the envoys of the Tarentines (Dion Cass. *Fr.* 144), but apparently without effect: nor does it appear that their constancy was for a moment shaken by the successes of Hannibal; and before the close of the Second Punic War we find them coming forward with the offer of volunteers for the army of Scipio. (Liv. xxviii. 45.) In the Social War they are said to have for a time broken out into revolt, and were defeated in a battle by the legate C. Plotius; but it is probable that the defection was a very partial one, and the Romans wisely secured the fidelity of the Umbrians as well as of the Etruscans by bestowing on them the Roman franchise, B. C. 90. (Liv. *Epit.* lxxiv.; Oros. v. 18; Appian, *B. C.* i. 49.)

From this time the name of the Umbrians as a nation disappears from history, though it continued, as already mentioned, to be well known as one of the territorial divisions of Italy. (Tac. *Hist.* iii. 41, 42; Jul. Capit. *Gordiani*, 4; &c.) In the early ages of the empire it was still one of the districts which supplied the most numerous recruits to the praetorian cohorts. (Tac. *Ann.* iv. 5.) As long as the division of Italy into regions subsisted, the name of Umbria continued to be applied to the sixth region; but from an early period, certainly long before the time of Constantine, it was united for administrative purposes with Etruria, and its name seems to have become gradually merged in that of the more important province. Thus Servius tells us that Umbria was a part of Tuscia (Serv. *ad Aen.* xii. 753), and the Liber Coloniarum includes the ancient Umbrian cities of Hispellum, Tuder, Ameria, &c., among the "Civitates Tusciae." (*Lib. Colon.* p. 224.) On the other hand, the district E. of the Apennines, the ancient Ager Gallicus, was now again separated from Umbria, and became known by the name of Picenum Annonarium. (Mommsen, *de Lib. Col.* p. 211.)

Of the Umbrians as a nation during their period of independence we know almost nothing. We learn only that they enjoyed the reputation of brave and hardy warriors; and the slight resistance that they opposed to the Roman arms was probably owing to their want of political organisation. So far as we learn, they appear to have been divided into several tribes or "populi," such as the Camertes, Sarsinates, &c., each of which followed its own line of policy without any reference to a common authority. No trace is found in history of the existence among them of any national league or council such as existed among the Etruscans and Latins; and even where the Umbrians are spoken of in general terms, it is often doubtful whether the whole nation is really meant.

The physical characters of Umbria are almost wholly determined by the chain of the Apennines, which, as already described, enters the province near the sources of the Tiber, and extends thence without interruption to the lofty group of the *Monti della Sibilla* (the ancient Mons Fiscellus) at the sources of the Nar, and on the confines of Picenum and the land of the Sabines. The Apennines do not rise in this part of the chain to so great an elevation as they attain farther south, but their principal summits within the Umbrian territory range from 4000 to 5500 feet in height; while their numerous ramifications fill up a space varying from 30 to 50 miles in breadth. A very large portion of Umbria is therefore a mountain country (whence it is termed "montana Umbria" by Martial, iv. 10), though less rugged and difficult of access than the central regions of Italy farther to the S. On the W. the mountain district terminates abruptly on the edge of a broad valley or plain which extends from near *Spoleto* to the neighbourhood of *Perugia*, and is thence continued up the valley of the Tiber as far as *Città di Castello.* But beyond this plain rises another group of hills, connected with the main chain of the Apennines by a ridge which separates *Spoleto* from *Terni*, and which spreads out through almost the whole extent of country from the valley of the Nar to that of the Tiber. It is on the outlying hills or underfalls of this range that the ancient Umbrian cities of Tuder and Ameria were placed. The broad valley between this group and the main mass of the central Apennines is a fertile and delightful district, and was renowned in ancient times for the richness and luxuriance of its pastures, which were watered by the streams of the Tinia and Clitumnus. Here we find within a short distance of one another the towns of Treba, Hispellum, Mevania, and Assisium. This district may accordingly be looked on as the heart of Umbria properly so called.

On the E. of the central chain the Apennines descend more gradually to the sea by successive stages, throwing off like arms long ranges of mountains, sinking into hills as they approach the Adriatic. The valleys between them are furrowed by numerous streams, which pursue nearly parallel courses from SW. to NE. The most considerable of these are the Aesis (*Esino*), which formed the established limit between Umbria and Picenum; the Sena, which flowed under the walls of Sena Gallica (*Sinigaglia*); the far more celebrated Metaurus, which entered the sea at Fanum Fortunae (*Fano*); the Pisaurus, which gave name to the city of Pisaurum (*Pesaro*); the CRUSTUMIUS, now called the *Conca;* and the ARIMINUS (*Marecchia*), which gave its name to the celebrated city of Ariminum, and seems to have been regarded by Pliny as the northern boundary of Umbria, though that limit was certainly marked at an earlier period by the far-famed though trifling stream of the RUBICON. The river SAPIS also flowed through the Umbrian territory in the upper part of its course, and gave name to the Sapinia Tribus, mentioned by Livy as one of the divisions of the Umbrian nation.

All the waters which descend on the W. of the Umbrian Apennines discharge themselves into the Tiber. None of them are considerable streams, and the TINIA and CLITUMNUS are the only two the ancient names of which have been preserved to us. The NAR, a much more important river, the sources of which are in the Sabine territory, seems to have formed the boundary between Umbria and the land of the Sabines, through a considerable part of its course; but it entered the Umbrian territory near Interamna (*Terni*), and traversed it thence to its junction with the Tiber.

Two principal passes crossed the main chain of the Apennines within the limits of Umbria, and served to maintain the communication between the two portions of that country. The one of these was followed by the main line of the Flaminian Way, which proceeded almost due N. from Forum Flaminii, where it quitted the valley of the Clitumnus, and passed by Nuceria, Tadinum, and Helvillum, to the crest of the mountain chain, which it crossed between the last place and Cales (*Cagli*), and descended by the narrow ravine of the *Furlo* (Intercisa) into the valley of the Metaurus, which it then followed to the Adriatic at *Fano* (Fanum Fortunae). This celebrated road continued throughout the period of the Roman Empire to be the main line of communication, not only from the plains of Umbria to the Adriatic, but from Rome itself to Ariminum and Cisalpine Gaul. Its military importance is sufficiently apparent in the civil war between Vitellius and Vespasian. (Tac. *Hist.* i. 86, iii. 50, 52, &c.) Another line of road given in the Antonine Itinerary, quitted this main line at Nuceria, and, turning abruptly to the E., crossed a mountain pass to Prolaqueum (*Pioraco*), in the valley of the *Potenza*, and descended that valley to Septempeda in Picenum (*S. Severino*), and thence to Ancona. This pass has been in modern times wholly abandoned. The present road from Rome to Ancona turns to the E. from *Foligno* (Fulginium) and crosses the mountain ridge between that place and *Camerino*, descending to *Tolentino* in the valley of the *Chienti* (Flusor).

The towns of Umbria were numerous, though few of them were of any great importance. 1. On the W. of the Apennines, and beginning with those nearest to Rome, were: OCRICULUM, near the left bank of the Tiber; NARNIA and INTERAMNA, on the banks of the Nar; AMERIA and CARSULAE, a few miles to the N. of Narnia; TUDER, on a hill on the left bank of the Tiber; SPOLETIUM, in the hills which separate the valley of the *Maroggia* from that of the Nar; TREBA, MEVANIA, HISPELLUM, FULGINIUM, and ASSISIUM, all situated in or bordering on the broad valley above mentioned; ARNA and TIFERNUM TIBERINUM in the upper valley of the Tiber, and IGUVIUM in the mountains at a short distance from it. VESIONICA was probably situated at *Civitella di Benezzone*, also in the valley of the Tiber. On the Flaminian Way, exactly at the entrance of the mountains, stood FORUM FLAMINII, and higher up, on the same line of road, NUCERIA, TADINUM, and HELVILLUM.

2. On the E. of the central ridge of the Apennines, but still high up among the mountains, were situated CAMERINUM, near the sources of the Flusor; PROLAQUEUM (*Pioraco*), near those of the Potentia; PITULUM (*Piolo*), in the same valley; MATILICA and ATTIDIUM, both in the upper valley of the Aesis; SENTINUM, in a lateral branch of the same valley; TUFICUM and SUASA, both of them in the valley of the *Cesano*; CALLES (*Cagli*), on the Flaminian Way; TIFERNUM METAURENSE and URBINUM METAURENSE, both of them in the upper valley of the Metaurus; FORUM SEMPRONII (*Fossombrone*), lower down in the same valley; URBINUM HORTENSE (*Urbino*), between the valleys of the Metaurus and the Pisaurus; SESTINUM (*Sestino*), near the sources of the latter river; PITINUM PISAURENSE, probably at *Piagnino* in the same valley; SARSINA, in the upper valley of the Sapis; and MEVANIOLA, which is fixed by Cluverius, on the faith of inscriptions discovered there, at *Galeata*, in the upper valley of the Bedesis or *Ronco* (Cluver. *Ital.* p. 623), and is therefore the most northerly town that was included in Umbria.

3. Along the coast of the Adriatic were the important towns of SENA GALLICA, FANUM FORTUNAE, PISAURUM, and ARIMINUM. To the above must be added AESIS or AESIUM (*Jesi*), on the left bank of the river of the same name, and OSTRA, the ruins of which are said to exist between the rivers *Cesano* and *Nigolo*. (Abeken, *Mittel-Italien.* p. 41.)

In addition to the above long list of towns, the position of which can be assigned with tolerable certainty, the following obscure names are enumerated by Pliny among the towns or communities of Umbria still existing in his time: the Casuentillani, Dolates surnamed Salentini, Forojulienses surnamed Concubienses, Forobrentani, Pelestini, Vindinates, and Viventani. The above towns being totally unknown, the correct form and orthography of the names is for the most part uncertain. The same is the case with several others which the same writer enumerates as having in his day ceased to exist. (Plin. iii. 14. s. 19.) Strabo also mentions a place called Larolum as being situated on the Flaminian Way, in the neighbourhood of Narnia and Ocriculum (v. p. 227), which is otherwise wholly unknown, and the name is probably corrupt.

Of the natural productions of Umbria the most celebrated were its cattle, especially those of the valley of the Clitumnus [CLITUMNUS]; but its mountain tracts afforded also pasturage to flocks of sheep, which were driven southwards as far as Metapontum and Heraclea. (Varr. *R. R.* ii. 9. § 6.) The lower portions of the country abounded in fruit-trees, vines, and olives; but when Propertius terms his native Umbria "terris fertilis uberibus," this can be understood only of the tracts on the W. of the Apennines, of which he is there speaking (Propert. i. 22. 9), not of the more extensive mountain regions.

The name of Umbria is still given to one of the provinces of the Papal States, of which *Spoleto* is the capital; but this is merely an official designation, the name having been wholly lost in the middle ages, and being no longer in use as a popular appellation. [E. H. B.]

UMBRO (*Ombrone*), a river of Etruria, and next to the Arnus the most considerable in that country. It rises in the hills between *Siena* and *Arezzo*, and has a course of above 50 miles in a SSW. direction till it flows into the Tyrrhenian sea, about 16 miles N. of the promontory of *Monte Argentaro.* Pliny terms it a navigable river ("navigiorum capax"), and Rutilius describes it as forming at its mouth a tranquil and secure port. (Plin. iii. 5. s. 8; Rutil. *Itin.* i. 337—340.) It flows near the modern city of *Grosseto,* and within a few miles of the ruins of Rusellae. The name of Umbro is considered to be connected with the Umbrians, who held this part of Italy previous to its conquest by the Etruscans: and according to Pliny, the coast district extending from its mouth to Telamon, was still known as the "tractus Umbriae." (Plin. *l. c.*) [E. H. B.]

UNELLI or VENELI (Οὐένελοι), one of the Armoric or maritime states of Gallia. (*B. G.* ii. 34, iii. 11.) Caesar mentions them with the Veneti, Osismi, Curiosolitae, and other maritime states. The Unelli and the rest submitted to P. Crassus in B.C. 57; but in B.C. 56 it was necessary to send a force again into the country of the Unelli, Curiosolitae, and Lexovii. Q. Titurius Sabinus had the command of the three legions who were to keep the Unelli and their neighbours quiet. The commander of the Unelli was Viridovix, and he was also at the head of all the forces of the states which had joined the Unelli, among whom were the Aulerci Eburovices and the Lexovii. The force of Viridovix was very large, and he was joined by desperate men from all parts of Gallia, robbers and those who were too idle to till the ground. The Roman general entrenched himself in his camp, and made the Galli believe that he was afraid and was intending to slip away by night. The trick deceived the Galli, and they attacked the Roman camp, which was well placed on an eminence with a sloping ascent to it about a mile in length. On the Galli reaching the Roman camp exhausted by a rapid march up the hill and encumbered with the fascines which they carried for filling up the ditch, the Romans sallied out by two gates and punished the enemy well for their temerity. They slaughtered an immense number of the Galli, and the cavalry pursuing the remainder let few escape. This clever feat of arms is told clearly in the Commentaries.

The Unelli sent a contingent of 6000 men to attack Caesar at the siege of Alesia. (*B. G.* vii. 75.)

Ptolemy (ii. 8. § 2) names Crociatonum the capital of the Veneli. [Crociatonum.] The people occupied the peninsula of *Cotantin* or *Cotentin,* which is now comprehended in the department of *La Manche,* except a small part which is included in the department of *Calvados.* [G. L.]

UNSINGIS, according to a reading in Tacitus (*Ann.* i. 70), a river in the north-west of Germany; but the correct reading in that passage is *ad Amisiam,* as Ritter has shown in his note upon it, Unsingin being only a conjecture of Alting manufactured out of the modern name of a river called *Unse* or *Hunse.* [L. S.]

VOBARNA [Brixia].

VOCANUS AGER, a district in Africa Propria, between Carthage and Thapsus. (Liv. xxxiii. 48.) [J. R.]

VOCARIUM or VACORIUM (Οὐακόριον), a place in Noricum, on the great road leading from Augusta Vindelicorum to Aemona. (Ptol. ii. 14. § 3; *Tab. Peut.*) Its exact site is matter of conjecture only. [L. S.]

VOCATES. [Vasates.]

VOCE'TIUS MONS. This name occurs in Tacitus (*Hist.* i. 68), and nowhere else. The history shows that Tacitus is speaking of the country of the Helvetii. The Vocetius is conjectured to be that part of the Jura which is named *Boetzberg.* The road from *Bâle* runs through the *Frickthal* over the *Bötzberg* to *Baden* and *Zürich.* The Helvetii fled from Caecina (A. D. 70) into the Vocetius, where many were caught and massacred. Aventicum, the chief city (caput gentis), surrendered to Caecina. [Aventicum.] It has been proposed to write Vogesus for Vocetius in the passage of Tacitus; but there is no reason for the alteration. [G. L.]

VOCONII FORUM. [Forum Voconii.]

VOCO'NTII (Οὐκόντιοι), a people of Gallia Narbonensis, between the *Rhône* and the Alps. The only city which Ptolemy (ii. 10. § 17) assigns to them is Vasio [Vasio]. On the north they bordered on the Allobroges, as we learn from Caesar's march (*B. G.* i. 10). Strabo places the Cavares west of the Vocontii, but he has not fixed the position of the Cavares well [Cavares]. The position of the Vocontii, and the extent of their country, are best shown by looking at the position of Vasio, which was in the south part of their territory, and of Dea [Dea], which is in the north part, and Lucus Augusti, which lies between them [Lucus Augusti].

In the Notitia of the Gallic Provinces we find both Civitas Deentium and Civitas Vasiensium or Vasionensium.

The Vocontii were between the *Isère* and the *Durance,* their southern limit being probably a little south of *Vaison.* D'Anville supposes that the Vocontii occupied the dioceses of *Vaison* and *Die,* and also a part of the country comprised in the diocese of *Gap* [Vapincum], and a part of the diocese of *Sisteron,* which borders on *Vaison.* Pliny (iii. 4) calls the Vocontii a "Civitas foederata," a people who had a "foedus" with Rome; and besides the chief places, Vasio and Lucus Augusti, he says they have nineteen small towns. Pliny (ii. 58) mentions that he had been in the country of the Vocontii, where he saw an aerolite which had lately fallen ("delatum" should perhaps be "delapsum"). The Vocontii occupied the eastern part of the department of *Drôme,* which is a mountainous country, being filled with the lower offsets of the Alps, and containing numerous valleys drained by mountain streams. Part of the country is fitted for pasture. Silius Ital. (iii. 466) has:—

> "Tum faciles campos, jam rura Vocontia carpit;"

for he makes Hannibal pass through the Vocontii to the Alps, as Livy (xxi. 31) does. [G. L.]

VODGORIACUM, in Gallia, is the first place in the Itins. on the road from Bagacum (*Bavai*) to Aduatuca (*Tongern*). This remarkable Roman road is called the *Chaussée de Brunehaut,* or the *Haut Chemin.* The distance of Vodgoriacum from Bagacum is xii., and the place is supposed to be *Voudrei* or *Vaudre.* (D'Anville, *Notice, &c.*) [G.L.]

VOGESUS. [Vosegus.]

VOLANA. [Samnium]

VOLANDUM, a castle in Armenia Major, lying a day's journey W. of Artaxata. (Tac. *Ann.* xiii. 39.) [T. H. D.]

VOLATERRAE (Οὐολατέῤῥαι: *Eth.* Volaterranus: *Volterra*), one of the most important and powerful of all the Etruscan cities. It was situated on a lofty hill, rising above the valley of the Cecina, about 5 miles N. of that river and 15 from the sea. Strabo has well described its remarkable situation on the summit of a hill, which required a steep ascent of 15 stadia from whatever side it was approached, while the summit itself presented a level surface of considerable extent, bounded on all sides by precipices, and crowned by the walls of the ancient city. (Strab. v. p. 223.) The hill on which it stands is, according to modern measurements, more than 1700 English feet in height above the sea, and completely overlooks all the surrounding heights, so that the position of the city is extremely commanding. It is indeed the most striking instance of the kind of position which the Etruscans seem to have generally preferred for their cities.

There can be no doubt of the great antiquity of Volaterrae, nor that it was, from the earliest period of Etruscan history with which we have any acquaintance, one of the twelve principal cities of the Etruscan confederation: this conclusion, to which we should be irresistibly led by the still existing proofs of its ancient greatness, is confirmed by the earliest notice of it that we find in history, where it appears as one of the five Etruscan cities which furnished support to the Latins in their war with Tarquinius Priscus. (Dionys. iii. 51.) But from this time we find no subsequent mention of Volaterrae in history till a much later period. Its remoteness from Rome will indeed sufficiently account for the fact that its name never figures in the long protracted wars of the Romans with the southern Etruscans; but even after the Roman arms had been carried into the heart of Etruria, and the cities of Perusia and Arretium took active part in the wars, we find no mention of Volaterrae. In B. C. 298, however, we are told that the Roman consul L. Scipio was encountered near Volaterrae by the combined forces of the Etruscans (Liv. x. 12), among which there is little doubt that those of the Volaterrans themselves were included, though this is not expressly stated. But we do not again find their name noticed in the extant accounts of these wars, and the terms on which they were finally reduced to submission by the Romans are unknown to us. We learn only that in common with most of the Etruscans they were received on the footing of dependent allies, and they appear among the "socii" who in the Second Punic War came forward to furnish supplies for the fleet of Scipio, B. C. 205. On that occasion the Volaterrans provided materials for shipbuilding as well as corn. (Liv. xxviii. 45.) From this time we hear no more of Volaterrae till the civil wars between Marius and Sulla, when the city espoused the cause of the former, and from its great natural strength became the last stronghold of the Marian party in Etruria, and indeed in Italy. It was besieged by Sulla himself long after every other city in Italy had submitted, and did not surrender till after a siege or rather blockade of two years' duration. (Strab. v. p. 223; Liv. *Epit.* lxxxix.; Cic. *pro Rosc. Amer.* 7, *pro Caec.* 7.) As a punishment for its obstinacy, its territory was confiscated by the conqueror; but it appears that it was never actually divided, and the citizens who had survived the calamities of the war remained in possession of their lands, as well as of the rights of Roman citizens, which had been doubtless conferred upon them in common with the other Etruscans by the Lex Julia in B. C. 89. (Cic. *pro Dom.* 30, *ad Fam.* xiii. 4, 5, *ad Att.* i. 19.) It appears that another attempt was made to dispossess them by an agrarian law in the consulship of Cicero, but this calamity was averted from them by the efforts of the great orator, to whom the citizens in consequence became warmly attached (Id. *ad Fam.* xiii. 4), and it appears probable that Caesar subsequently confirmed them in the possession both of their lands and municipal privileges. (*Ib.*)

Volaterrae, however, certainly received a colony under the Triumvirate (*Lib. Col.* p. 214), but does not appear to have retained the title of a Colonia: it is expressly included by Pliny among the municipal towns of Etruria. (Plin. iii. 5. s. 8; Ptol. iii. 1. § 48.) We find no mention of the name in history under the Roman Empire; but it is certain that the city continued to exist; and it appears again, after the fall of the Western Empire, as a place of importance during the wars of the Goths with Narses (Agath. *B. G.* i. 11). It continued to subsist throughout the middle ages, and still retains the title of a city and its episcopal see; though it has little more than 4000 inhabitants, and occupies only a small portion of the area of the ancient city. The latter is clearly marked out, having comprised the whole level surface of the hill, a very irregular space, above a mile and a half in length and more than 1000 yards in its greatest breadth: the whole circuit of the ancient walls is above three miles and a quarter. Very large portions of these walls are still visible, and these massive fortifications are incontestably the finest specimens of the kind now existing in Etruria: they resemble in their general style of construction those of Faesulae and Cortona, but are composed of a different material, a soft, arenaceous limestone, which composes the whole summit of the hill on which *Volterra* stands. This stone, however, like the *macigno* of *Fiesole* and *Cortona*, lends itself readily to the horizontal structure, and is wholly distinct from the hard Apennine limestone of which the polygonal walls of Cosa and other cities are composed. These walls may be traced, at intervals, all round the brow of the hill, following the broken and irregular outlines of its summit, and frequently taking advantage of projecting points to form bold salient angles and outworks. Two of the ancient gates are still preserved; of which the one called the *Porta all' Arco* still serves as the principal entrance to the city. It is of very massive construction, but regularly built, and surmounted by an arch of perfectly regular form and structure, adorned with three sculptured heads, projecting in relief from the keystone and two of the principal voussoirs. The antiquity of this arch has been a subject of much dispute among antiquarians; some maintaining it to be a specimen of genuine Etruscan architecture, others ascribing it to the Roman period. The arguments in favour of the latter view seem on the whole to preponderate; though there is no reason to doubt that the Etruscans were acquainted with the true principles of the construction of the arch. (Dennis's *Etruria*, vol. ii. pp. 146—150; Micali, *Antichi Popoli Italiani*, vol. iii. pp. 4, 5.*) The other gate, on the N. side of the Etruscan walls, now known as the *Porta di Diana* or *Portone*, is of similar plan and construction to the *Porta all' Arco;* but the arch is wanting.

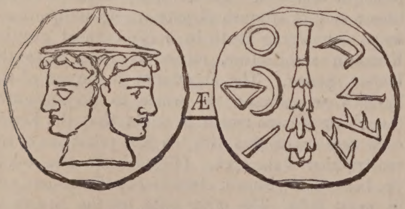
No other remains of ancient edifices are now extant on the site of Volaterrae, except some portions of Thermae, of Roman date and little interest; but the sepulchres which have been excavated on all sides of the city, but particularly on the N. slope of the hill, have yielded a rich harvest of Etruscan antiquities. Among these the most conspicuous are the sepulchral urns, or rather chests, for ashes, resembling small sarcophagi, and generally formed of alabaster, a material which is quarried in the immediate neighbourhood. Many of them are adorned with sculptures and bas-reliefs, some of them purely Etruscan in character, others taken from the Greek mythology, and there is no doubt that many of them belong to a period long after the fall of Etruscan independence. The inscriptions are for the most part merely sepulchral, and of little interest; but those of one family are remarkable as preserving to us the original Etruscan form (Ceicna) of the well-known family of the Caecinae, who figure frequently in Roman history [Caecina, *Biogr. Dict.*]. Indeed, the first of this family of whom we have any knowledge — the Aulus Caecina defended by Cicero in B.C. 69 — was himself a native of Volaterrae (Cic. *pro Caec.* 7). His son was the author of a work on the "Etruscan discipline," which is frequently referred to as a valuable source of information in regard to that department of antiquities (Cic. *ad Fam.* vi. 6; Plin. i. *Arg. Lib.* ii; Senec. *Nat. Quaest.* ii. 39).

---

* The gate itself is figured by Micali, pl. 7, 8; and by Abeken, *Mittel-Italien*, pl. 2, fig. 4.

There is no doubt that Volaterrae in the days of its independence possessed an extensive territory. Strabo distinctly tells us (v. p. 223) that its territory extended down to the sea-coast, where the town of Vada, or as it was called for distinction's sake, Vada Volaterrana, constituted its sea-port. It was not indeed a harbour or port in the strict sense of the word; but a mere roadstead, where the shoals, from which it derived its name, afforded a good anchorage and some shelter to shipping. Hence it was, in the Roman times, a frequented station for vessels proceeding along the coast of Etruria (Cic. *pro Quinct.* 6: Plin. iii. 5. s. 8; *Itin. Marit.* p. 501); and Rutilius, in particular, has left us an exact description of the locality (Rutil. *Itin.* i. 453—462). The site is still marked by a mediaeval tower on the coast, called *Torre di Vada.*

The coins of Volaterrae are numerous, and belong to the class called Aes Grave, from their large size and weight; but they are distinguished from all other Etruscan coins of this class by their having the name of the city in full; whence we learn that the Etruscan form of the name was Felathri, or Velathri, as on the one of which a figure is annexed. [E. H. B.]



COIN OF VOLATERRAE.

VOLCAE, a people of South Gallia, divided into Volcae Arecomici and Volcae Tectosages (Οὐόλκαι Ἀρικόμιοι, Οὐόλκαι Τεκτοσάγες, Ptol. ii. 10. §§ 9, 10; Οὐώλκαι Ἀρικόμισκοι, Strabo).

Ptolemy says that the Tectosages occupied the most western parts of the Narbonensis, and that these are their cities: Illiberis, Ruscino, Tolosa Colonia, Cessero, Carcaso, Baeterrae, and Narbo Colonia. Next to them and extending to the *Rhône* he places the Arecomici, or Aricomii, as the name is in Ptolemy's text; and he assigns to the Arecomii only Vindomagus [Vindomagus] and Nemausus Colonia (*Nismes*). These two nations occupied all the Provincia from the *Rhône* to its western limits; and if Livy is not mistaken (xxi. 26), at the time of Hannibal's invasion of Italy, the Volcae had also possessions east of the *Rhône.*

The Cebenna (*Cévennes*) formed a natural boundary between the Volcae Arecomici and the Gabali and Ruteni. As to the limits between the Tectosages and the Arecomici there is great difficulty; for while Ptolemy assigns Narbo to the Tectosages, Strabo (iv. p. 203) says that Narbo is the port of the Arecomici; and it is clear that he supposed the Arecomici to have possessed the greater part of the Provincia, which is west of the *Rhône*, and that he limited the country of the Tectosages to the part which is in the basin of the *Garonne.* He makes the Tectosages extend also northwards to the *Cévennes*, in the western prolongation of this range. The chief city of the Arecomici was Nemausus [Nemausus]; and the chief city of the Tectosages was Tolosa; and if Narbo belonged to the Arecomici, we must limit the Tolosates, as already observed, to the basin of the *Garonne.* [Narbo; Tolosa.]

There is some resemblance between the names Volcae and Belgae, and there is some little evidence that the Volcae were once named Belcae or Belgae. But it would be a hasty conclusion from this resemblance to assume a relationship or identity between these Volcae and the Belgae of the north of Gallia. There was a tradition that some of the Volcae Tectosages had once settled in Germany about the Hercynia Silva; and Caesar (*B.G.* vi. 24) affirms, but only from hearsay, that these Volcae in his time still maintained themselves in those parts of Germany, and that they had an honourable character and great military reputation. He adds that they lived like the other Germans. The Tectosages also were a part of the Gallic invaders who entered Macedonia and Greece, and finally fixed themselves in Asia Minor in Galatia [Galatia]. With the Roman conquest of Tolosa ended the fame of the Volcae Tectosages in Europe. [G. L.]

VOLCARUM STAGNA. [Stagna Volcarum.]

VOLCEIUM or VOLCENTUM (*Eth.* Volcentanus, Plin.; Volceianus, *Inscr.*: *Buccino*), a municipal town of Lucania, situated in the mountains W. of Potentia, a few miles from the valley of the Tanager. The name is variously written by ancient authors. Livy mentions the Volcentes as a people who in the Second Punic War revolted to Hannibal and received a Carthaginian garrison into their town, but, in B. C. 209, returned to the Roman alliance. (Liv. xxvii. 15.) There can be no doubt that these are the same people as the Volcentani of Pliny, who are enumerated by that author among the municipal communities of the interior of Lucania (Plin. iii. 10. s. 15), and it is certain that the Ulci or Volci of Ptolemy (Οὖλκοι, Ptol. iii. 1. § 70) refers to the same place, the correct name of which, as we learn from inscriptions, was Volceii or Vulceii, and the people Volceiani. (Mommsen, *Inscr. R. N.* pp. 15, 16.) The discovery of these inscriptions at *Buccino* leaves no doubt that this town occupies the site of the Lucanian city of Volceii. (Romanelli, vol. i. p. 422; Holsten. *Not. ad Cluver*, p. 290.) It appears to have been a considerable municipal town under the Roman Empire, and is one of the "Praefecturae Lucaniae" mentioned in the Liber Coloniarum (p. 209). [E. H. B.]

VOLCI (Οὐόλκοι, Ptol.: *Eth.* Volciens: Ru. near *Ponte della Badia*), a city of Etruria, situated in the plain on the right bank of the river Armina (*Fiora*), about 8 miles from its mouth. Very little mention is found of it in history. The name of the city is known from Ptolemy as well as from Pliny, who enumerates, among the municipal towns of Etruria, the "Volcentini cognomine Etrusci," an appellation evidently used to distinguish them from the people of Volcentum in Lucania. (Plin. iii. 5. s. 8; Ptol. iii. 1. § 49.) The name is quoted also by Stephanus of Byzantium, who writes it Ὄλκιον, from Polybius. (Steph. B. *s. v.*) But the only indication that they had once been a powerful people, and their city a place of importance, is found in the Fasti Capitolini, which record a triumph in the year B. C. 280 over the Volsinienses and Volcientes (*Fast. Capit.* ad ann. 473). This was one of the last struggles of the Etruscans for independence, and it was doubtless in consequence of the spirit shown on this occasion by the Volcientes that the Romans shortly afterwards (in B. C. 273) established a colony at Cosa, in their territory. (Vell. Pat. i. 14; Plin. iii. 5. s. 8.) It is expressly stated on this occasion by Pliny, that Cosa was a dependency of Volci (Cosa Volcientium), a statement which has been ignored by those modern writers who have represented Cosa as an independent and important Etruscan city. But while this is very doubtful in the case of Cosa, the evidence, though scanty, is conclusive that Volci was such; and there is even reason to suppose, from a monument discovered at *Cervetri*, that it was at one time reckoned one of the twelve chief cities of the Etruscan League. (*Ann. d. Inst. Arch.* 1842, pp. 37—40.)

But notwithstanding these obscure hints of its greatness, the name of Volci was almost forgotten, and its site unknown, or at least regarded as uncertain, when the first discovery of its necropolis in 1828 led to subsequent researches on the spot, which have brought to light a number of painted vases greatly exceeding that which has been discovered on any other Etruscan site. The unprecedented number, beauty, and variety of these works of art have given a celebrity in modern times to the name of Volci which is probably as much in excess of its real importance in ancient times as in the somewhat parallel case of Pompeii. It is impossible here to enter into any detailed account of the result of these excavations. It is calculated that above 6000 tombs in all have been opened, and the contents have been of the most varied kind, belonging to different periods and ages, and varying from the coarsest and rudest pottery to the finest painted vases. The same tombs have also yielded very numerous objects and works of art in bronze, as well as delicate works in gold and jewellery; and after making every allowance for the circumstance that the cemetery at Volci appears to have enjoyed the rare advantage of remaining undisturbed through ages, it affords incontestable proof that it must have belonged to a wealthy and populous city. The necropolis and its contents are fully described by Mr. Dennis (*Etruria*, vol. i. pp. 397—427). The results of the excavations, in regard to the painted vases discovered, are given by Gerhard in his *Rapporto su i Vasi Volcenti*, published in the *Annali dell' Instituto* for 1831. It is remarkable that only one of the thousands of tombs opened was adorned with paintings similar to those found at Tarquinii, and, in this instance, they are obviously of late date.

The site of the city itself has been carefully explored since these discoveries have attracted so much interest to the spot. It stood on the right bank of the river Armina, just below the point where that stream is spanned by a noble bridge, now called the *Ponte della Badia*, undoubtedly a work of Roman times, though the foundations *may be* Etruscan. The few remaining relics of antiquity still visible on the site of the city, which occupied a plateau of about 2 miles in circumference, are also of Roman date, and mostly belong to a late period. Inscriptions also have been discovered, which prove it to have continued to exist under the Roman Empire; and the series of coins found there shows that it was still in existence, at least as late as the fourth century of the Christian era. In the middle ages it seems to have totally disappeared, though the plain in which it stood continued to be known as the *Pian di Voci*, whence Holstenius correctly inferred that this must have been the site of Volci. (Holsten. *Not. ad Cluver.* p. 40.) The necropolis was, for the most part, on the other side of the river; and it is here that the excavations have been carried on most diligently. The site of Volci (which is now wholly uninhabited) is about 8 miles from *Montalto*, a small town at the mouth of the *Fiora*, where that river was crossed by the Via Aurelia. (Dennis, *l. c.*) [E. H. B.]

VOLCIANI, a people in Hispania Tarraconensis. (Liv. xxi. 19.) [T. H. D.]

VOLENOS, a fort in Rhaetia, in the territory of Tridentum, which was destroyed by the Franks (Paul. Diac. *Longob.* iii. 31), and is generally identified with the modern village of *Volano* on the *Adige*, south of *Caliano*. [L. S.]

VOLIBA (Οὐόλιϐα, Ptol. ii. 3. § 30), a town of the Dumnonii in Britannia Romana, near the W. extremity of the island. Most probably *Falmouth*. (Camden, p. 16.) [T. H. D.]

VOLOBRIGA (Οὐολόϐριγα, Ptol. ii. 6. § 41), a town in Gallaecia in Hispania Tarraconensis belonging to the Nemetatae. [T. H. D.]

VOLOGATIS, in Gallia Narbonensis, is placed by the Jerusalem Itin. after Lucus (*Luc*), on the road to Vapincum (*Gap*) past Mons Saleucus. The distance from Lucus is ix.; and D'Anville supposes that Vologatis may be a place named *Lèches*, but the distance ix. is too much. Others fix the place at *Beaurière;* and others propose *Lethes* or *Beaumont*. All this is uncertain. [G. L.]

VOLOGE'SIA (Οὐολγεσία, Ptol. v. 20. § 6), a city built by and named after Vologeses, one of the Arsacidan kings of Parthia, in the immediate neighbourhood of Seleuceia upon the Tigris. It is called by Pliny, Vologesocerta (vi. 26. s. 30), the latter portion of the name implying the "city of." The extensive ruins, still existing, on both sides of the Tigris, are probably those of the two great cities of Seleuceia and Vologesia. [V.]

VOLSAS (Οὐόλσας κόλπος, Ptol. ii. 3. § 1), a bay on the W. coast of Britain, probably *Loch Brey*. (Horsley, p. 378.) [T. H. D.]

VOLSCI (Οὐόλσκοι, Strab.; Οὐολοῦσκοι, Dionys.), an ancient people of Central Italy, who bear a prominent part in early Roman history. Their territory was comprised within the limits of Latium as that name was employed at a late period, and under the Roman Empire; but there is no doubt that the Volscians were originally a distinct people from the Latins, with whom, indeed, they were almost always on terms of hostility. On the other hand they appear as constantly in alliance with the Aequi; and there is little doubt that these two nations were kindred races, though always distinguished from each another as two separate peoples. We have no statement in any ancient writer as to the ethnic origin or affinities of the Volscians, and are left almost wholly to conjecture on the subject. But the remains of the language, few and scanty as they are, afford nevertheless the safest foundation on which to rest our theories; and these lead us to regard the Volscians as a branch of the same family with the Umbrians and Oscans, who formed the aboriginal population of the mountain tracts of Central Italy. It would appear, indeed, as if they were more closely connected with the Umbrians than either the Sabines and their Sabellian offshoots, or the Oscans properly so called; it is probable, therefore, that the Volscians had separated at a still earlier period from the main stock of the Umbrian race. (Mommsen, *Unter-Ital. Dialekt.* pp. 319—326; Schwegler, *Röm. Gesch.* vol. i. p. 178.) The only notice of their language that occurs in Roman authors, also points to it distinctly as different from Oscan (Titinius, *ap. Fest.* v. *Obscum*, p. 189), though the difference was undoubtedly that of two cognate dialects, not of two radically distinct languages.

When the Volscians first appear in Roman history, it is as a powerful and warlike nation, who were already established in the possession of the greater part at least of the territory which they subsequently occupied. Their exact limits are not, indeed, to be determined with accuracy; and it is probable that they underwent considerable fluctuations during their long wars with the Latins and Romans. But there seems no doubt that from a very early period they held the whole of the detached mountain group S. of the Tolerus (*Sacco*), termed by modern geographers the *Monti Lepini*, together with the valley of the Liris, and the mountain district of Arpinum, Sora, and Atina. Besides this they were certainly masters at one time of the plains extending from the Volscian Apennines to the sea, including the Pomptine Marshes and the fertile tract that borders on them. This tract they had, according to Cato, wrested from the Aborigines, who were its earliest possessors (Cato *ap. Priscian.* v. p. 668).

The first mention of the Volscians in Roman history is in the reign of the second Tarquin, when they appear as a numerous and warlike people. It is clear that it was the great extension of the Roman power under its last king (which must undoubtedly be admitted as a historical fact), and the supremacy which he had assumed over the Latin League, that first brought him into collision with the Volscians. According to the received history he marched into their country and took their capital city, Suessa Pometia, by assault. (Liv. i. 53; Dionys. iv. 50; Cic. *de Rep.* ii. 24.) The tradition that it was the spoils there obtained which enabled him to build the Capitol at Rome, sufficiently proves the belief in the great power and wealth of the Volscians at this early period; and the foundation of the two colonies of Circeii and Signia, both of which are expressly ascribed to Tarquin, was doubtless intended to secure his recent conquests, and to impose a permanent check on the extension of the Volscian power. It is evident, moreover, from the first treaty with Carthage, preserved to us by Polybius (iii. 22), that the important cities of Antium and Tarracina, as well as Circeii, were at this time subject to Tarquin, and could not, therefore, have been in the hands of the Volscians.

But the dissolution of the power of Tarquin, and the loss of the supremacy of Rome over the Latins, seem to have allowed the Volscians to regain their former superiority; and though the chronology of the earliest years of the Republic is hopelessly confused, we seem to discern clearly that it was the increasing pressure of the Volscians and their allies the Aequians upon the Latins that caused the latter people to conclude the celebrated treaty with Rome under Sp. Cassius, B. C. 493, which became the foundation of the permanent relation between the two states. (Liv. ii. 33; Dionys. vi. 95.) According to the received annals, the wars with the Volscians had already recommenced prior to this period; but almost immediately afterwards occurs the great and sudden development of their power which is represented in a legendary form in the history of Coriolanus. Whatever may have been the origin of that legend, and however impossible it is to receive it as historically true, there is no doubt that it has a historical foundation in the fact that many of the Latin cities at this period fell successively into the power of the Volscians and their allies the Aequians; and the two lines of advance, so singularly mixed up in the received narrative of the war, which represents all these conquests as made in a single campaign, appear to represent distinctly the two separate series of conquests by which the two nations would respectively press on towards Rome. (Niebuhr, vol. ii. pp. 95, 259; Schwegler, *Röm. Gesch.* vol. ii. pp. 274, 275.)*

It is impossible here to give more than a very brief outline of the long series of wars with the Volscians which occupy so prominent a place in the early history of Rome for a period of nearly two centuries. Little historical value can be attached to the details of those wars as they were preserved by the annalists who were copied by Livy and Dionysius; and it belongs to the historian of Rome to endeavour to dispel their confusion and reconcile their discrepancies. But in a general point of view they may be divided (as remarked by Niebuhr), into four periods. The first of these would comprise the wars down to B. C. 459, a few years preceding the Decemvirate, including the conquests ascribed to Coriolanus, and would seem to have been the period when the Volscians were at the height of their power. The second extends from B. C. 459 to 431, when the dictator A. Postumius Tubertus is represented as gaining a victory over the allied forces of the Volscians and Aequians (Liv. iv. 26—29), which appears to have been really an important success, and proved in a manner the turning point in the long struggle between the two nations. From this time till the capture of Rome by the Gauls (B. C. 390) the wars with the Volscians and Aequians assume a new character; the tide had turned, and we find the Romans and their allies recovering one after another the towns which had fallen into the hands of their enemies. Thus Labicum and Bola were regained in B. C. 418 and 414, and Ferentinum, a Hernican city, but which had been taken by the Volscians, was again wrested from them in B. C. 413. (Liv. iv. 47, 49, 51.) The frontier fortresses of Verrugo and Carventum were indeed taken and retaken; but the capture of Anxur or Tarracina in B. C. 399, which from that period continued constantly in the hands of the Romans, must have been a severe blow to the power of the Volscians, and may be considered as marking an era in their decline. Throughout this period it is remarkable that Antium, one of the most powerful cities of the Volscians, continued to be on peaceful terms with Rome; the war was carried on almost exclusively upon the NE. frontier of the Volscians, where they were supported by the Aequians, and Ecetra was the city which appears to have taken the lead in it.

---

* It is worthy of notice that Antium, which at the commencement of the Republic appears as a Latin city, or at least as subject to the supremacy of Rome, is found at the very outbreak of these wars already in the hands of the Volscians.

The capture of Rome by the Gauls marks the commencement of the fourth period of the Volscian Wars. It is probable that their Aequian allies suffered severely from the same invasion of the barbarians that had so nearly proved the destruction of Rome [Aequi], and the Volscians who adjoined their frontier, may have shared in the same disaster. But on the other hand, Antium, which was evidently at this period a powerful city, suddenly broke off its friendly relations with Rome; and during a period of nearly 13 years (B. C. 386—374), we find the Volscians engaged in almost perpetual hostilities with Rome, in which the Antiates uniformly took the lead. The seat of war was now transferred from the Aequian frontier to the southern foot of the Alban hills: and the towns of Velitrae and Satricum were taken and retaken by the Volscians and Romans. Soon after the conclusion of peace with the Antiates we hear for the first time of Privernum, as engaging in hostilities with Rome, B. C. 358, and it is remarkable that it comes forward single-handed. Indeed, if there had ever been any political league or bond of union among the Volscian cities, it would seem to have been by this time completely broken up. The Antiates again appear repeatedly in arms; and when at length the general defection of the Latins and Campanians broke out in B. C. 340, they were among the first to join the enemies of Rome, and laid waste the whole sea-coast of Latium, almost to the walls of Ostia. But they shared in the defeat of the Latin armies, both at Pedum and on the Astura: Antium itself was taken, and received a colony of Romans within its walls, but at the same time the citizens themselves were admitted to the Roman franchise. (Liv. viii. 14.) The people of Fundi and Formiae, both of them probably Volscian cities, received the Roman franchise at the same time, and Tarracina was soon after occupied with a Roman colony. The Privernates alone ventured once more to provoke the hostility of the Romans in B. C. 327, but were severely punished, and their city was taken by the consul C. Plautius. Nevertheless, the inhabitants were admitted to the Roman Civitas; at first, indeed, without the right of suffrage, but they soon afterwards obtained the full franchise, and were enrolled in the Ufentine tribe. The greater part of the Volscians, however, was included in the Pomptine tribe.

Of the fate of the cities that were situated on the borders of the valley of the Trerus, or in that of the Liris, we have scarcely any information; but there is reason to suppose that while the Antiates and their neighbours were engaged in hostilities with Rome, the Volscians of the interior were on their side fully occupied with opposing the advance of the Samnites. Nor were their efforts in all cases successful. We know that both Arpinum and Fregellae had been wrested from the Volscians by the Samnites, before the Romans made their appearance in the contest (Liv. viii. 23, ix. 44), and it is probable that the other cities of the Volscians readily took shelter under the protection of Rome, for security against their common enemy. It seems certain, at all events, that before the close of the Second Samnite War (B. C. 304), the whole of the Volscian people had submitted to the authority of Rome, and been admitted to the privileges of Roman citizens.

From this time their name disappears from history. Their territory was comprised under the general appellation of Latium, and the Volscian people were merged in the great mass of the Roman citizens. (Strab. v. pp. 228, 231; Plin. iii. 5. s. 9; Cic. *pro Balb.* 13.) But a rude and simple mountain-people would be naturally tenacious of their customs and traditions; and it is clear, from the manner in which Juvenal incidentally alludes to it, that even under the Roman Empire, the name of the Volscians was by no means extinct or forgotten in the portion of Central Italy which was still occupied by their descendants. (Juv. *Sat.* viii. 245.)

The physical geography of the land of the Volscians will be found described in the article Latium. Of the peculiar characters of the people themselves, or of any national customs or institutions that distinguished them from their Latin neighbours, we know absolutely nothing. Their history is a record only of the long struggle which they maintained against the Roman power, and of the steps which led to their ultimate subjugation. This is the only memory that has been transmitted to us, of a people that was for so long a period the most formidable rival of the Roman Republic. [E. H. B.]

VOLSINIENSIS LACUS (ἡ περὶ Οὐολσινίους λίμνη, Strab. v. p. 226: *Lago di Bolsena*), a considerable lake of Etruria, scarcely inferior in size to that of Trasimene. It took its name from the town of Volsinii, which stood on its NE. shore; but it was also sometimes called Lacus Tarquiniensis, as its western side adjoined the territory of Tarquinii. (Plin. ii. 96.) Notwithstanding its great size, it is probable, from the nature of the surrounding hills and rocks, that it is the crater of an extinct volcano (Dennis, *Etruria*, vol. i. p. 514). In this lake the river Marta has its source. It abounded in fish, and its sedgy shores harboured large quantities of water-fowl, with which articles it supplied the Roman markets. (Strab. *l. c.*; Colum. viii. 16.) It contained two islands, of which, as well as of the lake itself, wonderful stories were related by the ancients. They were remarked to be ever changing their forms (Plin. *l. c.*), and on one occasion during the Second Punic War its waters are said to have flowed with blood. (Liv. xxvii. 23.) The shores of the lake were noted for their quarries. (Plin. xxxvi. 22. a. 49.) In a castle on one of the islands queen Amalasontha was murdered by order of her husband Theodatus. (Procop. *B. Goth.* i. c. 4, p. 23, ed. Bonn.) [T. H. D.]

VOLSINII or VULSINII (Οὐολσίνιοι, Strab. v. p. 226; Οὐολσίνιον, Ptol. iii. 1. § 50: *Bolsena*), an ancient city of Etruria, situated on the shore of a lake of the same name (Lacus Volsiniensis), and on the Via Clodia, between Clusium and Forum Cassii. (*Itin. Ant.* p. 286; *Tab. Peut.*) But in treating of Volsinii we must distinguish between the Etruscan and the Roman city. We know that the ancient town lay on a steep height (Zonaras, *Ann.* viii. 7; cf. Aristot. *Mir. Ausc.* 96); while *Bolsena*, the representative of the Roman Volsini, is situated in the plain. There is considerable difference of opinion as to where this height should be sought. Abeken (*Mittelitalien*, p. 34, seq.) looks for it at *Monte Fiascone*, at the southern extremity of the lake; whilst Müller (*Etrusker*, i. p. 451) seeks it at *Orvieto*, and adduces the name of that place=Urbs Vetus, "the old city," as an argument in favour of his view; but Mr. Dennis (*Etruria*, vol. i. p. 508) is of opinion that there is no reason to believe that it was so far from the Roman town, and that it lay on the summit of the hill, above the amphitheatre at *Bolsena*, at a spot called *Il Piazzano.* He adduces in support of this hypothesis the existence of a good deal of broken pottery there, and of a few caves in the cliffs below.

Volsinii appears to have been one of the most powerful cities of Etruria, and was doubtless one of the 12 which formed the Etruscan confederation, as Volsinii is designated by Livy (x. 37) and Valerius Maximus (ix. 1. extern. 2) as one of the "capita Etruriae." It is described by Juvenal (iii. 191) as seated among well-wooded hills.

We do not hear of Volsinii in history till after the fall of Veii. It is possible that the success of the Roman arms may have excited the alarm and jealousy of the Volsinienses, as their situation might render them the next victims of Roman ambition. At all events, the Volsinienses, in conjunction with the Salpinates, taking advantage of a famine and pestilence which had desolated Rome, made incursions into the Roman territory in B.C. 391. But they were easily beaten: 8000 of them were made prisoners; and they were glad to purchase a twenty years' truce on condition of restoring the booty they had taken, and furnishing the pay of the Roman army for a twelvemonth. (Liv. v. 31, 32.)

We do not again hear of Volsinii till the year B.C. 310, when, in common with the rest of the Etruscan cities, except Arretium, they took part in the siege of Sutrium, a city in alliance with Rome. (Liv. ix. 32.) This war was terminated by the defeat of the Etruscans at lake Vadimo, the first fatal shock to their power. (*Ib.* 39.) Three years afterwards we find the consul P. Decius Mus capturing several of the Volsinian fortresses. (*Ib.* 41.) In 295, L. Postumius Megellus ravaged their territory and defeated them under the walls of their own city, slaying 2800 of them; in consequence of which they, together with Perusia and Arretium, were glad to purchase a forty years' peace by the payment of a heavy fine. (Id. x. 37.) Not more than fourteen years, however, had elapsed, when, with their allies the Vulcientes, they again took up arms against Rome. But this attempt ended apparently in their final subjugation in B.C. 280. (Liv. *Ep.* xi.; *Fast. Cons.*) Pliny (xxxiv. 7. s. 16) retails an absurd story, taken from a Greek writer called Metrodorus Scepsius, that the object of the Romans in capturing Volsinii was to make themselves masters of 2000 statues which it contained. The story, however, suffices to show that the Volsinians had attained to a great pitch of wealth, luxury, and art. This is confirmed by Valerius Maximus (*l. c.*), who also adds that this luxury was the cause of their ruin, by making them so indolent and effeminate that they at length suffered the management of their commonwealth to be usurped by slaves. From this degrading tyranny they were rescued by the Romans. (Flor. i. 21; Zonaras, *l. c.*; A. Victor, *Vir. Illustr.* 36; Oros. iv. 5.)

The Romans, when they took Volsinii, razed the town, and compelled the inhabitants, as we have already intimated, to migrate to another spot. (Zonaras, *l. c.*) This second, or Roman, Volsinii continued to exist under the Empire. It was the birthplace of Sejanus, the minister and favourite of Tiberius. (Tac. *Ann.* iv. 1, vi. 8.) Juvenal (x. 74) alludes to this circumstance when he considers the fortunes of Sejanus as dependent on the favour of Nursia, or Norsia, an Etruscan goddess much worshipped at Volsinii, into whose temple there, as in that of Jupiter Capitolinus at Rome, a nail was annually driven to mark the years. (Liv. vii. 3; Tertull. *Apol.* 24.) According to Pliny, Volsinii was the scene of some supernatural occurrences. He records (ii. 54) that lightning was drawn down from heaven by king Porsenna to destroy a monster called Volta that was ravaging its territory. Even the commonplace invention of hand-mills, ascribed to this city, is embellished with the traditional prodigy that some of them turned of themselves! (Id. xxxvi. 18. s. 29.) Indeed, in the whole intercourse of the Romans with the Etruscans, we see the ignorant wonder excited by a cultivated people in their semi-barbarous conquerors.

From what has been already said it may be inferred that we should look in vain for any traces of the Etruscan Volsinii. Of the Roman city, however, some remains are still extant at *Bolsena.* The most remarkable are those of a temple near the Florence gate, vulgarly called *Tempio di Norzia.* But the remains are of Roman work; and the real temple of that goddess most probably stood in the Etruscan city. The amphitheatre is small and a complete ruin. Besides these there are the remains of some baths, cippi, sepulchral tablets, a sarcophagus with reliefs representing the triumph of Bacchus, &c.

For the coins of Volsinii, see Müller, *Etrusker*, vol. i. pp. 324, 333: for its history, &c., Adami, *Storia di Volseno*; Dennis, *Etruria*, vol. i.; Abeken, *Mittelitalien.* [T. H. D.]

VOLTUMNAE FANUM [Fanum Voltumnae].

VOLUBILIANI. [Volubilis.]

VOLUBILIS (Οὐολουϐιλίς, Ptol. iv. 1. § 14), a town of Mauretania Tingitana, seated on the river Subur, and on the road from Tocolosida to Tingis, from the former of which places it was only 4 miles distant. (*Itin. Ant.* p. 23.) It lay 35 miles SE. from Banasa, and the same distance from the coast. (Plin. v. 1. s. 1; Mela, iii. 10.) It was a Roman colony (*Itin. Ant. l. c.*) and a place of some importance. Ptolemy calls the inhabitants of the surrounding district, Volubiliani (Οὐολουϐιλιανοί, iv. 1. § 10). In the time of Leo Africanus (p. 279, ed. Lorsbach) it was a deserted town between *Fez* and *Mequinez*, bearing the name of *Valili* or *Gualili*, the walls of which were 6 Italian miles in circumference. That position is now occupied by the town of *Zanitat-Mula-Driss*, on mount *Zarhon.* At some distance to the NW. are the splendid ruins of *Kassr Faraun* (Pharaoh's castle), with Roman inscriptions; but to what ancient city they belong is unknown. (Cf. Mannert, x. pt. ii. p. 486; Graberg di Hemsö, p. 28; Wimmer, *Gemälde von Afrika*, i. p. 439.) [T. H. D.]

VOLUCE (probably the Οὐέλουκα of Ptol. ii. 6. § 56), a town of the Pelendones in Hispania Tarraconensis, on the road from Asturica to Caesaraugusta, and 25 miles W. of Numantia. (*Itin. Ant.* p. 442.) Variously identified with *Velucha* (*Velache*), *Valecha*, and *Calatañazor.* [T. H. D.]

VOLUNTII (Οὐολούντιοι, Ptol. ii. 2. § 9), a people on the E. coast of Hibernia. [T. H. D.]

VOLUSTA'NA. [Cambunii Montes.]

VOMANUS (*Vomano*), a river of Picenum, which rises in the lofty group of the Apennines now known as the *Gran Sasso d'Italia*, and flows into the Adriatic, after passing within a few miles to the N. of the city of Adria (*Atri*). Its name is mentioned by Pliny only (iii. 13. § 18). [E. H. B.]

VORDENSES, in Gallia Narbonensis, an ethnic name which occurs in an inscription found at *Apt*, the site of Apta Julia [Apta Julia]. The inscription states that the "Vordenses pagani" dedicate this monument to their patronus, who is designated "IIIIvir" of the Colonia Apta. The place is supposed to be *Gordes*, which is contiguous to the diocese of *Apt*, and in that of *Cavaillon*. The change of *Vord* into *Gord* is easily explained. [Vapincum.] (D'Anville, *Notice, &c*) [G. L.]

VOREDA, a town of the Brigantes in Britannia Romana, on the road from Cataracton to Luguvallium. (*Itin. Ant.* p. 467.) It is variously identified with *Old Penrith*, *Whelp Castle*, and *Coal Hills*. By the Geogr. Rav. (v. 31) it is called Bereda. [T. H. D.]

VORGA'NIUM (Οὐοργάνιον), in Gallia Lugdunensis, the capital of the Osismii [Osismii], a Celtic people in the north-west part of *Bretagne* (Ptol. ii. 8. § 5). This seems to be the same place as the Vorginum of the Table; and it appears on a route which leads from the capital of the Namnetes through the capital of the Veneti, and ends on the coast at Gesocribate, or Gesobrivate, as some would write it. Between the capital of the Veneti and Vorginum is Sulis, supposed to be at the junction of the *Suel* and the *Blavet* [Sulis]. From Sulis to Vorginum the distance is marked xxiiii., and this brings us to a place named *Karhez* (D'Anville). But all this is very uncertain. Others fix Vorginum at a place named *Guemené* [G. L.]

VORO'GIUM, in Gallia, is placed in the table on a road from Augustonemetum (*Clermont Ferrand*) through Aquae Calidae (*Vichy*) to Ariolica (*Avrilli*). The distance is marked viii. from Aquae Calidae, and xiiii. from Vorogium to Ariolica. There is a place named *Vouroux*, which is the same name as Vorogium. *Vouroux* is near the small town of *Varennes*, and somewhat nearer to the banks of the Allier. The direct distance from the springs of *Vichy* to *Varennes* is somewhat less than the Itin. distance of viii. Gallic leagues, but the 8 leagues are not more than we may assign to the distance from *Vichy* to *Varennes* along the river. But the Itin. distance from Vorogium to Ariolica is somewhat too large compared with the real distance. (D'Anville, *Notice, &c.*) [G. L.]

VOSALIA. [Vosava.]

VOSAVA or VOSAVIA, in North Gallia, is placed by the Table on the Roman road along the west bank of the Rhine, and between Bontobrice or Baudobrica (*Boppart*) [Baudobrica] and Bingium (*Bingen*). It stands half-way between these places and at the distance of viiii. Vosava is *Oberwesel* on the Rhine, north of *Bingen;* and it is almost certain, as D'Anville suggests, that the name is erroneously written in the Table, and that it should be Vosalia. [G. L.]

VO'SEGUS (*Vogesen*, *Vasgau*, *Vosges*). The form Vosegus has better authority than Vogesus (Schneider's *Caesar*, *B. G.* iv. 10); and the modern name also is in favour of the form Vosegus. Lucan is sometimes quoted as authority for the form Vogesus:

> "Castraque quae Vogesi curvam super ardua rupem
> Pugnaces pictis cohibebant Lingonas armis."
> (*Pharsal.* i. 397.)

The name is Βοσῆκον in the Greek version of the Commentaries.

Caesar says that the Mosa (*Maas*) rises in the Vosegus, by which he means that the hills in which the *Maas* rises belong to the *Vosges*. But he says no more of this range. The battle with Ariovistus, B. C. 58, was fought between the southern extremity of the *Vosges* and the *Rhine*, but Caesar (*B. G.* i. 43, 48) gives no name to the range under which Ariovistus encamped in the great plain between the *Vosges* and the *Rhine*. D'Anville observes that an inscription in honour of the god Vosegus was found at *Berg-Zabern* on the confines of *Alsace* and the *Palatinate*, which proves that the name Vosegus extended as far as that place. It seems likely that the name was given to the whole range now called *Vosges*, which may be considered as extending from the depression in which is formed the canal of the *Rhône* and *Rhine*, between *Béfort* and *Altkirch*, to the bend of the *Rhine* between *Mainz* and *Bingen*, a distance of above 170 miles. The range of the *Vosges* is parallel to the Rhine. The hilly country of the *Faucilles* in which the *Maas* rises is west of the range to which the name of *Vosges* is now given. The *Vosges* are partly in France, and partly in Rhenish *Bavaria* and *Hesse Darmstadt*.

The territory of the Sequani originally extended to the Rhine, and the southern part of the *Vosges* was therefore included in their limits. North of the Sequani and west of the *Vosges* were the Leuci and Mediomatrici; and east of the *Vosges* and between the *Vosges* and the *Rhine* were the Rauraci, Triboci, Nemetes, Vangiones, and Caracates.

In the Table the Silva Vosagus is marked as a long forest on the west side of the Rhine. Pliny (xvi. 39) also speaks of the range of the Vosegus as containing timber. [G. L.]

UR, a castle of the Persians mentioned by Ammianus Marcellinus (xxv. 8), in his account of the war between Julian and the Persians. It must have been situated in Mesopotamia, at no great distance from Hatra (*Al-Hathr*). It has been generally supposed that Ur is the same place as that mentioned in Genesis (xi. 28); but the recent researches of Colonel Rawlinson have demonstrated that the Ur whence Abraham started was situated in the S. part of Babylonia, at a place now called *Muqeher*. (*Journ. Roy. As. Soc.* 1855.) [V.]

URANO'POLIS (Οὐρανόπολις), a town in the peninsula Acte of Chalcidice in Macedonia, of which we know nothing, except that it was founded by Alexarchus, the brother of Cassander, king of Macedonia (Athen. iii. p. 98; Plin. iv. 10. s. 17). As Pliny does not mention Sane in his list of the towns of Acte, it has been conjectured by Leake that Uranopolis occupied the site of Sane. (*Northern Greece*, vol. iii. p. 149.)

URANO'POLIS (Οὐρανόπολις), a town of Pisidia, in the district of Cabalia, to the north-west of Termessus, and south-east of Isionda. (Ptol. v. 5. § 6.) [L. S.]

URBA, a town of Gallia, in the territory of the Helvetii. It is placed in the Antonine Itin. between Lacus Lausonius and Ariolica [Ariolica], xviii. from Lacus Lausonius and xxiiii. from Ariolica. Urba is *Orbe* in the Swiss Canton *Waadt* or *Pays de Vaud*, on the road from the Lake of *Neuf-*

châtel to the *Lake of Geneva*, and on a hill nearly surrounded by the river *Orbe*. [G. L.]

URBANA COLONIA, mentioned by Pliny only (xiv. 6. s. 8), was a colony founded by Sulla in a part of the territory of Capua, adjoining the Falernus ager. From its name it would appear probable that it was a colony of citizens from Rome itself, who were settled by the dictator in this fertile district. It is doubtful whether there ever was a town of the name, as no allusion is found to it as such, and the district itself was reunited to that of Capua before the time of Pliny. (Plin. *l. c.*; Zumpt, *de Col.* p. 252.) [E. H. B.]

URBATE, a place in Lower Pannonia, on the road from Siscia to Sirmium (*It. Ant.* p. 268; *Tab. Peut.*); its exact site is unknown. [L. S.]

URBIACA, a town of the Celtiberi, in Hispania Tarraconensis. (*Itin. Ant.* p. 447.) Probably the Urbicua of Livy (xl. 16). Variously identified with *Albaroches*, *Checa*, and *Molina*. [T. H. D.]

URBIGENUS PAGUS. [Helvetii, Vol. I. p. 1041.]

URBINUM (Οὐρϐῖνον), was the name of two cities or municipal towns of Umbria, situated within a short distance of each other, which were distinguished by the epithets Hortense and Metaurense. (Plin. iii. 14. s. 19.)

1. Urbinum Hortense (*Urbino*), apparently the more considerable of the two, and for that reason frequently called simply Urbinum, was situated on a hill between the valleys of the Metaurus and the Pisaurus (*Foglia*), rather more than 20 miles from the Adriatic. It is mentioned by Pliny among the municipal towns of Umbria, and is incidentally noticed by Tacitus as the place where Fabius Valens, the general of Vitellius, was put to death, in A.D. 69, after he had fallen into the hands of the generals of Vespasian. (Tac. *Hist.* iii. 62.) Its municipal rank is confirmed by numerous inscriptions, which prove it to have been a town of some importance. (Orell. *Inscr.* 3714; Gruter, *Inscr.* p. 387. 8, p. 392. 1, &c.) Procopius also notices it during the Gothic Wars, and correctly describes it as situated on a steep and lofty hill; it was at that time a strong fortress, but was besieged and taken by Belisarius in A. D. 538. (Procop. *B. G.* ii. 19.) From this time it seems to have continued to be a place of consideration, and in the middle ages became the seat of government of a race of independent dukes. It is still a considerable city, and one of the capitals of the delegation of *Urbino* and *Pesaro*, but has no remains of antiquity, except the inscriptions above noticed.

2. Urbinum Metaurense (*Urbania*), was situated, as its name imports, in the valley of the Metaurus, on the right bank of the river, about 6 miles below *S. Angelo in Vado* (Tifernum Metaurense), and 9 from *Urbino*. Its municipal rank is attested by an inscription, in which the inhabitants are termed Urvinates Mataurenses, as well as by Pliny (Gruter, *Inscr.* p. 463. 4; Plin. iii. 14. s. 19); but it seems never to have been a place of much importance. In the middle ages it fell into complete decay, and was replaced by a village called *Castel Durante*, which, in 1625, was enlarged and raised to the dignity of a city by Urban VIII., from whom it derives its present name of *Urbania*. (Cluver. *Ital.* p. 620; Rampoldi, *Diz. Top.* vol. iii. p. 1278.) [E. H. B.]

URBS SALVIA (Οὔρϐα Σαλουΐα, Ptol. iii. 1. § 52: *Eth.* Urbis Salviensis or Urbisalviensis: *Urbisaglia*), a town of Picenum, mentioned by Pliny among the municipal towns of that district. (Plin. iii. 13. s. 18.) It was situated on a hill above the valley of the Flusor (*Chienti*), about 2 miles from the right bank of that river, and 7 miles E. of Tolentinum. The testimony of Pliny to its municipal rank is confirmed by the Liber Coloniarum, which mentions the "ager Urbis Salviensis," as well as by an inscription (*Lib. Col.* p. 226; Orell. *Inscr.* 1870); and it seems to have been a flourishing town until it was taken and destroyed by Alaric, a calamity from which it never recovered, so that it still lay in ruins in the time of Procopius. (Procop. *B. G.* ii. 16.) Dante also notices it in the 13th century as in complete ruins (*Par.* xvi. 73); but the name has always survived, and is still attached to the modern *Urbisaglia*, which is, however, a mere village, dependent on *Macerata*. The Itineraries give two lines of crossroads which passed through Urbs Salvia, the one from Septempeda (*S. Severino*) to Firmum (*Fermo*), the other from Auximum through Ricina and Urbs Salvia to Asculum. (*Itin. Ant.* p. 316; *Tab. Peut.*) [E. H. B.]

URBS VETUS (*Orvieto*), a city of Etruria mentioned by Paulus Diaconus (*Hist. Lang.* iv. 33) together with Balneum Regis (*Bagnaréa*) in the same neighbourhood. No mention of either name occurs in any writer before the fall of the Roman Empire, but it is probable that the Urbiventum (Οὐρϐίϐεντον) of Procopius, which figures in the Gothic Wars as a fortress of some importance, is the same place as the Urbs Vetus of P. Diaconus. (Procop. *B. G.* ii. 20.) There is no doubt that the modern name of *Orvieto* is derived from Urbs Vetus; but the latter is evidently an appellation given in late times, and it is doubtful what was the original name of the city thus designated. Niebuhr supposes it to be Salpinum, noticed by Livy in B. C. 389 (Liv. v. 31; Niebuhr, vol. ii. p. 493) [Salpinum], while Italian antiquaries in general identify it with Herbanum. [Herbanum.] But both suggestions are mere conjectures. [E. H. B.]

URCESA (Οὔρκεσα or Οὔρκαισα, Ptol. ii. 6 § 58), a town of the Celtiberi in Hispania Tarraconensis. According to some, the modern *Requena*, whilst others identify it with *Veles* or *Orgas*. (Coins in Sestini p. 212.) [T. H. D.]

URCI (Plin. iii. 3. s. 4; Οὔρκη, Ptol. ii. 6. § 14), a town of the Bastetani in Hispania Tarraconensis, on the borders of Baetica, or according to another boundary line, which makes the latter reach as far as Barca, in Baetica itself, on a bay named after it, and on the road from Castulo to Malaca. (Mela, ii. 6, where the editions incorrectly have Urgi and Virgi; *Itin. Ant.* p. 404.) Variously identified with *Abruceña*, *Puerto de Aguilas*, and *Alsoduz*. Ukert, however (ii. pt. i. p. 352), would seek it in the neighbourhood of *Almeria*. [T. H. D.]

URCITANUS SINUS, a small bay either on the S. coast of Hispania Tarraconensis or in Baetica, named after the town of Urci. It was separated by the Promontorium Charidemi from the Sinus Massienus on the E. (Mela, ii. 6.) Now the bay of *Almeria*. [T. H. D.]

URGAO, a town in Hispania Baetica, on the road from Corduba to Castulo (*Itin. Ant.* p. 403), with the surname of Alba. (Plin. iii. 1. s. 3.) In the editions of the Itinerary it is called Urcao and Vircao; and according to inscriptions in Gruter (ccxlix. 3, ccxliii. 6), it was a municipium, with the name of Albense Urgavonense. Most probably *Arjona*. (Cf. Morales, *Ant.* p. 74; Florez, *Esp. Sagr.* xii. p. 379.) [T. H. D.]

URGO. [Gorgona.]

URIA. [Hyrium.]

U'RIA LACUS. [Aetolia, p. 64, a.]

URIAS SINUS. [Apulia.]

URISIUM (*It. Hier.* p. 569), a town in Thrace, on the road between Tarpodizus and Bergule: according to Reichard it corresponds to the modern *Alpiuli* or *Alpuli*; but according to Lapie, to *Kirk-Kilissia.* [J. R.]

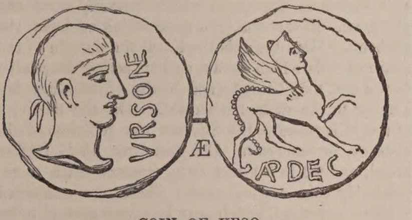
URIUM (Οὔριον, Ptol. ii. 4. § 12). 1. A town in Hispania Baetica, on the borders of Lusitania; according to Reichard, now *Torre del Oro.*

2. A river in Hispania Baetica, between the Baetis and the Anas, which entered the sea near the town just named. (Plin. iii. 1. s. 3.) Now the *Tinto.* [T. H. D.]

URPANUS, a small river of Pannonia, a tributary of the Savus, is now called the *Verbasz.* (Plin. iii. 28; *Tab. Peut.*, where it is called Urbas.) [L. S.]

URSI PROMONTORIUM. [Sardinia.]

URSO (Οὔρσων, Strab. iii. p. 141), a strong mountain town in Hispania Baetica, the last refuge of the Pompeians. It was a Roman colony, with the surname of Genua Urbanorum, and was under the jurisdiction of Astigi. (Plin. iii. 1. s 3; Hirt. *B. H.* 26, 41, 65; Appian, *B. H.* 16.) It is the modern *Osuña*, where some inscriptions and ruins have been found. (Cf. Muratori, p. 1095; Florez, *Esp. Sagr.* x. p. 77.) For coins of Urso, see Florez, *Med.* ii. p. 624, iii. p. 130; Mionnet, i. p. 28, *Suppl.* i. p. 47; Sestini, p. 94. [T. H. D.]



COIN OF URSO.

URSOLAE or URSOLI, a place in Gallia Narbonensis, fixed by the Antonine Itin. on the road between Valentia (*Valence*) and Vienna (*Vienne*), xxii. from Valentia, and xxvi. from Vienna. This agrees pretty well with the whole distance between *Valence* and *Vienne.* There are no means of determining the site of Ursoli except the distances; and D'Anville fixes on *S. Valier*, a place on the right bank of the *Galaure* near the place where it enters the Rhone. [G. L.]

URUNCI, a place in Gallia between the *Vosges* and the Rhine. It occurs twice in the Antonine Itin., and in both cases the road from Urunci runs to Mons Brisiacus. [Mons Brisiacus.] In one route it is placed between Larga (*Largitzen*) and Mons Brisiacus, xviii. from Larga, and xxiiii. from Brisiacus. This route is from south to north-east. The other route is from Arialbinnum, supposed to be *Binning* near *Basle*, to Mons Brisiacus, from south to north, and Urunci is xxiii. M. P. or 15 leugae from Mons Brisiacus. D'Anville supposes that Urunci may be a place named *Rucsen* or *Ricsen*, on the line of the road from Larga to Mons Brisiacus or *Breisach.* [G. L.]

USAR, the most easterly river of Mauretania. (Plin. v. 2. s. 1.) It seems to be the river called Σίσαρ by Ptolemy (iv. 2. § 10), and is probably the *Ajebby*, which falls into the gulf of *Bugie.* [T. H. D.]

USARGALA (Οὐσάργαλα, Ptol. iv. 6. § 7, &c.), a very extensive mountain chain in the country of the Garamantae on the N. border of Libya Interior, and S. of Numidia and Mauretania, stretching in a NW. direction as far as Atlas. It is in this mountain that the river Bagradas has its source. [T. H. D.]

U'SBIUM (Οὔσϐιον), a town mentioned by Ptolemy (ii. 11. § 30) in the south-east of Germania, probably in the territory of the Marcomanni, seems to be identical with the modern *Ispern*, on a rivulet of the same name. [L. S.]

US'CANA, the chief town of the Penestae, a people of Illyricum, which contained 10,000 inhabitants at the time of the Roman war with Perseus. At the commencement of this war it appears to have been in the hands of Perseus, and the first attempt of the Roman commander, App. Claudius, to obtain possession of the place proved unsuccessful, B. C. 170. (Liv. xliii. 10.) It would seem, however, to have been afterwards taken by the Romans, since we read that Perseus in the following year surprised Uscana, marching thither in three days from Stubera. (Liv. xliii. 17, 18.) Shortly afterwards L. Coelius, the Roman commander in Illyricum, made an unsuccessful attack upon Uscana. (*Ib.* 21.) The site of this town is uncertain.

U'SCENUM (Οὔσκενον, or Οὔσκαινον, Ptol. iii. 7. § 2), a town of the Jazyges Metanastae. [T.H.D.]

USCUDAMA, a town belonging to the Bessi, near Mount Haemus, which M. Lucullus took by assault. (Eutr. vi. 10.) [J. R.]

USELLIS (Οὔσελλις, Ptol.: *Usellus*), a city of Sardinia, situated in the interior of the island, about 16 miles from the *Gulf of Oristano* on the W. coast, and the same distance S. of Forum Trajani. Its name is not found in the Itineraries, and the only author who mentions it is Ptolemy (iii. 3. § 2), who erroneously places it on the W. coast of the island: but the existing ruins, together with the name of *Usellus*, still borne by a village on the site, leave no doubt of its true situation. It is about 3 miles NE. of the modern town of *Ales.* Ptolemy styles it a colonia, and this is confirmed by an inscription in which it bears the title of "Colonia Julia Augusta." It would hence appear probable that the colony must have been founded under Augustus, though Pliny tells us distinctly that Turris Libyssonis was the only colony existing in Sardinia in his time. (De la Marmora, *Voy. en Sardaigne*, vol. ii. pp. 367, 466.) [E. H. B.]

USILLA (Οὐσίλλα, Ptol. iv. 3. § 10), a place in Byzacium in Africa Proper. It is the Usula of the *Itin. Ant.* (p. 59), lying between Thysdrus and Thenae. Variously identified with *Inchilla* or *Sidi Makelouf*, and *Inshillah.* [T. H. D.]

USI'PETES or USI'PI (Οὐσίπεται, Οὔσιπαι), a German tribe, mostly mentioned in conjunction with the Tencteri, with whom they for a long time shared the same fate, until in the end, having crossed the lower Rhine, they were treacherously attacked and defeated by Julius Caesar. (Caes. *B. G.* iv. 4, &c.; Appian, *de Reb. Gall.* 18; comp. Tencteri.) After this calamity, the Usipetes returned across the Rhine, and were received by the Sigambri, who assigned to them the district on the northern bank of the Luppia, which had previously been inhabited by the Chamavi and Tubantes, and in which we henceforth find the Usipetes as late as the time of Tacitus. (*Ann.* xiii. 55, *Hist.* iv. 37, *Germ.* 32; Dion Cass. liv. 32, foll.) Afterwards the Usipetes are met with farther south, opposing Germanicus on his return from the country of the Marsi. (Tac. *Ann.* i. 50, 51; comp. Dion Cass. xxxix. 47; Plut. *Caes.* 22.) In Strabo (vii. p. 292) they appear under the name of Οὔσιποι, and Ptolemy (ii. 11. § 10) mentions a tribe of the name of Οὐϊσποί, whom some believe to be the same as the Usipetes; but if this be correct, it would follow that the Usipetes migrated still farther south, as Ptolemy places these Vispi on the upper Rhine; but as no other authority places them so far south, the question is altogether uncertain. About the year A. D. 70, the Usipetes took part in the siege of Moguntiacum (Tac. *Ann.* xiii. 54), and in A. D. 83 a detachment of them is mentioned as serving in the Roman army in Britain. (Id. *Agric.* 27.) Afterwards they disappear from history. (Comp. Zeuss, *Die Deutschen*, p. 88; Wilhelm, *Germanien*, p. 139.) [L. S.]

USPE, a town of the Siraci in Sarmatia, lying E. of the Tanais. It lay on a height, and was fortified with a ditch and walls; but the latter were composed only of mud confined in hurdles. (Tac. *Ann.* xii. 16.) [T. H. D.]

USSADIUM (Οὐσσάδιον, or Οὐσάδιον ἄκρον, Ptol. iv. 1. §§ 4 and 12), a promontory of Mauretania Tingitana, lying SW. of the promontory of Hercules. Now *Cape Osem.* [T. H. D.]

USTICA. [OSTEODES.]

USUERNA or USUERVA. [HOSUERBAS.]

UTHINA (Οὔθινα, Ptol. iv. 3. § 34), a town of Zeugitana, in Africa Propria, between Tabraca and the river Bagradas. (Cf. Id. viii. 14. § 11; Plin. v. 4. s. 4.) Erroneously written Uthica in Tab. Peut. Now *Udine.* [T. H. D.]

UTICA (ἡ Ἰτύκη, Polyb. i. 75; Ptol. iv. 3. § 6; Οὐτίκη, Dion Cass. xli. 41; *Eth.* Uticensis; Liv. xxix. 35; Caes. *B. C.* ii. 36), a colony founded by the Tyrians on the N. coast of Zeugitana in Africa. (Vell. Pat. i. 2; Mela, i. 7; Justin. xviii. 4, &c.) The date of its foundation is said to have been a few years after that of Gades, and 287 years before that of Carthage. (Vell. Pat. *l. c.*; Aristot. *Mirab. Ausc.* 146; Gesenius, *Monum. Script. Linguaeque Phoenic.* p. 291; Sil. Ital. *Pun.* iii. 241, sqq. &c.) Its name signified in Phoenician, "ancient," or "noble" (עתיקה, Gesen. *ib.* p. 420, and *Thes. Ling. Heb.* p. 1085). Utica was situated near the mouth of the river Bagradas, or rather that of its western arm, in the Bay of Carthage, and not far from the promontory of Apollo, which forms the western boundary of the bay. (Strab. xvii. p. 832; Liv. *l. c.*; Ptol. *l. c.*; Appian, *B. C.* ii. 44, seq.; Procop. *B. V.* ii. 15, &c.) It lay 27 miles NW. of Carthage. (*Itin. Ant.* p. 22.) The distance is given as 60 stadia in Appian (*Pun.* 75), which is probably an error for 160; and as a day's sail by sea. (Scylax, *Geogr. Min.* i. p. 50, ed. Huds.) Both Utica and Tunes might be descried from Carthage. (Strab. *l. c.*; Polyb. i. 73; Liv. xxx. 9.) Utica possessed a good harbour, or rather harbours, made by art, with excellent anchorage and numerous landing places. (Appian, *l. c.*; cf. Barth, *Wanderungen durch die Küstenländer des Mittelmeers*, pp. 111, 125.) On the land side it was protected by steep hills, which, together with the sea and its artificial defences, which were carefully kept up, rendered it a very strong place. (Liv. xxix. 35; App. *Pun.* 16, 30, 75; Diod. xx. 54; Plut. *Cat. Min.* 58.) The surrounding country was exceedingly fertile and well cultivated, and produced abundance of corn, of which there was a great export trade to Rome. (Liv. xxv. 31.) The hills behind the town, as well as the district near the present *Porto Farina*, contained rich veins of various metals; and the coast was celebrated for producing vast quantities of salt of a very peculiar quality. (Plin. xxxi. 7. s. 39; Caes. *B. C.* ii. 37; Polyb. xii. 3, seq.; Diod. xx. 8, &c.) Among the buildings of the town, we hear of a temple of Jupiter (Plut. *Cat. Min.* 5) and of one of Apollo, with its planks of Numidian cedar near twelve centuries old (Plin. xvi. 40. s. 79); of a forum of Trajan, and a theatre outside the city. (Tiro Prosper, *ap. Morcelli, Afr. Christ.* iii. p. 40; Caes. *B. C.* ii. 25.) The tomb and statue of Cato on the sea-shore were extant in the time of Plutarch (*Ib.* 79). Shaw (*Travels*, vol. i. p. 160, seq.) has the merit of having first pointed out the true situation of this celebrated city, the most important in N. Africa after Carthage. Before the time of Shaw, it was sought sometimes at *Biserta*, sometimes at *Porto Farina*; but that learned traveller fixed it near the little miserable *Duar*, which has a holy tomb called *Boo-shatter;* and with this view many writers have agreed (Falbe, *Recherches sur l'Emplacement de Carthage*, p. 66; Barth, *Wanderungen, &c.* p. 109; Semilasso, pp. 39, 46; Ritter, *Afrika*, p. 913, &c.) Since the Roman times the muddy stream of the Bagradas has deposited at its mouth a delta of from 3 to 4 miles in extent, so that the innermost recess of the Bay of Carthage, on which ancient Utica was situated, as well as the eastern arm of the river itself, have been converted into a broad morass, in which traces are still visible of the quays which formerly lined the shore, and of the northern mole which enclosed the harbour. More towards the E., at the margin of the chain of hills which at an earlier period descended to the sea, may be discerned blocks of masonry belonging to the ancient town wall. On the declivity of the hills towards the SE. are the remains of six cisterns, or reservoirs, 136 feet long, 15 to 19 feet broad, and 20 to 30 feet deep, covered with a remarkably thin arched roof. These are connected with an aqueduct, which may be traced several miles from *Boo-shatter*, in the direction of the hills; but its most remarkable remains are a treble row of arches by which it was carried over a ravine. These reservoirs may probably have served to furnish water for a naumachia in the neighbouring amphitheatre, which is hollowed out of the hills, and is capable of containing about 20,000 persons. The ancient site of the city is covered with ruins. Near its centre rises the highest summit of the chain of hills on which stood the citadel and, probably, also the ancient temple of Apollo. The ruins of other temples and castles have been discovered, as well as the site of the senate house (Plut. *Cat. Min.* 67), which has been thought to be determined by the excavation of a number of statues. These are now preserved in the museum at *Leyden.*

In the course of time, as is usual with such connections, Utica became severed from the mother-city, and first appears in history as independent of it. In the first commercial treaty between Rome and Carthage, in the year 509 B. C., Utica was probably included in it among the allies of the Carthaginians (Polyb. iii. 22); in the second, in B. C. 348, it is expressly named (*ib.* 24; Diodor. xvi. 69, who however confounds the two treaties), as well as in the alliance concluded by Hannibal with Philip of Macedon in the Second Punic War, B. C. 215 (Polyb. viii. 9). Subsequently, however, Utica appears to have thrown off her dependence upon, or perhaps we should rather call it her alliance with, Carthage, and, with other cities of N. Africa, to have joined the Sicilian Agathocles, the opponent of Carthage; to have afterwards revolted from that conqueror, but to have been again reduced to obedience (Diod. xx. 17, 54: cf. Polyb. i. 82). In the First Punic War, Utica remained faithful to Carthage; afterwards it joined the Libyans, but was compelled to submit by the victorious Carthaginians (Polyb. *ib.* 88: Diod. Fr. xxv.). In the Second Punic War also we find it in firm alliance with Carthage, to whose fleets the excellent harbour of Utica was very serviceable. But this exposed it to many attacks from the Romans, whose freebooting excursions were frequently directed against it from Lilybaeum, as well as to a more regular, but fruitless siege by Scipio himself (Liv. xxv. 31, xxvii. 5, xviii. 4, xxix. 35, xxx. 3, &c. ; Polyb. xiv. 2 ; Appian, *Punic.* 16, 25, 30). In the third war, however, the situation of Carthage being now hopeless, the Uticenses indulged their ancient grudge against that city, and made their submission to Rome by a separate embassy (Polyb. xxxvi. 1 ; Appian, *Pun.* 75, 110, 113). This step greatly increased the material prosperity of Utica. After the destruction of Carthage, the Romans presented Utica with the fertile district lying between that city and Hippo Diarrhytus. It became the chief town of the province, the residence of the Roman governor, the principal emporium for the Roman commerce, and the port of debarcation for the Roman armaments destined to act in the interior of Africa. Owing to this intimate connection with Rome, the name of Utica appears very frequently in the later history of the republic, as in the accounts of the Jugurthine War, of the war carried on by Pompey at the head of Sulla's faction, against the Marian party under Domitius and his ally the Numidian king Iarbas, and in the struggle between Caesar and the Pompeians, with their ally Juba. It is unnecessary to quote the numerous passages in which the name of Utica occurs in relation to these events. In the last of these wars, Utica was the scene of the celebrated death of the younger Cato, so often related or adverted to by the ancients (Plut. *Cat. Min.* 58, seq.: Dion Cass. xliii. 10, sqq.; Val. Max. iii. 2. § 14; Cic. *pro Ligar.* 1, &c. ; cf. *Dict. of Biogr.* Vol. I. p. 649). Augustus presented the Uticenses with the Roman *civitas*, partly as a reward for the inclination which they had manifested for the party of his uncle, and partly also to indemnify them for the rebuilding of Carthage (Dion Cass. xlix. 16 ; cf. Sext. Rufus, *Brev.* 4). We know nothing more of Utica till the time of Hadrian, who visited N. Africa in his extensive travels, and at whose desire the city changed its ancient constitution for that of a Roman colony (Spartian. *Hadr.* 13; Gell. *N. Att.* xvi. 13). Thus it appears in the *Tab. Peut.* with the appellation of Colonia, as well as in an inscription preserved in the museum of Leyden (*Col. Jul. Ael. Hadr. Utic.*, ap. Janssen, *Mus. Lugd. Batav. Inscr. Gr. et Lat.*). Septimius Severus, an African by birth, endowed it, as well as Carthage and his birthplace Leptis Magna, with the Jus Italicum. We find the bishops of Utica frequently mentioned in the Christian period from the time of the great Synod under Cyprian of Carthage in 256, down to 684, when a bishop of Utica appeared in the Council of Toledo. The city is said to have witnessed the martyrdom of 300 persons at one time (cf. Morcelli, *Afr. Christ.* i. p. 362, ii. p. 150 ; Munter, *Primod. Eccl. Afr.* p. 32 ; Augustin, *c. Donat.* vii. 8). Utica probably fell with Carthage, into the hands of the Vandals under Genseric in 439. Subsequently it was recovered by the Byzantine emperors, but in the reign of the Chalif Abdelmalek was conquered by the Arabians under Hassan ; and though it appears to have been again recovered by John the prefect or patrician, it finally sank under the power of the Saracens during the reign of the same Chalif, and on its second capture was destroyed (cf. Papencordt, *die Vandal Herrschaft in Afr.* p. 72, sq., 151, sq. ; Weil, *Gesch. der Chalifer*, i. p. 473, sqq. ; Gibbon, *Decl. and Fall*, vi. 350, sqq. ed. Smith). The remains of its marbles and columns were carried away in the preceding century, to serve as materials for the great mosque of Tunis (Semilasso, p. 43.)

Several coins of Utica are extant bearing the heads of Tiberius or Livia ; a testimony perhaps of the gratitude of the city for the rights bestowed upon it by Augustus (cf. Mionnet, *Med. Ant.* vi. p. 589 ; Supp. viii. p. 208). [T. H. D.]

UTIDAVA (Οὐτίδαυα, Ptol. viii. 8. § 7), a town in Dacia, E. of the Aluta. Identified with the ruins at *Kosmin*, near the confluence of the *Kutschur* and the *Pruth* (cf. Ukert, iii. pt. ii. p. 620.) [T. H. D.]

UTII (Οὔτιοι), one of the nations belonging to the fourteenth satrapy of the Persian empire (Herod. iii. 93), which was armed in the same manner as the Pactyes (Id. vii. 68), and, according to Bobrik's conjecture, perhaps dwelt in Pactyica. (*Geog. des Herod.* p. 181.) [J. R.]

UTIS or VITIS (*Montone*), a river of Gallia Cisalpina, which rises in the Apennines, flows under the walls of *Forli* (Forum Livii), and subsequently by the city of Ravenna, and enters the Adriatic about 5 miles from that city. At the present day it joins the *Ronco* (the Bedesis of Pliny), before reaching the latter city, but in ancient times it probably discharged its waters by a separate channel into the lagunes which at that time surrounded Ravenna. The name is written Vitis by Pliny (iii. 14. s. 19), but it is probable that Utis or Utens is the more correct form, which is found in Livy. According to that author it at one time formed the boundary between the Boian and Senonian Gauls. (Liv. v. 35.) [E. H. B.]

UTTARIS, a town of the Callaici in the NW. of Hispania Tarraconensis, on the road from Lucus Augusti to Asturica, between Pons Neviae and Bergidum. (*Itin. Ant.* pp. 425, 430.) Variously identified with *Cerredo*, *Doncos*, and *Castro de la Ventosa.* [T. H. D.]

UTUS, an affluent of the Danube in Moesia. The Utus had its sources in Mount Haemus, and formed the E. boundary of Dacia Ripensis (Plin. iii. 26. s. 29). Now the *Vid.* [T. H. D.]

UTUS (Οὔτως, Procop. *de Aed.* iv. 1), a town of Moesia Inferior, a little to the S. of the confluence of the like-named river with the Danube, and between Oescus and Securisca (*Itin. Ant.* p. 221). Variously identified with *Staroselitzi*, *Hutalidsch*, and a place near *Brestovatz.* [T. H. D.]

VULCANI FORUM. [Puteoli.]

VULCANIAE INSULAE. [Aeoliae Insulae.]

VULCHALO is mentioned by Cicero (*pro Fonteio*, 9) as a place in the west part of Gallia Narbonensis, but nothing more is known of it. [G. L.]

VULGIENTES. [Apta Julia.]

VULSINII. [Volsinii.]

VULTUR MONS (*Monte Voltore*), one of the most celebrated mountains of Southern Italy, situated on the confines of Apulia, Lucania, and the country of the Hirpini. It commences about 5 miles to the S. of the modern city of *Melfi*, and nearly due W. of *Venosa* (Venusia), and attains an elevation of 4433 feet above the level of the sea. Its regular conical form and isolated position, as well as the crater-like basin near its summit, at once mark it as of volcanic origin; and this is confirmed by the nature of the rocks of which it is composed. Hence it cannot be considered as properly belonging to the range of the Apennines, from which it is separated by a tract of hilly country, forming as it were the base from which the detached cone of *Monte Voltore* rises. No ancient author alludes to the volcanic character of Mount Vultur; but the mountain itself is noticed, in a well known passage, by Horace, who must have been very familiar with its aspect, as it is a prominent object in the view from his native city of Venusia. (*Carm.* iii. 4. 9—16.) He there terms it "Vultur Apulus," though he adds, singularly enough, that he was without the limits of Apulia ("altricis extra limen Apuliae") when he was wandering in its woods. This can only be explained by the circumstance that the mountain stood (as above stated) on the confines of three provinces. Lucan also incidentally notices Mt. Vultur as one of the mountains that directly fronted the plains of Apulia. (Lucan, ix. 185.)

The physical and geological characters of Mount Vultur are noticed by Romanelli (vol. ii. p. 233), and more fully by Daubeny (*Description of Volcanoes*, chap. 11). [E. H. B.]

VULTURNUM (Οὐουλτοῦρνον: *Castel Volturno*), a town of Campania, situated on the sea-coast at the mouth of the river of the same name, and on its S. bank. There is no trace of the existence of any town on the site previous to the Second Punic War, when the Romans constructed a fortress (castellum) at the mouth of the river with the object of securing their possession of it, and of establishing a magazine of corn for the use of the army that was besieging Capua. (Liv. xxv. 20, 22.) It is probable that this continued to exist and gradually grew into a town; but in B. C. 194, a colony of Roman citizens was established there, at the same time with Liternum and Puteoli. (Id. xxxiv. 45; Varr. *L. L.* v. 5.) The number of colonists was in each case but small, and Vulturnum does not appear to have ever risen into a place of much importance. But it is noticed by Livy as existing as a town in his time ("ad Vulturni ostium, ubi nunc urbs est," xxv. 20), and is mentioned by all the geographers. (Strab. v. p. 238; Plin. iii. 5. s. 9; Mel. ii. 4. § 9; Ptol. iii. 1. § 6.) We learn also that it received a fresh colony under Augustus (*Lib. Colon.* p. 239), and retained its colonial rank down to a late period. It became an episcopal see before the close of the Roman Empire, and appears to have continued to subsist down to the 9th century, when it was destroyed by the Saracens. In the 17th century a new fortress was built nearly on the ancient site, which is called *Castel Volturno* or *Castell' a Mare di Volturno*. But from the remains of the ancient city still visible it appears that this occupied a site somewhat nearer the sea than the modern fortress. Several inscriptions have been found on the spot, which attest the colonial rank of Vulturnum as late as the age of the Antonines. (Mommsen, *I. R. N.* 3535—3539.) [E. H. B.]

VULTURNUS (Οὐουλτοῦρνος: *Volturno*), the most considerable river of Campania, which has its sources in the Apennines of Samnium, about 5 miles S. of Aufidena, flows within a few miles of Aesernia on its left bank, and of Venafrum on its right, thence pursues a SE. course for about 35 miles, till it receives the waters of the Calor (*Calore*), after which it turns abruptly to the WSW., passes under the walls of Casilinum (*Capoua*), and finally discharges itself into the Tyrrhenian sea about 20 miles below that city. Its mouth was marked in ancient times by the town of the same name (Vulturnum), the site of which is still occupied by the modern fortress of *Castel Volturno* [VULTURNUM]. (Strab. v. pp. 238, 249; Plin. iii. 5. s. 9; Mel. ii. 4. § 9.) The Vulturnus is a deep and rapid, but turbid stream, to which character we find many allusions in the Roman poets. (Virg. *Aen.* vii. 729; Ovid. *Met.* xv. 714; Lucan. ii. 423; Claudian. *Paneg. Prob. et Ol.* 256; Sil. Ital. viii. 530.) A bridge was thrown over it close to its mouth by Domitian, when he constructed the Via Domitia that led from Sinuessa direct to Cumae. (Stat. *Silv.* iv. 3. 67, &c.) From the important position that the Vulturnus occupies in Campania, the fertile plains of which it traverses in their whole extent from the foot of the Apennines to the sea, its name is frequently mentioned in history, especially during the wars of the Romans with the Campanians and Samnites, and again during the Second Punic War. (Liv. viii. 11, x. 20, 31, xxii. 14, &c.; Polyb. iii. 92.) Previous to the construction of the bridge above mentioned (the remains of which are still visible near the modern *Castel Volturno*), there was no bridge over it below Casilinum, where it was crossed by the Via Appia. It appears to have been in ancient times navigable for small vessels at least as far as that city. (Liv. xxvi. 9; Stat. *Silv.* iv. 3. 77.)

Its only considerable tributary is the CALOR, which brings with it the waters of several other streams, of which the most important are the TAMARUS and SABATUS. These combined streams bring down to the Vulturnus almost the whole waters of the land of the Hirpini; and hence the Calor is at the point of junction nearly equal in magnitude to the Vulturnus itself. [E. H. B.]

VUNGUS, VICUS, in North Gallia, is placed by the Antonine Itin. on the road from Durocortorum (*Reims*) to Augusta Trevirorum (*Trier*). Vungus is between Durocortorum and Epoissum (*Iptsch*, *Ivois*), or Epusum [EPOISSUM], and marked xxii. leugae from each place. The direction of this road from *Reims* is to the passage of the *Maas* or *Meuse* at *Mouson;* and before it reaches *Ivois* it brings us to a place named *Vonc*, near the river *Aisne*, a little above *Attigni*. This is a good example, and there are many in France, of the old Gallic names continuing unchanged. Flodoard, in his history of *Reims*, speaks of "Municipium Vongum," and the "Pagus Vongensis circa Axonnae ripas." The Axonna is the *Aisne*. The Roman road may be traced in several places between *Reims* and *Vonc;* and there is an indication of this road in the place named *Vau d'Etré* (de strata), at the passage of the river *Suippe*. [G. L.]

UXACONA, a town belonging apparently to the Cornavii in Britannia Romana, on the road from Deva to Londinium, and between Urioconium and Pennocrucium. Camden (p. 653) and others identify it with *Okenyate*, a village in *Shropshire ;* Horsley (p. 419) and others with *Sheriff Hales*. [T. H. D.]

UXAMA (Οὔξαμα Ἀργέλλαι, Ptol. ii. 6. § 56), a town of the Arevaci in Hispania Tarraconensis, on the road from Asturica to Caesaraugusta, 50 miles W. of Numantia, and in the neighbourhood of Clunia (*Itin. Ant.* p. 441), where, however, the more recent editions read Vasama. (Plin. iii. 3. s. 4; Flor. iii. 22; Sil. Ital. iii. 384.) It is called Uxuma in the Geogr. Rav. (iv. 43); and according to Ukert (ii. pt. i. p. 455), is probably the 'Αξ*είνιον* of Appian (vi. 47). Now *Osma*. [T. H. D.]

UXAMABARCA (*Οὐξαμαϐάρκα*, Ptol. ii. 6. § 53), a town of the Autrigones in Hispania Tarraconensis. (Murat. *Inscr.* p. 1095. 8.) Ukert (ii. pt. i. p. 446) identifies it with *Osma* in *Biscaya*. [T. H. D.]

UXANTIS INSULA, for so the name should be read in the Maritime Itin., is Pliny's Axantos (iv. 30), an island off the Atlantic coast of Gallia. Uxantis is *Ouessant*, or *Ushant*, as the English often write it, a small island belonging to the department of *Finistère*, and nearly in the latitude of *Brest*. [G. L.]

UXELLA (Οὔξελλα, Ptol. ii. 3. § 10), called by the Geogr. Rav. (v. 30) Uxeli, a city of the Dumnonii in Britannia Romana. Camden (p. 18) identifies it with the little town of *Lostwithiel* in *Cornwall*; whilst Horsley (p. 378) and others take it to be *Exeter*. [T. H. D.]

UXELLODU'NUM, in Gallia. In B. C. 51 Drappes a Senon and Lucterius a Cadurcan, who had given the Romans much trouble, being pursued by C. Caninius Rebilus, one of Caesar's legates, took refuge in Uxellodunum, a town of the Cadurci (*B. G.* viii. 32—44): Uxellodunum was in a position naturally strong, protected by rocks so steep that an armed man could hardly climb up, even if no resistance were made. A deep valley surrounded nearly the whole elevation on which the town stood, and a river flowed at the bottom of the valley. The interval where the river did not flow round the steep sides of this natural fortress was only 300 feet wide, and along this part ran the town wall. Close to the wall was a large spring, which supplied the town during the siege, for the inhabitants could not get down the rocks to the river for water without risk of their lives from the Roman missiles. Caninius began his blockade of Uxellodunum by making three camps on very high ground, with the intention of gradually drawing a vallum from each camp, and surrounding the place. On the river side his camps were of course separated from the town by the deep valley in which the river flowed; he may have planted two camps here and one on the land side of Uxellodunum.

The townsmen remembering what had happened at Alesia the year before, sent out Lucterius and Drappes to bring supplies into the place. Lucterius and Drappes took all the fighting men for this purpose except 2000, and they collected a large quantity of corn; but as Lucterius was attempting to carry it into the town by night, the Romans surprised him, and cut his men to pieces. The other part of the force which had gone out was with Drappes about 12 miles off. Caninius sent his cavalry and light German troops against Drappes to surprise him, and he followed with a legion. His success was most complete. Drappes was taken prisoner and his force destroyed or captured. Caninius was now enabled to go on with his circumvallation without fear of interruption from without, and C. Fabius arriving the next day with his troops undertook the blockade of part of the town.

Caesar hearing the news about Uxellodunum and resolving to check all further risings in Gallia by one signal example more, hurried to the place with all his cavalry, ordering C. Calenus and two legions to follow him by regular marches. He found the place shut in, but it was well supplied with provisions, as the deserters told him; and there remained nothing to do but to cut off the townsmen from the water. By his archers and slingers, and by his engines for discharging missiles (tormenta) placed opposite those parts of the town where the descent to the river was easiest, he attempted to prevent the enemy from coming down to the river to get water. His next operation was to cut them off from the spring, and this was the great operation of the siege on which depended the capture of the town. Caesar dealt with his enemies as a doctor with a disease — he cut off the supplies. (Frontinus, *Strat.* iv. 7. 1.) He moved his vineae towards that part of the town where the spring lay under the wall, and this was the isthmus which connected the hill fort with the open country. He also began to construct mounds of earth, while the townsmen from the higher ground annoyed the Romans with missiles. Still the Romans pushed on their vineae and their earthworks, and at the same time began to form mines (cuniculi) to reach the source of water and draw it off. A mound of earth 9 feet high was constructed, and a tower of ten stories was placed upon it, not high enough to be on a level with the top of the wall, but high enough to command the summit level of the spring. Thus they prevented the enemy from reaching the spring, and a great number of cattle, horses, and men died of thirst. The townsmen now tumbled down blazing barrels filled with fat, pitch, and chips of wood, and began a vigorous onset to prevent the Romans from quenching the flames; for the burning materials being stopped in their descent by the vineae and mounds, set the Roman works on fire. On this Caesar ordered his men to scale the heights on all sides and to divert the defendants from the land side by a feint of attacking the walls. This drew the enemy from the fire; and all their force was employed in manning the walls. In the meantime the Romans put out the fire or cut it off. The obstinate resistance of the enemy was terminated by the spring being completely dried up by the diversion of the water through the subterraneous passages which the Romans had constructed; and they surrendered after many of them had died of thirst. To terrify the Galli by a signal example, Caesar cut off the hands of all the fighting men who remained alive.

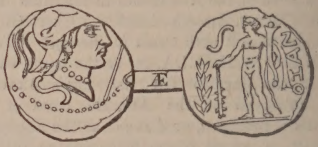
The attack and defence of Uxellodunum contain a full description of the site. This hill-fort was surrounded by a river on all sides except one, and on this side also the approach to it was steep. It is agreed that Uxellodunum was somewhere either on the Oltis (*Lot*) or on the Duranius (*Dordogne*). D'Anville places it at *Puech d'Issolu*, on a small stream named the *Tourmente*, which flows into the *Dordogne* after passing *Puech d'Issolu*. He was informed by some person acquainted with the locality that the spring still exists, and we may assume that to be true, for Caesar could not destroy the source: he only drew off the water, so that the besieged could not get at it. D'Anville adds that what appeared to be the entrance of the place is called in the country *le portail de Rome*, and that a hill which is close to the *Puech*, is named *Bel-Castel*. But this distinguished geographer had no exact plan of the place, and had not seen it. Walckenaer (*Géog. des Gaules*, i. p. 353) affirms that the plan of *Puech* *d'Issolu* made by M. Cornuau, at the request of Turgot does not correspond to the description in the Gallic War, for the river *Tourmente* washes only one of the four sides of this hill; he also says, that nothing appears easier than to turn the river towards the west on the north side of the town, and to prevent its course being continued to the south. But the author of the eighth book of the Gallic War says that Caesar could not deprive the defenders of Uxellodunum of the water of the river by diverting its course, "for the river flowed at the very foot of the heights of Uxellodunum, and could not be drawn off in any direction by sinking ditches." There is a plan of *Capdenac* in Caylus' *Antiquités* (tom. v. pl. 100, p. 280), and Walckenaer observes that this also corresponds very imperfectly with the description. The researches of Champollion (*Nouvelles Recherches sur Uxellodunum*), which are cited by Walckenaer, appeared in 1820. Walckenaer makes some objection to *Capdenac*, on grounds which are not very strong. He says that the *Lot* is above 300 feet wide where it surrounds *Capdenac*, and one cannot conceive how archers placed on one bank could have prevented the besieged from getting water on the other side. If the archers and slingers were on the river in boats or rafts, which is likely enough, this objection is answered, even if it be true that an archer or slinger could not kill a man at the distance of 300 feet. Walckenaer makes some other objections to *Capdenac*, but they are mainly founded on a misunderstanding or a perversion of the Latin text.

It is possible that we have not yet found Uxellodunum, but a journey along the banks of the Lot, for that is more probably the river, might lead to the discovery of this interesting site of Caesar's last great military operation in Gallia. The position of the place, the attack, and the defence, are well described; and it cannot be difficult to recognise the site, if a man should see it before his eyes. Nothing could be easier to recognise than Alesia. It is impossible for any man to doubt about the site of Alesia who has seen *Alise* [MANDUBII]. In the case of Uxellodunum, we have not the help of a corresponding modern name, unless it be a place not yet discovered. [G. L.]

UXELLODUNUM, a station on the wall of Hadrian in Britannia Romana, where the Cohors I. Romanorum was in garrison (*Not. Imp.*). Probably *Brough*. [T. H. D.]

UXELLUM (Οὔξελλον, Ptol. ii. 3. § 8), a town of the Selgovae in Britannia Barbara. Camden (p. 1193) takes it to have been on the river *Euse* in *Eusedale;* whilst Horsley (p. 366) identifies it with *Caerlaverock* near *Dumfries*. [T. H. D.]

UXENTUM (Οὔξεντον, Ptol.: *Eth.* Uxentinus: *Ugento*), a town of Calabria, in the territory of the Sallentines, situated about 5 miles from the sea-coast, and 16 from the Iapygian Promontory (*Capo di Leuca*). It is mentioned by both Pliny and Ptolemy among the inland towns which they assign to the Sallentines, and is placed by the Tabula on the road from Tarentum to the extremity of the peninsula. (Plin. iii. 11. s.16; Ptol. iii. 1. § 76; *Tab. Peut.*) The name is corruptly written in the Tabula Uhintum, and in Pliny the MSS. give Ulentini, for which the older editors had substituted Valentini. Hence Ptolemy is the only authority for the form of the name (though there is no doubt that the place meant is in all cases the same); and as coins have the Greek legend **OZAN**, it is doubtful whether Uxentum or Uzentum is the more correct form. The site is clearly marked by the modern town of *Ugento*, and the ruins of the ancient city were still visible in the days of Galateo at the foot of the hill on which it stands. (Galateo, *de Sit. Iapyg.* p. 100; Romanelli, vol. ii. p. 43.) Many tombs also have been found there, in which coins, vases, and inscriptions in the Messapian dialect have been discovered. [E. H. B.]



COIN OF UXENTUM.

UXENTUS (τὸ Οὔξεντον, Ptol. vii. 1. §§ 24, 76), a chain of mountains in the *Deccan* of India, between lat. 22° and 24° and long. 136° and 143°, probably those called *Gondwana*. They formed the watershed of several rivers which flowed into the *Bay of Bengal*, as the Adamas, Dosaron and Tyndis. [V.]

U'XII (Οὔξιοι, Arrian, *Anab.* iii. 17; Strab. xi. p. 524, xv. pp. 729, 744), a tribe of ancient Persis, who lived on the northern borders of that province between Persis and Susiana, to the E. of the Pasitigris and to the W. of the Oroatis. They were visited by Alexander the Great on his way from Susa; and their capital town, Uxia (Strab. xv. p. 744), was the scene of a celebrated siege, the details of which are given by Arrian and Curtius. It has been a matter of considerable discussion where this city was situated. The whole question has been carefully examined by the Baron de Bode, who has personally visited the localities he describes. (*Geogr. Journ.* xiii. pp. 108—110.) He thinks Uxia is at present represented by the ruins near *Shikaftohi-Suleimán* in the *Bakhtyari* Mountains, to the E. of *Shuster*. [V.]

UZ, a district of Western Asia, to which the prophet Job belonged. (*Job*, i. 1.) It cannot be certainly determined where it was; hence, learned men have placed it in very different localities. Winer, who has examined the question, inclines to place it in the neighbourhood of Edom, adjoining Arabia and Chaldaea. (*Biblisch. Realwörterb. s. v. Uz.*) The people are perhaps represented in classical geography by the Αὐσῖται or Αἰσῖται of Ptolemy (v. 19. § 2), a tribe who lived on the borders of Babylonia. In *Genesis* x. 23, Uz is called the son of Aram: hence Josephus says, Οὖσος κτίζει τὴν Τραχωνῖτιν καὶ Δαμασκόν (*Antiq.* i. 6. § 4); but there is no sufficient evidence to show that the "land of Uz" of Job is connected with Northern Mesopotamia. [V.]

UZITA (Οὔζιτα, or Οὔζικα, Ptol. iv. 3. § 37), a town of Byzacium in Africa Propria, lying S. of Hadrumetum and Ruspina, and W. of Thysdrus. (Cf. Hirt. *B. Afr.* 41, 51.) [T. H. D.]

X.

XANTHUS (Ξάνθος: *Eth.* Ξάνθιος), the greatest and most celebrated city of Lycia, was situated according to Strabo (xiv. p. 666) at a distance of 70 stadia from the mouth of the river Xanthus, and according to the Stadiasmus (§ 247) only 60 stadia. Pliny (v. 28) states the distance at 15 Roman miles, which is much too great. (Comp. Steph. B. *s. v.*; Ptol. v. 3. § 5; Mela, i. 15; Polyb. xxvi. 7.) This famous city was twice destroyed, on each of which occasions its inhabitants defended themselves with undaunted valour. The first catastrophe befell the city in the reign of Cyrus, when Harpagus besieged it with a Persian army. On that occasion the Xanthians buried themselves, with all they possessed, under the ruins of their city. (Herod. i. 176.) After this event the city must have been rebuilt; for during the Roman civil wars consequent upon the murder of Caesar, Xanthus was invested by the army of Brutus, as its inhabitants refused to open their gates to him. Brutus, after a desperate struggle, took the city by assault. The Xanthians continued the fight in the streets, and perished with their wives and children in the flames, rather than submit to the Romans. (Dion Cass. xlvii. 34; Appian, *B. C.* iv. 18, foll.) After this catastrophe, the city never recovered. The chief buildings at Xanthus were temples of Sarpedon (Appian, *l. c.*), and of the Lycian Apollo. (Diod. v. 77.) At a distance of 60 stadia down the river and 10 stadia from its mouth, there was a sanctuary of Leto on the bank of the Xanthus. (Strab. *l. c.*) The site of Xanthus and its magnificent ruins were first discovered and described by Sir C. Fellows in his *Excursion in Asia Minor*, p. 225, foll. (comp. his *Lycia*, p. 164, foll.) These ruins stand near the village of *Koonik*, and consist of temples, tombs, triumphal arches, walls, and a theatre. The site, says Sir Charles, is extremely romantic, upon beautiful hills, some crowned with rocks, others rising perpendicularly from the river. The city does not appear to have been very large, but its remains show that it was highly ornamented, particularly the tombs. The architecture and sculptures of the place, of which many specimens are in an excellent state of preservation, and the inscriptions in a peculiar alphabet, have opened up a page in the history of Asia Minor previously quite unknown. The engravings in Fellows' works furnish a clear idea of the high perfection which the arts must have attained at Xanthus. (See also Spratt and Forbes, *Travels in Lycia*, i. p. 5, and ii., which contains an excellent plan of the site and remains of Xanthus; E. Braun, *Die Marmorwerke von Xanthos in Lykia*, Rhein. Mus. Neue Folge, vol. iii. p. 481, foll.)

A large collection of marbles, chiefly sepulchral, discovered at Xanthus by Sir C. Fellows, and brought to England in 1842 and 1843, has been arranged in the British Museum. Of these a full account is given in the Supplement to the *Penny Cyclopaedia*, vol. ii. p. 713, foll. [L. S.]

XANTHUS (Ξάνθος), an important river in the W. of Lycia, which is mentioned even in Homer (*Il.* ii. 877, v. 479), and which, according to Strabo (xiv. p. 665), was anciently called Sirbes, that is in Phoenician and Arabic "reddish yellow," so that the Greek name Xanthus is only a translation of the Semitic Sirbes or Zirba. The Xanthus has its sources in Mount Taurus, on the frontiers between Lycia and Pisidia, and flows as a navigable river in a SW. direction through an extensive plain (Ξάνθου πεδίον, Herod. i. 176), having Mount Bragus on the W. and Massicytes on the E., towards the sea, into which it discharges itself about 70 stadia S. of the city of Xanthus, and a little to the NW. of Pinara. (Herod. *l. c.*; Ptol. v. 3. § 2; Dion. *Per.* 848; Ov. *Met.* ix. 645; Mela, i. 15; Plin. v. 28.) Now the *Etshen* or *Essenide*. (Fellows, *Lycia*, pp. 123, 278.) Respecting Xanthus as a name of the Trojan river Scamander, see SCAMANDER. [L. S.]

XANTHUS. [BUTHROTUM.]

XATHRI (Ξάθροι, Arrian, *Anab.* vi. 15), a tribe of free Indians mentioned by Arrian as dwelling along the banks of the Hydraotes (*Iraváti*) in the *Panjáb*. There can be little doubt that they derive their name from the Indian caste of the *Kshatriyas*. [V.]

XENAGORAE INSULAE (Ξεναγόρου νῆσοι), according to Pliny (v. 35), a group of eight small islands off the coast of Lycia, which the Stadiasmus (§ 218) states were situated 60 stadia to the east of Patara. They are commonly identified with a group of islands in the bay of *Kalamaki*. [L. S.]

XENIPPA, a small place in the NE. part of Sogdiana, noticed by Curtius (viii. 2. § 14); perhaps the present *Urtippa*. [V.]

XEROGYPSUS (Ξηρόγυψος, Anna Comn. vii. 11, p. 378, Bonn), a small river in the SE. of Thrace, which falls into the Propontis, not far from Perinthus. In some maps it is called the Erginus, upon the authority of Mela (ii. 2). [J. R.]

XERXE'NE (Ξερξηνή, Strab. xi. p. 528), a district on the Euphrates, in the NW. part of Armenia, more properly, however, belonging to Cappadocia. It is called Derxene by Pliny (v. 24. s. 20), and this perhaps is the more correct name. (Cf. Ritter, *Erdk.* x. p. 769.) [T. H. D.]

XIME'NE (Ξιμήνη), a district in the most southern part of Pontus, on the Halys, and near the frontiers of Cappadocia, was celebrated for its salt-works. (Strab. xii. p. 561.) [L. S.]

XION (Ξιών, Scylax, p. 53), a river on the W. coast of Libya Interior. [T. H. D.]

XIPHONIUS PORTUS (Ξιφώνειος λιμήν, Scyl. p. 4: *Bay of Augusta*), a spacious harbour on the E. coast of Sicily, between Catana and Syracuse. It is remarkable that this, though one of the largest and most important natural harbours on the coasts of Sicily, is rarely mentioned by ancient authors. Scylax, indeed, is the only writer who has preserved to us its name as that of a port. Strabo speaks of the Xiphonian Promontory (τὸ τῆς Ξιφωνίας ἀκρωτήριον, vi. p. 267), by which he evidently means the projecting headland near its entrance, now called the *Capo di Santa Croce.* Diodorus also mentions that the Carthaginian fleet, in B. C. 263 touched *at Xiphonia* on its way to Syracuse (εἰς τὴν Ξιφωνίαν, xxiii. 4. p. 502). None of these authors allude to the existence of a town of this name, and it is probably a mistake of Stephanus of Byzantium, who speaks of Xiphonia as *a city* (*s. v.*). The harbour or bay of *Augusta* is a spacious gulf, considerably larger than the Great Harbour of Syracuse, and extending from the *Capo di Santa Croce* to the low peninsula or promontory of *Magnisi* (the ancient Thapsus). But it is probable that the port designated by Scylax was a much smaller one, close to the modern city of *Augusta*, which occupies a low peninsular point or tongue of land that projects from near the N. extremity of the bay, and strongly resembles the position of the island of Ortygia, at Syracuse, except that it is not quite separated from the mainland. It is very singular that so remarkable and advantageous a situation should not have been taken advantage of by the Greek colonists in Sicily; but we have no trace of any ancient town on the spot, unless it were the site of the ancient Megara. [MEGARA.] The modern town of *Augusta*, or *Agosta*, was founded in the 13th century by Frederic II. [E. H. B.]

XOIS (Ξόϊς, Strab. xvii. p. 802; Ptol. iv. 5. § 50; Ξόης, Steph. B. *s. v.*), a town of great antiquity and considerable size, was situated nearly in the centre of the Delta, upon an island formed by the Sebennytic and Phatnitic branches of the Nile. It belonged to the Sebennytic Nome. The 14th dynasty, according to Manetho, consisted of 76 Xoite kings. This dynasty immediately preceded that of the shepherd kings of Aegypt. It seems probable, therefore, that Xois, from its strong position among the marshes formed by the intersecting branches of the river, held out during the occupation of the Delta by the Hyksos, or at least compromised with the invaders by paying them tribute. By some geographers it is supposed to be the Papremis of Herodotus (ii. 59, iii. 12). Champollion (*l'Egypte sous les Pharaons*, vol. ii. p. 214) believes its site to have been at *Sakkra*, which is the Arabian synonyme of the Coptic *Xeos* and of the old Aegyptian *Skhoo* (Niebuhr, *Travels*, vol. i. p. 75.) The road from Tamiathis to Memphis passed through Xois. [W.B.D.]

XYLENO'POLIS, a town said by Pliny, on the authority it would seem of Onesicritus or Nearchus, to have been founded by Alexander the Great (vi. 23. s. 26). It must have been in the southern part of *Sinde;* but its position cannot be recognised, as Pliny himself states that the authors to whom he refers did not say on what river it was situated. [V.]

XYLICCENSES (οἱ Ξυλικκεῖς Αἰθίοπες, Ptol. iv. 6. § 23), an Aethiopian people in Libya Interior, between the mountains Arangas and Arualtes. [T.H.D.]

XYLINE COME, a village in Pisidia, between Corbasa and Termessus, is mentioned only by Livy (xxxviii. 15). A place called Xyline, in the country of the Cissians in Pontus, is noticed by Ptolemy (v. 6. § 6). [L. S.]

XYLO'POLIS (Ξυλόπολις), a town of Mygdonia in Macedonia (Ptol. iii. 13. § 36), whose inhabitants, the Xylopolitae, are mentioned by Pliny also (iv. 10. s. 17).

XY'NIA or XY'NIAE (Ξυνία: *Eth.* Ξυνιεύς), a town near the southern confines of Thessaly, and the district of the Aenianes (Liv. xxxiii. 3), which gave its name to the lake Xynias (Ξυνίας), which Stephanus confounds with the Boebeis (Apollon. Rhod. i. 67; Catull. lxiii. 287; Steph. B. *s. v.* Ξυνία). Xynia, having been deserted by its inhabitants, was plundered by the Aetolians in B. C. 198 (Liv. xxxii. 13). In the following year Flamininus arrived at this place in three days' march from Heraclea (Liv. xxxiii. 3; comp. Liv. xxxix. 26). The lake of Xynias is now called *Taukli*, and is described as 6 miles in circumference. The site of the ancient city is marked by some remains of ruined edifices upon a promontory or peninsula in the lake. (Leake, *Northern Greece*, vol. i. p. 460, vol. iv. p. 517.)

XY'PETE. [ATTICA, p. 325, a.]

Z.

ZABA (Ζάβα), a small place on the northern coast of Taprobane or *Ceylon*, noticed by Ptolemy (vii. 4. § 13). It has not been identified with any modern site. [V.]

ZABAE (Ζάβαι, Ptol. i. 14. §§ 1, 4, 6, 7, vii. 2. § 6, viii. 27. § 4), a town of some importance in India intra Gangem, on the sinus Gangeticus, perhaps the modern *Ligor*. [J. R.]

ZA'BATUS (Ζάβατος), a river of Assyria, first noticed by Xenophon (*Anab.* ii. 5. § 1, iii. 3. § 6), and the same as the Lycus of Polybius (v. 51), Arrian (*Anab.* iii. 15), and Strabo (ii. p. 79, xvi. p. 737). It is called Zabas by Ammianus (xviii. 14) and Zerbis by Pliny (vi. 26. s. 30). There can be no doubt that it is now represented by the *Greater Záb*, a river of considerable size, which, rising in the mountains on the confines of *Armenia* and *Kurdistán*, flows into the Tigris a little to the S. of the great mound of *Nimrúd* (Tavernier, ii. c. 7; Layard, *Nineveh and its Remains*, i. p. 192.) [V.]

ZABE. [BERZABDA.]

ZABE (Ζάβη, Procop. *B. Vand.* ii. 20, p. 501, ed. Bonn), a district in Mauretania Sitifensis. According to the Not. Imp. it contained a town of the same name, which must be that called Zabi in the *Itin. Ant.* (p. 30). Lapie identifies it with the present *Msilah.* [T. H. D.]

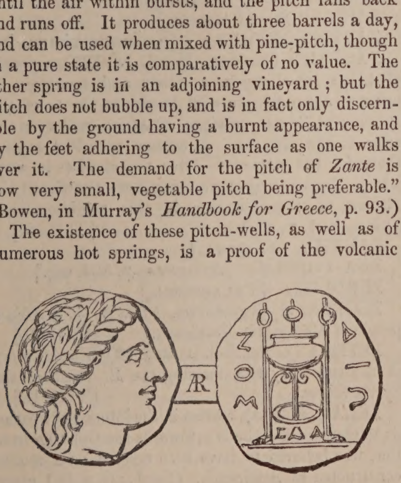
ZACATAE (Ζακάται, Ptol. v. 9. § 16), a people of Asiatic Sarmatia. [T. H. D.]

ZACYNTHUS (Ζάκυνθος: *Eth.* Ζακύνθιος: *Zante*), an island in the Sicilian sea, lying off the western coast of Peloponnesus, opposite the promontory Chelonatas in Elis, and to the S. of the island of Cephallenia, from which it was distant 25 miles, according to Pliny, (iv. 12. s. 19) but according to Strabo, only 60 stadia (x. p. 458). The latter is very nearly correct, the real distance being 8 English miles. Its circumference is stated by Pliny at 36 M. P., by Strabo at 160 stadia; but the island is at least 50 miles round, its greatest length being 23 English miles. The island is said to have been originally called Hyrie (Plin. *l. c.*), and to have been colonized by Zacynthus, the son of Dardanus, from Psophis in Arcadia, whence the acropolis of the city of Zacynthus was named Psophis. (Paus. viii. 24. § 3; Steph. B. *s. v.*) We have the express statement of Thucydides that the Zacynthians were a colony of Achaeans from Peloponnesus (ii. 66). In Homer, who gives the island the epithet of "woody" (ὑλήεις and ὑλήεσσα), Zacynthus forms part of the dominions of Ulysses. (*Il.* ii. 634, *Od.* i. 246, ix. 24, xvi. 123, 250; Strab. x. p. 457.) It appears to have attained considerable importance at an early period; for according to a very ancient tradition Saguntum in Spain was founded by the Zacynthians, in conjunction with the Rutuli of Ardea. (Liv. xxi. 7; Plin. xvi. 40. s. 79; Strab. iii. p. 159.) Bocchus stated that Saguntum was founded by the Zacynthians 200 years before the Trojan War (*ap.* Plin. *l. c.*) In consequence probably of their Achaean origin, the Zacynthians were hostile to the Lacedaemonians, and hence we find that fugitives from Sparta fled for refuge to this island. (Herod. vi. 70, ix. 37.) In the Peloponnesian War the Zacynthians sided with Athens (Thuc. ii. 7, 9); and in B. C. 430 the Lacedaemonians made an unsuccessful attack upon their city. (*Ib.* 66.) The Athenians in their expedition against Pylus found Zacynthus a convenient station for their fleet. (Id. iv. 8, 13.) The Zacynthians are enumerated among the autonomous allies of Athens in the Sicilian expedition. (Id. vii. 57.) After the Peloponnesian War, Zacynthus seems to have passed under the supremacy of Sparta; for in B. C. 374, Timotheus, the Athenian commander, on his return from Corcyra, landed some Zacynthian exiles on the island, and assisted them in establishing a fortified post. These must have belonged to the anti-Spartan party; for the Zacynthian government applied for help to the Spartans, who sent a fleet of 25 sail to Zacynthus. (Xen. *Hell.* vi. 2. § 3; Diodor. xv. 45, seq.; as to the statements of Diodorus, see Grote, *Hist. of Greece*, vol. x. p. 192.) The Zacynthians assisted Dion in his expedition to Syracuse with the view of expelling the tyrant Dionysius, B. C. 357. (Diod. xvi. 6, seq.; Plut. *Dion*, 22, seq.) At the time of the Roman wars in Greece we find Zacynthus in the possession of Philip of Macedon. (Polyb. v. 102.) In B. C. 211 the Roman praetor M. Valerius Laevinus, took the city of Zacynthus, with the exception of the citadel. (Liv. xxvi. 24.) It was afterwards restored to Philip, by whom it was finally surrendered to the Romans in B. C. 191. (Id. xxxvi. 32.) In the Mithridatic War it was attacked by Archelaus, the general of Mithridates, but he was repulsed. (Appian, *Mithr.* 45.) Zacynthus subsequently shared the fate of the other Ionian islands, and is now subject to Great Britain.

The chief town of the island, also named Zacynthus (Liv. xxvi. 14; Strab. x. p. 458; Ptol. iii. 14. § 13), was situated upon the eastern shore. Its site is occupied by the modern capital, *Zante*, but nothing remains of the ancient city, except a few columns and inscriptions. The situation of the town upon the margin of a semi-circular bay is very picturesque. The citadel probably occupied the site of the modern castle. The beautiful situation of the city and the fertility of the island have been celebrated in all ages (καλά πόλις ἁ Ζάκυνθος, Theocr. *Id.* iv. 32; Strab., Plin., *ll. cc.*). It no longer deserves the epithet of "woody," given to it by Homer (*l. c.*) and Virgil ("nemorosa Zacynthos," *Aen.* iii. 270); but its beautiful olive-gardens, vineyards, and gardens, justify the Italian proverb, which calls *Zante* the "flower of the Levant."

The most remarkable natural phenomenon in *Zante* is the celebrated pitch-wells, which are accurately described by Herodotus (iv. 195), and are mentioned by Pliny (xxxv. 15. s. 51). They are situated about 12 miles from the city, in a small marshy valley near the shore of the *Bay of Chieri*, on the SW. coast. A recent observer has given the following account of them: "There are two springs, the principal surrounded by a low wall; here the pitch is seen bubbling up under the clear water, which is about a foot deep over the pitch itself, with which it comes out of the earth. The pitch-bubbles rise with the appearance of an India-rubber bottle until the air within bursts, and the pitch falls back and runs off. It produces about three barrels a day, and can be used when mixed with pine-pitch, though in a pure state it is comparatively of no value. The other spring is in an adjoining vineyard; but the pitch does not bubble up, and is in fact only discernible by the ground having a burnt appearance, and by the feet adhering to the surface as one walks over it. The demand for the pitch of *Zante* is now very small, vegetable pitch being preferable." (Bowen, in Murray's *Handbook for Greece*, p. 93.)

The existence of these pitch-wells, as well as of numerous hot springs, is a proof of the volcanic agency at work in the island; to which it may be added that earthquakes are frequent.



COIN OF ZACYNTHUS.

Pliny mentions Mt. Elatus in Zacynthus ("Mons Elatus ibi nobilis," Plin. *l. c.*), probably Mt. *Skopo*, which raises its curiously jagged summit to the height of 1300 feet above the eastern extremity of the bay of *Zante*. (Dodwell, *Tour through Greece*, vol. i. p. 83, seq.)

ZADRACARTA. [TAGAE.]

ZAGATIS (Ζάγατις), a coast river in the E. part of Pontus, discharging itself into the Euxine about 7 stadia to the east of Athenae; probably the same river as the modern *Sucha Dere*. (Arrian, *Peripl. P. E.* p. 17; Anon. *Peripl. P. E.* p. 15.) [L. S.]

ZAGO'RUS, or ZAGO'RUM (Ζάγωρος, or Ζάγωρον, Marcian. p. 73; Ζάγειρα, Ptol. v. 4. § 5; Ζάγωρα, Arrian, *Peripl. P. E.* p. 15; Zacoria, *Tab. Peut.*), a town of Paphlagonia, on the coast of the Euxine, between Sinope and the mouth of the Halys, from the latter of which it was distant about 400 stadia. [L. S.]

ZAGRUS MONS (ὁ Ζάγρος, τὸ Ζάγρον ὄρος, Polyb. v. 44; Ptol. vi. 2. § 4; Strab. xi. p. 522), the central portion of the great chain of mountains which, extending in a direction nearly N. and S. with an inclination to the W. at the upper end, connects the mountains of Armenia and the Caucasus with those of Susiana and Persis. It separates Assyria from Media, and is now represented by the middle and southern portion of the mountains of *Kurdistán*, the highest of which is the well known *Rowandiz*. Near this latter mountain was the great highroad which led from Assyria and its capital Nineveh into Media, and, at its base, was in all probability the site of the pass through the mountains, called by Ptolemy αἱ τοῦ Ζάγρου πύλαι (vi. 2. § 7), and by Strabo, ἡ Μηδικὴ πύλη (xi. p. 525). Polybius notices the difficulty and danger of this pass (v. 44), which, from Colonel Rawlinson's narrative, would seem to have lost none of its dangers (Rawlinson, in *Trans. Geogr. Soc.* vol. x., *Pass and Pillar of Keli-Shín*). [V.]

ZAITHA or ZAUTHA (Ζαυθά, Zosim. iii. 14), a small town or fortified place in Mesopotamia, on the Euphrates, to the SE. of Circesium. It is said by Ammianus to have been called Zaitha (or more properly Zaita) from the olive trees (xxiii. 5. § 7), which we must suppose grew there, though the climate is very hot for that tree. He adds that it was celebrated for the monument erected by the soldiers to the emperor Gordianus. Zosimus, on the other hand, places this monument at Dara (*l. c.*), in which Eutropius agrees with him (ix. 2). Ptolemy calls it Zeitha (Ζείθα, v. 18. § 2). [DURA.] [V.]

ZALACUS (τὸ Ζάλακον ὄρος, Ptol. iv. 2. §§ 14, 19), a mountain chain of Mauretania near the river Chinalaph, the highest and most rugged branch of the Atlas in this neighbourhood. Now the *Wannash-reese* or *Gueneseris*. (Cf. Shaw, *Travels*, i. p. 74.) [T. H. D.]

ZALDAPA (Ζάλδαπα, Procop. *de Aed.* iv. 11. p. 308), a town in the interior of Lower Moesia. It is called Saldapa by Theophylact (Σάλδαπα, i. 8), and Zeldepa by Hierocles. (Ζέλδεπα, p. 637). [T. H. D.]

ZALE'CUS (Ζάληκος, or Ζάλισκος, in Ptol. v. 4. § 3), a small river on the coast of Paphlagonia, discharging itself into the Euxine at a distance of 210 stadia west of the Halys. (Marcian. p. 73.) At its mouth there was a small town of the same name, about 90 stadia from Zagorus, or Zagorum (Anon.

Peripl. P. E. p. 9); and this place seems to be the same as the one mentioned in the Peut. Table under the corrupt name of Halega, at a distance of 25 Roman miles from Zacoria. Hamilton (*Researches*, i. p. 298) identifies the site of Zalecus with the modern *Alatcham*, where some ruins and massive walls are still seen. [L. S.]

ZALICHES (Ζαλίχης), a town in the interior of Paphlagonia, or what, at a late period, was called Hellenopontus, probably near some mountain forest, as Hierocles (p. 701) calls it Σάλτος Ζαλίχης (*Novell.* 28; Conc. Nicaen. ii. p. 355, where a bishop of Zaliches is mentioned, and p. 163, from which it would seem that at one time the place bore the name of Leontopolis.) [L. S.]

ZAMA (Ζάμα μείζων, Ptol. iv. 3. § 33), a town of Numidia, situated five days' journey to the SW. of Carthage. (Polyb. xv. 5; Liv. xxx. 29.) It lay between Sicca Veneria and Suffetula, and bore the name of "Regia;" whence we find it erroneously written Zamareigia in the *Tab. Peut.* Zama is particularly renowned as the scene of Scipio's victory over Hannibal in 201 B. C. It was a very strong place, and hence adopted as a residence by Juba, who brought his harem and his treasure hither, as to a place of safety. (Hirt. *B. Afr.* 91; Vitruv. viii. 3. (or 4.) § 24.) Strabo represents it as destroyed by the Romans, and as being in a ruinous state in his time (xvii. pp. 829, 831). But it must have been subsequently restored, since Pliny (v. 4. s. 4) mentions the Zamense oppidum as a free city. It also appears in the *Tab. Peut.*, and a bishop of Zama is mentioned by St. Augustine. (*De Civ. Dei*, vii. 16.) In an inscription in Gruter (364. 1) Zama Regia appears with the title of a colony (Col. Aelia Hadriana); though it is not mentioned as a colony in any of the ancient writers. It is the present *Jama*, SE. of *Kess.* (Cf. Dion Cass. xlviii. 23; Sall. *J.* 60, 61.) [T. H. D.]

ZAMA (Ζάμα), a town of the district of Chammanene, in Cappadocia, on the borders of Galatia. (Ptol. v. 18. § 12; *Tab. Peut.*) [L. S.]

ZAMAE FONS, a spring in Africa, probably near the town of Zama, which had the property of rendering the voice clear and strong. (Plin. xxxi. 2. s. 12.) [T. H. D.]

ZAMAZII (Ζαμάζιοι, Ptol. iv. 6. § 18), a people of Libya Interior. [T. H. D.]

ZAMENSE OPPIDUM. [Zama.]

ZAMES (Ζάμης, Ptol. vi. 7. §§ 20, 21), a mountain chain in the interior of Arabia Felix, which stretched as far as the borders of Arabia Deserta. It is probably the present *Jabel Aared*, or *Imaryeh.* [T. H. D.]

ZANCLE. [Messana.]

ZAO PROMONTORIUM, a headland on the coast of Gallia Narbonensis, and east of Massilia (*Marseille*). Pliny (iii. 4), after mentioning Massilia says, "Promontorium Zao, Citharista Portus. Regio Camatullicorum. Dein Suelteri." It is not easy to identify Zao. Ukert conjectures that it may be *Bec de Sormion.* In the *Statistique du Dép. des Bouches du Rhône*, it is supposed to be *Cap de la Croisette.* This is a rocky coast, which has undergone little change for many centuries. (Ukert, *Gallien*, p. 120.) [G. L.]

ZAPAORTENI. [Apavarcticene.]

ZARA (Ζάρα), a town in the northern part of Armenia Minor, or perhaps more correctly in Pontus, on the road from Caesarea to Satala, and at the same time on that from Arabissus to Nicopolis. It still bears the name of *Zara* or *Sara.* (*It. Ant.* pp. 182, 207, 213.) [L. S.]

ZARADRUS (Ζαράδρος, Ptol. vii. 1. § 27), the upper portion of the Hyphasis, the most eastern of the five rivers of the *Panjáb*, now the *Sutledge.* There is some doubt about the orthography of this name, which in some editions is written Zadrades. There can be no doubt that in either case it is derived from the Sanscrit name *Satadru*, and that it is the same as the Hesydrus of Pliny (vi. 17. s. 21). [V.]

ZARAI, a town in the interior of Numidia, on the road from Lamasba to Sitifis. (*Itin. Ant.* p. 35.) In the *Tab. Peut.* it is called Zaras. Variously identified with *Jigbah*, *Ngaous*, and *Zéryah.* [T. H. D.]

ZARANGI. [Drangae.]

ZARATAE, or ZARETAE (Ζαράται, Ptol. vi. 14. § 11), a people of Scythia on the Imaus. [T.H.D.]

ZARAX (Ζάραξ, Paus., Polyb.; Ζάρηξ, Ptol.: *Eth.* Ζαρήκιος, Steph. B.), a town on the eastern coast of Laconia, with a good harbour, situated upon a promontory, which is a projection of Mt. Zarax. [Vol. II. p. 109, b.] Like Prasiae and some other places on this part of the Laconian coast, it passed into the hands of the Argives in the time of the Macedonian supremacy; and this was apparently the reason why it was destroyed by Cleonymus, the son of Cleomenes. From this disaster it never recovered. Augustus made it one of the Eleuthero-Laconian towns; but Pausanias found in it nothing to mention but a temple of Apollo at the end of the harbour. It is now called *Hiéraka*, which is evidently a corruption of Zarax, and there are still ruins of the ancient town. The promontory bears the same name, and the port, which is on its northern side, is described as small but well sheltered. Pausanias says that Zarax was 100 stadia from Epidaurus Limera, but this distance is too great. (Paus. iii. 24. § 1; comp. i. 38. § 4, iii. 21. § 7; Polyb. iv. 36; Ptol. iii. 15. § 10; Plin. iv. 5. s. 17; Steph. B. *s. v.*; Leake, *Morea*, vol. i. p. 219; Boblaye, *Recherches, &c.* p. 101; Curtius, *Peloponnesos*, vol. ii. p. 291.)

ZARAX MONS. [Laconia, p. 109, b.]

ZARGIDAVA (Ζαργίδαυα, Ptol. iii. 10. § 15), a town of Moesia Inferior, on the Danube. [T. H. D.]

ZARIASPA. [Bactra.]

ZARIASPAE. [Bactra.]

ZARIASPIS. [Bactrus.]

ZARMIZEGETHUSA. [Sarmizegethusa.]

ZAUE'CES (Ζαυῆκες, Herod. iv. 193), a people of Libya, dwelling in a woody and mountainous country abounding in wild beasts, to the S. of the subsequent Roman province of Africa, and near the tribe of the Maxyes. A custom prevailed among them for the women to drive the chariots in war; which Heeren conjectures may have occasioned the placing of the Amazons in this neighbourhood. (*Ideen*, ii. 1. p. 41.) [T. H. D.]

ZAUTHA. [Zaitha.]

ZEA PORTUS. [Athenae, p. 304, seq.]

ZEBULON. [Palaestina.]

ZEGRENSII (Ζεγρήνσιοι, Ptol. iv. 1. § 10), a people of Mauretania Tingitana. [T. H. D.]

ZEITHA (Ζείθα, Ptol. iv. 3. § 12), a promontory of the Regio Syrtica forming the E. point of the Syrtis Minor. [T. H. D.]

ZELA (τὰ Ζῆλα), a town in the interior of Pontus, on the left bank of the Iris, towards the Galatian frontier, was believed to have been erected on a mound constructed by Semiramis. (Strab. xii. p. 561, comp. pp. 512, 559.) It seems to have originally been a place consecrated to the worship of the goddess Anaitis, to whom a temple was built there by the Persians in commemoration of a victory over the Sacae. The chief priest of this temple was regarded as the sovereign of Zela and its territory (Ζηλῆτις). Notwithstanding this, however, it remained a small place until Pompey, after his victory over Mithridates, raised it to the rank of a city by increasing its population and extending its walls. Zela is celebrated in history for a victory obtained in its vicinity by Mithridates over the Romans under Triarius, and still more for the defeat of Pharnaces, about which Caesar sent to Rome the famous report "Veni, Vidi, Vici." (Plin. vi. 3; Appian, *Mithrid.* 89; Plut. *Caes.* 50; Dion Cass. xlii. 47, where the place is erroneously called Ζέλεια; Hirt. *Bell. Alex.* 73, where it is called Ziela; Ptol. v. 6. § 10; Hierocl. p. 701; Steph. B. *s. v.*) Zela was situated at a distance of four days' journey (according to the Peut. Table 80 miles) from Tavium, and south-east of Amasia. The elevated ground on which the town was situated, and which Strabo calls the mound of Semiramis, was, according to Hirtius, a natural hill, but so shaped that it might seem to be the work of human hands. According to Hamilton (*Researches*, i. p. 306), is a black-coloured isolated hill rising out of the plain, and is now crowned with a Turkish fortress, which still bears the name of *Zilleh*. [L. S.]

ZELA'SIUM. [Posidium, p. 662, No. 4.]

ZELDEPA. [Zaldapa.]

ZELEIA (Ζέλεια), a town of Troas, at the foot of Mount Ida and on the banks of the river Aesepus, at a distance of 80 stadia from its mouth. It is mentioned by Homer (*Il.* ii. 824, iii. 103), who calls it a holy town. (Comp. Strab. xii. p. 565, xiii. pp. 585, 587, 603; Steph. B. *s. v.*) Arrian (*Anab.* i. 13) mentions it as the head-quarters of the Persian army before the battle of the Granicus: it existed in the time of Strabo; but afterwards it disappears. Some travellers have identified it with the modern *Biga*, between *Bozaegee* and *Sorricui*. [L. S.]

ZELETIS. [Zela.]

ZENOBII INSULAE (Ζηνοϐίου νησία, Ptol. vi. 7. § 47), seven small islands lying in the Sinus Sachalites, at the entrance of the Arabian Gulf. (Cf. Arrian. *Per. M. Eryth.* p. 19.) [V.]

ZENODO'TIUM (Ζηνοδότιον, Dion Cass. xl. 12; Steph. B. *s. v.*), a strong castle in the upper part of Mesopotamia, which was held by the Parthians during the war between them and the Romans under Crassus. It is called by Plutarch, Zenodotia (*Crass.* c. 17). It cannot be identified with any modern site, but it was, probably, not far distant from Edessa. [V.]

ZENO'NIS CHERSONESUS (Ζήνωνος Χερσόνησος, Ptol. iii. 6. § 4), a point of land on the N. coast of the Chersonesus Taurica in European Sarmatia, probably the narrow tongue of *Arabat*, between the *Sea of Azof* and the *Putrid Sea*. [T.H.D.]

ZE'PHYRE, a small island off the promontory Sammonium in Crete. (Plin. iv. 12. s. 20.)

ZEPHY'RIA. [Halicarnassus.]

ZEPHY'RIUM (Ζεφύριον), the name of a great number of promontories, as 1. At the western extremity of the peninsula of Myndus in Caria, now called *Gumichle* or *Angeli*. (Strab. xiv. p. 658.)

2. On the coast of Cilicia, between Cilicia Tracheia and Pedias, a little to the west of the town of Anchiale. (Strab. xiv. p. 671.) It contained a fort of the same name, and was 120 stadia from Tarsus, and 13 miles east of Soli. (*Stadiasm.* § 157; *Tab. Peut.*; comp. Scyl. p. 40; Ptol. v. 8. § 4; Liv. xxxiii. 20; Plin. v. 22; Hierocl. p. 704.) When Pliny (xxxiv. 50) states that the best molybdaena was prepared at Zephyrium, he no doubt alludes to this place, since we know from Dioscorides (v. 100) that this mineral was obtained in the neighbouring hill of Corycus, and that there it was of excellent quality. Leake (*Asia Minor*, p. 214) looks for it near the mouth of the river *Mertin*.

3. On the coast of Cilicia, near the mouth of the river Calycadnus. (Strab. xiv. p. 670; Ptol. v. 8. § 3.)

4. A town on the coast of Paphlagonia, 60 stadia to the west of Cape Carambis. (Arrian, *Peripl. P. E.* p. 15; Anon. *Peripl. P. E.* p. 6; Ptol. v. 4. § 2.)

5. A town and promontory on the coast of Pontus, in the country of the Mosynoeci, 90 stadia to the west of Tripolis. (Ptol. v. 6. § 11; Arrian, *Peripl. P. E.* p. 17; Scylax, p. 33; Anon. *Peripl. P. E.* p. 13; *Tab. Peut.*) The cape still bears the name of *Zafra* or *Zefreh*, and Hamilton (*Researches*, i. p. 261) regards the modern *Kaik Liman* as occupying the site of the ancient Zephyrium. [L. S.]

ZEPHYRIUM PROMONTORIUM (τὸ Ζεφύριον: *Capo di Bruzzano*), a promontory on the E. coast of the Bruttian peninsula, between Locri and the SE. corner of Bruttium. It is mentioned principally in connection with the settlement of the Locrian colonists in this part of Italy, whose city thence derived the name of Locri Epizephyrii. According to Strabo, indeed, these colonists settled in the first instance on the headland itself, which had a small port contiguous to it, but after a short time removed to the site of their permanent city, about 15 miles farther N. (Strab. vi. pp. 259, 270.) The Zephyrian Promontory is mentioned by all the geographers in describing the coast of Bruttium, and is undoubtedly the same now called the *Capo di Bruzzano*, a low but marked headland, about 10 miles N. of *Cape Spartivento*, which forms the SE. extremity of the Bruttian peninsula. (Strab. *l. c.*; Plin. iii. 5. s. 10; Mel. ii. 4. § 8; Ptol. iii. 1. § 10; Steph. Byz. *s. v.*) [E. H. B.]

ZEPHY'RIUM (Ζεφύριον ἄκρον, Ptol. iii. 17. § 5). 1. A promontory on the E. part of the N. coast of Crete, near the town of Apollonia. Now *Ponta di Tigani.*

2. A promontory on the W. coast of Cyprus, near Paphos, probably the cape which closes the bay of *Baffo* to the W. (Ptol. v. 14. § 1; Strab. xiv. p. 683.)

3. A promontory in the E. part of Cyrenaica, 150 stadia to the W. of Darnis. (Strab. xvii. p. 799, who attributes it to Marmarica; Ptol. iv. 4. § 5; *Stadias. M. Magni*, §§ 47, 48.) Now *Cape Derne.*

4. Another promontory of Cyrenaica, with a harbour. (Strab. xvii. p. 838.)

5. A promontory near Little Taposiris in Lower Aegypt, having a temple of Arsinoë-Aphrodite. (Strab. xvii. p. 800.) Hence that goddess derived the epithet of Zephuritis (Ζεφυρῖτις, Athen. vii. p. 318, d.; Callim. *Ep.* 31; Steph. B. *s. v.*).

6. A town of the Chersonesus Taurica, mentioned only by Pliny (iv. 12. s. 26). [T. H. D.]

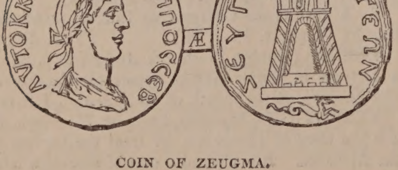
ZERNES (Ζέρνης, Procop. *de Aed.* iv. 6. p. 288), a fortress in Upper Moesia, apparently the present *Old Orsowa*, at the mouth of the *Tzerna*. [T.H.D.]

ZERYNTHUS (Ζήρυνθος, Lycophr. 77; Steph. B. *s. v.*), a town of Thrace not far from the borders of the Aenianes. It contained a cave of Hecate, a temple of Apollo, and another of Aphrodite, which two deities hence derived the epithet of Zerynthian. (Cf. Liv. xxxviii. 41; Ov. *Trist.* i. 10. 19; Tzetz. *ad Lycophr.* 449, 958.) [T. H. D.]

ZESUTERA (*It. Hier.* p. 602), a town in the SE. of Thrace, on the Egnatian Way, between Apri and Siracellae, which Lapie identifies with *Kahraman.* [J. R.]

ZEUGITANA REGIO, the more northern part of the Roman province of Africa. Pliny seems to be the earliest writer who mentions the name of Zeugitana (v. 4. s. 3). A town of Zeugis is mentioned by Aethicus (*Cosmogr.* p. 63), and a Zeugitanus, apparently a mountain, by Solinus (" a pede Zeugitano," c. 27), which is perhaps the same as the Mons Ziguensis of Victor (*de Persec. Vandal.* iii.), the present *Zow-wan;* and according to Shaw (*Travels*, i. p. 191, sq.), if the existence of a town or mountain so named is not altogether problematical, the province probably derived its name from either one or the other. The district was bounded on the S. by Byzacium, on the W. by Numidia, from which it was divided by the river Tusca (now *Zaine*), and on the N. and E. by the Mare Internum. After the time of Caesar it appears to have been called Provincia Vetus, or Africa Propria, as opposed to the later acquired Numidia. (Dion Cass. xliii. 10; Plin. *l. c.*; Mela, i. 7.) Strabo mentions it only as ἡ Καρχηδονία, or the province of Carthage (vi. p. 267, &c.). It embraced the modern *Frigeah* (which is doubtless a corruption of the ancient name of Africa) or northern part of the kingdom of *Tunis.* Zeugitana was watered by the Bagradas, and was a very fertile country. There were no towns of importance in the interior, but on the coast we find Siagul, Neapolis, Curubis, Aspis or Clupea, Carpis, Tunes, Carthago, Castra Cornelia, Utica, and Hippo Diarrhytus. For further particulars concerning this province see AFRICA. [T. H. D.]

ZEUGMA. 1. (Ζεῦγμα, Ptol. v. 15. § 14), a town founded by Seleucus Nicator, in the province of Cyrrhestica, in Syria. It derived its name from a bridge of boats which was here laid across the Euphrates, and which in the course of time became the sole passage over the river, when the older one at Thapsacus, 2000 stadia to the S., had become impracticable, or at all events very dangerous, owing to the spreading of the Arabian hordes. (Plin. v. 24. s. 21; Strab. xvi. p. 746; Steph. B. *s. v.*) Zeugma lay on the right bank of the Euphrates, opposite to Apamea, 72 miles SW. of Samosata, 175 miles NE. of the maritime Seleucia, and 36 miles N. of Hierapolis. (Plin. *l. c.*, and v. 12. s. 13; Strab. xvi. p. 749; *Tab. Peut.*) It was therefore opposite to the modern *Bir* or *Biredsjik*, which occupies the site of the ancient Apamea. (Cf. Ritter, *Erdkunde*, x. p. 944, seq.) In the time of Justinian, Zeugma had fallen into decay, but was restored by that emperor. Procop. *de Aed.* ii. 9, p. 237, ed. Bonn.) (Cf. Polyb. v. 43; Dion Cass. xl. 17, xlix. 19; Lucan, viii. 236; *Itin. Ant.* pp. 184, 185, &c.)



ΑΥΤΟΚ Μ ΙΟΥΛΙ ΦΙΛΙΠΠΟϹ ϹΕΒ
Æ
ΖΕΥΓΜΑΤΕΩΝ

COIN OF ZEUGMA.

2. A place in Dacia. (Ptol. iii. 8. § 10). Mannert (iv. p. 210) identifies it with the Pons Augusti of the Geogr. Rav. (iv. 14) and Tab. Peut.; concerning which see above, p. 656.) [T. H. D.]

ZICCHI (Ζικχοί, Arrian, *Perip. P. Eux.* p. 19), ZINCHI (Ζιγχοί, Ptol. v. 9. § 18), or ZINGI (Plin. vi. 7. s. 7), a savage piratical tribe of Asiatic Sarmatia, on the coast of the Pontus Euxinus, between Sanigae and Achaei They are called by Procopius Ζῆχοι and Ζῆκχοι (*B. Goth.* iv. 4, *B. Pers.* ii. 29), and by Strabo, Ζυγοί (i. p. 129, xi. pp. 492, 495), if, indeed, he means the same people, as he places them in the interior on the Caucasus. [T. H. D.]

ZIGAE, a people of Sarmatia, on the Tanais (Plin. vi. 7. s. 7). [T. H. D.]

ZIGERE, a place in Lower Moesia, in the neighbourhood of Axiopolis (Plin. iv. 11. s. 18). [T.H.D.]

ZIGUENSIS MONS. [ZEUGITANA.]

ZIKLAG, a town in the tribe of Simeon (*Jos.* xix. 5), which at first belonged to the Philistine city of Gath (1 *Sam.* xxvii. 5), but was annexed to the kingdom of Israel by David. (1 *Chron.* xii. 1.) It appears to be the same as that called Σέκελλα by Josephus (*Ant.* vi. 14) and Σέκελα by Stephanus B. It is now entirely destroyed. (Robinson, *Travels*, ii. p. 424.) [V.]

ZILIA (Mel. iii. 10; Ζιλεία or Λιξεία, Ptol. iv. 1. § 2), a river on the W. coast of Mauretania Tingitana, which fell into the sea near the town of the same name, N. of the Lixius. It is still called *Ar-Zila.* [T. H. D.]

ZILIA (Mel. iii. 10; Ζιλία, Ζιλεῖαι, and Ζειλία, Ptol. iv. 1. § 13, viii. 13. § 4; Ζῆλις and Ζέλης, Strab. xvii. p. 827, iii. p. 140), a town of some importance on the W. coast of Mauretania Tingitana, at the mouth of the like-named river, and on the road from Lix to Tingis, from which latter place it was 24 miles distant (*Itin. Ant.* p. 8, where, and in Plin. v. 1. s. 1, it is called Zilis). It was founded by the Carthaginians, and made a colony by the Romans, with the surname of Julia Constantia. (Plin. *l. c.*) According to Strabo (iii. p. 140), the Romans transplanted the inhabitants, as well as some of the citizens of Tingis, to Julia Joza in Spain. The place is still called *Azzila, Azila, Ar-Zila.* [T. H. D.]

ZIMARA (Ζίμαρα), a town in Armenia Minor, on the road from Satala to Melitena, between Anatiba and Teucira (*It. Ant.* p. 208; Ptol. v. 7. § 2; *Tab. Peut.*) The exact site is still matter of uncertainty, some finding traces of it near *Pashash*, others near *Divriki*, and others near *Kemakh.* (Ritter, *Erdkunde*, x. p. 800.) [L. S.]

ZINGIS PROMONTORIUM (Ζίγγις Ptol. i. 17. § 9, iv. 7. § 11), probably the Modern *Maroe*, was a headland on the eastern coast of Africa about lat. 10° N. It was conspicuous from its forked head and its elevation above a level shore of nearly 400 miles in extent. [W. B. D.]

ZIOBERIS, a small river of Parthia mentioned by Curtius (vi. 4. § 4). It is probably the same as the Stiboites (Στιβοίτης) of Diodorus (xvii. 75), which flowed under the earth in some places, and at length fell into the Rhidagus (Curt. vi. 4. § 6). [V.]

ZION. [SION.]

ZIPH. [SIPH.]

ZIPHA (Ζίφα, Ζύφα, or Ζίφαρ, Ptol. iv. 8. § 6), a mountain in the interior of Libya. [T. H. D.]

ZIPHE'NE (Ζιφήνη, Joseph. *Antiq.* vi. 13), a district of Palaestina, in the neighbourhood of Ma-

Carmel, which probably took its name from Ziph. (*Josh.* xv. 14.) Steph. Byz. notices it, quoting from Josephus. [Siph.] [V.]

ZIRIDAVA (Ζιρίδαυα, Ptol. iii. 8. § 8), a town in Dacia, most probably *Szereka* on the *Broosch* (cf. Katancsich, *Istri Accolae*, ii. p. 296). [T.H.D.]

ZIRINAE (*Tab. Peut.*; Ζειρινία, Steph. B. p. 287; Zernae, with various readings, in *It. Ant.* p. 322), a town in Thrace, on the Hebrus, between Trajanopolis and Plotinopolis. Reichard places it on the site of *Zernits*; but Lapie identifies it with *Termalitza.* [J. R.]

ZITHA, or ZEITHA (Ζείθα, Ptol. v. 18. § 6), a small place in Mesopotamia near the Euphrates, noticed by Ptolemy. It is in all probability the same as the Sitha of Zosimus (iii. 15). [V.]

ZITHA (Ζεῖθα, Ptol. iv. 3. § 12), a promontory in Africa Propria between the two Syrtes and W. of Sabathra. On it lay the place called Pons Zitha. [T. H. D.]

ZOARA (Ζοάρα, Steph. B. *s. v.*), a small town at the southern end of the Lacus Asphaltites in Judaea, to which Lot escaped from the burning of Sodom. (*Gen.* xiv. 2, 8, xix. 22.) Josephus, in describing the same lake, states that it extends *μέχρι Ζοάρων 'Αραϐίας* (iv. c. 27). During the latter times of the Roman Empire, there was a guard maintained in that part of the country, a corps of native mounted bowmen ("Equites sagittarii Indigenae Zoarae"), who were under the command of the Dux Palaestinae. (*Notit. Imper.*) [V.]

ZOELAE, a town of the Astures in Hispania Tarraconensis, not far from the sea, and noted for the cultivation of flax. (Plin. iii. 3. s. 4, xix. 1. s. 2; comp. Florez, *Esp. Sagr.* xvi. p. 17; *Inscr. in Spon. Misc.* p. 278. 3; Orelli, no. 156.) [T.H.D.]

ZOE′TIA. [Megalopolis, p. 309, b.]

ZOMBIS (Ζομϐίς, Steph. B. *s. v.*), a small place in Upper Media, noticed by Ammianus (xxiii. 6). [V.]

ZONE (Plin. iv. 11. s. 18; Mela, ii. 2. § 8; Ζώνη, Herodot. vii. 59; Scyl. p. 27; Steph. B. p. 291; Schol. *Nicand. Ther.* 462; Schol. *Apoll. Rhod.* i. 29), a town on the S. coast of Thrace, on a promontory of the same name, a short distance to the W. of the entrance of the Lacus Stentoris. According to Apollonius and Mela (*ll. cc.*) it was to this place that the woods followed Orpheus, when set in motion by his wondrous music. [J. R.]

ZORAMBUS (Ζωράμϐος), a small stream on the coast of Gedrosia, mentioned by Marcian (*Peripl.* c. 29, ed. Müller), called Zorambes by Ptolemy (vi. 8. § 9). [V.]

ZORLANAE (*Tab. Peut.*; in Geog. Rav. v. 12, Strolanae), a place in Thrace, on the road from Siracellae to Aenus. [J. R.]

ZOROANDA (Plin. vi. 27. s. 31), a place on the range of Mount Taurus, where the Tigris fell into a cavern, and reappeared on the other side of the mountain; perhaps the spot discovered by Rich, 11 leagues from *Julamerik*, where an eastern tributary of the Tigris suddenly falls into a chasm in the mountain. (Rich, *Koordistan*, i. p. 378; cf. Ritter, *Erdk.* x. p. 86, seq.; D'Anville, *l'Euphr. et le Tigre*, p. 74.) [J. R.]

ZOSTER. [Attica, p. 330, b.]

ZUCHABBARI (Ζουχάϐϐαρι, Ptol. iv. 3. § 20), a mountain at the S. borders of the Regio Syrtica. [T. H. D.]

ZUCHABBARI. [Succabar.]

ZUCHIS (Ζοῦχις, Strab. xvii. p. 835), a lake 400 stadia long, with a town of the same name upon it, in Libya, not far from the Lesser Syrtis. Stephanus B. (p. 290) mentions only the town, which, according to Strabo, was noted for its purple dyes and salt fish. It seems to be the place called Χουζίς by Ptolemy (iv. 3. § 41.) [T. H. D.]

ZUGAR (Ζούγαρ, Ptol. iv. 3. § 40), a town of Africa Propria, between the rivers Bagradas and Triton. [T. H. D.]

ZUMI (Ζοῦμοι), a German tribe occupying a district in the neighbourhood of the Lugii, are mentioned by Strabo (vii. p. 209), the only author that notices them, as having been subdued by Maroboduus. [L. S.]

ZUPHONES (Ζούφωνες, Diod. xx. 38), a Numidian tribe in the vicinity of Carthage. [T. H. D.]

ZURMENTUM (Ζούρμεντον, Ptol. iv. 3. § 37), a town of Byzacium, in Africa Propria, lying to the S. of Hadrumetum. [T. H. D.]

ZUROBARA (Ζουρόϐαρα, Ptol. iii. 8. § 9), a town of Dacia, situated where the *Marosch* falls into the *Theiss.* [T. H. D.]

ZUSIDAVA (Ζουσίδαυα, Ptol. iii. 8. § 8), a town of Dacia, probably on the site of the ruins called *Tschetatie de Pömunt*, below *Burlau* (cf. Ukert, iii. pt. ii. p. 621). [T. H. D.]

ZYDRE′TAE (Ζυδρῆται or Ζυδρεῖται, Arrian, *Peripl. Pont. Eux.* p. 11), a people of Colchis, on the coast of the Pontus Euxinus, on the S. side of the Phasis, and between the Machelones and the Lazi. [T. H. D.]

ZYGANTIS (Ζυγαντίς, Hecat. *Fr. ap. Steph. B.* p. 290), a town of Libya, whose inhabitants were noted for their preparation of honey. Hence Klausen (*ad Hecat.* p. 134) identifies them with the Gyzantes of Herodotus (iv. 194), on the W. side of the lake Tritonis, of whom that historian relates the same thing. [T. H. D.]

ZYGENSES (Ζυγεῖς, Ptol. iv. 5. § 22), a people on the coast of the Libyan Nomos in Marmarica. [T. H. D.]

ZYGI (Ζυγοί, Strab. xi. p. 496), a wild and savage people on the Pontus Euxinus in Asiatic Sarmatia, and on the heights stretching from the Caucasus to the Cimmerian Bosporus. They were partly nomad shepherds, partly brigands and pirates, for which latter vocation they had ships specially adapted (cf. Id. ii. 129, xi. 492, xvii. 839). Stephanus B. (p. 290) says that they also bore the name of Ζυγριανοί; and we find the form Zygii (Ζύγιοι) in Dionysius (*Perieg.* 687) and Avienus (*Descrip. Orb.* 871). [T. H. D.]

ZYGOPOLIS (Ζυγόπολις, Strab. xii. p. 548), a town in Pontus, in the neighbourhood of Colchis. Stephanus B. (p. 290) conjectures that it was in the territory of the Zygi, which, however, does not agree with Strabo's description. [T. H. D.]

ZYGRIS (Ζυγρίς, Ptol. iv. 5. § 4), a village on the coast of the Libyan Nomos in Marmarica, which seems to have given name to the people called Zygritae dwelling there (Ζυγρῖται, Ptol. *ib.* § 22.) [T. H. D.]

ZYGRITAE. [Zygris.]

ZYMETHUS (Ζύμηθος, Ptol. iv. 4. § 11), a town in the interior of Cyrenaica. [T. H. D.]
